ITEM NO. 1

Increase (+) \$29,000.00 and 10 Calendar Days

Description

The following table includes the corresponding quantity adjustments.

Contract No.	Contract Item	Current Qty.	Amended Qty.	Difference	Unit	Unit Price	Total Difference
OCAT-WPA-2419--01-04	Portland Cement Concrete Pavement (6")(Class AA)	600	890	290	S.Y.	\$ 100.00	\$ 29,000.00
Total							\$ 29,000.00

Justification

The primary spillway for the proposed detention pond drains to an existing reinforced concrete box (RCB) structure under N. Council Rd. The area downstream of the proposed spillway and east of the RCB under N. Council Rd. is overgrown with trees, brush and miscellaneous debris. In order to ensure the proposed detention pond primary spillway functions properly, vegetation in this area needs to be removed and erosion protection installed. This amendment includes the clearing and grubbing and installation of a concrete spillway between the detention pond spillway apron and the existing RCB apron under N. Council Rd.

ITEM NO. 2

Increase (+) 17 Calendar Days

Description

Additional calendar days due to weather.

Justification

During the month of February, the Contractor experienced eleven (11) days of delay due to several rain/ice/snow events. The contract includes seven (7) anticipated lost weather days, resulting in a net increase of four (4) calendar days to the contract due to weather. During the month of April, the Contractor experienced sixteen (16) days of delay due to rain events. The contract includes three (3) anticipated lost weather days, resulting in a net increase of thirteen (13) calendar days to the contract due to weather. The total weather days added to the contract are seventeen (17).

In consideration of these changes, T.J. Campbell Construction Co's Construction Contract is altered as follows:
