Monitor system as maneuvering aid with 2 cameras and screen. Each of these shows the area behind the machine as well as the area at the discharge conveyor.	<b>Standard</b>	<b>2410296</b>	<b>USD</b>	<b>0.00</b>
Monitor system as maneuvering aid with 5 cameras and 2 displays. The cameras show the area behind the machine, the area in front of the loading conveyor, the side plate, the crawler unit at the front left, the left milled edge, the left side of the machine and the milled surface behind the milling drum unit. 2 additional LED lamps illuminate the camera area and are included in the scope of supply.	<b>Option</b>	<b>2410297</b>	<b>USD</b>	<b>11,685.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2659026</b>	<b>USD</b>	<b>434.00</b>
<b>Other devices</b>				
Large sized storage compartment for 10 pick containers on the rear of the machine instead of the standard storage compartment.	<b>Option</b>	<b>2409814</b>	<b>USD</b>	<b>1,045.00</b>
<b>Additional milling drums</b>				
FCS milling drum with milling width 1500 mm / 4 ft / 11 in, milling depth max. 100 mm / 3 15/16 in, tool spacing 8 mm / 5/16 in, equipped with quick-change toolholder system HT22 and 210 picks. For applications with a high requirement on macro and micro-profile of the road surface, e.g fine milling with increased evenness or correction milling work.	<b>Option</b>	<b>2314979</b>	<b>USD</b>	<b>54,625.00</b>
FCS milling drum, with milling width 1500 mm / 4 ft / 11 in, milling depth max. 30 mm / 1 in, tool spacing 6x2 mm / 15/64 x / 5/64 in, equipped with welded holder system HT5 and 512 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	<b>Option</b>	<b>2090950</b>	<b>USD</b>	<b>67,192.00</b>
FCS milling drum with milling width 1500 mm / 4 ft / 11 in, milling depth max. 330 mm / 1 ft 1 in, tool spacing 20 mm / 25/32 in, equipped with quick-change toolholder system HT22 with increased tool life and 102 picks. For applications with high requirements for milling volume, e.g. complete removal of road surfaces or concrete milling work.	<b>Option</b>	<b>2314995</b>	<b>USD</b>	<b>27,089.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list

### W 150 Cfi - 1500 mm

#### Scope of supply – basic machine

- Engine: 6-CYLINDER DIESEL ENGINE: CUMMINS QSL 9 C-380 AG4f
- Rated engine power 2100 r.p.m.: 283 kW / 380 HP / 385 PS
- Maximum power at 1900 r.p.m.: 298 kW / 400 HP / 405 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 4ft 11 in / 1,500 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

#### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with wasp waist on the right side (zero edge)
- Electrohydraulically opening engine cowling
- Radiator with temperature-dependent fan speed
- Additional control switch for scraper blade, bottom right
- Elastically mounted engine station with low vibration and low noise
- Three milling drum rotation speeds with electric on/off function 106 r.p.m. - 96 r.p.m. - 86 r.p.m.
- Air compressor system

#### MILLING DRUM HOUSING

- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Hydraulic material depressor with conveyor lifting function
- Hydraulically opening scraper plate with convenience locking
- Exchangeable wearing segments on the side plate

#### LOADING OF MILLED MATERIAL

- Discharge conveyor slewing angle left 60 degrees - right 60 degrees
- Two slewing speeds on the hydraulically foldable discharge conveyor with an adjustable conveying speed for precise loading

#### MACHINE CONTROL AND LEVELLING SYSTEM

- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- Jog mode for height adjustment
- Load-dependent advance control
- 4-track drive with manually activated, electronic anti-slip control
- 4 selectable steering modes

- Automatic water management
- Automatic engine speed control

#### **OPERATOR 'S PLATFORM**

- Convenient control panel with practical switches
- Multi-function armrest including color operating display for one-handed operation of most machine functions.
- Digital multi-function display for all important operating conditions
- Scraper height is shown on the display
- Operating panel nighttime lighting
- Robust anti-vandalism protection for the controls
- Adjustable steering wheel position
- Optimally positionable operator's seat
- Footstep right and left with conveniently folding ladder
- Two mirrors front, one mirror middle and one mirror in rear area of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Fourfold full-floating axle for high machine stability
- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Reversing with the milling drum rotating. Simple and fast maneuvering
- Equipped with extremely wear-resistant 2-piece polyurethane track pads

#### **MISCELLANEOUS**

- Large tool package
- Generously sized water and diesel tanks
- Total of 3 EMERGENCY STOP switches at sensible positions on the machine
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 628,764.00**

