Proprietary Information of Flock includes non-public information regarding features, functionality and performance of the Services. Proprietary Information of Customer includes non-public data provided by Customer to Flock or collected by Flock via Flock Services, which includes but is not limited to geolocation information and environmental data collected by sensors. The Receiving Party agrees: (i) to take the same security precautions to protect against disclosure or unauthorized use of such Proprietary Information that the Party takes with its own proprietary information, but in no event less than commercially reasonable precautions, and (ii) not to use (except in performance of the Services or as otherwise permitted herein) or divulge to any third person any such Proprietary Information. The Disclosing Party agrees that the foregoing shall not apply with respect to any information that the Receiving Party can document (a) is or becomes generally available to the public; or (b) was in its possession or known by it prior to receipt from the Disclosing Party; or (c) was rightfully disclosed to it without restriction by a third party; or (d) was independently developed without use of any Proprietary Information of the Disclosing Party. Nothing in this Agreement will prevent the Receiving Party from disclosing the Proprietary Information pursuant to any judicial or governmental order, provided that the Receiving Party

gives the Disclosing Party reasonable prior notice of such disclosure to contest such order. At the termination of this Agreement, all Proprietary Information will be returned to the Disclosing Party, destroyed or erased (if recorded on an erasable storage medium), together with any copies thereof, when no longer needed for the purposes above, or upon request from the Disclosing Party, and in any case upon termination of the Agreement. Notwithstanding any termination, all confidentiality obligations of Proprietary Information that is trade secret shall continue in perpetuity or until such information is no longer trade secret.

5.3 Disclosure of Footage. Subject to and during the Retention Period, Flock may access, use, preserve and/or disclose the Footage to law enforcement authorities, government officials, and/or third parties, if legally required to do so or if Flock has a good faith belief that such access, use, preservation or disclosure is reasonably necessary to comply with a legal process, enforce this Agreement, or detect, prevent or otherwise address security, privacy, fraud or technical issues, or emergency situations.

6. PAYMENT OF FEES

6.1 Billing and Payment of Fees. Customer shall pay the fees set forth in the applicable Order Form based on the billing structure and payment terms as indicated in the Order Form. If Customer

believes that Flock has billed Customer incorrectly, Customer must contact Flock no later than thirty (30) days after the closing date on the first invoice in which the error or problem appeared to receive an adjustment or credit. Customer acknowledges and agrees that a failure to contact Flock within this period will serve as a waiver of any claim. If any undisputed fee is more than thirty (30) days overdue, Flock may, without limiting its other rights and remedies, suspend delivery of its service until such undisputed invoice is paid in full. Flock shall provide at least thirty (30) days' prior written notice to Customer of the payment delinquency before exercising any suspension right.

6.2 Notice of Changes to Fees. Flock reserves the right to change the fees for subsequent Renewal Terms by providing sixty (60) days' notice (which may be sent by email) prior to the end of the Initial Term or Renewal Term (as applicable).

6.3 Late Fees. If payment is not issued to Flock by the due date on the Order Form, interest at a rate of 1.0% of any unpaid amount may be added for each month or fraction thereafter, until final payment is made.

6.4 Taxes. Customer is responsible for all taxes, levies, or duties, excluding only taxes based on Flock's net income, imposed by taxing authorities associated with the order. If Flock has the legal obligation to pay or collect taxes, including amount subsequently assessed by a taxing authority, for which Customer is responsible, the appropriate amount shall be invoice to and paid by Customer unless Customer provides Flock a legally sufficient tax exemption certificate and Flock shall not charge customer any taxes from which it is exempt. If any deduction or withholding is required by law, Customer shall notify Flock and shall pay Flock any additional amounts necessary to ensure that the net amount that Flock receives, after any deduction and withholding, equals the amount Flock would have received if no deduction or withholding had been required. A copy of the Oklahoma City Tax Exemption Letter from the Oklahoma Tax Commission is attached as **Exhibit E** and incorporated herein by reference.

