

Planning Commission Minutes
May 26, 2022

(The agenda was filed with the City Clerk of The City of Oklahoma City at 1:59 p.m. on May 23, 2022.)

17. (PC-10816) Application by Joe and Christine Blake, to rezone 4404, 4408, 4420 and 4428 SE 154th Street from the AA Agricultural District to the RA-2 Single-Family Two-Acre Rural Residential District. Ward 4.

The applicant was present. There were no protestors present.

RECOMMENDED APPROVAL.

MOVED BY PRIVETT, SECONDED BY HINKLE

LAFORGE;

ABSENT: FRALEY, PENNINGTON

STAFF REPORT
The City of Oklahoma City
Planning Commission
May 26, 2022

Item No. IV. 17.

(PC-10816) Application by Joe and Christine Blake, to rezone 4404, 4408, 4420 and 4428 SE 154th Street from the AA Agricultural District to the RA-2 Single-Family Two-Acre Rural Residential District. Ward 4.

I. GENERAL INFORMATION

A. Contacts

Applicant

Joe and Christine Blake
(405) 651-0469
Ckblake1@hotmail.com

B. Case History

This is a new application. This application is associated with case number DA-26839 an application for Deed Approval by Public Hearing.

C. Reason for Request

The purpose of this request is to change the existing agricultural based zoning to a residential based zoning that will permit rural residential development.

D. Existing Conditions

1. Size of Site (8.2 Acres)

2. Zoning and Land Use

	Subject Site	North	East	South	West
Zoning	AA	AA	AA	AA	AA
Land Use	Residential	Residential	Residential	Residential	Residential

3. Comprehensive Plan Land Use Typology Area: Rural – Medium Intensity (RM)

Rural – Medium is similar to the Rural-Low Typology Area except that it allows higher housing densities. These areas are usually near a fire station. Rural-Medium areas are often located adjacent to Urban-Low and Urban Reserve typologies, which are areas intended to urbanize in the future. While there is no expectation for urban services, RM areas have limited potential to connect to City water or sewer service, and may become more integrated into the urbanized area in the distant future. Commercial and light industrial uses may be appropriate provided they do not negatively impact the rural residential character.

- 4. Development Context:** The subject site is located on the south side of SE 154th Street, east of S Sunnyside Road. The site is zoned AA and developed with two residences and multiple outbuildings. Surrounding the site are 5- and 6-acre residential parcels to the north, south and west, and an undeveloped 5-acre parcel abutting the site on the east. The south side of the adjacent parcel to the west is zoned I-1 and is used as an outdoor equestrian training site. The application proposes rezoning the subject site from AA to the RA2 District which would allow the parcel to be split into four residential lots. The application is associated with DA-26839, an application for lot split deed approval.

II. REVIEW COMMENTS

This application was submitted to the following agencies, departments, and/or divisions for review and comment. An asterisk indicates that the agency, department, and/or division responded with no adverse comments.

A. Outside Agencies

- 1. Oklahoma City-County Health Department (OCCHD)**
- 2. Oklahoma City Urban Renewal Authority (OCURA)**
- 3. Oklahoma Gas and Electric (OGE)**
- 4. Oklahoma Water Resources Board (OWRB)**
- 5. School District (Moore)**
- 6. Oklahoma Department of Transportation (ODOT)**
- 7. Oklahoma Natural Gas (ONG)**
- 8. Oklahoma Electric Cooperative (OEC)**

B. City Departments

- 1. Airports**
- 2. Central Oklahoma Transportation and Parking Authority (COTPA)**

3. Fire

Location is beyond rural response times, suppression is needed. If this is not served by City water, a water tank as required by the Subdivision Regulations and the Fire department is required.

4. Information Technology/Geographic Support

5. Parks and Recreation

6. Police

7. Public Works

a. Engineering

Storm Sewer Availability

- 1) The Public Works Drainage Division staff has reviewed the subject application. All development, new construction, and/or substantial improvements planned within the proposed area shall be subject to chapter 16 of the Oklahoma City Municipal Code.
- 2) Storm sewers in accordance with the City's Drainage Ordinance will be required. Development abutting section line roads with drainage flows that exceed the capacity of OKC standard ditch detail (D-100) will necessitate the installation of enclosed storm sewer and/or concrete channel. These improvements shall be placed to provide a minimum of 35' clearance distance from the centerline of the section. Concrete channels must be entirely outside public right-of-way.
- 3) A flood and/or drainage study will be required to establish finished floor elevations, common lot areas or private drainage easements. A final plat should not be submitted until the study has been reviewed and approved by the Public Works Department.
- 4) Plans for drainage improvements within the private drainage reserves and/or common areas must be submitted for review, and payment of inspection fees shall be made prior to construction. Building permits will not be issued until construction is complete. If a subdivision abuts a stream, the private drainage easements and/or common area along stream shall extend to flow line of stream at a minimum.