Mandatory Options				
Exhaust Gas After Treatment				
Exhaust after-treatment by diesel oxidation catalytic converter DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Without diesel particulate filter.	Standard	2400773	USD	0.00
Exhaust after-treatment by diesel oxidation catalyst DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Additionally equipped with diesel particulate filter (DPF) - for operation e.g. in halls or in environmental zones with limited fine dust emission.	Option	2400774	USD	14,549.00
Milling drum housing				
Wear-resistant milling drum housing FB1500 (4 ft 11 in), with pre-fitting enabling a quick and easy change of the milling drums with varying spacings and milling widths, without milling drum.	Standard	2400857	USD	0.00
Milling drums / milling units				
FCS milling drum with milling width 1500 mm / 4 ft / 11 in, milling depth max. 330 mm / 1 ft 1 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 136 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2309317	USD	0.00
Operator's platform				
Standard operator's seat with shock absorption and lengthways adjustment	Standard	2412488	USD	0.00
Hydraulic connection				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	Standard	2412477	USD	0.00
Material transport				
Discharge conveyor 26 ft 9 in / 8,150 mm long with conveyor belt width 2 ft / 600 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields.	Standard	2336175	USD	0.00
Paint				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2400780	USD	0.00
Single-color special paint. Cream color is replaced by a special color (RAL acc. to customer request). The complete lower part of the machine is painted in slate gray RAL 7015.	Option	2400782	USD	1,547.00
Technical documentation				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
Service documentation				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
Warranty				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00

<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
<b>Machine lighting</b>				
Lighting system consisting of 8 halogen and 6 LED working lights. The headlights illuminate the area in front of and behind the machine, both machine sides, the area in front of the milling drum unit and on the chassis unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 21,100 lumens in total.	Standard	2450350	USD	0.00
High-performance lighting system consisting of 1 halogen and 17 LED working lights. The headlights illuminate the area in front of and behind the machine, both machine sides, the area in front of the milling drum unit and on the chassis unit, the area of the wasp waist, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 29,900 lumens in total. LED working lights are extremely bright, shock-resistant and durable.	Option	2450351	USD	2,104.00
<b>Additional devices</b>				
Battery-operated electro-hydraulic unit. Weather canopy and engine cowling can be lifted with the hydraulic unit.	Standard	2400778	USD	0.00
Battery-operated electro-hydraulic unit for milling drum rotation device and hydraulic pick extractor drift. Weather canopy and engine cowling can be lifted with the hydraulic unit. Moreover, emergency functions such as lifting the chassis units, releasing the parking brake and other cylinder functions can also be operated when the engine is switched off.	Option	2400779	USD	1,737.00
<b>Equipment Options</b>				
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	Option	2441379	USD	8,251.00
<b>Advance drive</b>				
Equipment of the machine with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine.	Standard	2400798	USD	0.00

<b>Equipment operator's platform</b>				
Operator's platform equipped with weather canopy as well as windscreen and rear window. The side parts of the roof shell can be pulled out and the windows are movable. The complete roof can be folded in electro-hydraulically using a battery operated hydraulic pump for simplified machine transport. In addition, operation with a hand pump is possible. The operator's seat is surrounded by impact and abrasion-resistant Plexiglas panels.	Option	2400795	USD	13,178.00
Additional control unit for ground operation of the machine. Enables the ground crew to control important machine functions on the left side of the machine additionally.	Standard	2400803	USD	0.00
Heating with fan and air outlet openings in the footwell of the operator's platform.	Option	2400791	USD	1,031.00
<b>Milling drum assembly options</b>				
Overload sensor on the scraper for automatic lifting function in case of obstacles. Effectively prevents the scraper from sinking into the loose sub-base, as well as getting stuck on obstacles.	Standard	2483584	USD	0.00
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB1500 (4 ft 11 in), for straightforward milling drum change	Option	2125929	USD	5,049.00
<b>Additional milling units</b>				
FCS milling unit FB600 (24") LA12, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 80 picks, including scraper bottom part FB600 (24")	Option	2417852	USD	26,424.00
FCS milling unit FB900 (2 ft 11 in) LA15, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 102 RS picks, including scraper bottom part FB900 (2 ft 11 in)	Option	2417854	USD	31,269.00
FCS milling unit FB1200 (3 ft 11 in) LA15, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 115 picks, including scraper bottom part FB1200 (3 ft 11 in)	Option	2409827	USD	36,249.00
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0	Option	2400772	USD	746.00
<b>Options for belt conveyor</b>				
Signal lights on the loading conveyor for a visual truck stop-and-go control without using the horn. The signal lights can be folded in hydraulically from the operator's platform.	Option	2458620	USD	6,392.00

<b>Leveling</b>				
Expansion of leveling system by one Sonic-Ski sensor for scanning in front of the milling drum right or left. Including connection cable and holder.	Option	2410276	USD	5,659.00
<b>Leveling</b>				
Expansion of the leveling system for scanning the surface in front of the milling drum unit. A ski in a mobile mounting scans the height using a position measuring system. The surface shortly ahead of the milling drum unit can thus be taken as a reference if scanning using the side plate is not possible. The scanning can be hydraulically activated from the operator's seat.	Standard	2400801	USD	0.00
<b>Additional control unit LEVEL PRO</b>				
Expansion LEVEL PRO PLUS with an additional operating display, including required connection cable and holder.	Option	2400802	USD	2,769.00
<b>Leveling</b>				
Multiplex pre-fitting comprising 4 sensor sockets and holder for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	Option	2459795	USD	1,371.00
Expansion of the leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, and connection cable.	Option	2410282	USD	3,651.00
Expansion of the leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors and connection cable.	Option	2410283	USD	7,288.00
<b>Water system</b>				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min / 3 gall 8 pt/min at 150 bar / 2175 psi pressure. Ideal for daily cleaning of the machine, including high pressure lance and 15 m / 50 ft hose.	Option	2438190	USD	2,443.00
<b>Pick changing aids</b>				
Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement.	Option	2410287	USD	2,931.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5 m / 16 ft 5 in hose and holder.	Standard	2400775	USD	0.00
Additional folding seat on the rear right chassis unit for additional comfort during the pick change. The entire milling drum can easily be reached from a sitting position.	Option	2411373	USD	936.00
<b>Wirtgen information and diagnostic system</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO PLUS display.	Option	2410291	USD	1,018.00
Equipment of the machine with job data acquisition. The information is shown in the control display.	Option	2410294	USD	1,113.00

<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras and screen. Each of these shows the area behind the machine as well as the area at the discharge conveyor.	<b>Standard</b>	<b>2410296</b>	<b>USD</b>	<b>0.00</b>
Monitor system as maneuvering aid with 5 cameras and 2 displays. The cameras show the area behind the machine, the area in front of the loading conveyor, the side plate, the crawler unit at the front left, the left milled edge, the left side of the machine and the milled surface behind the milling drum unit. 2 additional LED lamps illuminate the camera area and are included in the scope of supply.	<b>Option</b>	<b>2410297</b>	<b>USD</b>	<b>11,685.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2659026</b>	<b>USD</b>	<b>434.00</b>
<b>Other devices</b>				
Large sized storage compartment for 10 pick containers on the rear of the machine instead of the standard storage compartment.	<b>Option</b>	<b>2409814</b>	<b>USD</b>	<b>1,045.00</b>
<b>Additional milling drums</b>				
FCS milling drum with milling width 1500 mm / 4 ft / 11 in, milling depth max. 100 mm / 3 15/16 in, tool spacing 8 mm / 5/16 in, equipped with quick-change toolholder system HT22 and 210 picks. For applications with a high requirement on macro and micro-profile of the road surface, e.g fine milling with increased evenness or correction milling work.	<b>Option</b>	<b>2314979</b>	<b>USD</b>	<b>54,625.00</b>
FCS milling drum, with milling width 1500 mm / 4 ft / 11 in, milling depth max. 30 mm / 1 in, tool spacing 6x2 mm / 15/64 x / 5/64 in, equipped with welded holder system HT5 and 512 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	<b>Option</b>	<b>2090950</b>	<b>USD</b>	<b>67,192.00</b>
FCS milling drum with milling width 1500 mm / 4 ft / 11 in, milling depth max. 330 mm / 1 ft 1 in, tool spacing 20 mm / 25/32 in, equipped with quick-change toolholder system HT22 with increased tool life and 102 picks. For applications with high requirements for milling volume, e.g. complete removal of road surfaces or concrete milling work.	<b>Option</b>	<b>2314995</b>	<b>USD</b>	<b>27,089.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list W 200i

### Scope of supply – basic machine

- Engine: 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSX 15
- Maximum power at 1900 r.p.m.: 455 kW / 610 HP / 619 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 6 ft 7 in / 2000 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with double-sided wasp waist
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Cooling system with temperature-controlled fan speed
- Large storage compartments for pick containers

### MILLING DRUM HOUSING

- Three milling drum rotation speeds with electric on/off function 127 r.p.m. - 109 r.p.m. - 97 r.p.m.
- Hydraulic material depressor with conveyor lifting function
- Hydraulically movable and positionable scraper plate with automatic locking
- Hydraulically lifting side plates, clearance right 450 mm (1 ft 6 in), clearance left 330 mm (1 ft 1 in)
- Water sprinkling strip in the milling drum unit

### LOADING OF MILLED MATERIAL

- Conveyor system with manually or automatically adjustable conveying speed
- Water spray system in the primary conveyor
- Slewing angle discharge conveyor  $\pm 60^\circ$

### MACHINE CONTROL AND LEVELLING SYSTEM

- Multi-function control display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Milling power control with automatic on/off function
- Two exterior panels for operating functions by ground crew
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system

