It is, therefore, essential that you are aware of its terms, as well as those contained in the specifications.

Submit this electronically signed document, along with all accompanying documents:

THIS PRICING AGREEMENT/CONTRACT is made and entered into, by and between **FarrWest Environmental Supply, Inc.** hereinafter referred to as "Bidder" and The City of Oklahoma City, a municipal corporation, or a participating Public Trust of which The City of Oklahoma City is Beneficiary hereinafter referred to as the "Contracting Entity."

WITNESSETH:

WHEREAS, the governing body of the Contracting Entity has approved certain specifications and requested by notice that bids be submitted thereon; and

WHEREAS, this document until executed by the Mayor/Chairman of the Contracting Entity constitutes the Bidder's proposal; and

NOW, THEREFORE, that in consideration of the covenants, agreements and representations as hereinafter set forth, it is mutually agreed by the parties that:

1. The Bidder agrees to sell and deliver to the Contracting Entity, the items of material and/or services, specified in the pricing section of the electronic bid submittal, which is attached hereto and made a part of this Pricing Agreement/Contract. List the prompt payment discount, if any, for this agreement in the space provided below:

Discount for Prompt Payment **0% 30 Days**

2. The Bidder expressly warrants that all articles, material, and/or work covered in this Pricing Agreement/Contract will conform to the specifications and electronic bid documents attached to this bid and are hereby incorporated, as if set forth in full herein; and further warrants that the same shall be of good material and workmanship, and free from defects.

3. The Bidder understands that all bids are to be submitted in U.S. dollars at a firm price. Bids submitted in any currency other than U.S. dollars will be rejected.

4. The Bidder also understands that all invoices shall be submitted in U.S. dollars and agrees to accept payment in U.S. dollars as full satisfaction of the invoiced amount.

5. If any of the goods fail to meet the warranties contained in Paragraph 2, above, the Bidder, upon notice from the Contracting Entity, shall promptly correct or replace the same at the Bidder's expense. If the Bidder shall fail to so do, the Contracting Entity may cancel this order as to all such goods, and in addition, may cancel the then remaining balance of this order. After notice to the Bidder, all such goods will be held

at the Bidder's risk. The Contracting Entity may, at the Bidder's direction, make available such goods to be returned to the Bidder at the Bidder's risk, and all transportation charges, both to and from the original destination, shall be paid by the Bidder. Any payment for such goods shall be refunded by the Bidder unless the Bidder promptly corrects or replaces the same at the Bidder's expense.

6. The Contracting Entity agrees to pay to the Bidder the price and amount in accordance with Paragraph 1 above, based on the quantity actually purchased, upon delivery to and acceptance by the Contracting Entity, of the material and/or service[s] above described and upon the filing by the Bidder, and approval by the Contracting Entity, of a verified claim for the amount due.

7. The Bidder agrees, in connection with the performance of work under this Pricing Agreement/Contract:

a. That the Bidder will not discriminate against any employee or applicant for employment, because of race, creed, color, sex, age, national origin, ancestry or disability. The Bidder shall take affirmative action to ensure that employees are treated without regard to their race, creed, color, age, national origin, sex, ancestry or disability. Such actions shall include, but not be limited to, the following: employment, promotion, demotion or transfer, recruitment, advertising, lay-off, termination, rates of pay or other forms of compensation and selection for training, including apprenticeship. The Bidder agrees to post, in a conspicuous place available to employees and applicants for employment, notices to be provided by the City Clerk/Secretary of the Contracting Entity setting forth the provisions of this section, and;

b. That the Bidder agrees to include this non-discrimination clause in any subcontracts connected with the performance of this Pricing Agreement/Contract.

8. In the event of the Bidder's non-compliance with the above non-discrimination clause, this Pricing Agreement/Contract may be canceled or terminated by the Contracting Entity. The Bidder may be declared by the Contracting Entity ineligible for further Pricing Agreement[s]/Contract[s] with the Contracting Entity until satisfactory proof of intent to comply is made by the Bidder.

9. The risk of loss or damage shall be borne by the Bidder at all times until the acceptance of goods, properly packed, by the Contracting Entity.

10. This Pricing Agreement/Contract, specifications, electronic bid submittal documents and any attachments constitutes the entire understanding and agreement of the parties upon the subject matter hereof. There is no agreement, oral or otherwise, which is not contained in or attached to this Pricing Agreement/Contract. This Pricing Agreement/Contract may not be modified or assigned unless approved in writing and signed by both parties.

11. The parties assume and understand that the variables in the Bidder's cost of performance may fluctuate; consequently, the parties agree that any fluctuations in the Bidder's costs will not alter the Bidder's obligations under this Pricing Agreement/Contract nor excuse performance or delay on the Bidder's part.

12. This Pricing Agreement/Contract shall be inoperative during such period of time that the aforesaid delivery or acceptance may be rendered impossible by reason of fire, Act of God or government regulation. Provided, however, to the extent that the Bidder has any commercially reasonable alternative method of performing this Pricing Agreement/Contract by purchase on the market or otherwise, the Bidder shall not be freed of any obligations hereunder by this clause, even though the goods intended for this Pricing Agreement/Contract were destroyed or their delivery delayed because of an event described above.

13. The shipping or receiving of any goods under this Pricing Agreement/Contract shall not be deemed, or be, a waiver of any right to damages for any prior failure to ship or receive any goods.

14. This Pricing Agreement/Contract shall be governed by the laws of the State of Oklahoma.

15. The Bidder shall be responsible for complying with all applicable federal, state and local laws.

16. If submitting a bid for services, the Bidder certifies that they, and any proposed subcontractors, are in compliance with 25 O.S. §1313 and participate in the status Verification System. The Status Verification System is defined in 25 O.S. §1312 and includes but is not limited to the free Employment Verification Program (E-Verify) through the Department of Homeland Security and available at www.dhs.gov/E-Verify.

Supplier: Farrwest Environmental Supply, Inc.**INSTRUCTIONS FOR CERTIFICATION REGARDING DEBARMENT, SUSPENSION,
INELIGIBILITY AND VOLUNTARY EXCLUSION**

- i. By signing and submitting this proposal, the prospective primary participant is providing the certification set out below.
- ii. The inability of a person to provide the certification set out below will not necessarily result in denial of participation in this covered transaction. The prospective participant shall submit an explanation of why it cannot provide the certification set out below. The certification or explanation will be considered in connection with the Contracting Entity's determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such a person from participation in this transaction.
- iii. The certification in this clause is a material representation of fact upon which reliance was placed when the Contracting Entity determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the Contracting Entity may terminate this transaction for cause of default.
- iv. The prospective primary participant shall provide immediate written notice to the Contracting Entity if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
- v. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the Contracting Entity for assistance in obtaining a copy of those regulations.
- vi. The prospective primary participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the Contracting Entity.
- vii. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transaction," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
- viii. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the nonprocurement portion of the "Lists of Parties Excluded From Federal Procurement or Nonprocurement Programs" (Nonprocurement List) which is compiled by the General Services Administration.
- ix. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
- x. Except for transactions authorized under paragraph f of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the Contracting Entity may terminate this transaction for cause or default.

3. ToxiRAE Pro Single-Gas Monitors for VOCs, O₂, Toxic, CO₂ and Combustible Gases

The ToxiRAE Pro is the industry's first and largest family of wireless¹ personal single-gas instruments that reliably and accurately monitor a full range of common toxic industrial gases, volatile organic compounds, carbon dioxide and combustible gases.

ToxiRAE Pro is a unified wireless single-gas monitoring platform that customers standardize on to reduce costs and increase efficiencies pertaining to worker safety.

ToxiRAE Pro instruments boast intelligent interchangeable² sensors, continuous data logging functionality³, Man Down alarm and policy enforcement functionalities, the largest backlit display in their class, and an unmistakable five-way alarm notification system that immediately alerts both the user and a remote observer of a hazardous condition by activating the buzzer, vibration alarm, display, and LED lights on the instrument and by sending a remote alarm over the RAE Systems Dedicated Wireless Network⁴.

ToxiRAE Pro monitors require minimal user training due to their intuitive user interface that puts all critical readouts at the user's fingertips. ToxiRAE Pro monitors are designed for simple and efficient maintenance and calibration. Their plug-and-play sensor and battery can be replaced in the field while the new AutoRAE 2 Automated Test and Calibration Station makes bump testing and calibration as easy as a press of a button.

ToxiRAE Pro monitors are rugged, intrinsically safe instruments engineered by RAE Systems to last, safeguarding workers day after day, month after month, and year after year. The wireless ToxiRAE Pro monitors interface with both the Safety Suite software and the EchoView-Host-based Closed-Loop Wireless System.

The Safety Suite software allows incident commanders, plant managers and first responders to set up a rapidly deployable, secure wireless threat detection system that facilitates faster, data-driven decision-making that helps responders save lives and assets. RAE Systems' EchoView Host-based Closed-Loop Wireless System provides safety-enhancing wireless monitoring in applications such as fireground and hazmat response, confined space entry, multi-gas leak detection, environmental remediation and refinery turnarounds.

¹ Wireless functionality is an optional feature. Instruments can be ordered with or without an integrated wireless modem. Instruments ordered as non-wireless cannot be upgraded to wireless at a later time.

² RAE Systems recommends calibrating sensors on installation.

³ Available on all ToxiRAE Pro instruments except Safety Configurations of ToxiRAE Pro PID.

⁴ Additional equipment and / or software licenses may be required to enable remote wireless monitoring and alarm transmission.

8.2 Sensor Conditioning

SensorRAE 4R+

The SensorRAE 4R+ is a six-socket electrochemical (EC) sensor conditioning station that not only expands the assortment of 4R+ sensors available to the users of RAE Systems gas detection instruments (such as the ToxiRAE Pro and MultiRAE family) in the field, but also keeps such sensors on bias and ready for installation, calibration, and use without requiring the extra warm-up time. The SensorRAE 4R+ is also a convenient way to protect, carry, and store spare sensors.

Supports the following RAE Systems Products:

- MultiRAE Lite
- MultiRAE
- MultiRAE Pro
- ToxiRAE Pro
- AreaRAE Pro
- AreaRAE Plus

9. HONEYWELL BW™ RIGRAT (Transportable Multi-gas Area Monitor)

Honeywell BW™ RigRat is so easy to use that workers can operate it with confidence, trusting it to alert them to gas threats in their proximity — indoors and out, in temperatures from -40 to +140°F (-40 to +60°C). Honeywell BW™ RigRat delivers:

- **Up to 8 weeks of runtime on a single charge.** Longer runtime than any area monitor in its class
- **Up to six slots for interchangeable gas sensors.** Choice of electrochemical, PID, infrared, and catalytic bead sensors (measuring % LEL and percent by volume).
- **Integrated Noise sensor and Meteorological data sensors.**
- **Enhanced configurations with programmable input and output.**
- **Approval for explosive atmosphere.** Certified for ATEX/IECEx Zone 0 and CSA C1D1.
- **Flexible applications.** Zone declassification, turnarounds, confined space, routine maintenance, fence line and more. Available with pump for remote sampling.
- **One-button operation.** Grab and go. No expertise required
- **Simple setup with a smartphone.** Easy mobile app for alarm set points, calibration records and more.
- **Added protection.** Alerts workers to nearby gas leaks, whereas personal detectors cover only the breathing zone.

