RE: C-7279 and Case Number 10720

Dear Oklahoma City Planning Commission and City Commission,

We are writing to you about the above mentioned applications and cases. We are concerned that there is no timeline mentioned on the documents we received. We have listened to years of William Dirt Services construction noise and blowing dirt in our backyards.

Because of this we feel a timeline would be important. We understand that grading and filling will be needed to create a neighborhood. But, because we have had to endure so many years of construction noise due to the illegal operation of Williams Dirt Services in operating a dirt strip mine we are requesting an accelerated timeline. We look forward to another neighborhood added to our area. However, we think a timeline of this neighborhood is imperative to the beauty and peacefulness of this area.

In addition, we thank you for all of your help in stopping this illegal dirt strip mine. We are so grateful.

Mike and Delana Jordan, Rowlett Estates

Keen Oaks Neighborhood

Noma Road Neighborhood
