MEMORANDUM

TO: Sharmanlyne Vickers, Purchasing Agent  
Procurement Services Division, Finance Department

FROM: Wade Gourley, Chief of Police   
Oklahoma City Police Department

DATE: December 18, 2023

SUBJECT: Sole Source – Scanna MSC Inc

The Oklahoma City Police Department's Bomb Squad Unit is in need (4) new Scanx Scout X-Ray systems. Currently OKCPD has (3) mounted Logos X-Ray units, Logos systems are no longer being supported by Logos. All are starting to have issues ranging from works most of the time to non-functioning. The Logos system and the Scanna ScanX Scout system are the only two being used and trained on at the FBI Hazardous Devices School. These mounted systems will be used in our 4 response vehicles. This will make each able to run a full bomb call as per standards. This will increase our capability in the event of multiple incidents simultaneously.

The use of the mounted systems outweighs the use of the Digital dis-mounted systems for bomb calls outside of large events such as the Memorial Marathon. Parts of the city have a lot of radio frequency interference that sometimes render the dismounted systems useless. This RF interference does not affect the mounted systems. There is still a great use for the dismounted systems however the mounted systems are the staple of necessary equipment for a bomb squad to complete their mission.

ScanX Scout with battery – (4) @ \$21,065.19 = \$84,260.76  
PSP Plate 14"x 17" – (18) @ \$783.80 = \$14,108.40  
Plate Protector 14"x 17" – (18) @ \$24.38 = \$438.84

Estimated Total \$98,808.00