7. TERM AND TERMINATION

7.1 Term. The initial term of this Agreement shall be for the period of one year from July 1, 2023 to June 30, 2024 (the "**Term**"). In the event of any material breach of this Agreement, the non-breaching Party may terminate this Agreement prior to the end of the Term by giving thirty (30) days prior written notice to the breaching Party; provided, however, that this Agreement will not terminate if the breaching Party has cured the breach prior to the expiration of such thirty (30) day period ("Cure Period"). Either Party may terminate this Agreement (i) upon the institution by or against the other Party of insolvency, receivership or bankruptcy proceedings, (ii) upon the other Party's making an assignment for the benefit of creditors, or (iii) upon the other Party's dissolution or ceasing to do business. In the event of a material breach by Flock, and Flock is unable to cure within the Cure Period, Flock will refund Customer a pro-rata portion of the pre-paid fees for Services not received due to such termination.

Customer agrees and understands that in the event Customer is found to engage in any of the foregoing restricted actions, all warranties herein shall be null and void, and this Agreement shall be subject to immediate termination for material breach by Customer. Customer shall not perform any acts which would interfere with the retention of title of the Flock Hardware by Flock. Should Customer default on any payment of the Flock Services, Flock may remove Flock Hardware at Flock's discretion. None of Customer's purchase orders, authorizations or similar documents will alter the terms of this Agreement, and any such conflicting terms are expressly rejected. Any mutually agreed upon purchase order is subject to these terms. In the event of any conflict of terms found in this Agreement or any other terms and conditions, the terms of this Agreement shall prevail. D. WHO IS AN INSURED – NEWLY ACQUIRED OR FORMED LIMITED LIABILITY COMPANIES

The following replaces Paragraph 3. of **SECTION II – WHO IS AN INSURED**:

- 3. Any organization you newly acquire or form, other than a partnership or joint venture, and of which you are the sole owner or in which you maintain an ownership interest of more than 50%, will qualify as a Named Insured if there is no other similar insurance available to that organization. However:
 - a. Coverage under this provision is afforded only:
 - (1) Until the 180th day after you acquire or form the organization or the end of the policy period, whichever is earlier, if you do not report such organization in writing to us within 180 days after you acquire or form it; or

- b. Coverage **A** does not apply to "bodily injury" or "property damage" that occurred before you acquired or formed the organization; and
- c. Coverage **B** does not apply to "personal and advertising injury" arising out of an offense committed before you acquired or formed the organization.

IMPLEMENTATION TEAM

Field Operations Team

The Field Operations team is responsible for the physical installation and maintenance of cameras and associated equipment provided by Flock. This includes a large team of technicians, schedulers, and many others involved in ensuring the delivery of your product.

They take the technical plan you finalized with Product Implementation and work closely with other teams at Flock to make sure that your cameras are installed quickly and safely, and in a way that maximizes the opportunity to solve crime at a specific location.

Note: For **all Installation questions or concerns**, please always direct them to your **Customer Success Manager** and not to the technician.

Please Note: On some occasions, third parties outside of Flock Safety may be (or need to be) involved in your implementation.

OUTSIDE PARTY	WHEN THEY MAY BE INVOLVED
Electrician/Street Department	If your Flock cameras need to be AC powered, you (customer) are responsible for providing an electrician to ensure power connectivity
Public Works (LE)	To weigh in on use of public Right of Ways or property
Department of Transportation (DOT), City, or County Agencies	If installation in your area requires permitting

THINGS TO CONSIDER WHEN PICKING LOCATIONS

Falcon Cameras

- **Use Cases**
 - Flock LPRs are designed to capture images of rear license plates, aimed in the direction of traffic.
 - Flock LPRs are not designed to capture pedestrians, sidewalks, dumpsters, gates, other areas of non-vehicle traffic, intersections
 - **Placement**
 - They capture vehicles driving away from an intersection.
 - They cannot point into the middle of an intersection.
 - They should be placed after the intersection, to prevent stop and go motion activation, or “stop and go” traffic.
 - **Mounting**
 - They can be mounted on existing utility, light, or traffic signal poles, or 12 foot Flock poles. ****NOTE**** Permitting (or permission from pole owner) may be required in order to use existing infrastructure or install in specific areas, depending on local regulations & policies.
 - They should be mounted one per pole*. If using AC power, they can be mounted 2 per pole.
 - *Cameras need sufficient power. Since a solar panel is required per camera, it can prevent sufficient solar power if 2 cameras and 2 solar panels were on a single pole (by blocking visibility). Therefore if relying on solar power, only one camera can be installed per pole.
 - They can be powered with solar panels or direct wire-in AC Power (no outlets). ****NOTE**** Flock does not provide Electrical services. The agency or community must work with an electrician to wire the cameras once installed. Electrician services should be completed within 2 days of installation to prevent the camera from dying.
 - They will require adequate cellular service using AT&T or T-Mobile to be able to process & send images
 - Any Flock equipment mounted over 14 feet or on a horizontal beam will require a bucket truck. If mounting in this way:
 - Flock will request use of a bucket truck through the customer or Public Works
 - If a bucket truck is not available through the customer, Flock will have to procure one.
- **Note**** This will lead to delays on install & any subsequent maintenance visits based on bucket truck availability
- Flock will likely require traffic control assistance provided by customer to install or provide maintenance with a bucket truck

Solar Panels

- Solar panels need unobstructed southern-facing views

CUSTOMER RESPONSIBILITIES: AC-POWERED CAMS

In the event your Flock cameras need to be AC-powered, the customer is responsible for acquiring an electrician and ensuring they connect the camera to power. **See steps 2 and 6 below.**

FAQS ABOUT AC-POWERED FLOCK CAMERAS

What voltage is supported?

The AC kit is designed to work with 120VAC infrastructure by default. A 240VAC version is available on request.

How much power does this consume?

Peak current draw is 1.5 A at 120VAC. Average power draw is roughly 30W in high traffic conditions, but may be lower when less vehicles are present.

Who is responsible for contracting the electrician?

The customer is responsible for contracting an electrician. We can help answer questions, but the customer is responsible for identifying and contracting an electrician.

Who is responsible for maintenance?

Flock will handle all maintenance related to the camera and power equipment installed by Flock. However, any problems with the electrical supply are the responsibility of the customer. The AC junction box has two lights to indicate the presence of power and make it easy for quick diagnosis if there is a problem related to the AC power source.

In the event the camera indicates to Flock that there is a power supply problem, Flock will notify the customer and request that the customer verify the lights on the AC junction box. If the AC Source light is illuminated, Flock will send a technician to investigate. If the AC source light is not illuminated the customer should check any GFCI's or breakers in the supply circuit or call the electrician who installed the power supply.

How much does it cost?

Work required to bring AC power to each location will be different, so exact pricing is not possible. The primary driver of cost is the distance from AC power source to the intended camera location.

What information do I need to provide my electrician?

The Flock deployment plan and these work instructions should be sufficient to secure a quote. It will be helpful if you know the location of existing power infrastructure before creating the deployment plan.

Can you plug into my existing power outlet?

The Flock AC power adapter does not use a standard outlet plug, but must be directly wired into the power mains. While using outlet plugs may be convenient, they can easily be unplugged presenting a tampering risk to this critical safety infrastructure. If an outlet is close to the camera, the electrician can route power directly to the camera with a direct wire-in connection.

How long does this process typically take?

The installation process typically takes 6-8 weeks. In order to accelerate the process, be sure to have the electrician perform his work shortly after the Flock technician finishes installing the camera.

What kind of electrician should I look for?

Any licensed electrician should be able to perform this work, though we have found that those who advertise working with landscape lighting are most suited for this work.

What happens if the electrician damages the equipment?

The customer is responsible for contracting the electrician. Any liability associated with this work would be assumed by the customer. If any future work is required at this site due to the electrical infrastructure or the work performed by the electrician would be the responsibility of the customer.

When should the electrician perform his work?

Once Flock installs the camera, you will receive an email alert letting you know that this has been completed. After this, you will need to schedule the electrician to route power to the pole.

What if my electrician has questions about Flock's AC Kit?

You should share the [AC-Power Kit Details](#) packet with the electrician if they have questions.

What if the AC power is on a timer?

Sometimes the AC power will be on a timer (like used for exterior lighting). Flock requires that the AC power provided to the camera be constant. The source that the electrician uses must not be on a timing circuit.

PERMITTING: PRE-INSTALL QUESTIONNAIRE

1. Timeline

- In Flock Safety's experience, in-depth permitting requirements can **add 2+ months to the installation timeline**. Law enforcement agencies and city governments can work with their local Public Works or Department of Transportation offices directly to help expedite the process. When Flock Safety customers manage the permitting processes, results tend to come more quickly.
- Is your agency able to own the permitting process with Flock Safety's assistance?

