1.0 EXECUTIVE SUMMARY

1.1 Project Overview and Findings

The MAPS 4 Parks Programming for Neighborhood and Community Parks Master Plan development provides recommendations to improve the existing neighborhood and community parks throughout Oklahoma City. Assessments of existing park amenities along with extensive feedback from stakeholders and the public helped to identify the park improvement priorities. Common improvements are new and updated playgrounds, splash pads, sports courts, sidewalks, site furnishings, lighting, and other miscellaneous amenities. Through the assessment and feedback process, a list of recommendations for each park and high-level cost estimates for each improvement was identified. Prioritization based on the five phases of construction identified in the MAPS 4 implementation plan was completed factoring in current condition, need, and geographic area.

The first phase of park improvements will be designed, bid, and constructed. Subsequent phases will be carried out on an annual basis until all five phases are complete.