- 5) Place the following note on the plat and construction plans: Maintenance of the Common Areas and/or Private Drainage Easements shall be the responsibility of the property owner. No structures, storage of material, grading, fill or other obstructions, including fences, either temporary or permanent shall be placed within the common areas and/or drainage easements shown.
- 6) Drainage easements shall be clearly denoted as public or private in owner's dedication, on the plat, and/or in the plat notes.
- 7) Construction within the limits of this PC will require an erosion control plan in accordance with EPA Storm Water Discharge permitting: CFR Vol. 57, No. 175, September 9, 1992. A copy of the EPA Notice of Intent (NOI) will be required prior to the issuance of work orders or permits for construction activities disturbing an area of 1/2 acre or greater.
- 8) Sidewalks shall be installed for all new construction and/or at the time of a residential use to a more intense use on all lots having frontage on public streets classified as a major or minor arterial.
- 9) All private roads /streets will have private storm sewer systems.
- 10) Engineer/Developers will be contacting PW for detention determination before they submit their final plat and plans.

8. Streets, Traffic and Drainage Maintenance

9. Stormwater Quality Management

10. Traffic Management

11. Utilities

a. Engineering

Wastewater Availability

- 1) No wastewater service is available for proposed improvements, private on-site sewage disposal systems are required in accordance with ODEQ rules and regulations. On-site sewage disposal system must be installed by an ODEQ certified installer and inspected by ODEQ.

b. Solid Waste Management

c. Water/Wastewater Quality

Water Availability

- 1) No water service is available for proposed improvements, private on-site water systems is required. The developer will provide an internal (on-site) private water distribution system capable of supply water to each lot or tract within the proposed subdivision or land development in accordance with City Standard Specifications and the current Subdivision Regulations.

12. Planning

a. Comprehensive Plan Considerations

1) LUTA Development Policies:

Site Design:

- Design buildings and sites to complement the character of surrounding areas and not detract from the open character of the landscape.
- Utilize Best Management Practices (BMP) for stormwater.
- Cluster development may be appropriate provided it maintains rural character by preserving open space and/or Environmentally Sensitive Areas (ESAs) by clustering lots, and maximum gross density requirements are not exceeded. Open space and/or ESAs should be permanently protected through mechanisms such as conservation easements, dedicated zoning tracts, deed restriction, etc.

National, state, and local permitting require basic best management practices for stormwater management.

Density: The Rural Medium LUTA outlines a minimum lot size of 2 acres and a gross density of 0.5 du/acre or below. Smaller lots (1-2 acres) may be appropriate in cluster developments provided the maximum gross density of the project is maintained. *The RA2 District allows densities of 0.35-0.45, within the LUTA range. The associated Deed Approval application proposes four lots of least 2 acres each.*

- 2) **Compatibility:** The comprehensive plan includes a land use compatibility matrix used to identify potential conflicts between major land use categories. When locating Low Intensity Residential adjacent to existing Agriculture or Low Intensity Residential, “Building Scale and Site Design” are potential compatibility issues identified by the comprehensive plan.

Building Scale and Site Design: The comprehensive plan calls for mitigation measures for new projects if residential lot sizes within Rural Medium areas are less than 40% of directly adjacent residential lots; the setbacks are significantly deeper or more shallow than the predominant character of adjacent development; the building's orientation to the street differs from the predominant character of adjacent development; building size or street frontage dramatically differs from that of adjacent uses, the lot coverage (including buildings and paved areas) dramatically exceeds that of adjacent uses, or if buildings within 40 ft. of a single-family residential structure exceed a 3:1 ratio in height. *The RA2 height, setbacks, and street frontage (lot width) regulations are similar or more restrictive than the surrounding AA District. Lot coverage allowed in the RA2 District is 30 percent compared to 5 percent for residential uses in the AA District. The 2-acre lots permitted within the RA2 District are considered compatible with the 5-acre lots allowed within adjacent AA Districts.*

- 3) **Service Efficiency:**
 - Water: *Not Served*
 - Sewer: *Need for Major Investment*
 - Fire Service: *Longer than Rural Service Level*
- 4) **Environmentally Sensitive Areas:** The following apply to the proposed development site:
 - Riparian Areas: N/A
 - Upland Forests: N/A
 - Vulnerable Aquifers: The aquifer in this area is considered highly vulnerable to depletion. The comprehensive plan recommends preserving natural open spaces and utilizing low impact development techniques whenever possible in new developments in order to maintain water quality and allow for the infiltration of stormwater onsite.
- 5) **Transportation System:** This site is located off SE 154th Street, a Private Street in the Rural Medium LUTA. Transit (bus) service is not available.
- 6) **Other Development Related Policies**
 - Preserve overall landscape character and natural landforms (rolling hills, native vegetation, etc.) to the greatest extent possible. (G-4)
 - Ensure that development in rural areas is consistent with local design and scale and does not detract from the open character of the landscape. (SU-45)

