LIGHT TASK CHAIR AND STOOL

Design that responds to you.

What goes into the award-winning line of Rio® plastic chairs? Patented flexing technology, for one.

Our complete family of Rio models feature our patented Active Rebound Control (ARC) Technology® — a performance-minded flexor insert that supports a wide range of motion (20 full degrees to be exact) and responds precisely to the amount of weight pressed against it.

Add a fresh, modern color palette and you've got a seating solution that allows for more movement, day-long comfort and flexibility than any other chair in its class.

Better

Mika

MULTIPURPOSE CHAIR, COUNTER STOOL AND BAR STOOL

Design above.

Mika sits above most others in its class—and not just because it was a multi-award winner. Mika is elevated. Upholstered or non-upholstered, it reaches new heights in what a molded shell chair can be. From top to bottom, the design flows. Back and forth, the design rocks with 15 degrees of flex. Up and up, the design pushes an upholstered seat farther than ever before. And in the end, you arrive at a place of sit-ability and stack-ability hard to find in something that looks this good.

LINKING TABLES

High traffic. Low stress.

Tables are like bridges joining chairs and multiseating elements. Connect like items together or mix them up. For instance, a table can link to a guest or patient chair on one side and a preconfigured, freespan, start or end element on the other. In a start/center/end configuration, a table must connect to either a start or an end. End tables have two legs and 90° radius and square tables have one leg.

For almost 25 years, SitOnIt Seating products have been expertly designed to provide the best comfort and support in the industry.

Glides are an often overlooked element in the seating specification process, but they play a crucial role in ensuring proper interface between the chair and the floor.

This application guide offers general guidelines to assist customers with choosing the best glide for their needs. The guide is based on extensive lab testing and hands-on experience with selling chairs in a variety of environments, as well as review and consultations with glide experts.

Felt glides are subject to wear and tear and require periodic replacement.

- **BEST:** Best choice for this application based on our testing.
- **BETTER:** Better choice for this application based on our testing.
- **ACCEPTABLE:** Acceptable choice for this application based on our testing but consider BETTER or BEST options.
- **NR:** Not recommended for this application based on our testing.

This Application Guide is provided for informational purposes only. Always follow the manufacturer's instructions for care and maintenance of your flooring. Periodic inspection and maintenance of glides is critical to minimize the risk of damage to your flooring, especially when using glides with floors that are prone to scratching and marring. Testing was performed under simulated conditions. Because a wide range of factors impact actual performance, including how your chairs are used; the state of the glides and flooring; and dirt, moisture and other environmental factors, Exemplis does not warrant you will achieve any specific result. Actual results may vary.

CARE AND CLEANING

Safety First

To ensure proper cleaning and/or disinfecting, it's important to consult with facilities or safety personnel and follow the manufacturer's instructions—including detailed dilution requirements, safe application instructions, dwell time for effective disinfecting and more.

Per CDC instructions, always read and follow the directions on the label to ensure safe and effective use.

- Wear skin protection and consider eye protection for potential splash hazards
- Ensure adequate ventilation
- Use no more than the amount recommended on the label
- Use water at room temperature for dilution (unless stated otherwise on the label)
- Avoid mixing chemical products
- Label diluted cleaning solutions
- Store and use chemicals out of the reach of children and pets

Always read and follow the directions on the cleaner/disinfectant labels to ensure safe and effective use.

Clean + Disinfect

Cleaning and disinfecting are two distinct actions, and knowing the difference between the two can help promote safety in any space. This comprehensive, 2-step process requires cleaning before disinfecting.

Clean

CLEANING REMOVES GERMS

- The act of removing visible dirt and debris from objects or surfaces
- Cleaning works by using soap/detergent with water to remove impurities from surfaces either manually or mechanically
- Cleaning does not kill germs, but by removing them, it lowers their numbers and risk of spreading infection

Clean (Cont.)

CLEANING GUIDELINES AND TIPS

- Start by lightly dusting with a soft, grit-free cloth or chamois (no wiping)
- After dusting, dampen cloth or chamois with a solution of mild, non-abrasive liquid soap and water
- Wipe clean and dry with a soft, grit-free cloth, sponge or chamois
- Avoid using abrasive cleaners and steel wool to prevent scratching
- Test any cleaning method or agent in an inconspicuous area of the surface

Disinfect

DISINFECTING KILLS GERMS

- This process comes after a surface is cleaned
- Disinfecting kills germs on objects or surfaces with the use of chemicals
- Most common disinfectants include one of the following active ingredients: Quaternary Ammonium (Quats), Sodium Hypochlorite (Bleach), Hydrogen Peroxide, or 70% Isopropyl Alcohol
- EPA-registered disinfectants List N: Disinfectants for Use Against SARS-CoV-2

DISINFECTING GUIDELINES AND TIPS

- Follow the disinfectant manufacturer's instructions when applying the agent
- Once finished, remove all disinfecting agents from the surface with water and a grit-free cloth, then dry
- If not properly removed, disinfectant residue could degrade product life and appearance

Cleaning + Disinfecting efforts should be part of an organization's comprehensive systems-based approach to provide a safe and sustainable workspace.

CARE AND CLEANING

Cleaning and disinfecting are two distinct actions, and knowing the difference between the two can help promote safety in any space. This comprehensive, 2-step process requires cleaning before disinfecting.

Cleaning Our Soft Surfaces

Our textiles and meshes offer a performance and cleaning story unmatched in the industry.

Our Carded Textile Program offers over 700 bleach-cleanable fabrics through our SitOnIt Seating private label and partnership textile program.

MESH:

- All of our mesh materials are bleach-cleanable. This determination is supported by 3rd-party results from completing AATCC 188 Colorfastness to Bleach testing where the subject material is submersed, and friction stirred in a diluted sodium hypochlorite solution.
- Cleaning of our mesh materials varies. Check out the [Mesh Spec + Care Guide](#) on our website for more information.

SEATING FABRICS:

- Soft surfaces on seating can vary widely from woven, knits and leather to coated textiles such as vinyl and polyurethane. Woven and knits tend to be more permeable than vinyl or polyurethane.
- Cleaning of our seating fabric materials varies. For a list of our textile spec + care guides, see the [Materials Downloads](#) on our website.
- For a list of bleach-cleanable materials, see our [Carded Library](#) and select "Bleach Cleanable" under performance.

SCREEN FABRICS:

- Cleaning of screen materials varies. For a list of our textile spec + care guides, see the [Materials Downloads](#) on our website.
- For a list of bleach-cleanable materials, see our [Carded Library](#) and select "Bleach Cleanable" under performance.

ARM ADJUSTMENT GUIDE

SitOnIt Seating offers a wide variety of arm styles and adjustments to accommodate all types of users doing a wide variety of tasks. The general adjustments for each arm type are described below. See the website or the product hang tag for specifics.

Armless

Any discussion of arm styles must begin with armless. Armless chairs and stools are less expensive and are easier to get in and out of. However, they do not provide ergonomic support for long-term sitting and task functions.

Most chairs and stools are available armless, but the selection may be limited to specific models. For instance, Freelance multipurpose chairs and stools can be specified armless, but not Freelance bariatric chairs.

Fixed

As the name implies, fixed arms cannot be adjusted. Also known as loop arms, cantilever arms and other names, these arms are commonly found on side and multi-seating as well as basic task seating.

Height-Adjustable

This is the most basic adjustable arm. The arm adjusts up or down. Height-adjustable arms are best for basic task work.

INSTRUCTIONS:

Glove Active, Knack, Non-Stop Heavy Duty, ReAlign, TR2 and Vectra

- To increase or decrease the arm height, press the button and pull up or push down on the arm.

Amplify, Focus, Focus 2.0, Vectra and Wit

- To increase arm height, press the button located under the front of the arm pad and pull the arm up.
- To decrease arm height, press the button located under the front of the arm pad and push the arm down.

Height-adjustable arms are available for Amplify, Focus, Focus 2.0, Glove Active, Knack, Non-Stop Heavy Duty, Novo, ReAlign, TR2, Vectra and Wit.

ARM ADJUSTMENT GUIDE

Height-/Width-Adjustable | Multi-Adjustable

Height-/width-adjustable arms are sometimes called multi-adjustable arms on certain products. The arm adjusts up and down and side to side. This provides more “elbow room” for larger people. Best for basic task work.

INSTRUCTIONS:

- Height: See instructions in the height-adjustable section.
- Width: To adjust the arm width, push down the lever located under the seat to unlock the width adjustment. Move the arm to the desired width and pull up on the lever to lock the arm in place.

Height-/width-adjustable arms are available for Focus, Glove Active, Knack, Non-Stop Heavy Duty, ReAlign and TR2.

Multi-adjustable arms are available for Amplify, Focus 2.0, Novo, Torsa and Vectra.

Height-/Width-Adjustable With Pivot | Multi-Adjustable (Height/Width) With Pivot

This arm adjusts up and down, side to side and 30° in or out.

INSTRUCTIONS:

- Height: The arm adjusts up or down. To increase or decrease the arm height, press the button.
- Width: The arm adjusts side to side. To adjust the arm width, push down the lever located under the seat to unlock the width adjustment. Move the arm to the desired width and pull up on the lever to lock the arm in place.
- Pivot: The armrest has three positions: 30° in, center or 30° out (Non-Stop Heavy Duty pivots 15-degrees). To pivot the arm, grasp the arm pad and move it to one of the three positions.