2. Right of Way

- Will any of the Flock Safety cameras be installed on city, state or power company owned poles or in city, county, or state Right of Way (RoW)?
 - What is the RoW buffer?
 - Will additional permits or written permission be required from third-party entities (such as DOT, power company, public works, etc)?
- Will any cameras be installed on city-owned traffic signal poles (vertical mass)?
 - If yes, please provide heights/photos to determine if a bucket truck is needed for the installation.
Note: If height is greater than 15 feet tall, a bucket truck is **required**.

3. AC Power vs. Solar

- If AC powered, is there a 120V power source available, and is there access to an electrician who can connect the existing wire to the Flock Safety powered installation kit?

[CLICK HERE](#)

- If solar powered, consider the size of the solar panel and potential to impact visibility of DOT signs/signals:
 - Single Panel: 21.25" x 14" x 2" (Length x Width x Depth)
 - Double Panel: 21.25" x 28" x 2" (LxWxD)

4. Traffic Control & Installation Methods

- **If a bucket truck is required**, this typically necessitates a full lane to be blocked in the direction of travel. **Can you provide a patrol car escort, or will full traffic control be required?**
 - Note: If traffic control is required, you may incur additional costs due to city/state requirements; Fees will be determined by quotes received.
- **If full traffic control required (cones, arrowboards, etc.):**
 - Will standard plans suffice, or are custom plans needed? Custom plans can double the cost, while standard plans can be pulled from the Manual of Uniform Traffic Control Devices (**MUTCD**).
 - Will a non-sealed copy of the traffic plan suffice? Or does the traffic plan need to be sealed and/or submitted by a professional engineer?
 - Are there state-specific special versions/variances that must be followed?
- **If a bucket truck is *not* required**, the shoulder or sidewalk should suffice and enable Flock Safety to proceed without traffic control systems in place.
 - Note: In some states (i.e. California), sidewalks may require signage. If signage is mandatory, Will your Public Works department be able to assist?

5. Paperwork & Required Forms

- Flock Safety will need copies of paperwork to complete prior to proceeding (ex. business license applications, encroachment permit applications). We can save critical time by gathering these documents upfront. We appreciate your assistance in procuring these.

6. Contacts

- If Flock Safety will need to interface directly with the departments, please share the contact information of the following departments:
 - Permitting
 - Public Works
 - Traffic Department

Our ALPRs are solar powered and have wireless communication capabilities, meaning our team of full time technicians can put them nearly anywhere you want to solve and prevent crime. Below are some specifics that set Flock apart from other vendors.

- We are the first public safety operating system empowering thousands of cities to eliminate crime. Our cameras and devices detect objective evidence, decode it with machine learning, and deliver it into the hands that stop crime.
- Communities operating on Flock Safety have reduced crime by up to 70%.
- Last year in 2022, the Cobb County Police Department (Major City Chiefs Association member) solved 100% of their homicide investigations and stated publicly that Flock Safety was one of the primary ways they were able to do so.
- After just one year with Flock cameras in their community, Gwinnett County Police Department's Central Precinct saw lower crime rates in all major categories, including a 37% drop in commercial burglary and a 38% drop in aggravated battery.

COMPANY'S QUALIFICATIONS AND EXPERIENCE

City of Oklahoma City,

We appreciate the opportunity to bid on this project. Based on the requirements and needs shared we are confident that we can deliver an ALPR system that will help prevent and reduce crime in the City of Oklahoma City.

When we started Flock Safety in 2017, we were just concerned citizens trying to use our talents in electrical engineering and software development to help our neighborhoods stop property crime. Since that time, we've heard from Sheriffs, Chiefs of Police, Command Staff, City Councils, Mayors, Business Leaders, and other Concerned Neighbors like us from all across the country. There is a growing desire to work together to eliminate crime and I believe that with the right technology, hard-working officers, and community engagement we can make a serious dent in the crime in your jurisdiction.

And it's working today in 2,500+ cities, with 2,000+ law enforcement agencies (including several similar sized cities/police departments listed in the References portion of the RFP) across the country, hiring 600+ employees. We're seeing lower crime rates, kidnapping victims returned to their families unharmed, homicides, drive-by shootings, hit and runs being solved, tens of millions of dollars in recovered stolen vehicles, illegal weapons and drugs taken off the streets, a renewed energy among detectives and patrol officers, and most importantly, communities that support their local law enforcement because they are safer than ever before. Moreover, Flock is the only company in this space that views privacy as a deliverable, and we will continue to do so in perpetuity.

We want to continue that success with you and your community, so that you can:

- Use the latest, most advanced technology to capture better evidence.
- Build tighter partnerships between law enforcement and the community you serve.
- Have a local team of Flock Safety reps (Law Enforcement, HOAs/Apartments, Commercial Businesses, K-12 School Corporation and Universities) dedicated to working with you and serving you.
- If Flock is awarded, Flock will work with the City to find mutual terms that satisfy both parties.

Together, we can change the fabric of our country. We look forward to hearing from you and hope you will join the "flock"!

Thank you,

PRODUCT SPECIFICATIONS

III. INTEGRATION:

The ALPR System must be able to integrate with current systems in use such as FUSUS. The ALPR system must also be able to integrate license plate reader cameras from platforms such as AXIS.

- Flock Safety complies. Flock has the ability to integrate with the FUSUS platform to push Flock hotlist alerts to the FUSUS platform at no additional cost to the Oklahoma City Police Department. Additionally, Flock is able to integrate with Axis IP cameras and can bring those Axis cameras into Flock's software interface to incorporate Live Video as well as turning existing Axis cameras into LPRs by applying Flock's patented and proprietary Vehicle Fingerprint software on the camera.

IV. REQUESTED SCOPE OF SERVICES:

The Contracting Entity is seeking a contractor or contractors to provide an Automated License Plate Reader (ALPR) system(s) that incorporate ALPR cameras, comprehensive monitoring, processing and machine vision services in one platform.

- Flock Safety complies.

Proposers will be responsible for all design and engineering to accomplish a viable installation of the system and its various components. Proposers are encouraged to submit cost saving solutions for purchasing, maintenance, and management of these systems.

- Flock Safety complies.

Proposers are expected to provide all materials and equipment necessary to perform installation and maintenance of services. All components and installation techniques should be current technology and comply with all governing laws and statutes. Proposer will be responsible for coordination with other contractors, the City's Information Technology Department and other City Department and Trust representatives.

- Flock Safety complies.

REQUESTED SCOPE OF SERVICES

Overview

- a) The system should have the ability to analyze vehicle license plate, state recognition, and vehicle attributes such as color, type, make and objects (roof rack, bumper stickers, etc.) based on image analytics (not car registration data);
- Flock Safety complies. Within Flock Safety's OS end users will have access to 24 unique characteristics including vehicle color, type, make, state detection, no tags, paper tags, roof racks, back racks, bumper sticks, window stickers, decals, etc. that are captured from the camera. Utilizing Flock's proprietary Machine Learning, the attributes are compiled through the image.
- b) The ability to capture and identify characteristics of vehicles with a paper license plate and vehicles with the absence of a license plate;
- Flock Safety complies. Within Flock's software interface, there is the capability to search for images with plates, without plates, and temporary tags (including paper plates).
- c) Ability to save searches based on description of vehicles without the need for a license plate, and set up alerts based on vehicle description;
- Flock Safety complies. The ability to create and use Saved Searches for vehicle descriptions and set up alerts are part of the functionality that Flock Safety has to offer.
- d) The cameras must have the ability to be hung on a pole supplied by the vendor and/or on poles identified or supplied by the buyer such as utility poles;
- Flock Safety complies. Flock Falcon LPRs are able to be put on a Flock pole or vendor approved poles from the buyer. (e.g. traffic signal pole, light pole, utility pole, etc)
- e) The cameras must be stationary;
- Flock Safety complies.
- f) Minimum of 25 license plate reader cameras with the ability to expand to 200 under the same system with all functionality intact;
- Flock Safety complies.
- g) Allow for camera integration from cameras purchased and owned by the buyer to be utilized and operated through the vendor's AI platform (need pricing for this option);
- Flock Safety complies. Flock is capable of integrating with all IP based cameras that the buyer has access to. This allows the ability for Live streaming, Video replay, and LPR functionality with our Vehicle Fingerprint AI and Machine Learning analytics. This Flock feature is called "Wing" and the pricing breakdown of Wing is \$1,500 per camera per year meaning any existing camera that the Oklahoma City Police Department owns that you want to add the Flock LPR software on, it's \$1,500 per year. There's a one-time \$500 installation/setup cost and that \$500 includes up to 10 cameras. Past the initial \$500 for 10 cameras on implementation, it's \$50 per camera thereafter. (e.g. if you wanted to convert 15 existing cameras to Flock Wing LPR for implementation it would be \$750)

