Case # PUD-2041

I have a few concerns about this new residential development. First the roads around this area are not in good enough condition to handle the new traffic SE 59th Street from Henny Road to Choctaw Road needs to be replaced. The same goes for Henny Road from SE 59th Street to SE 44th Street. Second, has anyone done a study to see if the aquifer that this area is on would be able to handle the added homes. Lastly, has a study been done to see how the new construction of the homes will help or hurt in water drainage from rainfall. I know this area is close to a flood plain.

Best Regards,