Height-/width-adjustable arms with pivot are available for Glove Active, Non-Stop Heavy Duty, ReAlign and TR2.

Height-Adjustable With Pivot

The arm adjusts up and down and 30-degrees in or out. The arms can be turned in to facilitate writing or keyboarding and turned out for other tasks.

INSTRUCTIONS:

- Height: To increase or decrease the arm height, press the button.
- Pivot: The armrest has three positions: 30-degrees in, center or 30-degrees out. To pivot the arm, grasp the arm pad and move it to one of the three positions.

Height-adjustable arms with pivot are available for Glove Active, ReAlign and TR2.

Height-Adjustable Break-Away

The arm adjusts up or down and folds down 90-degrees. The folding arm allows for fast and easy ingress and egress and is also great for users with large key rings, tool belts or other personal gear.

INSTRUCTIONS:

- Height: The arm adjusts up or down. To increase or decrease the arm height, press the button.
- Break-Away: To fold the arm back, push down the lever located under the seat to unlock the arm and move the arm back. To return the arm to the original position, pull the arm up until it locks into place.

Height-adjustable break-away arms are available for Non-Stop Heavy Duty (stool only).

ARM ADJUSTMENT GUIDE

Multi-Adjustable (Height/Width) Articulating

The articulating arm adjusts up and down and side to side while the arm pad pivots left and right.

Non-Stop Heavy Duty offers a multi-adjustable articulating arm option.

Fully Adjustable (6-Way)

Let's replace it with: This control includes a weight-activated back recline tension control and a tilt-limiter function

- Height-adjustment
- Seat depth adjustment
- Recline tension override: if you need more or less tension than the one set by the mechanism automatically

- Recline tilt limiter: The tilt limiter is integrated into the height-adjustment control. Pull the paddle all the way out to lock the chair to a fully upright position. The three grooves in the handle correspond to three tilt ranges. Push the paddle in and the mechanism will subtly click into the groove when adjusted, locking in the range.

For longer task applications, try three more halfturns to the right.
- Height-adjustment: Facing forward, the single control paddle is under the seat on the right. Pull up on the paddle to adjust. Stand slightly to raise the seat. Sit to lower the seat.
- Seat slider: While seated, locate the tab on the left side of the chair. Pull lever out to adjust the seat position. Slide seat forward or back to desired setting.

Power/Data Placement: Conference Tables

Power/data units (not including Rapport Power/Data Trough) will be placed on standard-shaped conference tables as outlined below, or provide a drawing indicating desired custom placement/orientation. A quantity of four or more units per table requires a drawing. When custom placement is required, we can provide assistance in determining optimal placement for your tables.

- 1 power/data unit per table: default placement is centered, oriented parallel with the length of the table.
- 2 or 3 power/data units per table: default placement is centered lengthwise, evenly distributed, avoiding base and/or other obstructions, and oriented parallel to the length of the table, and maintaining a minimum distance of 20" from the ends of the table.
- 4 or more power/data units per table: drawing is required.
- Please note that center power may not be available with all base types, shapes and sizes due to base and/or other obstructions. Please inquire before ordering.

Conference Table Base Wire Management Options

Three style-specific base wire management options are offered. Please see below for options and detailed ordering instructions.

How To Order

When specifying an option for an individual base on a conference table, it is important to identify which base(s) should get the option(s). This is due to the face that on some conference tables, the bases on the same table can differ in size. Each base is numbered as per the example below; please use the correct base number you would like your option to be applied with. For wedge shape tables, base #1 is on the smaller end of the table.

IQ Non-Sequential System

The IQ non-sequential power system allows users to "daisy chain" multiple power centers together. The system's "brain" allows users to connect up to 8 power/data centers off of one infeed. iQ was even created with smart LED indicators that illuminate green when you're connected and ready to plug in and a red light when you've linked too many units.

- The IQ Non-Sequential System consists of a "Brain" unit with starter cord and up to eight power/data units, which can be connected to each other in any order you choose.
- IQ Non-Sequential Systems are available with the following Power/Data units: Axil® Z, Glenbeigh Contemporary, Mho®, and Nacre® (see below for finish availability).
- Please specify desired placement, or provide a drawing illustrating placement.
- IQ Non-Sequential Systems are available in a corded version only; hardwire is not available.
- You may link a maximum of eight units per chain, and the standard maximum distance between units is 60"
- Spans greater than 60" are possible via the use of Jumper cords, however, each jumper cord counts as one unit towards the 8-unit maximum

IQ Non-Sequential System on tables ≤ 60" in length

IQ Non-Sequential System on tables > 60" in length

IQ Non-Sequential System on tables > 60" in length with added jumper cords (each jumper cord counts as one unit towards the 8-unit maximum.)
