Stiffeners

Due to environmental influences, sagging may occur unless the table top is supported properly. Since SurfaceWorks® has no control over how table tops will be installed, we can only warranty our product against sagging when and if the proper precautions have been taken. Steel stiffeners are a required accessory for table tops with a span of 45" or greater between supports. Even with a stiffener, the maximum unsupported span should not exceed 60" (see guidelines below). As it is your responsibility to determine if a stiffener is necessary, stiffeners are not included in the table top price, and are not automatically added to your order. Stiffeners will be shipped loose and are to be field installed. Kits include required mounting screws. Placement: Optimal stiffener placement is in the center, directly between the base plates/panels, however, it can be placed up to 6" off the center. If the stiffener must be placed further off center, it is highly recommended that two parallel stiffeners are placed on either side of the base plates. Please carefully factor in the dimensions and location of your base hardware/plates when determining which size stiffener to order.

- Dimension "A" should not exceed 20"
- If Dimension "B" is less than 45" , a stiffener is not required
- If Dimension "B" is between 45" & 53.9" , a 45" stiffener is required
- If Dimension "B" is between 54" & 60" , a 54" stiffener is required
- Dimension "B" should not exceed 60" with or without a stiffener; additional supports are required

Dewey inspires better approaches to teaching and learning, wherever they take place. Sure, learning happens in classrooms. It also happens in offices, homes and in-between spaces. Four key factors in learning dynamics are constantly shifting and interacting: students, technology, space, and pedagogy. Dewey leverages great design to create as much synergy as possible among them.

Dewey was designed to earn top marks in four critical areas:

Flexibility: Today's varied teaching and learning styles call for furniture that can quickly and easily shift into different configurations, whether the focus is on the instructor, on student collaboration, or on a distance learning screen.

Durability: To withstand the rigors of frequent rearranging and constant use, Dewey was designed with long-lasting materials and components, from cast and extruded aluminum bases to urethane edges.

Technology Supporting: Products are designed to support changing technology for long-term relevancy.

Timeless Design: Furniture this flexible, durable, and technology-friendly calls for a clean design that will continue looking relevant throughout its long life.

*Stay Put Power Data Trough Kit accommodates data configurations. Data jack adapters included. Customer provides data jacks and cording.

Three different types of power solutions are available. To select the best solution for the space or application, identify how different power needs impact configuration options. **Table-to-table power** requires ganging. Adding ganging and consecutively connected power minimizes flexibility.

On the Fly

Highly mobile reconfigurations provide maximum flexibility and the option to reconfigure on the fly, sometimes multiple times per day. Select furniture with more flexibility and/or space saving features that flip or nest. Solutions include surface-mounted power modules that are easily plugged in to a floor receptacle, or no power at all.

Move About

Moderate reconfigurations focus on shifting teaching and learning methods with more furniture movement and moderate flexibility. The power solutions are easy and intuitive for the end user that requires minimal power and data requirements, with heavier focus on charging end user devices. Power components and ganging mechanisms are easier to disconnect (without tools) for occasional reconfiguration.

Stay Put

Stationary configurations with hardwired power troughs have less flexibility and often focus on traditional training applications (computer labs) with heavier technology, power, and data needs. Furniture may be moved for building maintenance. Limitations on power access locations (infeeds) may be present in the space. Stay Put NYC fully hardwired options are also available.

In working to reduce waste, sustain resources, support recycling, and eliminate harmful chemicals, Cabot Wrenn takes active, tangible steps to preserve our environment.

Our primary material, wood, is fundamental to everything we do.
Fortunately, it is the most readily available, and easily renewable resource.
It also has the added benefit of being the only resource with a carbon negative footprint.
All of our wood is harvested from sustainable forests.

We utilize non-toxic finishing materials that are virtually free of all volatile organic compound emissions, as well as Ozone Depleting Substances (ODS).
All these materials boast low emissions designed to reduce off gassing in order to preserve the air we breathe.

Every upholstery piece is produced using foam that is free of harmful fluorocarbons;
all foams used are PBDE, TCDPP, TCEP and formaldehyde free.
Every scrap of foam generated is sent back to the supplier for recycling.

We have joined with several fabric suppliers to offer top quality upholstery, which is also environmentally friendly. Momentum®, CF Stinson®, Maharam® and Mayer® are just a few of the suppliers we work with to provide textiles made of up to 100% recyclable materials that are also 100% recyclable/compostable and PVC-free.

Our glue is water-based and environmentally friendly; all bases and metal components contain recycled material and are 100% recyclable; our factories employ energy efficient lighting; recycled paper is used for our literature and price list. No measure is too small.

The determination doesn't stop with manufacturing, but extends to the packaging and transporting of our product. All of our corrugated packaging material is up to 100% recycled content and 96% post-consumer recycled content.
Working directly in a combined effort with local partners, we have diverted tons of waste from our landfills. We also encourage the use of carriers that promote cleaner, more fuel efficient transportation to lessen fumes exhausted into the air from transporting our product.

At Cabot Wrenn, we take great pride in being a good steward of our resources as we strive to protect and sustain the environment for everyone present and future.

It is the obligation of the consignee to count and examine the condition of the shipper's containers at the time of delivery. It is the consignee's responsibility to file claims for damage or loss with the transportation company as soon as possible after receipt of merchandise. When ordering leather, please take into account this is a natural product that has flaws that cannot be used in furniture.

You should expect yield losses of between 30% to 40% depending on product and color.

How To Order Leather

Leathers can be purchased by the hide, half hide, or on a square footage basis.

For leather cut to size, we will compute the square footage and double the square footage price to account for the leather yield loss. Please contact customer service for leather requirements if the approximate average hide size is less than 10 square feet.

We will try to accommodate specific footage requests, but hide sizes vary and you will be billed for actual square footage.

Please use the following chart when estimating leather requirements:

Cleaning Instructions for Leather

General Care Tips

Try to maintain at least two feet between your furniture and heating sources. Avoid placing your furniture in direct sunlight. All materials will fade over time when exposed to sunlight.

Natural Markings

Each piece of leather has unique marks and a personality all its own. These distinctive marks are barbed wire nicks, brands, and nature's hallmarks. Only true leather can boast these marks, and pride of ownership is enhanced due to this individuality. Please note these marks are not defects but characteristics of full top grain leathers.

Protected Leather

No upholstery material is easier to care for than genuine top grain leather. Dust frequently with a clean dry cloth. Wipe occasionally with a mild Ivory soap and water solution on a clean damp cloth. Repeat with a clean damp cloth and dry with a clean cloth to restore the beautiful patina of the leather. DO NOT use saddle soap, polish, wax or any cleaning agents other than a mild Ivory soap and water solution. The use of any cleaning substance other than a mild Ivory soap and water solution will negate any warranties from the leather tannery.

Unprotected Leather

This is a natural leather that cannot be cleaned because it does not have a protective coating. Dust frequently with a clean dry cloth. This leather will fade if exposed to direct sunlight. Leather Solutions has products available that may help the performance of this leather.

You may contact Leather Solutions for assistance at (336) 629 - 4998.

Cleaning Instructions for Fabric

Code S

To prevent overall soil and to remove dust and grime, frequent vacuuming or light brushing is recommended. Spot clean using a mild water-free solvent or dry cleaning product. Clean only in a well ventilated room and avoid any product containing Carbon Tetrachloride or other toxic materials. Pretest a small area before proceeding. Cleaning by a professional furniture cleaning service only is recommended. Caution: Never remove cushion covers for separate dry cleaning or washing, even though they do have zippers. Do not use bleach at any time. The use of steam, water or water based cleaners may cause excessive shrinking or staining of this particular fabric. Do not use any tumble method cleaning service, as this may destroy the backing of the fabric, shrink or otherwise damage the upholstery fabric.

Code W

To prevent overall soil and to remove dust and grime, frequent vacuuming or light brushing is recommended. Spot clean using the foam only from a water-based cleaning agent, such as a mild detergent or non-solvent upholstery shampoo product. Apply foam with a soft brush in a circular motion. Vacuum when dry. Pretest a small area before proceeding. Use a professional furniture cleaning service when an overall soiled condition has been reached. Caution: Never remove cushion covers for separate dry cleaning or washing, even though they do have zippers. Do not use bleach or any tumble method cleaning service, as this may destroy the backing of the fabric, shrink or otherwise damage the upholstery fabric.

Code SW or X

With either method, pretest a small area before proceeding. Use a professional furniture cleaning service when an overall soiled condition has been reached. Wood owes its inherent beauty to variations in color, grain and texture. As a result, there may be minor variations from one piece of furniture to the next even though they are finished at the same time. Exposure to light and the aging process will cause a darkening of natural wood products. For these reasons, Cabot Wrenn does not guarantee the exact matching of grain, pattern and color.

