

MEMORANDUM

OCAT Agenda  
Item No. V. A  
7/25/2024

TO: Trustees, Oklahoma City Airport Trust

FROM: Jeff Mulder, Director of Airports

Plans and Project Manual to be advertised for bids, Project No. OCAT WPA 2419, Drainage Improvements – Phase 1.

**Location:**

Wiley Post Airport

**Background:**

On August 25, 2022, Trust amended the Contract for Professional Services with MKEC Engineering, Inc. (Consultant), which includes design for Project No. OCAT WPA 2419, Drainage Improvements – Phase 1 (Project), at Wiley Post Airport (Airport).

During particularly heavy rain events (10-year events or greater), Trust and tenant properties experience slow drainage, resultant ponding, and flooding resulting in damaged property. Wiley Post Airport will be widening the pavement of Runway 17R/35L. This presents an ideal opportunity to incorporate drainage improvements adjacent to the runway. Installing the dry detention pond and additional length of reinforced concrete box culvert (RCB) in conjunction with the widening project will reduce the overall impact and cost to the Airport and its users. The Consultant's construction cost estimate for the Project is \$4,210,833. The Plans and Project Manual have been completed and are submitted for approval. No Federal funds are anticipated for this project.

**Bids to be Received:**

August 28, 2024, 10:00:00 a.m. CDT

**Estimated Construction Cost:**

\$4,210,833

**Recommendation:** Plans and Project Manual be approved and advertisement for bids be authorized.