12.1 Honeywell Central Hub

Enterprise gas detection for real-time safety intelligence

The Central Hub utilizes Long Range Low Power (LoRa) radio that collects the gas sensor data from Honeywell gas detectors and reports it in real-time to the Honeywell Safety Suite software solution. The Hub supports three uplink connection methods: Ethernet, Wi-Fi and Cellular

- Supports GPS positioning and regularly report device location information
- Supports multi-channel LoRa enabled gas detectors
- Multiple indicators show the working status of the equipment
- Aids wall-mounted, desktop, and car installation

4. Standard Limited Warranty

RAE Systems by Honeywell warrants products manufactured and sold by RAE Systems to be free from defects in materials and workmanship for the periods listed in the tables on the following pages. This warranty is expressly limited to the original owner who purchases the equipment directly from RAE Systems or from an authorized RAE Systems Distributor.

To maintain this limited warranty, the product must be operated, calibrated, and maintained in accordance with the Operation and Maintenance Manual supplied with the product. Abuse, mechanical damage, alteration, or repairs not made in accordance with the Operation and Maintenance Manual void the RAE Systems Standard Limited Warranty. The obligation of RAE Systems under this limited warranty is limited to the repair or replacement of components deemed by the RAE Systems Technical Support Center to have been defective under the scope of this Standard Limited Warranty.

To receive consideration for warranty repair or replacement, the product must be returned to a RAE Authorized Service Partner or to RAE Systems in San Jose, California, USA, with transportation and shipping charges prepaid. If the product is being returned to RAE Systems, it is necessary to obtain a return authorization number (RMA) from RAE Systems prior to shipment. This limited warranty is expressly in lieu of any and all representations, express or implied, including but not limited to the warranty of fitness for a particular purpose.

RAE Systems will not be liable for loss or damage of any kind connected to the use of its products or failure of its products to function or operate properly.

Oxygen (O₂), combustible gas (LEL) and electrochemical sensors are normally consumed during their service life. RAE Systems and RAE Authorized Service Partners will replace defective sensors under the following terms:

- Sensors with two-year warranties (O₂, LEL, H₂S, CO) that fail in their first year of service will be replaced with a sensor having a remaining warranty at least equal to that of the replaced sensor, up to a maximum of two years, at the option of RAE Systems or a RAE Authorized Service Partner.
- Sensors with two-year warranties (O₂, LEL, H₂S, CO) that fail in their second year of service will be replaced with a sensor having a remaining warranty at least equal to that of the replaced sensor, up to a maximum of one year, at the option of RAE Systems or a RAE Authorized Service Partner.
- Sensors with one-year warranties (all other electro-chemical sensors) that fail will be replaced with a sensor having a remaining warranty at least equal to that of the replaced sensor, up to a maximum of one year, at the option of RAE Systems or a RAE Authorized Service Partner.

Damage to combustible (LEL) sensors incurred by exposure to known sensor poisons (such as silicones, tetra-ethyl-lead, and/or other substances as noted in the operator's manual) may (at the unilateral discretion of the RAE Systems Customer Advocacy Department) void this warranty as it applies to the replacement of combustible sensors.

15. RAE Systems by Honeywell Terms and Conditions

The terms and conditions of sale and the RAE Order Placement Procedures contained herein apply to all quotations and purchases made and purchase orders received by RAE Systems Inc. ("RAE Systems") and are the exclusive binding agreement between the parties regarding the products or services purchased ("Products"), unless otherwise expressly agreed in writing by RAE Systems and buyer ("Buyer"). THE ACCEPTANCE OF ANY OR ALL OF THE BUYER'S PURCHASE ORDERS IS CONDITIONAL UPON BUYER'S ASSENT TO THE TERMS AND CONDITIONS IN THIS DOCUMENT, IN LIEU OF THE TERMS CONTAINED IN BUYER'S PURCHASE ORDER. RAE Systems hereby rejects all provisions contained in communications from Buyer that conflict with or are inconsistent with the terms contained herein. RAE Systems' failure to object to any of the provisions contained in Buyer's documentation shall not be deemed a waiver of these provisions.

1. Quotation and Prices: All quotations are subject to the terms and conditions stated herein as well as any additional Terms and Conditions that may appear on RAE Systems' quotation. In the case of a conflict between the terms and conditions stated herein and those appearing on RAE Systems' quotation, the latter shall control. RAE Systems prices and quotations are subject to the following:

- a) Buyer will be billed at the prices in the list price or specifically quoted to Buyer at the time of RAE Systems' purchase order acceptance.
- b) All published prices are subject to change without notice.
- c) Unless otherwise specified in writing, all quotations are firm for, and will expire, thirty (30) days after date thereof. Budgetary quotations and estimates are for preliminary information only and shall neither constitute firm offers nor impose any responsibility or liability upon RAE Systems.
- d) Unless otherwise stated in writing by RAE Systems, all prices quoted and billed shall be exclusive of transportation fees, insurance, taxes (including without limitation any use tax, sales tax or similar tax), license fees, customs fees, duties and other charges related thereto, and Buyer shall report and pay any and all such shipping charges, premiums, taxes, fees, duties and other charges related thereto, and shall hold RAE Systems harmless therefrom.
- e) The sale of any of RAE Systems' Products to Buyer in no way conveys to Buyer, either expressly or by implication, any intellectual property license or rights whatsoever, except any limited license rights as may be expressly granted by RAE Systems in the materials which accompany the Products as delivered.

2. Payment: Unless otherwise agreed to in writing, payment shall be paid Net 30 days from the date of invoice. Should custom work be involved, purchase orders shall be accompanied by a non-refundable 50% payment of the total amount with an additional 30% of such total amount due upon the scheduled shipment date, and the final 20% of such total amount is due 30 days after RAE Systems makes shipment. International orders must be accompanied by an irrevocable letter of credit confirmed through a U.S. bank acceptable to RAE Systems and to be drawn at sight when presented with proper documents consisting of (1) signed commercial invoice in triplicate and (2) clean airway bill for the Product. Alternately, wire transfer of funds must be received before shipment (International). Past due balances shall be subject to a finance charge of the lesser of 1.5% per month or the maximum amount allowed by law.

Buyer agrees to accept partial shipments in satisfaction of a single purchase order; when partial shipments are made, pro-rata payments shall become due in accordance with the designated terms for each shipment. RAE Systems may withdraw credit, suspend or cancel performance under any purchase orders or delay delivery of Products in the event Buyer fails to comply with these payment terms.

If Buyer becomes insolvent or bankruptcy proceedings are instituted against Buyer or Buyer makes an assignment for the benefit of its creditors, any such event shall be deemed a material default, entitling RAE Systems to cease performance under a purchase order and to avail itself of all legal or equitable remedies it may have against Buyer. In the event of a default by Buyer under these terms, and the matter is placed in the hands of an attorney for collection, or suit is brought at law, or in equity, to enforce the provisions herein, the Buyer agrees to pay a reasonable attorney's fee together with costs in addition to the amount due under said purchase order.

3. Title and Delivery: Unless otherwise agreed to in writing by RAE Systems, shipment shall be F.O.B. RAE Systems' location and the manner of shipment shall be any commercially reasonable option determined at RAE Systems' option. Buyer shall be responsible for all shipping charges. RAE Systems reserves the right to ship Products freight collect and to select the means of transportation and routing. Unless otherwise advised, RAE Systems will insure to full value of the Product or declare full value to the transportation company at the time of delivery and all such freight; provided that such insurance costs shall be for Buyer's account. Any and all taxes levied on or with respect to Products after delivery to the F.O.B. point, including without limitation taxes levied on or assessed to RAE Systems by reason of its retention of title, shall be paid by Buyer. In the event RAE Systems, in its sole discretion, chooses to pay such taxes, then Buyer shall reimburse RAE Systems in full upon demand. All Products must be inspected by Buyer upon receipt and claims should be filed with the transportation company when there is evidence of damage, either concealed or external.

Shipping dates are approximate and are based upon prompt receipt of all necessary information from Buyer. RAE Systems shall not be liable for delay in delivery or non delivery due to causes beyond RAE Systems' reasonable control, including but not limited to acts of God, acts of Buyer, acts of civil or military authority, war, riots, priorities, fires, strikes, lockouts, delays in transportation and inability due to causes beyond RAE Systems' reasonable control to obtain necessary labor, materials, manufacturing facilities, or compliance with any law, regulation or order, whether such circumstances or causes have been remedied. RAE Systems reserves the right, in its sole discretion, to allocate inventories and current production and substitute suitable materials when, in its opinion, such allocation or substitution is necessary due to any such circumstances or causes. No penalty clause of any kind shall be effective.

15. RAE Systems by Honeywell Terms and Conditions (continued)

4. Testing Procedures: RAE Systems will conduct industry standard testing procedures to confirm RAE Systems' compliance with Buyer's purchase order. Such testing procedures include verification of model number and serialized inventory, power-up test confirmation, instrumentation calibration and diagnostics verification. Any requested changes to these testing procedures require a separate price quotation.

5. Termination: All purchase orders are firm and non-cancellable by Buyer. Buyer is responsible for the full price of Products as ordered. Termination by mutual agreement is subject to the following conditions: (a) Buyer will pay for all Products which are completely manufactured and allocable to Buyer at the time of RAE Systems receipt of notice of termination; and (b) Buyer will pay all costs which have been incurred by RAE Systems with regard to products which have not been completely manufactured at the time of RAE Systems receipt of notice of termination, plus a pro rata portion of normal profit on the purchase order using RAE Systems' standard accounting practices. To reduce termination charges, RAE Systems shall divert completed parts, material or work-in-process from terminated purchase orders to the Buyer whenever in RAE Systems' sole discretion, it is practical to do so.

6. Limited Warranty: RAE Systems' Product warranty is incorporated as part of the Product Operating and Service manual supplied with each individual Product shipment. Such warranty does not extend to any damage or failure which results from alteration, accident, theft, misuse, abuse, abnormal use, improper or unauthorized repairs or improper maintenance. RAE Systems neither assumes nor authorizes any other firm or person to assume on RAE Systems behalf any liability in any way connected with the sale of RAE Systems Products. The sole and exclusive remedy in the event of any breach of the foregoing warranty is to return Products to RAE Systems with delivery or postage prepaid for a refund pursuant to the terms of the applicable Product warranty.

THIS LIMITED WARRANTY SHALL EXTEND TO ORIGINAL BUYER ONLY AND NOT TO BUYER'S CUSTOMERS OR BUYER'S FOREIGN LOCATIONS AND, EXCEPT FOR THE WARRANTY OF TITLE, IT IS IN LIEU OF ANY AND ALL OTHER WARRANTIES, WHETHER EXPRESSED OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE AND MERCHANTABILITY.

7. Limitation of Liability: IN NO EVENT SHALL RAE SYSTEMS BE LIABLE FOR ANY CONSEQUENTIAL, INCIDENTAL, INDIRECT, EXEMPLARY, PUNITIVE, SPECIAL OR OTHER DAMAGES WHATSOEVER RESULTING FROM RAE SYSTEMS' PERFORMANCE OR FAILURE TO PERFORM UNDER THESE TERMS OR THE FURNISHING, PERFORMANCE OR USE OF ANY GOODS SOLD PURSUANT HERETO, WHETHER DUE TO BREACH OF CONTRACT, BREACH OF WARRANTY, STRICT LIABILITY, PRODUCT LIABILITY, THE NEGLIGENCE OF RAE SYSTEMS OR OTHERWISE. IN NO EVENT SHALL RAE SYSTEMS' LIABILITY EXCEED THE U.S. DOLLAR AMOUNT EQUAL TO THE AMOUNT PAID BY BUYER FOR THE COST OF THE PRODUCTS PAID BY BUYER UNDER THE APPLICABLE INVOICE. THE DAMAGE LIMITATIONS PROVIDED IN THIS AGREEMENT AND THE REMEDIES STATED HEREIN SHALL BE EXCLUSIVE AND SHALL BE BUYER'S SOLE REMEDY. THIS LIMITATION ON LIABILITY SHALL SURVIVE FAILURE OF ANY ESSENTIAL PURPOSE. Certain jurisdictions do not permit the limitation of certain types of liability, so this limitation may not apply to the Buyer.

8. Governing Law and Disputes: The terms and conditions of sale stated herein shall be governed by and construed according to the laws of the State of California without regard to its conflict of law provisions. All disputes under any purchase order concerning Products not otherwise resolved between RAE Systems and Buyer shall be resolved in a court of competent jurisdiction at the location of RAE Systems' place of business fulfilling the purchase order, and in no other location. In RAE Systems' sole discretion, such action may be heard in some other place designated by RAE Systems (if necessary to acquire jurisdiction over third persons), so that the dispute can be resolved in an action. Buyer agrees to appear in any such action and consent to the jurisdiction of such court upon written notice. No action, regardless of form, arising out of, or in any way connected with, the Products furnished or services rendered by RAE Systems, may be brought by Buyer more than one (1) year after the cause of action has accrued.

9. Indemnification: In the event of a claim by a third party of infringement of proprietary rights, trademarks, or patents, resulting from compliance with Buyer's designs, specifications, or instructions Buyer will defend, indemnify and hold RAE Systems harmless against any expense or loss ensuing from such a claim.

Except as otherwise provided above, RAE Systems shall defend any suit or proceeding brought against Buyer to the extent the same is based upon a claim that any Product, or any part thereof, delivered to Buyer under a purchase order constitutes an infringement of any United States patent; provided that, RAE Systems is notified promptly in writing and given authority, information and assistance (at RAE Systems' expense) for the defense of same. In case said Product, or any part thereof, is in such suit held to constitute infringement and the use of said Product or part is enjoined, RAE Systems shall, at its sole and exclusive option and expense, either (i) procure for Buyer the right to continue using said Product or part, (ii) replace said Product with a comparable non-infringing product, (iii) modify said Product so it becomes non-infringing; or (iv) remove said Product and refund to Buyer the actual cost of said Product paid to RAE Systems by Buyer, less a reasonable amount for depreciation. The foregoing states the entire liability of RAE Systems for any patent infringement by the said Product or any part thereof. Notwithstanding the foregoing, in no event shall RAE Systems be obligated to indemnify Buyer pursuant to this Section 10 if a claim, suit or proceeding arises out of or is related to: (a) RAE Systems' compliance with Buyer's designs, specifications or instructions; (b) modifications made to the Products other than by RAE Systems; or (c) Buyer's combination or use of the Product with software, services or products developed by Buyer or a third party.

10. Compliance with Laws: RAE Systems represents that with respect to the production of the Products or the performance of the services covered by this purchase order, RAE Systems will fully comply with all applicable federal, state and local laws including, without limitation, all requirements of the Fair Labor Standards Act of 1938, as amended. RAE Systems is an Equal Opportunity Employer. It does not discriminate in any phase of the employment process against any person because of race, color, creed, religion, national origin, sex, age, veteran or handicapped status. The Equal Opportunity Certificate, which is mailed annually to all vendors, is hereby incorporated into these terms and conditions by reference.

15. RAE Systems by Honeywell Terms and Conditions (continued)

11. Assignment: Buyer shall not assign this purchase order or any interest therein or any rights hereunder without the prior written consent of RAE Systems.

12. Changes: Upon written acceptance of RAE Systems, Buyer may make changes within the scope of this purchase order in specifications, drawings, or type of Products ordered or in the time or place of delivery or order quantity. Engineering charges for any specification changes will be quoted under a separate purchase order. Reduction in purchase order quantities and/or extension or delay of scheduled shipment dates will be subject to price adjustment as determined by RAE Systems and agreed to by the Buyer. RAE Systems reserves the right to reject any changes and thus the original purchase order quantities, shipment dates, and prices shall remain in effect.

13. Export Controls: Buyer acknowledges that all shipments by RAE Systems are or may be subject to restrictions and limitations imposed by United States export controls, trade regulations and trade sanctions. Buyer at all times will comply with such sanctions, controls and regulations and will cause compliance with such sanctions, controls and regulations in its use and disposition of the Products. With respect to each Products shipment pursuant to these terms and conditions, Buyer will obtain and supply to RAE Systems in writing all information required by RAE Systems to obtain any U.S. export license, permit, approval or documentation applicable to such shipment. Notwithstanding any contrary provision in these terms and conditions, RAE Systems will have no obligation to make any shipment to Buyer until it has received all such information and has obtained the applicable licenses, permits, approvals or documentation for shipment, if any. If RAE Systems learns, or has reasonable cause to believe, or if any branch or agency of the government of the United States claims, that a violation of any applicable trade sanctions, export controls or trade regulations has occurred or is likely to occur because of any shipment, RAE Systems may, in addition to any other remedy it may have, suspend all shipments to Buyer until: (a) RAE Systems is satisfied that such violation did not occur or has ceased to occur, or (b) such claim is withdrawn or otherwise resolved in favor of RAE Systems. Neither Buyer nor its employees, agents, subcontractors, officers or representatives shall cause or permit any shipment of the Products to be made by Buyer or by anyone acting on behalf of Buyer or to whom Buyer may sell the Products, to any country for which a validated export license is required by the United States, or to which shipment is prohibited under trade regulations or trade sanctions of the United States. It shall be the duty of Buyer to inform itself in detail of such export controls, trade regulations and trade sanctions. Buyer will not cause or permit any customer or user in other parts of the world until all necessary import and/or export approvals and clearances have been obtained, and until all United States export controls, trade regulations or trade sanctions applicable to such shipments have been fully complied with. Buyer will indemnify and will hold RAE Systems harmless from and against any claim, loss or liability arising out of any breach of the foregoing covenants contained in this Section 14.

14. Notices: Any notice or report required or permitted by these terms and conditions shall be in writing and shall be deemed given if delivered personally or if sent by either party to the other by confirmed overnight delivery or by certified or registered mail, return receipt requested, postage prepaid, addressed to the other party to its address as set forth on the purchase order or at such other address as such party shall designate by notice hereunder. Where Buyer is giving notice to RAE Systems, all notices shall be sent to the attention of RAE Systems' account representative or customer service representative.

15. Government Contracts: Unless otherwise stated by reference on the face hereof, all purchase orders are considered commercial sales regardless of government contract or subcontract references. RAE Systems pricing and production and shipment commitments shall be based on published price lists and RAE Systems internal accounting and production allocation procedures which shall be applied equitably to all customers as determined by RAE Systems.

16. Service Warranty: RAE Systems warrants all repair work performed on Products theretofore purchased by Buyer from RAE Systems for a period of ninety (90) days after completion of the repairs and shipment to Buyer (the "Warranty Period"). In the event that a Product shall fail within the Warranty Period, Buyer's sole and exclusive remedy shall be to return said Product to RAE Systems during the Warranty Period, transportation prepaid, for re-repair. In this event, this warranty will not be deemed to have failed of its essential purpose. Transportation from Buyer to RAE Systems shall be via a carrier selected by Buyer with all charges borne by Buyer. The aforementioned provisions will not extend the original warranty period for any Product that has been repaired by RAE Systems.

2. AreaRAE (PGM-65XXX)

AreaRAE Plus / Pro is a wireless, transportable area monitor that can simultaneously detect toxic and combustible gases, volatile organic chemicals, and meteorological factors that affect the speed and direction of the gas.

AreaRAE Plus:

Whether you need to protect your community by monitoring a fence line, protect your employees during a maintenance turnaround, or protect your fire and hazmat team during emergency response, the AreaRAE Plus alerts you to threats with local audible and visual alarms. Plus, it works with Honeywell's remote monitoring software to give you a real-time view of threat readings from a safe location.

AreaRAE Pro:

Whether you're carrying it into a hazmat response, setting up perimeter at a fire or protecting a public venue, the AreaRAE Pro works with Honeywell's remote monitoring software to give you a real-time view of threat readings — so you can ensure the safety of your teams and the general public.

AreaRAE Plus / Pro delivers flexibility for your changing requirements:

- Multiple 4R+ sensors for toxic and combustible gas.
- 7R+ photoionization detector. Monitor VOCs at parts per million or parts per Billion, with built-in compensation for temperature and humidity.
- Optional meteorological sensor for tracking toxic plumes. Use the RAEMet, a 5-inch-tall sensor on top of the AreaRAE Plus / Pro, to measure wind speed, direction and other factors; then model the data with Honeywell's real-time monitoring software, which integrates the ALOHA hazard monitoring program.
- Optional gamma sensor for radiation detection (AreaRAE Pro Only). Choose this sensor for high sensitivity and fast response — with no need to trade off on your other sensors. The gamma sensor has its own dedicated slot.

12. RAE Systems by Honeywell Terms and Conditions

The terms and conditions of sale and the RAE Order Placement Procedures contained herein apply to all quotations and purchases made and purchase orders received by RAE Systems Inc. ("RAE Systems") and are the exclusive binding agreement between the parties regarding the products or services purchased ("Products"), unless otherwise expressly agreed in writing by RAE Systems and buyer ("Buyer"). THE ACCEPTANCE OF ANY OR ALL OF THE BUYER'S PURCHASE ORDERS IS CONDITIONAL UPON BUYER'S ASSENT TO THE TERMS AND CONDITIONS IN THIS DOCUMENT, IN LIEU OF THE TERMS CONTAINED IN BUYER'S PURCHASE ORDER. RAE Systems hereby rejects all provisions contained in communications from Buyer that conflict with or are inconsistent with the terms contained herein. RAE Systems' failure to object to any of the provisions contained in Buyer's documentation shall not be deemed a waiver of these provisions.