REQUESTED SCOPE OF SERVICES

h) Need pricing option also for vendor supplied hardware and software;

- Flock Safety includes the cost for hardware and software in the initial cost listed in the pricing. Please refer to the Pricing breakdown page within our RFP response for pricing on vendor supplied hardware and software along with agency supplied hardware and what the costs associated with that would be. There's also a brief breakdown of agency supplied hardware under item "G" in the "Overview" section.

i) Allow for the buyer to transition from the vendor's ALPR cameras to the buyer's camera mid-contract for the reduced rate of utilizing the buyer's own equipment;

- Flock Safety unfortunately cannot allow for a transition from the vendor's supplied ALPR cameras to the buyer's cameras during the middle of the contract for the reduced rate of utilizing the buyer's own equipment. There is far too much work involved with building out a deployment plan, getting the proper permits for installation, having our local technicians come out to complete site surveys plus the installations thereafter and any necessary maintenance after the fact which is all included in our annual subscription cost. Flock Safety is however happy to offer a 12 month initial term (12 months is the shortest initial term we offer) and allow the buyer to transition from the vendor's ALPR cameras to the buyer's own equipment after completion of the initial 12 month term. If this route were taken, Flock Safety's local installation technicians would come out to remove all of the vendor's supplied hardware and then we could transition to implementing the software onto the buyer's own equipment and sign a new agreement reflecting that.

i) Allow for the buyer to transition from the vendor's ALPR cameras to the buyer's camera mid-contract for the reduced rate of utilizing the buyer's own equipment;

- Flock Safety unfortunately cannot allow for a transition from the vendor's supplied ALPR cameras to the buyer's cameras during the middle of the contract for the reduced rate of utilizing the buyer's own equipment. There is far too much work involved with building out a deployment plan, getting the proper permits for installation, having our local technicians come out to complete site surveys plus the installations thereafter and any necessary maintenance after the fact which is all included in our annual subscription cost. j) Options for annual and quarterly billing;

- Flock Safety unfortunately does not allow for quarterly billing. Our standard billing terms are Annual, Net 30. We can set the billing terms up to where the Oklahoma City PD would not be invoiced until the first camera is installed and operational though so there would not be a payment due until our installation technicians start installing.

REQUESTED SCOPE OF SERVICES

k) Provide a per camera cost for the buyer utilizing their own camera/equipment through the vendor's AI platform;

- If the buyer chooses to utilize their own camera/equipment through Flock's AI software platform, the cost would be \$1,500 per camera per year and there would be a one-time \$500 implementation fee for up to the first 10 cameras implemented into the Flock software platform. Any camera beyond the first 10 would be subject to \$50 per camera, one-time cost.

l) Vendor will replace/repair any broken, non-functioning, or limited functioning cameras supplied by the vendor as part of the contract for damages not caused by the buyer during a move;

- All Flock products are under a full maintenance warranty for the duration of the buyer's contract. Flock cameras have built-in alarms to alert our Support Team if a camera is not performing at optimal standards. In the event of a camera performance issue, an alert will notify our Support Team in which they will investigate the issue to see if it can be fixed remotely or if they need to create a Work Order to send a local installation technician to either fix or replace the equipment at NO charge to the Oklahoma City PD.

m) Ability to capture two (2+) lanes of traffic simultaneously with a single camera from a vertical platform;

- Flock Safety complies.

n) Ability for cameras to capture and process up to 30,000 vehicles in a day;

- Flock Safety complies.

o) Ability for cameras to be powered by either direct power, solar or other alternative power means;

- Flock Safety complies. The Falcon LPR is able to be powered by Solar or 120v AC power.

p) Web based footage retrieval tool with filtering capabilities such as vehicle color, vehicle type, vehicle manufacturer, partial or full license plate, state of license plate, and object detection;

- Flock Safety complies. Flock's cloud web based platform allows for all users to search for 24 unique characteristics of a vehicle including vehicle color, vehicle type, vehicle manufacturer, partial or full license plate, state detection of the license plate to eliminate false positive hotlist alerts, object detection, paper plates, no plates, bumper stickers, window stickers and decals, roof racks, back racks, set up alerts, and more.

q) Utilizes a motion capture feature to start and stop recording without the need for a reflective plate. This motion detection capability should allow for unique cases such as bicycle capture, ATV, motorcycle, pedestrians etc.;

- Flock Safety complies. The Falcon ALPR cameras are motion activated to capture the rear of ALL vehicles (including trailers, semis, buses, etc), bicycles, golf carts, and motorcycles. There are no filters for pedestrians when conducting an investigative search however. The ALPR cameras will capture pedestrians if they are within the capture frame when a vehicle, ATV, motorcycle, bicycle, etc. passes by but it will not capture pedestrians on their own for privacy purposes and because Flock does not do facial recognition.