- Incorporate natural features (such as ponds, lakes, streams, rock outcroppings, stands of mature trees, and/or sizable individual trees) into the design of all residential, commercial, and industrial projects rather than eliminating, hiding, or limiting access to those features. (E-31)

b. Plan Conformance Considerations

The subject site is located on the south side of SE 154th Street, a private street located east of S Sunnyslane Road. The proposed RA2 District is requested in order to create four new lots. The application is associated with DA-26839 that indicates how lots would be split. The proposed density is consistent with the Rural Medium LUTA.

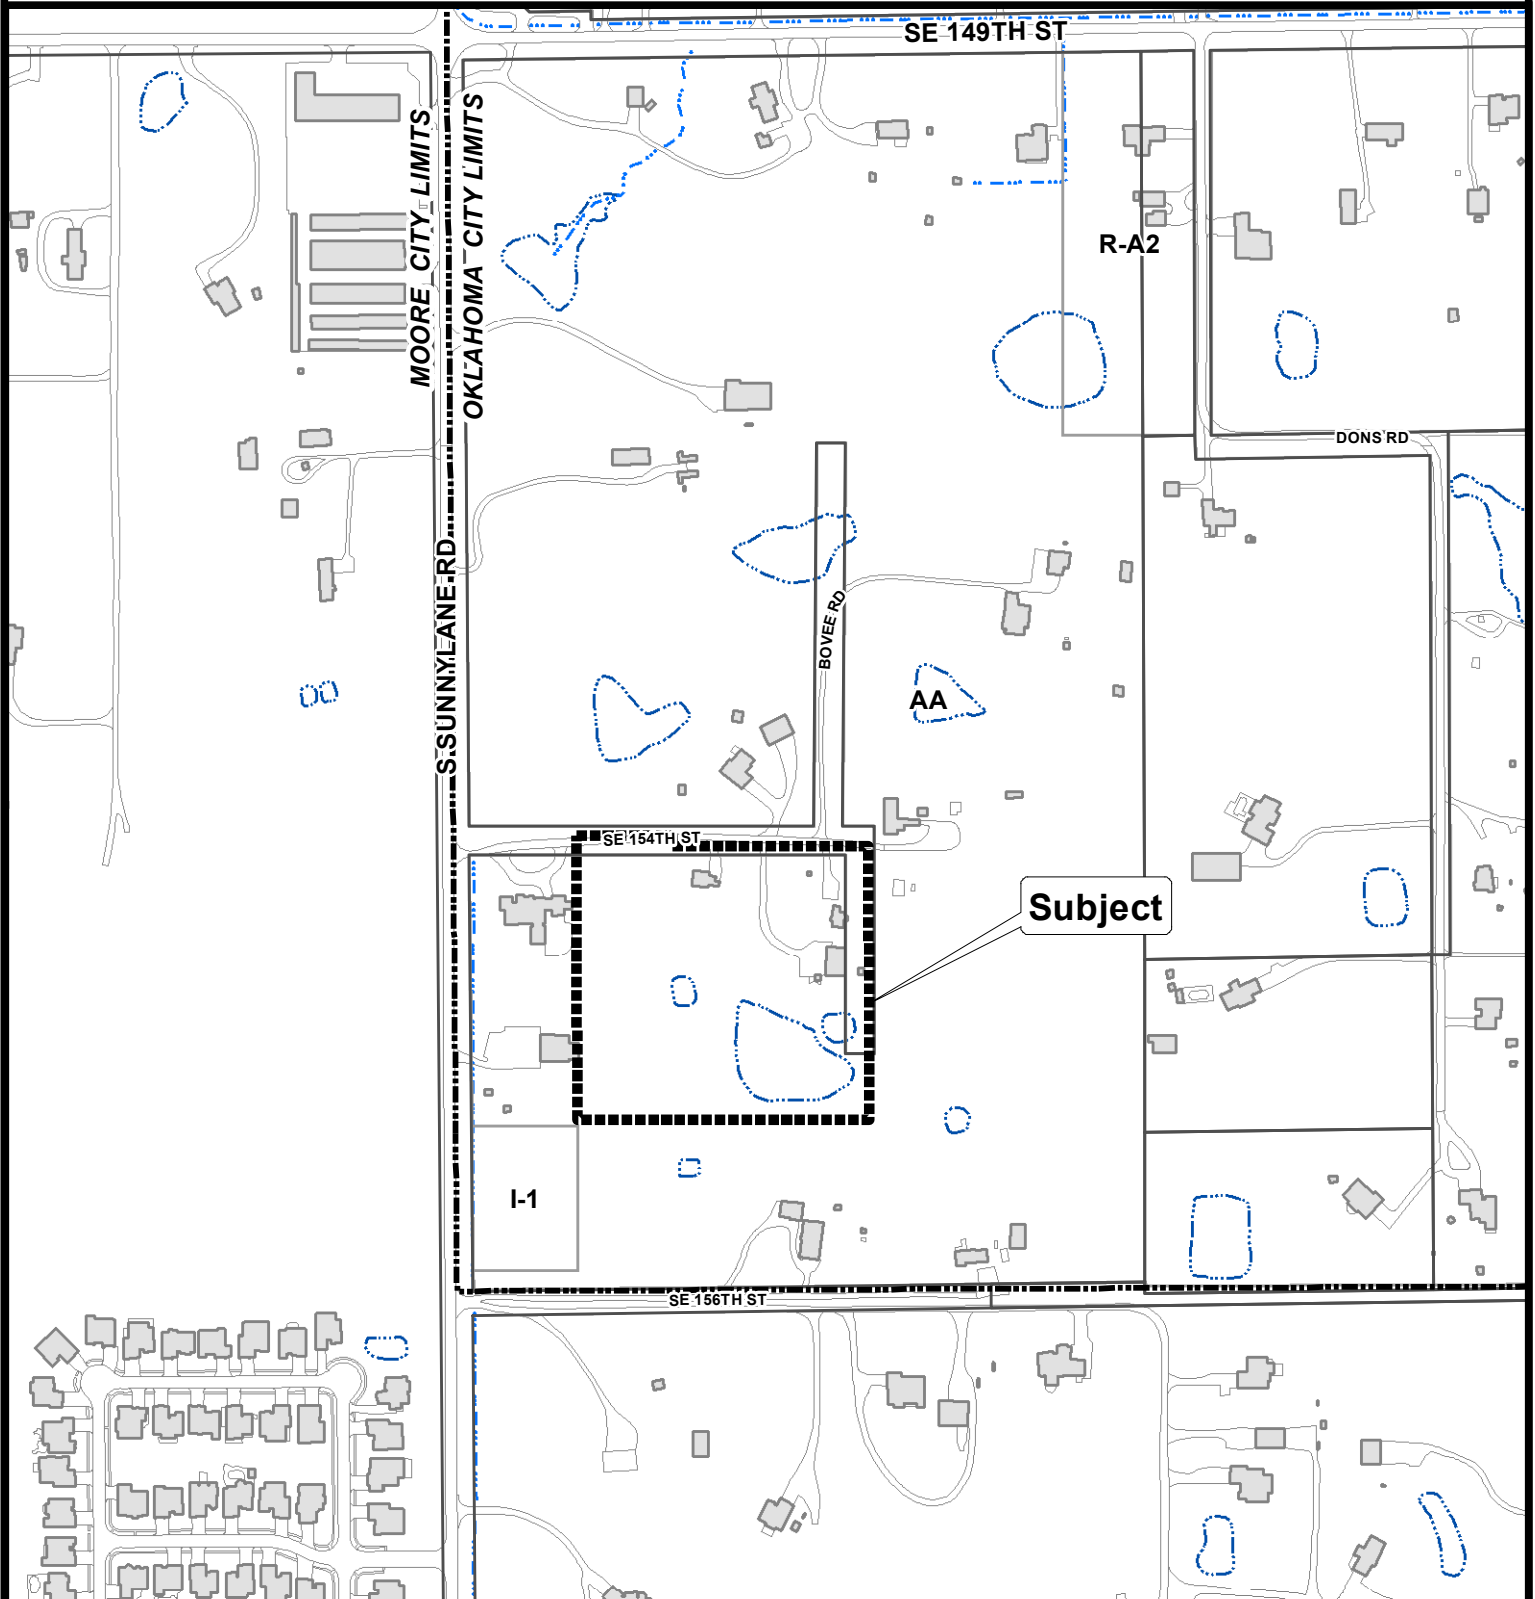

IV. STAFF RECOMMENDATION

Staff recommendations are advisory only and do not constitute Planning Commission decisions. Staff recommendations are based on a technical evaluation of information submitted at the time of review. Determination of conformance with policies contained in the comprehensive plan is the purview of the Planning Commission. Planning Commission decisions require a vote of five members to approve or deny an item. The Planning Commission may consider in its decision-making process any additional relevant information presented at the public hearing by the public, applicant, and/or City departments.

Approval of the application.