1. Quotation and Prices: All quotations are subject to the terms and conditions stated herein as well as any additional Terms and Conditions that may appear on RAE Systems' quotation. In the case of a conflict between the terms and conditions stated herein and those appearing on RAE Systems' quotation, the latter shall control. RAE Systems prices and quotations are subject to the following:

- a) Buyer will be billed at the prices in the list price or specifically quoted to Buyer at the time of RAE Systems' purchase order acceptance.
- b) All published prices are subject to change without notice.
- c) Unless otherwise specified in writing, all quotations are firm for, and will expire, thirty (30) days after date thereof. Budgetary quotations and estimates are for preliminary information only and shall neither constitute firm offers nor impose any responsibility or liability upon RAE Systems.
- d) Unless otherwise stated in writing by RAE Systems, all prices quoted and billed shall be exclusive of transportation fees, insurance, taxes (including without limitation any use tax, sales tax or similar tax), license fees, customs fees, duties and other charges related thereto, and Buyer shall report and pay any and all such shipping charges, premiums, taxes, fees, duties and other charges related thereto, and shall hold RAE Systems harmless therefrom.
- e) The sale of any of RAE Systems' Products to Buyer in no way conveys to Buyer, either expressly or by implication, any intellectual property license or rights whatsoever, except any limited license rights as may be expressly granted by RAE Systems in the materials which accompany the Products as delivered.

2. Payment: Unless otherwise agreed to in writing, payment shall be paid Net 30 days from the date of invoice. Should custom work be involved, purchase orders shall be accompanied by a non-refundable 50% payment of the total amount with an additional 30% of such total amount due upon the scheduled shipment date, and the final 20% of such total amount is due 30 days after RAE Systems makes shipment. International orders must be accompanied by an irrevocable letter of credit confirmed through a U.S. bank acceptable to RAE Systems and to be drawn at sight when presented with proper documents consisting of (1) signed commercial invoice in triplicate and (2) clean airway bill for the Product. Alternately, wire transfer of funds must be received before shipment (International). Past due balances shall be subject to a finance charge of the lesser of 1.5% per month or the maximum amount allowed by law.

Buyer agrees to accept partial shipments in satisfaction of a single purchase order; when partial shipments are made, pro-rata payments shall become due in accordance with the designated terms for each shipment. RAE Systems may withdraw credit, suspend or cancel performance under any purchase orders or delay delivery of Products in the event Buyer fails to comply with these payment terms.

If Buyer becomes insolvent or bankruptcy proceedings are instituted against Buyer or Buyer makes an assignment for the benefit of its creditors, any such event shall be deemed a material default, entitling RAE Systems to cease performance under a purchase order and to avail itself of all legal or equitable remedies it may have against Buyer. In the event of a default by Buyer under these terms, and the matter is placed in the hands of an attorney for collection, or suit is brought at law, or in equity, to enforce the provisions herein, the Buyer agrees to pay a reasonable attorney's fee together with costs in addition to the amount due under said purchase order.

3. Title and Delivery: Unless otherwise agreed to in writing by RAE Systems, shipment shall be F.O.B. RAE Systems' location and the manner of shipment shall be any commercially reasonable option determined at RAE Systems' option. Buyer shall be responsible for all shipping charges. RAE Systems reserves the right to ship Products freight collect and to select the means of transportation and routing. Unless otherwise advised, RAE Systems will insure to full value of the Product or declare full value to the transportation company at the time of delivery and all such freight; provided that such insurance costs shall be for Buyer's account. Any and all taxes levied on or with respect to Products after delivery to the F.O.B. point, including without limitation taxes levied on or assessed to RAE Systems by reason of its retention of title, shall be paid by Buyer. In the event RAE Systems, in its sole discretion, chooses to pay such taxes, then Buyer shall reimburse RAE Systems in full upon demand. All Products must be inspected by Buyer upon receipt and claims should be filed with the transportation company when there is evidence of damage, either concealed or external.

Shipping dates are approximate and are based upon prompt receipt of all necessary information from Buyer. RAE Systems shall not be liable for delay in delivery or non delivery due to causes beyond RAE Systems' reasonable control, including but not limited to acts of God, acts of Buyer, acts of civil or military authority, war, riots, priorities, fires, strikes, lockouts, delays in transportation and inability due to causes beyond RAE Systems' reasonable control to obtain necessary labor, materials, manufacturing facilities, or compliance with any law, regulation or order, whether such circumstances or causes have been remedied. RAE Systems reserves the right, in its sole discretion, to allocate inventories and current production and substitute suitable materials when, in its opinion, such allocation or substitution is necessary due to any such circumstances or causes. RAE Systems by Honeywell Terms and Conditions (continued)

4. Testing Procedures: RAE Systems will conduct industry standard testing procedures to confirm RAE Systems' compliance with Buyer's purchase order. Such testing procedures include verification of model number and serialized inventory, power-up test confirmation, instrumentation calibration and diagnostics verification. Any requested changes to these testing procedures require a separate price quotation.

5. Termination: All purchase orders are firm and non-cancellable by Buyer. Buyer is responsible for the full price of Products as ordered. Termination by mutual agreement is subject to the following conditions: (a) Buyer will pay for all Products which are completely manufactured and allocable to Buyer at the time of RAE Systems receipt of notice of termination; and (b) Buyer will pay all costs which have been incurred by RAE Systems with regard to products which have not been completely manufactured at the time of RAE Systems receipt of notice of termination, plus a pro rata portion of normal profit on the purchase order using RAE Systems' standard accounting practices. To reduce termination charges, RAE Systems shall divert completed parts, material or work-in-process from terminated purchase orders to the Buyer whenever in RAE Systems' sole discretion, it is practical to do so.

6. Limited Warranty: RAE Systems' Product warranty is incorporated as part of the Product Operating and Service manual supplied with each individual Product shipment. Such warranty does not extend to any damage or failure which results from alteration, accident, theft, misuse, abuse, abnormal use, improper or unauthorized repairs or improper maintenance. RAE Systems neither assumes nor authorizes any other firm or person to assume on RAE Systems behalf any liability in any way connected with the sale of RAE Systems Products. The sole and exclusive remedy in the event of any breach of the foregoing warranty is to return Products to RAE Systems with delivery or postage prepaid for a refund pursuant to the terms of the applicable Product warranty.

THIS LIMITED WARRANTY SHALL EXTEND TO ORIGINAL BUYER ONLY AND NOT TO BUYER'S CUSTOMERS OR BUYER'S FOREIGN LOCATIONS AND, EXCEPT FOR THE WARRANTY OF TITLE, IT IS IN LIEU OF ANY AND ALL OTHER WARRANTIES, WHETHER EXPRESSED OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE AND MERCHANTABILITY.

7. Limitation of Liability: IN NO EVENT SHALL RAE SYSTEMS BE LIABLE FOR ANY CONSEQUENTIAL, INCIDENTAL, INDIRECT, EXEMPLARY, PUNITIVE, SPECIAL OR OTHER DAMAGES WHATSOEVER RESULTING FROM RAE SYSTEMS' PERFORMANCE OR FAILURE TO PERFORM UNDER THESE TERMS OR THE FURNISHING, PERFORMANCE OR USE OF ANY GOODS SOLD PURSUANT HERETO, WHETHER DUE TO BREACH OF CONTRACT, BREACH OF WARRANTY, STRICT LIABILITY, PRODUCT LIABILITY, THE NEGLIGENCE OF RAE SYSTEMS OR OTHERWISE. IN NO EVENT SHALL RAE SYSTEMS' LIABILITY EXCEED THE U.S. DOLLAR AMOUNT EQUAL TO THE AMOUNT PAID BY BUYER FOR THE COST OF THE PRODUCTS PAID BY BUYER UNDER THE APPLICABLE INVOICE. THE DAMAGE LIMITATIONS PROVIDED IN THIS AGREEMENT AND THE REMEDIES STATED HEREIN SHALL BE EXCLUSIVE AND SHALL BE BUYER'S SOLE REMEDY. THIS LIMITATION ON LIABILITY SHALL SURVIVE FAILURE OF ANY ESSENTIAL PURPOSE. Certain jurisdictions do not permit the limitation of certain types of liability, so this limitation may not apply to the Buyer.

8. Governing Law and Disputes: The terms and conditions of sale stated herein shall be governed by and construed according to the laws of the State of California without regard to its conflict of law provisions. All disputes under any purchase order concerning Products not otherwise resolved between RAE Systems and Buyer shall be resolved in a court of competent jurisdiction at the location of RAE Systems' place of business fulfilling the purchase order, and in no other location. In RAE Systems' sole discretion, such action may be heard in some other place designated by RAE Systems (if necessary to acquire jurisdiction over third persons), so that the dispute can be resolved in an action. Buyer agrees to appear in any such action and consent to the jurisdiction of such court upon written notice. No action, regardless of form, arising out of, or in any way connected with, the Products furnished or services rendered by RAE Systems, may be brought by Buyer more than one (1) year after the cause of action has accrued.

9. Indemnification: In the event of a claim by a third party of infringement of proprietary rights, trademarks, or patents, resulting from compliance with Buyer's designs, specifications, or instructions Buyer will defend, indemnify and hold RAE Systems harmless against any expense or loss ensuing from such a claim.

Except as otherwise provided above, RAE Systems shall defend any suit or proceeding brought against Buyer to the extent the same is based upon a claim that any Product, or any part thereof, delivered to Buyer under a purchase order constitutes an infringement of any United States patent; provided that, RAE Systems is notified promptly in writing and given authority, information and assistance (at RAE Systems' expense) for the defense of same. In case said Product, or any part thereof, is in such suit held to constitute infringement and the use of said Product or part is enjoined, RAE Systems shall, at its sole and exclusive option and expense, either (i) procure for Buyer the right to continue using said Product or part, (ii) replace said Product with a comparable non-infringing product, (iii) modify said Product so it becomes non-infringing; or (iv) remove said Product and refund to Buyer the actual cost of said Product paid to RAE Systems by Buyer, less a reasonable amount for depreciation. The foregoing states the entire liability of RAE Systems for any patent infringement by the said Product or any part thereof. Notwithstanding the foregoing, in no event shall RAE Systems be obligated to indemnify Buyer pursuant to this Section 10 if a claim, suit or proceeding arises out of or is related to: (a) RAE Systems' compliance with Buyer's designs, specifications or instructions; (b) modifications made to the Products other than by RAE Systems; or (c) Buyer's combination or use of the Product with software, services or products developed by Buyer or a third party.

10. Compliance with Laws: RAE Systems represents that with respect to the production of the Products or the performance of the services covered by this purchase order, RAE Systems will fully comply with all applicable federal, state and local laws including, without limitation, all requirements of the Fair Labor Standards Act of 1938, as amended. RAE Systems is an Equal Opportunity Employer. It does not discriminate in any phase of the employment process against any person because of race, color, creed, religion, national origin, sex, age, veteran or handicapped status. The Equal Opportunity Certificate, which is mailed annually to all vendors, is hereby incorporated into these terms and conditions by reference.

