

AMENDMENT NO. 5 TO CONTRACT FOR ENGINEERING SERVICES

This amendment is made and entered into this 5TH day of NOVEMBER, 2024, by and between the Oklahoma City Water Utilities Trust, a municipal trust, herein called "Trust", and Tetra Tech, Inc., herein called "Engineer".

WITNESSETH:

WHEREAS, the Trust and the Engineer entered into an agreement on July 31, 2018 as follows:

Project No. WC-0930
Water Transmission Main and Booster Station No. 9
Improvements for Draper-Hefner System Interconnection; and

WHEREAS, this project provides for design and all other engineering services related to interconnecting the Hefner and Draper service areas to allow the transfer of treated water between the two systems by constructing approximately 3,000 linear feet of new 42-inch water transmission main and modifying existing Booster Station No. 9; and

WHEREAS, subsequent to execution of the original contract, the original alignment and interconnecting piping were modified due to land acquisition issues; and

WHEREAS, due to these modifications, the Engineer revised the Engineering Report to incorporate the new data; and

WHEREAS, additional survey was required for the pipeline alignment along Reno Avenue, crossing locations, as well as the 48-inch pipeline (Project WC-0853) interconnections to Booster Station No. 9; and

WHEREAS, the control scheme and communication with Booster Station No. 14 (and system to the north) were also modified; and

WHEREAS, the above work was authorized under the auspices of **Amendment No. 1**; and

WHEREAS, subsequent to execution of the original contract as previously amended, it was determined to relocate the backup generator to the east of the pump station; and

WHEREAS, due to this relocation, the Engineer was required to provide a new site plan and electrical design for the backup generator and the evaluation, concept development, and

drafting of all desired operational scenarios for water delivery and coordination with Project WC-0853; and

WHEREAS, additionally, the Engineer provided the following design services, including: 1) realignment based on the revised interconnect orientation and coordination with Project WC-0853 design; 2) corrosion protection due to the change from DIP to steel; 3) sizing of PRV and vault design of the 42-inch Booster Station No. 9 discharge line to Council Road and siting of the PRV vault in a location on the north side of Reno Avenue; and 4) landscape design for the new backup generator and utility coordination for Booster Station No. 4; and

WHEREAS, the above work was authorized under the auspices of **Amendment No. 2**; and

WHEREAS, subsequent to execution of the original contract as previously amended and due to Projects WC-0853 and WC-0930 being bid as one integrated project, it was determined to be in the best interest of the Trust to remove corrosion protection services from the scope of work previously authorized in Amendment No. 2 and include geotechnical investigation services for both projects; and

WHEREAS, cathodic protection services for Project WC-0930 will be incorporated into the scope of work for Project WC-0853; and

WHEREAS, additionally, it was determined that potholing services are required to evaluate the subsurface of the new alignment; and

WHEREAS, services for potholing and geotechnical investigation were not included in the original scope of work, therefore, it was necessary to incorporate Exhibit E – Additional Services to compensate the Engineer for these services; and

WHEREAS, the above work was authorized under the auspices of **Amendment No. 3**; and

WHEREAS, the original design included three manual butterfly valves along the 42-inch transmission main; and

WHEREAS, subsequent to execution of the original contract as previously amended, it was determined to be in the best interest of the Trust to revise the electrical design to include automation of the three butterfly valves and SCADA integration at Booster Station No. 9; and

WHEREAS, the Engineer was required to provide the following design services, including, but not limited to: 1) adding power supply and control wiring to vaults on electrical drawings; 2) modifying actuator callouts and specifications; 3) structural design for the addition of pressure sustaining/reducing valve vault bypass line and vault modifications for larger vault with beam and access hatches; and 4) additional progress meetings and coordination efforts with subconsultants and property owners necessary for completion of the project; and

WHEREAS, the above work was authorized under the auspices of **Amendment No. 4**; and

WHEREAS, subsequent to execution of the original contract as previously amended, it has been determined that additional design changes are required due to the review/comment process including but not limited to, ADA compliance items, storm water control and erosion plan sheets, incorporating and subsequently removing the interconnect valve to connect to the main installed under Project WC-0853, and the addition of a private utility pole; and

WHEREAS, the original contract must be amended to provide for the Engineer's increased scope of work as outlined above and associated fees; and

WHEREAS, the total compensation to be paid to the Engineer for this Contract and Amendment shall be as follows:

For the original contract:

Not to exceed \$542,668 for engineering services

For Amendment No. 1:

Not to exceed \$30,403 for engineering services

Information required to complete this Schedule, if not shown above, will be shown in the Declarations.

- A. For all sums which the insured becomes legally obligated to pay as damages caused by "occurrences" under Section I – Coverage A, and for all medical expenses caused by accidents under Section I – Coverage C, which can be attributed only to ongoing operations at a single designated construction project shown in the Schedule above:
1. A separate Designated Construction Project General Aggregate Limit applies to each designated construction project, and that limit is equal to the amount of the General Aggregate Limit shown in the Declarations.
 2. The Designated Construction Project General Aggregate Limit is the most we will pay for the sum of all damages under Coverage A, except damages because of "bodily injury" or "property damage" included in the "products-completed operations hazard", and for medical expenses under Coverage C regardless of the number of:
 - a. Insureds;
 - b. Claims made or "suits" brought; or
 - c. Persons or organizations making claims or bringing "suits".
 3. Any payments made under Coverage A for damages or under Coverage C for medical expenses shall reduce the Designated Construction Project General Aggregate Limit for that designated construction project. Such payments shall not reduce the General Aggregate Limit shown in the Declarations nor shall they reduce any other Designated Construction Project General Aggregate Limit for any other designated construction project shown in the Schedule above.
 4. The limits shown in the Declarations for Each Occurrence, Damage To Premises Rented To You and Medical Expense continue to apply. However, instead of being subject to the General Aggregate Limit shown in the Declarations, such limits will be subject to the applicable Designated Construction Project General Aggregate Limit.

- B.** For all sums which the insured becomes legally obligated to pay as damages caused by "occurrences" under Section I – Coverage A, and for all medical expenses caused by accidents under Section I – Coverage C, which cannot be attributed only to ongoing operations at a single designated construction project shown in the Schedule above:
1. Any payments made under Coverage A for damages or under Coverage C for medical expenses shall reduce the amount available under the General Aggregate Limit or the Products-completed Operations Aggregate Limit, whichever is applicable; and
 2. Such payments shall not reduce any Designated Construction Project General Aggregate Limit.
- C.** When coverage for liability arising out of the "products-completed operations hazard" is provided, any payments for damages because of "bodily injury" or "property damage" included in the "products-completed operations hazard" will reduce the Products-completed Operations Aggregate Limit, and not reduce the General Aggregate Limit nor the Designated Construction Project General Aggregate Limit.
- D.** If the applicable designated construction project has been abandoned, delayed, or abandoned and then restarted, or if the authorized contracting parties deviate from plans, blueprints, designs, specifications or timetables, the project will still be deemed to be the same construction project.
- E.** The provisions of Section III – Limits Of Insurance not otherwise modified by this endorsement shall continue to apply as stipulated.