Special Finishes for Seating

One-time Formulation Charge \$375 NET, **plus** an upcharge of 5% COM net per unit. For large quantities, contact Cabot Wrenn Customer Service. Purchase Orders with a custom wood finish will be scheduled into production upon receipt of written approval of the finish match. Light Finishes

Light Finishes are considered to be:

- Light Maple
- Light Cherry
- Medium Cherry

Stiffeners are required when a freespan distance is 60"L or longer.
Freespan is the clearance between two supports that goes directly from the underside of the surface right to the ground. Examples of that support can be a pedestal or gable.

Most Bridge Connections will require a stiffener to be added.

OK against a wall only

Hutches are either mounted to worksurfaces or directly to a wall. Hutch uprights must be supported below surface by a desk leg or pedestal storage unit.

Addition of pedestal storage is required for freestanding straight desk shell applications, otherwise units are only suitable for use against a wall.

This is bad layout as the range on the height adjustable is up to 45"H and if you have a monitor or large items on the desktop, it may collide with the hutch.

If using a Hutch on a Freestanding Desk Return, it must be connected to another worksurface.

CALIFORNIA BORN AND BRED

We're a leading manufacturer of commercial solutions in the U.S.—and #1 in task chairs. From tables and lounge to screens and more, we've been the go-to destination for comprehensive, build-to-order solutions for almost 25 years.

We combine award-winning design with the fastest lead times around (choose from 2-, 5- or 10-day shipping). We can build almost any specification you want, deliver it when you need it and offer a price no one can match. It's all part of our indie California spirit and drive to help you do more.

DESIGN THAT GETS YOU

Discover seating engineered around you. Experience responsive design, supreme comfort and hyper-customizable features—all at value-driven prices.

OUR BUILD-TO-ORDER PROMISE

Custom-designed chairs, no waiting. Our nimble size and lean manufacturing operation means we can ship build-to-order chairs in just two days.

FASTEST SHIPPING IN THE INDUSTRY

Choose from two, five, or 10 day shipping. We cut lead time, sync orders and avoid off-schedule shipments at a rate our competitors just can't match.

WORLD-CLASS SERVICE

We're proud to announce that the Office Furniture Dealer Alliance voted for us as "Best Customer Service" three times in the past five years.

SUSTAINABLE DESIGN

We make it easy to go green. Design an eco-friendly room from the ground up or upgrade an existing space to meet the latest environmental standards.

ANSI/BIFMA Certified

SitOnIt Seating is a member of the Business and Institutional Furniture Manufacturer's Association (BIFMA). Tests developed by BIFMA are approved by the American National Standards Institute (ANSI) to determine the strength and durability of seating. Although testing is not a warranty or guarantee, our task, side and lounge products meet or exceed BIFMA and ANSI standards.

LEED Certified

Earn points toward LEED certification thanks to our U.S. manufacturing location and our use of recycled materials where possible.

GREENGUARD Certification

All SitOnIt Seating lounge and seating products met the rigorous criteria required by GREENGUARD in accordance with the Collaborative for High Performance Schools.

LEVEL Certified

Sustainability matters. That's why we've worked to achieve BIFMA LEVEL® certification for all task chairs, side chairs and lounge products.

The Take Back Program

SitOnIt Seating helps minimize product waste by connecting our customers and dealers with third-party groups who redirect materials that would be headed for the landfill to local nonprofits and public agencies.

We Did Our Homework

Download detailed documents that break down the percentage of recycled content, manufacturing processes and indoor air emissions for every chair we make.

Fire safety is a top priority for us. SitOnIt Seating strongly supports CAL 133 standards and makes it easy for designers and buyers to specify CAL 133 chairs.

TB 117

Under California law, all upholstered furniture must meet TB 117-2013 by January 1, 2015. At a minimum, all SitOnIt Seating fabrics, vinyl, leathers and resilient filling material (i.e., foam and Dacron) meet TB 117-2013. Unlike TB 117-2013, which tests only the inner upholstery components, with CAL 133 the entire piece of furniture must withstand ignition from a gas burner inside a testing chamber.

What is CAL 133?

CAL 133 is a standard of furniture flammability started by the California Bureau of Home Furnishings and Thermal Insulation for furniture used in public buildings such as healthcare facilities, convalescent homes, public assembly areas of hotels and motels, hospitals, board and care homes, stadiums, licensed child care facilities, prisons and jails.