12. RAE Systems by Honeywell Terms and Conditions

RAE Systems by Honeywell Terms and Conditions (continued)

11. Assignment: Buyer shall not assign this purchase order or any interest therein or any rights hereunder without the prior written consent of RAE Systems.

12. Changes: Upon written acceptance of RAE Systems, Buyer may make changes within the scope of this purchase order in specifications, drawings, or type of Products ordered or in the time or place of delivery or order quantity. Engineering charges for any specification changes will be quoted under a separate purchase order. Reduction in purchase order quantities and/or extension or delay of scheduled shipment dates will be subject to price adjustment as determined by RAE Systems and agreed to by the Buyer. RAE Systems reserves the right to reject any changes and thus the original purchase order quantities, shipment dates, and prices shall remain in effect.

13. Export Controls: Buyer acknowledges that all shipments by RAE Systems are or may be subject to restrictions and limitations imposed by United States export controls, trade regulations and trade sanctions. Buyer at all times will comply with such sanctions, controls and regulations and will cause compliance with such sanctions, controls and regulations in its use and disposition of the Products. With respect to each Products shipment pursuant to these terms and conditions, Buyer will obtain and supply to RAE Systems in writing all information required by RAE Systems to obtain any U.S. export license, permit, approval or documentation applicable to such shipment. Notwithstanding any contrary provision in these terms and conditions, RAE Systems will have no obligation to make any shipment to Buyer until it has received all such information and has obtained the applicable licenses, permits, approvals or documentation for shipment, if any. If RAE Systems learns, or has reasonable cause to believe, or if any branch or agency of the government of the United States claims, that a violation of any applicable trade sanctions, export controls or trade regulations has occurred or is likely to occur because of any shipment, RAE Systems may, in addition to any other remedy it may have, suspend all shipments to Buyer until: (a) RAE Systems is satisfied that such violation did not occur or has ceased to occur, or (b) such claim is withdrawn or otherwise resolved in favor of RAE Systems. Neither Buyer nor its employees, agents, subcontractors, officers or representatives shall cause or permit any shipment of the Products to be made by Buyer or by anyone acting on behalf of Buyer or to whom Buyer may sell the Products, to any country for which a validated export license is required by the United States, or to which shipment is prohibited under trade regulations or trade sanctions of the United States. It shall be the duty of Buyer to inform itself in detail of such export controls, trade regulations and trade sanctions. Buyer will not cause or permit any customer or user in other parts of the world until all necessary import and/or export approvals and clearances have been obtained, and until all United States export controls, trade regulations or trade sanctions applicable to such shipments have been fully complied with. Buyer will indemnify and will hold RAE Systems harmless from and against any claim, loss or liability arising out of any breach of the foregoing covenants contained in this Section 14.

14. Notices: Any notice or report required or permitted by these terms and conditions shall be in writing and shall be deemed given if delivered personally or if sent by either party to the other by confirmed overnight delivery or by certified or registered mail, return receipt requested, postage prepaid, addressed to the other party to its address as set forth on the purchase order or at such other address as such party shall designate by notice hereunder. Where Buyer is giving notice to RAE Systems, all notices shall be sent to the attention of RAE Systems' account representative or customer service representative.

15. Government Contracts: Unless otherwise stated by reference on the face hereof, all purchase orders are considered commercial sales regardless of government contract or subcontract references. RAE Systems pricing and production and shipment commitments shall be based on published price lists and RAE Systems internal accounting and production allocation procedures which shall be applied equitably to all customers as determined by RAE Systems.

16. Service Warranty: RAE Systems warrants all repair work performed on Products theretofore purchased by Buyer from RAE Systems for a period of ninety (90) days after completion of the repairs and shipment to Buyer (the "Warranty Period"). In the event that a Product shall fail within the Warranty Period, Buyer's sole and exclusive remedy shall be to return said Product to RAE Systems during the Warranty Period, transportation prepaid, for re-repair. In this event, this warranty will not be deemed to have failed of its essential purpose. Transportation from Buyer to RAE Systems shall be via a carrier selected by Buyer with all charges borne by Buyer. The aforementioned provisions will not extend the original warranty period for any Product that has been repaired by RAE Systems.

Honeywell BW Clip® Series

Single-Gas Detectors

The most user-friendly, reliable and cost-effective way to ensure safety and compliance

The Honeywell BW Clip® Series single-gas detector is your everyday companion for hazardous environments. It operates up to three years maintenance-free. Just turn on the device and it runs continuously - no need for calibration, sensor replacement, battery replacement or battery charging. That means great reliability and no downtime.

Plus, with the two-year Honeywell BW Clip® Series for H₂S or CO, you can put the device in a hibernation case when you're not using it for a week or more - and extend its life by that period of time.

Compatible with the Honeywell IntelliDox® instrument management system, the Honeywell BW Clip® Series is engineered to the highest standards of quality and reliability, keeping you safe and compliant.

Honeywell BW™ Icon Series

Four-Gas Detector

The Honeywell BW Icon is named for its display of simple icons for gas levels and device status. That means no live gas readings for workers to interpret and no time-consuming training. Instead, when there's a gas alarm, the bell icon on the display will illuminate, along with an indicator next to the sensor in alarm, so workers can quickly clear the area.

The simplest way to prioritize safety - Honeywell BW™ Icon is a fixed-life, two-year, four-gas detector for the gas hazards that workers face most often. That means you can turn it on and activate two years of protection, with no need for sensor or battery replacement - and no hidden costs

Honeywell BW Icon+ delivers an icon-based experience in a serviceable package. It enables you to maximize the lifespan of your four-gas detectors, optimize long-term cost of ownership and select from multiple gas sensors for flexible applications.

*Honeywell Analytics recommends using a combustible (LEL) sensor only when accompanied by an oxygen (O₂) sensor. As oxygen is required for the detection of combustible gases, a Catalytic LEL sensor may not detect combustible hazards in an oxygen deprived environment. IR LEL Sensors are better suited to oxygen deprived environments

*For further information regarding the effectiveness and suitability of the types of LEL combustibles sensors for your target gas and application, please refer to the LEL sensor information page within the Price Guide or alternatively contact your local Honeywell Sales Representative.

†Advisory: Detectors are equipped on a standard basis with SR-W04 combustible sensors. This sensor includes a heavy-duty silicone filter that make it ideal for use in environments that have known sources of silicone or vapors containing silicon. The SR-W04 silicone filter equipped sensor should not be used when monitoring diesel, kerosene, jet fuel or other heavy hydrocarbon vapors with flashpoint temperatures above 38° C (100° F). Filtered LEL sensors may not be suitable for detecting specific combustible gases, including some compounds found in the GasAlertMicro 5 correction factor library. For more information on filtered and unfiltered LEL sensors, please see page 108. Series detectors cannot be sold or shipped to the states of Oregon and California. Please contact your local Honeywell Analytics Office to know the availability of products manufactured prior to December 31, 2016, that could still be shipped to the states of California and Oregon or to identify alternative products.

Honeywell ConneXt Pro

RAEPoint Wireless Router

Enterprise gas detection for real-time safety intelligence.

The Central Hub utilizes Long range Low Power (LoRa) radio that collects the gas sensor data from Honeywell gas detectors and reports it in real-time to the Honeywell Safety Suite software solution. The Hub supports three uplink connection methods: Ethernet, Wi-Fi and Cellular

- Supports GPS positioning and regularly report device location information
- Supports multi-channel LoRa enabled gas detectors
- Multiple indicators show the working status of the equipment
- Aids wall-mounted, desktop, and car installation

Honeywell IntelliDoX®

Automatic Instrument Management System

Honeywell IntelliDoX®, unmatched performance and customization

The Honeywell IntelliDoX® instrument management system combines smart docking modules with Honeywell Safety Suite Device Configurator software to provide automated instrument management, helping drive productivity, reliability and efficiency. Place the detector in the docking module, and it automatically tests the gas detector and sensors while transferring data to the docking station.

The Honeywell IntelliDoX® delivers quicker bump tests for better productivity. Bump as many as five detectors in less than a minute. That means no more queues of workers waiting to test their detectors. Gang up to five Honeywell IntelliDoX® for even greater productivity, each module can function independently, managing fleets of detectors, all simultaneously.

Efficient when networked via Ethernet or stand-alone, transfer data with a USB drive, the Honeywell IntelliDoX® is the solution for easy record-keeping, to transfer pump tests, peak exposures and other gas-detection data.

Honeywell IntelliDoX[®] Automatic Instrument Management System (continued)

How to Assemble a Honeywell IntelliDoX[®] and prepare for first-time use

1. Connect the purge inlet filter - Ensure that the filter assembly is free of obstructions and defects. Connect the filter assembly to the purge inlet (G). If necessary, attach extension tubing to the filter assembly to draw ambient air from an adjacent fresh air environment.
2. Connect the exhaust tubing - Inspect the exhaust tubing to ensure that it is free of obstructions and defects. Connect the exhaust tubing to the exhaust outlet (F). Ensure that the exhaust tubing is not connected to a negative pressure system or obstructed in any way.
3. Connect the calibration gas tubing - Inspect the calibration gas tubing to ensure that it is free of obstructions and defects. Connect the calibration gas tubing to a demand flow regulator. Ensure that the calibration gas tubing is connected to a 3 L/min Demand Flow regulator. Connect the calibration gas tubing to the first gas inlet (H). Attaching additional calibration gas tubing to a Honeywell IntelliDoX[®] inlets 2, 3 or 4 (I) requires the attachment of the Multi-Inlet Key (J) on each module that requires this gas.
4. Connect the power - Connect the AC power cord to the power supply. Connect the power supply to the power connection on the Honeywell IntelliDoX[®] module (E). Plug the AC power cord into a suitable wall outlet. When the power is connected, the Honeywell IntelliDoX[®] LCD activates and a self-test is performed.

5. Connect to a Computer Network - Insert one end of the Ethernet cable into the Ethernet port on the Honeywell IntelliDoX[®] module (D). Insert the free end of the Ethernet cable into the network outlet.
6. The integrated back panel of the Honeywell IntelliDoX[®] (C) may be used as a retractable stand suitable for table top use or as a wall mount to support an individual module or gang of up to five connected modules. Refer to the operator's manual for assembly instructions.

How to Assemble Up To Five Connected Modules

1. Unlock and raise the latch arm (A) on the first module. If an end plate (B) is attached, remove it.
2. Align the connection port and outlets on the first module with the connection port and inlets on a second module. Push the modules firmly together to connect.
3. Lower and lock the latch arm (A).
4. Repeat as necessary to connect up to a maximum of five Honeywell IntelliDoX[®] modules in one gang.
5. When the gang is complete, attach the end plate (B) to the last module in the gang.

Safety and Productivity Apps

Honeywell has developed the following apps for use with your Apple or Android devices. These apps use a Bluetooth® connection to pair with one or more portable gas detectors to:

- allow you to view existing device configuration and alarm information
- change device configurations
- forward device alarms and associated information to monitoring applications such as Safety Suite
- provide enhanced functionality such as Panic Alarms

The apps work with Bluetooth/Bluetooth Low Energy (BLE) capable Honeywell portable gas detectors from BW and RAE. Some detectors have the wireless capability built-in, either by default or as an option. These detectors can be directly paired with an Apple or Android smartphone or tablet. Other detectors, such as the Honeywell BW™ MicroClip Series or the Honeywell BW™ Max XT II, can use the new Honeywell BW™ Connect wireless accessory to pair with the smartphone or tablet. The Honeywell BW™ Connect conveniently attaches to the back of these detectors and provides the wireless interface between the detector and Apple or Android device.

These apps currently support a number of BW and RAE portable detectors and more are being added. Consult your Honeywell Regional Sales Manager for details.

Safety Communicator App

Personal information and communication hub

Safety Communicator (SC) is an app for both industrial-grade and non-industrial-grade smartphones and tablets. Available for both Android and iOS devices, it enables real-time communication between a worker's personal safety instruments and a remote monitoring system—such as Safety Suite Real Time. The Android/iOS device and app act as a personal communication hub for a worker, which collects instrument readings and alarms from instruments over Bluetooth (BLE) and transmits in real time to a remote system over a 3G/4G cellular communication network. To further promote worker safety, the app also transmits a worker's information and location to the remote system, which allows safety managers to quickly react and provide necessary assistance in case of an emergency.

Device Configurator App

Mobile Device Management

Configurator (DC) is a mobile app for tablets and smartphones for managing device configurations, updating firmware and downloading and sharing data. DC enables you to provide:

- enhanced safety, by ensuring detector firmware and settings are up-to-date.
- better productivity, through efficient access to device information, easier device configuration and maintenance and on-demand data sharing.
- improved compliance, using immediate access to device configuration change history and data logs.

Calibration Equipment (continued)

For Honeywell brand portable gas detectors only: Honeywell BW Clip® Series, Honeywell BW™ Solo, Honeywell BW™ Icon, Honeywell BW™ Flex, Honeywell BW™ MicroClip Series, Honeywell BW™ Clip4, Honeywell BW™ Max XT II, GasAlertMicro 5 Series and Honeywell BW™ Ultra

Test Gases	Cylinder Material	Liters	Shelf Life (Warranty)	Order Number	USD
Bump alarm test gas aerosol H ₂ S (100 ppm)	Aluminum	11	6 months	CG-BUMP-H25	\$116.00
Bump alarm test gas aerosol CO (100 ppm)	Aluminum	11	12 months	CG-BUMP-M100	\$116.00
Bump alarm test gas aerosol H ₂ S (100 ppm), CO (200 ppm), CH ₄ (2.5%), O ₂ (10%)	Aluminum	11	6 months	CG-BUMP1	\$101.00
Spare balloon assembly kit with hose (1/8 in I.D., 3/16 in O.D.) and adaptor for				CG-BUMP-B-K	\$40.00

Note: H₂S concentrations in bump gas cylinders degrade rapidly due to the properties of these cylinders. While these cylinders might initially come with H₂S concentrations of 100 ppm, they could lose up to 60% of that concentration in 12 months (users may see only 40 ppm after 12 months). Bump gas cylinders are used for qualitative functional testing of sensors and alarms only. Bump gases cannot be used as calibration gases.

For bump testing detectors with ClO₂ and O₃ sensors, recommended methods are to use a gas generator whenever possible to produce the necessary level of the test gas. If a generator is not available, the following may be used with the proper verification that the proxy gas type produces the same result as the target gas. Cl₂ can be used as a proxy for both ClO₂ & O₃ sensors. ClO₂: 1 PPM Cl₂ = 0.6 PPM ClO₂ O₃: 1 PPM Cl₂ = 1.2 PPM O₃

Filtered Catalytic Bead Combustible (LEL) Sensor Information

Honeywell multi-gas detectors are offered with an unfiltered combustible gas (LEL) sensor. The filtered LEL sensor provides enhanced resistance to airborne sensor poisons such as volatile silicone vapors and high concentrations of hydrogen sulfide gas. Due to the physical size of some molecules, the filtered LEL sensor is not typically suitable for the detection of some compounds including complex hydrocarbons, alcohols, ketones and esters. The filtered LEL sensor is suitable for the detection of less complex molecules including C1 to C6 hydrocarbons, hydrogen and acetylene.

For applications requiring the detection of more complex compounds, select a detector with an unfiltered LEL sensor. Consult the following chart for assistance in selecting a suitable combustible sensor.

PID Information

VOCs and PID

VOCs are organic compounds characterized by a tendency to evaporate easily at room temperature with the potential of forming a toxic gas concentration. While some volatile organic compounds (VOCs) are acutely toxic at low concentrations, the harmful effects of most VOCs are delayed. Negative effects may occur long after the primary exposure thus many people ignore the potential danger. Long-term effects can include leukemia, memory problems, loss of hand-eye coordination, cancer and a range of other physiological affects. Many personnel throughout the world are unprotected from VOCs in their daily work either because they are unaware of the toxic hazards or because they are without a detector that detects for these gas concentrations.

Most VOCs have surprisingly low occupational exposure limits. An increased awareness has resulted in several newly revised VOC exposure limits, including TLVs for diesel vapor, kerosene and gasoline. Photoionization detectors (PIDs) are able to detect VOCs and large hydrocarbon molecules that are undetectable by catalytic and electrochemical sensors.

PID equipped instruments are generally the best choice for measurement of VOCs at exposure limit concentrations.

This table lists 10 common VOCs, their lower explosive limit (LEL) concentration and their exposure limits per the UK OEL, NIOSH REL and ACGIH TLV. The table also identifies those contaminants (highlighted in dark gray) with toxic exposure limits lower than 5%LEL.

Notable Changes for This Price Guide Release

After years of stable pricing, recent increases in supply costs have inevitably forced us to increase some of our list prices as well. We have done so on a selective basis, to avoid across-the-board price rises and thus continue to offer the lowest prices possible. As always, we have separate Price Guides for U.S. and International markets, and for portable vs. fixed instrumentation. This version has a few notable changes, including:

- Introduce a limited set of pre-configured MUNIs and begin phase out of build-to-order versions
- Introduce UNI Lite low-cost, bulk-order single gas monitors
- Introduce VOXI EC/LEL transmitters for systems such as Rig Monitoring
- Add NEO SEMI version with industrial comm/power connector for areas that do not allow USB
- Add CaliCase MP342 MUNI 4-bay docking station; add 5-MUNI Charging Station
- Add 5-POLI Charging Station
- Updated minimum order amount and return materials policies

mPower Electronics declares shipping values up to full invoice amounts on your behalf if no instructions are given on purchase orders. If you want us to declare specific values or waive value declarations, please write clear instructions on your purchase orders, and bear responsibility for risk of lost shipment, as the shipper will limit the loss claim to the declared value. Please refer to the loss claim and refund policy from your shippers, e.g. UPS, FedEx and DHL.

We will need your pro-forma invoice before drop-shipping to customers outside the U.S.

These fees apply when requested features require engineering modifications that are outside standard ranges listed in this Price Guide, such as different sensor ranges or physical modifications. Custom configurations in the firmware within the existing platform are not usually charged this extra fee. Tiered distributor discounts apply. Please contact us for 3rd party integration partnership and associated fees.

Used Items Returned for Service or Repair The RMA form should be filled out with instrument serial number, a description of the service/repair needs, the return shipping address, the requestors contact information, and any other relevant information. A hard copy of the RMA should be included with the returned materials. Shipping costs to mPower are the responsibility of the customer. If advance replacement of a sensor is being requested, the sensor raw count values must be provided on the RMA (check with a Service Center for procedures). A purchase order for the estimated repair cost should be prepared at the same time the RMA is being prepared, to expedite return shipment once the service is completed.

mPower Electronics - 2024 US Price List**MUNI MP42X Pre-Configured Four-Gas Detectors**

The MUNI MP42X series is a compact and lightweight 4-gas detector for worker safety at hazardous locations, with four standard sensors for oxygen (O₂, lead-free), combustibles (LEL), carbon monoxide (CO) and hydrogen sulfide (H₂S). Alternative sensors are low-power LEL methane (CH₄) by NDIR, sulfur dioxide (SO₂), and galvanic oxygen (O₂). The sensor options are pre-configured at the factory and cannot be changed by the user. The detector is packaged in a robust housing with no moving parts. Its battery power offers 24 hrs for a standard 4-gas detector, and extended runtime when using the low-power infrared sensor. The simple, 2-button operation is easy to use and significantly reduces the time spent training the user.

Standard

- MP42X detector including rechargeable Li+ battery, selected sensors and alligator clip
- AC Charging adapter
- Calibration cap
- USB Communication cable
- Quick start guide
- Calibration certificate

Optional

- External filters
- BLE Wireless
- MuniDock single-bay MP420T or CaliCase 4-bay MP342 bump & calibration stations

CAUTION: NDIR LEL detects methane and most hydrocarbons, but not hydrogen, acetylene or carbon disulfide.

CAUTION: SENSORS ARE REPLACEABLE IF WORN OUT, BUT NOT INTERCHANGEABLE WITH OTHER TYPES. UNITS MUST BE ORDERED IN THE DESIRED CONFIGURATION, WHICH CANNOT BE CHANGED BY THE END USER.

mPower Electronics - 2024 US Price List**POLI MP400, MP400P, MP400S & MP400H Multi-Gas Detectors**

The POLI MP400 Series Multi-Gas Detector can sample by diffusion or built-in pump and offers up to 6-gas monitoring of oxygen (O₂), combustibles (LEL), toxic gases, carbon dioxide (CO₂), and volatile organic compounds (VOCs). It allows a full selection of sensors, i.e., electrochemical (EC), pellistor, non-dispersive infrared (NDIR) and photo-ionization detector (PID). 4 Sensor slots are available; 5- and 6-gas measurements are possible using combination sensors. The MP400S and MP400H add wireless communication in squads of up to 8 to enable real-time remote monitoring of alarm status including Man-Down Alarm for extra safety. The MP400H Head samples by diffusion only. Wireless transmission is provided at no subscription fee. **We recommend using a pre-configured mSquad for Wireless users (see Wireless Systems page).**

**Monitor-only configuration includes:**

- Monitor as specified
- Sensors as specified
- Sampling option (pump/no pump) as specified
- Calibration Adaptor
- Lithium-ion Battery
- USB cable for charging and data download with 100-240V charge adaptor
- Quick Reference Guide
- Calibration Certificate

NOTE: At most two high-power sensors can be used at the same time. These include PID, LEL and NDIR sensors

NOTE: Both POLI diffusion and pump models can use an Automatic Test and Calibration Station.

NOTE: For Purging Applications using Oxygen, LEL and VOL sensors, The LEL sensor MUST be an NDIR sensor and cannot be a pellistor-type sensor.

