City of Oklahoma Planning Commission Members  
Case # PUD-2041

I have a few concerns about this new residential development. First the roads around this area are not in good enough condition to handle the new traffic SE 59<sup>th</sup> Street from Henny Road to Choctaw Road needs to be replaced. The same goes for Henny Road from SE 59<sup>th</sup> Street to SE 44<sup>th</sup> Street. Second, has anyone done a study to see if the aquafer that this area is on would be able to handle the added homes. Lastly, has a study been done to see how the new construction of the homes will help or hurt in water drainage from rainfall. I know this area is close to a flood plain.

Best Regards,