Notice: Starting January 1, 2020, the State of California changed regulations to ban flame retardants in upholstered furniture sold in California. We anticipate further regulatory changes in other states. The TB-133 barrier material used in our products is a flame-retardant fabric designed to pass open-flame testing protocols. The cotton/fiberglass knit is infused with a phosphorus flame retardant and coated with a chemical that expands in heat to create a physical flame barrier. The TB-133 barrier material that we use in our products is free of halogenated flame retardants, polybrominated diphenyl ethers (PBDE), formaldehyde, and antimony.

Choosing CAL 133 Textiles

Consult the individual [SitOnIt Seating fabric cards](#) to review the specifications for each fabric offered. Because we offer such a vast array of fabrics with varying degrees of flame retardancy, we suggest you consult the published technical data of the fabric supplier when making your fabric selection.

Specify CAL 133 textiles in the Material section of the Final Price Calculation worksheet or on your purchase order.

SitOnIt Seating assumes no responsibility for the flame retardancy of any customer-provided textile.

CAL 133 Testing

CAL 133 is a full-scale fire test for furniture manufactured for use in public buildings. The standards do not specify how to construct furniture, but only how it should perform when tested. To pass this fire standard test, a fire blocking liner is sandwiched between the foam and the fabric of our chairs. This liner acts as a fire extinguisher by smothering the flame.

COM/COL compliance for the CAL 133 models listed on the following page can be determined by specifying upholstery with the exact characteristics as approved SitOnIt Seating fabrics and leathers or by conducting a full chair burn test. The nondiscountable test fee for each chair-textile combination is listed below. The lead time for testing is four weeks.

Task and Side Chairs/Stools: \$600
Lounge: \$800

For more information on TB 117-2013 and CAL 133, visit the [State of California Department of Consumer Affairs](#) website.

To Order CAL 133

Allow a 10-day lead time. Clearly specify CAL 133 on your order. For each chair, add the appropriate additional charge.

CAL 133 Materials

- **CAL 133 LEATHER:** All carded leather is CAL 133 approved.
- **CAL 133 PLASTIC:** All our plastic chairs are CAL 133 approved except for our Achieve and Baja collections.
- **CAL 133 TEXTILES:** Over a thousand CAL 133 approved textiles in all grades, colors and styles are listed on the SitOnIt Seating website. Visit sitonit.net and search textiles by CAL 133 compliance, manufacturer, grade, lead time and other attributes.

Unmatched Matching®

Textiles can be everything. With the right fabrics, you can provide atmosphere, create cohesiveness and offer an unforgettable experience across many spaces and places.

Fabric color, alignment, texture, orientation and pattern all play a part—and need to line up or match perfectly (especially with field-replaceable parts). With PatternMatch and pattern orientation, you can rest assured that every part of every chair can be traded out easily without disrupting design.

PatternMatch®

We ensure that design elements of the back, seat and arms match and/or align between seat and back. The patterns or lines also match unit-to-unit.

Pattern Orientation

All fabric (vertical, horizontal or bi-directional pattern) will be applied in the direction shown on the fabric manufacturer's website, unless otherwise specified.

To ensure desired fabric direction, use the Custom Upholstery Order Form on page 20 and check the appropriate box under the "Pattern Orientation" section.

When we apply a textile pattern with lines at a 90-degree angle (vertically and/or horizontally) to the back and seat of a chair, we strive to achieve full alignment. Some small variations can occur due to the shape and size of the product. Pattern Orientation is standard for SitOnIt Seating.

Multi-Upholstery

The multi-upholstery option allows one fabric to be selected for the back and a different fabric for the seat. Multi-upholstery lounge pricing is different than multi-upholstery pricing for task and side seating.

TASK AND SIDE

- Upholstery pricing is based on both seat and back being the same textile. If the material is COM/COL or more than one textile is used:

If two fabrics of the same grade are chosen, one grade level will be added to the upholstery price. Example: grade 4 for the seat and a different grade 4 for the back, the upholstery price will be grade 5 for both.

If two fabrics of different grades are chosen, the final upholstery price will be based on the highest grade. Example: grade 2 for the seat and grade 3 for the back, the upholstery price will be grade 3 for both.

The above upcharges only apply to chairs that have both the seat and back upholstered.

LOUNGE AND CORA

- A standard upcharge applies to all multi-upholstery orders. Different fabrics and grades may be combined because each back, seat, arm and valance are separately priced.
- Add the single multi-upholstery upcharge to the cost of the components. Example: upcharge + any grade price for the seat + any grade price for the back + any grade price for the arm.

Moisture Barrier

Accidents happen. To help protect your investment, moisture barrier for seats and backs is an option on all lounge seating products.

Specify moisture barrier seats and/or backs in the Material section of the Final Price Calculation worksheet or on your purchase order. Note that specification and pricing are separate for seat and back and apply to each single seat or back position.

COM CALCULATION

Steps to Calculate COM Yardage.

1. Determine which products are being ordered as COM.
2. Find the yardage needed to upholster those products from the COM Yardage Requirement charts.
3. Adjust the yardage requirement total based on the repeat of the fabric roll using the COM Repeat Calculation table.
4. Take the final calculation and round up to the nearest half-yard to get final yardage.

For orders of 10 or more seats, contact Customer Experience for further quoting.

COM Repeat Calculation.

Use the guide below to calculate the percentage of extra upholstery required to cover large repeats.

Repeat	Railroaded/Horizontal OR Vertical/Off The Roll
5.1"– 7"	10%
7.1"–10"	15%
10.1"–14"	20%
14.1"–20"	30%
20.1"–27"	45%

Yardage requirements listed in this document are based on textile bolts/rolls that are 54" wide. Please contact Customer Experience if goods are a width other than 54".

COM Calculation Example

Below is a hypothetical scenario for how total COM yardage should be determined. This example is for a patterned textile that has a repeat.

STEP 1: DETERMINE WHICH PRODUCTS ARE BEING ORDERED AS COM

For this example order, we'll assume we need to order: 20 units of Freelance 4-leg—backs only.

STEP 2: DETERMINE THE COM YARDAGE REQUIREMENT

Looking at the COM Yardage Requirements chart that begins on page 22, we see that the following yardage amounts are needed for each product:

Freelance 4-leg chair back = 0.94 yards.
Now we multiply 0.94 yards by the 20 chair backs and we get a total of 18.8 yards.

STEP 3: ADJUST THE YARDAGE REQUIREMENT TOTAL BASED ON REPEAT

Since the textile we've chosen is a pattern with a repeat, we should look at the COM Repeat Calculation table to determine our multiplier. For this example, let's assume our repeat is 11" and we're upholstering the fabric vertical/off-the-roll. Based on the table, the multiplier is 20%. Now, we need to take the 18.8 yards from step two and increase it by 20%. An easy way to calculate this is by multiplying 18.8 by 1.2, which gives us 22.6 yards.

STEP 4: ROUND TO GET THE FINAL AMOUNT NEEDED

To determine how much yardage is needed to complete this order, we take the amount from step three and round it to the nearest half-yard. In this case, that means the customer needs to send SitOnIt Seating 23 yards to complete this order.

COM/COL YARDAGE: TASK AND CONFERENCE

Combining upholstery is an option on all SitOnIt Seating upholstered products. Below are tables outlining the fabric or vinyl requirements for the entire chair as well as individual pieces. Pricing

First-time custom stains must be approved before acceptance of an order. A one-time net fee applies if stains are not in our library. Thereafter, a stain-to-match upcharge is applied to each chair.

LOUNGE

Stain not in our library: \$275 Net
Stain-to-match upcharge: \$70 List

Ordering

When ordering, enter the approved STAIN ID# in the Material section of the Final Price Calculation worksheet or on your purchase order.

Custom Finish Terms and Conditions

Wood is inherently beautiful because of natural variations in color, grain and texture. There may be minor differences from one chair to the next, even though they are finished at the same time. We cannot guarantee exact matches of grain or natural wood color.

Approval Process

Since all new stains must be approved before they can be applied to seating or tables, allow extra time for custom finishes. Custom finishes generally require at least one to two weeks to create a matched sample. We will need a signed Approval Form before we can accept your order. We reserve the right to decline the opportunity to match a finish color.

1. Send a 3" x 4" or 4" x 6" sample of the stain, along with the model numbers and options to which the finish will be applied, to:

Customer Experience
Custom Finish Program
6415 Katella Avenue
Cypress, CA 90630

Include dealer name, contact and project reference.

2. Once approved, we will send a finish sample to you along with any caveats that may apply. We will keep an identical sample in our files for future orders. Custom finishes generally require at least a week to create a matched sample.
3. Carefully review the sample. Note the STAIN ID# (example: SM#070214-1); this will be needed for your order. Return the signed approval form to Customer Experience along with your order. We need your approval before we can accept the order, schedule it for production or acknowledge a ship date.
4. Lounge orders using our stain-to-match program will have a lead time of 15 days.