NOTE: Some exotic sensors may have longer lead times.

NOTE: Extension tubing for remote sampling must be purchased separately

WARNING: Please review the cross-sensitivity of the selected sensors in TA Note 4 at www.mpowerinc.com to avoid obvious interferences of sensor responses.

Listed below are some common configurations of the POLI detector. For other specific options, please use the Assemble-To-Order (ATO) Configuration Guide below.

Detectors arrive ready to use with sensors (user specified), stainless-steel alligator clip, rechargeable lithium polymer battery, calibration hose, instructions and quick reference guide. **PLEASE ENTER SENSORS IN SOCKETS IN THE ORDER THEY APPEAR ON THE LIST**, for example, always put H₂S in a lower socket number than CO.

NOTE: Some sensor ranges can be extended at a cost of \$50 per sensor per instrument. For example, CO can go to 2000 ppm and 0.1-100 ppm H₂S can go to 0.1-200 ppm.

NOTE: For safety reasons we cannot accept orders for POLI instruments without at least one sensor installed

* Sensors Listed with "Required" in the "Pump" column cannot be ordered in diffusion instruments

NEO/MP18X Photo-Ionization Detectors

The NEO is one of the most advanced handheld VOC (Volatile Organic Compound) monitors available for ppb (parts per billion) detection. The NEO offers several models from the most sensitive 1 ppb to a high range up to 15,000 ppm for different applications and a benzene-specific version (NEO BENZ). Novel designs of the Photo-ionization Detector (PID) and Ultraviolet (UV) lamp reduce interferences due to humidity. All models communicate locally through a built-in Bluetooth Low Energy (BLE) and have one year of datalogging (@1-min intervals).

VOXiWatch II Rig Monitoring Systems

The VOXiWatch II series continuous gas monitoring system is designed for detection of H₂S and LEL around temporary workover rigs. VOXiWatch II uses our MP883 two-channel controller in a NEMA 4X enclosure with mounting feet, outfitted with MP820/MP840 transmitters for 1 or 2 electrochemical H₂S sensor(s), or 1 or 2 catalytic bead LEL sensor(s), or one each of H₂S and LEL. All cable connections are protected by rugged strain relief in an explosion proof enclosure. Also included are Modbus® RTU, common or individual channel relays, and large easy-to-read graphic color LCD displays.

Prices

Prices are subject to change without notice. All prices are in US Dollars.

Payment Terms

Our payment terms are Net 30 Days Date of Invoice (Net 30 DOI) with credit approval. Customers with overdue accounts are subject to credit hold and might be required to prepay future shipments. Service fees will apply to all credit card payments – 2.5% for domestic shipments, 3.0% for international shipments.

Minimum Billing/Handling Charges

\$30.00 net minimum billing (excluding shipping charges) applies to any order. A handling charge will be added to any order under our minimum billing to equal \$30.00.

Freight Terms

All orders for domestic or international delivery are shipped FOB shipping point, regardless of point of origin. This applies to orders shipped from RKI as well as orders drop-shipped from third parties.

Shipping Charges

Shipping is prepaid and added to the invoice at the shipper's current published rates, unless a collect account number is provided. Within North America, RKI ships via UPS ground unless otherwise specified. ***Dangerous Goods Shipments*** - Dangerous goods (calibration gas cylinders and kits) incur additional handling and shipping charges.

International Shipping Charges

Any customs fees and import taxes or duties that apply at country of destination are the responsibility of the consignee. RKI quotes only the shipping (transportation) cost.

Drop Shipments

RKI will drop ship to customers at no extra charge. RKI's default method of shipment is UPS Ground.

Next Day Delivery

Orders that require next day delivery must be received by 12:00 noon Pacific Time. Items ordered will ship if they are in stock. Customers must confirm next day orders by phone to assure next day delivery. Fixed system orders require a minimum of 24 hours for set up and calibration.

Order Acknowledgement

RKI confirms all orders by e-mail. Discrepancies must be challenged by the customer before the scheduled ship date; otherwise, RKI accepts no responsibility for incorrect orders.

Shortages/Errors

Claims for shortage, shipping errors, or damage must be made within 7 days after receipt of shipment.

Returns and Credits

Returns for credit must be pre-approved and accompanied by an RKI Material Return Form and include original packaging in good condition without any markings. Contact RKI with the reason for the return to obtain a Material Return Form and RMA number. RMA numbers are valid for 30 days only; after 30 days, a new return authorization must be requested. Returns not accompanied by a complete Material Return Form (with valid RMA number) will be returned to the sender. A restocking fee of \$75.00 or 10% of the invoice value (whichever is greater) will apply to all returns for credit. Shipping charges are not credited. No returns of sensors, or instruments with sensors, will be accepted after 30 days. No returns of dangerous goods (cylinders) or perishable items (tablets or tapes) will be accepted.

Returns for Repair

All items returned for repair must be accompanied by a completed Service Order Form with each instrument. The form must include a description of the problem. Service Order Form: <https://www.rkiinstruments.com/download/forms/service-and-repair>

Satisfaction Guarantee

We guarantee that our equipment will perform to our specifications. If the customer is not satisfied, the equipment may be returned to RKI within 15 days of original shipment for full credit less shipping charges, if accompanied by a completed Material Return Form (and valid RMA number) and in new condition.

Calibration Certificates

Calibration certificates are available upon request at \$10 per instrument.

Examples of such items are:

- a). Pump diaphragms and valves
- b). Fuses
- c). Batteries
- d). Filter elements
- e). Scrubbers

Warranty is voided by abuse including mechanical damage, alteration, rough handling, liquid exposure, corrosion from battery leakage or repair procedures not in accordance with instruction manual. This warranty indicates the full extent of our liability, and we are not responsible for removal or replacement costs, local repair costs, transportation costs, or contingent expenses incurred without our prior approval.

THIS WARRANTY IS EXPRESSLY IN LIEU OF ANY AND ALL OTHER WARRANTIES AND REPRESENTATIONS, EXPRESSED OR IMPLIED, AND ALL OTHER OBLIGATIONS OR LIABILITIES ON THE PART OF RKI INSTRUMENTS, INC. INCLUDING BUT NOT LIMITED TO, THE WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL RKI INSTRUMENTS, INC. BE LIABLE FOR INDIRECT, INCIDENTAL OR CONSEQUENTIAL LOSS OR DAMAGE OF ANY KIND CONNECTED WITH THE USE OF ITS PRODUCTS OR FAILURE OF ITS PRODUCTS TO FUNCTION OR OPERATE PROPERLY.

This warranty covers instruments and parts sold to users only by authorized distributors, dealers and representatives as appointed by RKI Instruments, Inc.

We do not assume indemnification for any accident or damage caused by the operation of this gas monitor and our warranty is limited to the replacement of parts or our complete goods. Warranty covers parts and labor performed at RKI Instruments, Inc. only, and does not cover field labor or shipment of parts back to RKI.

* Warranty is one year for all products and parts except as indicated below:

2 Year warranty:

Special Attention Combinations

Listed below are some gas combinations that can be installed into one GX-6000 but that have limitations of operations that must be discussed and understood by the customer prior to purchase. Some have special filters installed for improved specificity.

A.	SO ₂ / NO ₂ *	9 ppm NO ₂ reads -10.4 SO ₂ 6 ppm SO ₂ reads -3.8 ppm NO ₂
B.	Cl ₂ / SO ₂	6 ppm SO ₂ reads 3 ppm Cl ₂
C.	NH ₃ / NO ₂	9 ppm NO ₂ reads -5.7 ppm NH ₃

* This combination is only practical if only one gas is present at a time due to cross interference.

Impractical Combinations

Some combinations of gases are not practical in the same GX-6000 due to interference issues. If you do not see the combination you want in the price list, please consult the factory. Please see below for BAD combinations (not practical) or combinations which require special attention.

A.	HCN / SO ₂	6 ppm SO ₂ reads 11.4 ppm HCN
B.	HCN / NO ₂	9 ppm NO ₂ reads -20.8 HCN
C.	H ₂ S / Cl ₂	H ₂ S suppresses Cl ₂ reading

Calibration Equipment

Regulators For 17 / 34 L Steel Cylinders

Regulators are necessary equipment used to accurately deliver calibration gas from a cylinder to an instrument. Each regulator is designed to fit on a specific set of cylinders. Most of the RKI regulators are designed for non refillable cylinders. There are two common fittings these regulators use to connect to the non refillable cylinders. One common fitting is a CGA 600 connection and fits on the 17 (no part number suffix) & 34 (-01 part number suffix) liter steel cylinders. Make sure the regulator you purchase fits the cylinder you have.

These Regulators			
		 Most commonly ordered

Calibration Equipment

Regulators For 34L / 58L / 116L Aluminum & 103L Steel

The second common fitting is the 5/8 x 18 UNF fitting which connects to the 34 & 58 liter aluminum cylinders (-04 & -02 part number suffix) and the 58 & 103 liter steel cylinders (-05 & -03 part number suffix). Make sure the regulator you purchase fits the cylinder you have.

These Regulators

Calibration Equipment

Knobs and Gauges

Regulators can be equipped with an on / off knob or a pressure gauge to show how much gas is in the cylinder. Most of the Low Volume (-LV) type cal kits are equipped with regulators that include an on / off knob and a pressure gauge, in order to offer the easiest to use calibration kit.

Cylinders

Cylinder part numbers have a 2 digit suffix which indicate the cylinder size for that particular gas mixture. The 2 digit suffix numbers indicate the following cylinders:

Part # Suffix	Disposable Cylinder Size	Part # Suffix	Refillable Cylinder Size
no suffix =	17 liter steel cylinder (17L)	-R04 =	34 liter aluminum cylinder (34L), refillable
-01 =	34 liter steel cylinder (34L)	-R02 =	58 liter aluminum cylinder (58AL), refillable
-02 =	58 liter aluminum cylinder (58AL)	-R100 =	100 liter aluminum cylinder (100AL), refillable
-H02 =	58 liter aluminum cylinder (58AL, 1000 psi)		
-03 =	103 liter steel cylinder (103L)		
-04 =	34 liter aluminum cylinder (34AL)		
-H04 =	34 liter aluminum cylinder (34AL/44ES, 825 psi)		
-05 =	58 liter steel cylinder (58L)		
-07 =	7 liter aluminum cylinder		
-116 =	116 liter aluminum cylinder (116AL)

Calibration and EAGLE Upgrade Services

Many instruments are sent to us for just a general checkup and calibration. If no additional repair work, extra parts or sensors are required to perform this service, then RKI's calibration services can apply. In this case, if you send a "not to exceed" purchase order to RKI along with the instrument, your repair time will be expedited. Using standard calibration and Eagle upgrade services eliminates the need for the service department to obtain an approval, which gets your service order back to you much faster.

Please remember to always complete an RKI Service Order Form with every repair, even for standard calibration services. This form can be found on RKI's web site, or one can be faxed or emailed to you.