REQUESTED SCOPE OF SERVICES

r) Option for Cloud storage of footage;

- Flock Safety complies. Flock Safety stores images for 30 days out of the box with the option to pay for additional storage if more than 30 days of storage is needed.

s) Built-in integration with NCMEC to receive AMBER Alerts to find missing children;

- Flock Safety complies.

t) Built-in integration with NCIC for stolen vehicles, wanted persons and other NCIC alerts;

u) Privacy controls to enable certain vehicles to “opt-out” of being captured;

- Flock Safety partially complies. Flock Safety's ALPR cameras are motion activated. With that, the camera will capture images of all vehicles that pass by. Within the web based application, users have the ability to search on any vehicle. There is the option to customize alerts and searches within the application.

v) System should be able to partner with AXON, a major existing partner of the Contracting Entity, and be natively and directly integrated into Evidence.com;

- Flock Safety is the ONLY ALPR vendor on the market that has a native and direct integration to Evidence.com and that is supported by our attached signed letter from AXON'S Chief Operating Officer stating such on their letterhead. If any other vendor's response says that they have a native and direct integration to Evidence.com that is false and our attached letter within the RFP response supports that.

w) System should be fully integrated into a dynamic network of Axon's Fleet 3 mobile ALPR cameras for patrol cars as well as the system's cameras;

- Flock Safety is the only ALPR vendor on the market that has a direct integration with Axon's Fleet 3 mobile ALPR camera as well. In fact, the software and guts of the hardware are powered by Flock Safety's proprietary Vehicle Fingerprint software. Axon's web URL here supports that and lists Flock by name and company logo for their Fleet 3 device <https://www.axon.com/products/axon-fleet-3>. Currently, all Fleet 3 LPR captures will flow into the Flock Safety software platform's "LookUp Tool" which is Flock's nationwide database. All of the fixed/stationary Flock ALPR reads flow into this LookUp Tool as well. By the end of April 2023, when the Police Department runs an Investigative Search through the Flock software platform, they will be able to query all of their Flock Stationary ALPR cameras along with all of the Fleet 3 LPR captures within the Flock Safety platform. There is no other ALPR vendor on the market that has this capability.

REQUESTED SCOPE OF SERVICES

rx) Access to additional ALPR system cameras purchased by homeowner associations and private businesses at no additional cost, lifetime maintenance and support included in subscription price;

- The Oklahoma City Police Department would have full access to LPR reads + hotlist alerts from any private camera purchased as long as that Flock ALPR camera is within the Oklahoma City PD's jurisdiction. This could include homeowners associations, apartment complexes, private businesses, K-12 schools, universities, etc. all of which Flock Safety does business with. Lifetime maintenance AND support are included in the annual subscription price, there are no additional costs for this.

y) Proposers should provide delivery and installation and if not the manufacturers of the systems, be knowledgeable of the products and have quick turn around on problem resolution;

- Flock Safety complies. Flock Safety is a turnkey solution and Flock itself manufactures all of our products within the United States. Flock Safety products can only be purchased from Flock Safety and Flock does not utilize any resellers, contractors or third parties. Flock will provide delivery, full installation and ongoing maintenance with all of our products.

z) Proposers should provide monitoring software to predict potential failures, obstructions, tilts, and other critical or minor issues;

aa) System must integrate with FUSUS;

- Flock Safety complies.

bb) Data must be web based to allow for field users to actively monitor pre-selected cameras;

There are no limitations or caps for how many images can be downloaded from the Flock software platform through Evidence.com - The PD can do this within the Investigative Search platform along with the Hotlist alerts platform with the click of a button through the direct and native Evidence.com integration.

ff) Local data must be sharable with other agencies via the web portal;

- Flock Safety complies. Data is able to be shared with other agencies as long as it is approved by the agency owning that data. A list of Law Enforcement agencies within the State of Oklahoma that utilize and are contracted with Flock Safety has been provided in the "References" section as well.

