

MEMORANDUM

OCAT Agenda
Item No. V. Q
3/28/2024

TO: Trustees, Oklahoma City Airport Trust

FROM: Jeff Mulder, Director of Airports

Resolution authorizing the purchase of one 2025 Freightliner 114SD Tandem Runway De-Icer Truck, from Premier Truck Group, utilizing State Contract SW0035T, with certain optional items as described in the attached price quote, estimated cost \$311,729.

Location:

Will Rogers World Airport

Background:

The Department of Airport's Equipment Maintenance Division monitors the reliability and maintenance costs for the Oklahoma City Airport Trust's (Trust) runway de-icer truck to determine the appropriate time for replacement. The Trust has one 2006 runway de-icer truck that has reached its life expectancy due to increasing breakdowns and unavailable parts because the manufacturer is no longer in business.

A runway de-icer truck is critical to airport operations in keeping the friction level on the runway in usable condition during inclement weather. The State has a contract, SW0035T, that provides for runway de-icer trucks of equal make and model to the Trust's current runway de-icer truck. The contract price for the runway de-icer truck with all necessary options is \$311,729.

Recommendation: Resolution be adopted.