STEPS FOR CALIBRATION AND UPGRADE ORDERS:

1. Select the appropriate calibration services for your instrument model from the *Services For Portable Instruments* or *Eagle Upgrades* sections.
2. Complete an RKI Repair Form specifying your service, a "not to exceed" figure, and a purchase order number.
3. Return instrument to RKI with the completed Service Order Form.
4. RKI will complete the service indicated and promptly return it to you, as long as no other parts or repair work are required.

If additional parts or service work are required that exceeds your "not to exceed" amount, then RKI will create an estimate for your approval. You may then either give authorization to RKI to add the additional charges to the original PO, or supply a new PO to cover the new total costs. If you know that certain parts or sensors will be required prior to sending the instrument to us, you can also expedite the service by including the cost of those sensors or parts on the original purchase order sent to us with the instrument.

Services For Portable Instruments

Select the appropriate service for your instrument model from the list below. Complete an RKI Service Order Form indicating service required, a "not to exceed" figure, and a purchase order number. Return instrument to RKI with the completed Service Order Form. Prices include inspection, testing, cleaning and calibration. These prices assume that no additional sensor replacement, parts or labor is required. If an instrument is extremely dirty, requires replacement parts, sensors or additional labor, an estimate will be provided documenting additional work required.

Calibration certificate is included with every instrument repair.

Upgrades

For EAGLE OR EAGLE 2 upgrades adding super toxic sensors, contact RKI Applications Department to confirm that the gas combination you need is practical. Or find the part number for the version you want in the EAGLE section of this price list to confirm it is a viable combination. **Eagle upgrades are not eligible for the expedite program.**

Please use the following guidelines for quoting and handling EAGLE upgrades from one configuration to another.

The pricing below includes all parts, calibration, and labor required to convert an EAGLE that is complete and in good working order, and that does not need any additional repairs, parts or sensors replaced. If additional parts, sensors or labor is required an estimate will be provided. Approval of the estimate is required before upgrade can be completed.

For upgrades that include adding super toxic channels, the part number utilizes a suffix to indicate the specific super toxic gas being added. For example, to add a chlorine channel to an EAGLE, the upgrade part number would be 91-1000-CL2. To add 2 super toxic channels, use a separate line item for each channel. Specify the 91-1000-XXX part number for each new channel and total each individual price.

Sensor / Cylinder 2 Digit Date Code	
RKI sensors and gas cylinders are labeled with a 2 digit date code that represents the product's manufactured date.	
1st Digit	= The last digit of manufactured calendar year (ex. year 2012 = 2)
2nd Digit	= Month (X, Y, Z = month 10, 11, or 12 respectively)
Example: 6X	= Manufacture date of Oct. 2016

Terminology	
TLV - Threshold Limit Values. There are 3 categories of TLV's; TWA, STEL, & Ceiling.	
TWA - Time Weighted Average. The time-weighted average concentration for a conventional 8 hour workday and a 40 hour work week, to which it is believed nearly all workers may be repeatedly exposed without adverse affect.	
STEL - Short Term Exposure Limit. The concentration which is believed that workers can be exposed continuously for a short period of time without suffering provided that the TWA is not exceeded. STEL is defined as a 15 minute TWA exposure.	

Ceiling - The concentration that should not be exceeded during any part of the working exposure.

Parts Per Million (ppm) equivalence to % Volume		
1 ppm	=	0.0001 %
10 ppm	=	0.001 %
100 ppm	=	0.01 %
1000 ppm	=	0.1 %
10,000 ppm	=	1.0 %
100,000 ppm	=	10.0 %
1,000,000 ppm	=	100.0 %

THIS PRICING AGREEMENT/CONTRACT is made and entered into, by and between
hereinafter referred to as "Bidder" and The City of Oklahoma City, a municipal corporation, or a participating Public Trust of which The City of Oklahoma City is Beneficiary hereinafter referred to as the "Contracting Entity."

WITNESSETH:

WHEREAS, the governing body of the Contracting Entity has approved certain specifications and requested by notice that bids be submitted thereon; and

WHEREAS, this document until executed by the Mayor/Chairman of the Contracting Entity constitutes the Bidder's proposal; and

NOW, THEREFORE, that in consideration of the covenants, agreements and representations as hereinafter set forth, it is mutually agreed by the parties that:

1. The Bidder agrees to sell and deliver to the Contracting Entity, the items of material and/or services, specified in the pricing section of the electronic bid submittal, which is attached hereto and made a part of this Pricing Agreement/Contract. List the prompt payment discount, if any, for this agreement in the space provided below:

Discount for Prompt Payment % Days

2. The Bidder expressly warrants that all articles, material, and/or work covered in this Pricing Agreement/Contract will conform to the specifications and electronic bid documents attached to this bid and are hereby incorporated, as if set forth in full herein; and further warrants that the same shall be of good material and workmanship, and free from defects.

3. The Bidder understands that all bids are to be submitted in U.S. dollars at a firm price. Bids submitted in any currency other than U.S. dollars will be rejected.

4. The Bidder also understands that all invoices shall be submitted in U.S. dollars and agrees to accept payment in U.S. dollars as full satisfaction of the invoiced amount.

5. If any of the goods fail to meet the warranties contained in Paragraph 2, above, the Bidder, upon notice from the Contracting Entity, shall promptly correct or replace the same at the Bidder's expense. If the Bidder shall fail to so do, the Contracting Entity may cancel this order as to all such goods, and in addition, may cancel the then remaining balance of this order. After notice to the Bidder, all such goods will be held at the Bidder's risk. The Contracting Entity may, at the Bidder's direction, make available such goods to be returned to the Bidder at the Bidder's

risk, and all transportation charges, both to and from the original destination, shall be paid by the Bidder. Any payment for such goods shall be refunded by the Bidder unless the Bidder promptly corrects or replaces the same at the Bidder's expense.

6. The Contracting Entity agrees to pay to the Bidder the price and amount in accordance with Paragraph 1 above, based on the quantity actually purchased, upon delivery to and acceptance by the Contracting Entity, of the material and/or service[s] above described and upon the filing by the Bidder, and approval by the Contracting Entity, of a verified claim for the amount due.

7. The Bidder agrees, in connection with the performance of work under this Pricing Agreement/Contract:

a. That the Bidder will not discriminate against any employee or applicant for employment, because of race, creed, color, sex, age, national origin, ancestry or disability. The Bidder shall take affirmative action to ensure that employees are treated without regard to their race, creed, color, age, national origin, sex, ancestry or disability. Such actions shall include, but not be limited to, the following: employment, promotion, demotion or transfer, recruitment, advertising, lay-off, termination, rates of pay or other forms of compensation and selection for training, including apprenticeship. The Bidder agrees to post, in a conspicuous place available to employees and applicants for employment, notices to be provided by the City Clerk/Secretary of the Contracting Entity setting forth the provisions of this section, and;

b. That the Bidder agrees to include this non-discrimination clause in any subcontracts connected with the performance of this Pricing Agreement/Contract.

8. In the event of the Bidder's non-compliance with the above non-discrimination clause, this Pricing Agreement/Contract may be canceled or terminated by the Contracting Entity. The Bidder may be declared by the Contracting Entity ineligible for further Pricing Agreement[s]/Contract[s] with the Contracting Entity until satisfactory proof of intent to comply is made by the Bidder.

9. The risk of loss or damage shall be borne by the Bidder at all times until the acceptance of goods, properly packed, by the Contracting Entity.

10. This Pricing Agreement/Contract, specifications, electronic bid submittal documents and any attachments constitutes the entire understanding and agreement of the parties upon the subject matter hereof. There is no agreement, oral or otherwise, which is not contained in or attached to this Pricing Agreement/Contract. This Pricing Agreement/Contract may not be modified or assigned unless approved in writing and signed by both parties.

11. The parties assume and understand that the variables in the Bidder's cost of performance may fluctuate; consequently, the parties agree that any fluctuations in the Bidder's costs will not alter the Bidder's obligations under this Pricing Agreement/Contract nor excuse performance or delay on the Bidder's part.

12. This Pricing Agreement/Contract shall be inoperative during such period of time that the aforesaid delivery or acceptance may be rendered impossible by reason of fire, Act of God or government regulation. Provided, however, to the extent that the Bidder has any commercially reasonable alternative method of performing this Pricing Agreement/Contract by purchase on the market or otherwise, the Bidder shall not be freed of any obligations hereunder by this clause, even though the goods intended for this Pricing Agreement/Contract were destroyed or their delivery delayed because of an event described above.

13. The shipping or receiving of any goods under this Pricing Agreement/Contract shall not be deemed, or be, a waiver of any right to damages for any prior failure to ship or receive any goods.

14. This Pricing Agreement/Contract shall be governed by the laws of the State of Oklahoma.

15. The Bidder shall be responsible for complying with all applicable federal, state and local laws.

16. If submitting a bid for services, the Bidder certifies that they, and any proposed subcontractors, are in compliance with 25 O.S. §1313 and participate in the status Verification System. The Status Verification System is defined in 25 O.S. §1312 and includes but is not limited to the free Employment Verification Program (E-Verify) through the Department of Homeland Security and available at www.dhs.gov/E-Verify.

**INSTRUCTIONS FOR CERTIFICATION REGARDING DEBARMENT, SUSPENSION,
INELIGIBILITY AND VOLUNTARY EXCLUSION**

- i. By signing and submitting this proposal, the prospective primary participant is providing the certification set out below.
- ii. The inability of a person to provide the certification set out below will not necessarily result in denial of participation in this covered transaction. The prospective participant shall submit an explanation of why it cannot provide the certification set out below. The certification or explanation will be considered in connection with the Contracting Entity's determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such a person from participation in this transaction.
- iii. The certification in this clause is a material representation of fact upon which reliance was placed when the Contracting Entity determined to enter into this transaction. If it is later determined that the prospective primary participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the Contracting Entity may terminate this transaction for cause of default.
- iv. The prospective primary participant shall provide immediate written notice to the Contracting Entity if at any time the prospective primary participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
- v. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," "participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the Contracting Entity for assistance in obtaining a copy of those regulations.
- vi. The prospective primary participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the Contracting Entity.
- vii. The prospective primary participant further agrees by submitting this proposal that it will include the clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion-Lower Tier Covered Transaction," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
- viii. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the nonprocurement portion of the "Lists of Parties Excluded From Federal Procurement or Nonprocurement Programs" (Nonprocurement List) which is compiled by the General Services Administration.
- ix. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
- x. Except for transactions authorized under paragraph f of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the Contracting Entity may terminate this transaction for cause or default.

OKLAHOMA OPEN RECORDS ACT AND CONFIDENTIAL INFORMATION

All materials submitted to the Contracting Entity pursuant to this Bid or Proposal potentially become subject to the mandates of the Oklahoma Open Records Act, 51 O.S. § 24A.1. *et seq.* The purpose of this Act is to ensure and facilitate the public's right of access to and review of government records so they may efficiently and intelligently exercise their inherent political power.