Vehicle Recognition System

The foundational layer to Flock Safety’s public safety operating system is the Flock Safety Falcon® infrastructure-free LPR cameras. Unlike traditional LPR, the Flock Safety Falcon® uses Vehicle Fingerprint technology* to transform hours of footage into actionable evidence, even when a license plate isn't visible, and sends Hot List alerts to law enforcement users when a suspect vehicle is detected. The Flock Safety Falcon® has both fixed and location-flexible deployment options with 30% more accurate reads than leading LPR.*

PROJECT TEAM MEMBERS AND LOCAL SERVICE SUPPORT

Flock Safety is able to provide the Contracting Entity with excellent customer service for the reason that the Oklahoma City PD will have a dedicated Major Accounts Manager Sales Rep along with a dedicated Major Accounts Customer Success Manager. Both of these individuals (Ryan Elswick and Morgan Herrig in this case) will be the primary points of contact at Flock Safety for the contracting entity. Ryan Elswick has already been working closely with the Oklahoma City PD for over the past year plus and has created a great rapport and relationship with members of the Oklahoma City Police Department. Additionally, Flock Safety offers 24/7 support via email and phone. The contracting entity may reach out to our Support at any time for troubleshooting, questions, emergencies, equipment failure, etc. Flock Safety has local full-time technicians that live in Oklahoma who will handle all new installations and ongoing maintenance as well resulting in a quick turnaround for issues. Flock Safety has built in alarms on all of our hardware devices so if an ALPR camera stops capturing images after a 15-20 minute period, an alert gets sent to our Support Team to diagnose the problem. They will see if they can diagnose the issue remotely and if not, a work order will be created and a technician will be scheduled to come out and remedy the problem. Flock offers "Daily Digest Emails" as well notifying key stakeholders at the PD of when maintenance will occur along with new camera installations, relocations, etc. Support's Phone number is 866.901.1781 and the email is Support@flocksafety.com

There are over 40,000 Law Enforcement cameras nationwide that feed into this network that would be accessible by the OKC PD for investigations), Vehicle Description Alert (gives the ability to input suspect vehicle descriptions for Hotlist alerting if the license plate is unknown) along with our ESRI Based Mapping software which puts all of ALPR Cameras on a visual map of the city and is another form of our Hotlist) - All of our software features and capabilities are under one roof through the FlockOS platform. This is a cloud based system and can be accessed on any device that has Internet/Browser capabilities. Flock also offers unlimited users so the FlockOS software can be accessed by anyone at OKC PD that has login credentials, there are no licensing fees whatsoever, truly unlimited.

Flock provides cellular service for our customers through our annual subscription pricing, it's not required from our customers. Support and maintenance of existing systems is provided to our customers at NO additional cost. If a camera, solar panel, backup battery or any of the other equipment were to malfunction, stop working, etc. Flock will replace that hardware at NO cost through the lifetime of the customer's contract. - Any new software enhancements or upgrades
- Unlimited Cloud Data Storage through Amazon Web Services GovCloud
- LTE Cellular Data SIM Card either through Verizon or AT&T FirstNet (this will depend on the location of the camera, our field technicians conduct a site survey before installation to determine which provider has the best coverage)

Pricing for our Cameras (includes installation) on an annual basis is \$3,000 per camera per year. The Oklahoma City PD already has 25 Flock Falcon ALPR Cameras through a National 1 Year Pilot Study and Flock is offering ALL participants of that Study the option to keep those existing 25 ALPR Cameras at \$2,500 per camera per year. Any cameras added beyond the 25 would be subject to the \$3,000 per camera per year price point which is new pricing that took effect earlier this year. Flock has not raised pricing on our ALPR cameras for 3+ years prior to the \$500 price increase earlier this year.

As an example, if the PD were to want to move forward with a Total of 200 Flock ALPR Fixed Cameras the pricing would be as such:

- 25 Cameras at \$2,500 per camera per year = \$62,500
- 175 additional Cameras at \$3,000 per camera per year = \$525,000
- \$0 Installation for all 175 NEW Cameras (the 25 are already installed)

Total Investment: \$587,500/yr (this would be a price not to exceed and is all inclusive) - there would be no additional costs beyond this price-point for this amount of ALPR cameras.