### OPERATOR'S PLATFORM

- Fully anti-vibration mounted operator's platform
- Convenient, individually adjustable control panel
- Convenient access to the operator's platform, right and left
- Lockable control panel covers
- Two mirrors front, one mirror middle and one mirror in rear area of the machine

#### CHASSIS AND HEIGHT ADJUSTMENT

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- Freely selectable steering functions for the four-track steering
- Extremely wear-resistant, two-piece EPS polyurethane track pads

#### MISCELLANEOUS

- Lighting system including 3 halogen floodlights and 4 LED lights in the area of the milling unit
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

List price ex subsidiary Wirtgen America

USD

730,007.00

#### Mandatory Options

##### Milling drum housing

Wear-resistant milling drum housing FB2200 (7 ft 3 in) FCS-Light, with pre-fitting enabling a quick and easy change of milling drums with varying spacings and equal milling widths, without milling drum.

Standard

2436519

USD

0.00

##### Milling drums / milling units

FCS milling drum with milling width 2200 mm / 7 ft / 3 in, milling depth max. 330 mm / 1 ft 1 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 181 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.

Standard

2375650

USD

0.00

##### Operator's platform

Flexibly mounted operator's platform with clearly laid-out control panel and control display as well as a large storage compartment (approx. 250 l / 66 gal) on the operator's platform and single standing seats on the right and left. The storage compartment has a variable, removable false floor and a lockable lid which can also be used as a seat. It is used for storing tools, pick elements, a coolbox, etc.

Option

2488383

USD

3,026.00

Flexibly mounted operator's platform with clear control panels and control display as well as comfortable adjustable operator's seats right and left.	<b>Standard</b>	<b>2430848</b>	<b>USD</b>	<b>0.00</b>
Operator's platform in "Operator Comfort System" version, consisting of movable and fully air-conditioned comfort cab with air-sprung operator's seat, 6-way camera system, joystick machine control and radio. An integrated intercom provides good communication with the second machine operator.	<b>Option</b>	<b>2433078</b>	<b>USD</b>	<b>87,074.00</b>
<b>Operator's platform</b>				
Complete mirror set: two mirrors front, one mirror middle and one mirror on rear of the machine	<b>Standard</b>	<b>2105659</b>	<b>USD</b>	<b>0.00</b>
Complete mirror set, partial from operator's platform electrically folding as well as additionally heated and with truck stop and go indication	<b>Option</b>	<b>2105660</b>	<b>USD</b>	<b>5,293.00</b>
<b>Material transport</b>				
Robust 7,900 mm (25 ft 11 in) long discharge conveyor with conveyor belt system 850 mm (2 ft 9 in) and hydraulic folding device for shortening the transport length	<b>Standard</b>	<b>2430852</b>	<b>USD</b>	<b>0.00</b>
<b>Water tank filling</b>				
Additional water tank filling from the rear of the machine using a stopcock.	<b>Standard</b>	<b>2120201</b>	<b>USD</b>	<b>0.00</b>
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filling pump.	<b>Option</b>	<b>2430853</b>	<b>USD</b>	<b>3,691.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2433013</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2433222</b>	<b>USD</b>	<b>2,334.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>

<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 6 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 3 rotary beacons.	<b>Standard</b>	<b>2346607</b>	<b>USD</b>	<b>0.00</b>
Powerful LED lighting system 24 V. Consisting of 6 additional LED working lights for optimum illumination of the working area. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 3 LED rotary beacons.	<b>Option</b>	<b>2346608</b>	<b>USD</b>	<b>4,085.00</b>
<b>Equipment Options</b>				
<b>Additional weight</b>				
Additional weight 3,748 lbs / 1,700 kg	<b>Standard</b>	<b>2199810</b>	<b>USD</b>	<b>0.00</b>
Large sized storage compartment for 29 pick containers mounted on the rear of the machine instead of the standard storage compartment.	<b>Option</b>	<b>2221603</b>	<b>USD</b>	<b>3,257.00</b>
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	<b>Standard</b>	<b>2105684</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				
Operator's platform equipped with weather canopy including windscreen and rear window. The canopy is equipped with extensions on both sides and protects the entire operator's platform from rain and sunlight. The canopy itself is made of highly durable GFRP and the windscreen and rear window are scratch-resistant laminated protective glass. The canopy can be folded up electrohydraulically to facilitate machine transport.	<b>Option</b>	<b>2492942</b>	<b>USD</b>	<b>14,304.00</b>
Hot air heating in the footwell area of the operator's platform	<b>Option</b>	<b>2174234</b>	<b>USD</b>	<b>1,696.00</b>
<b>Device for milling drum change</b>				
Milling drum mounting and transport carriage FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	<b>Option</b>	<b>2312515</b>	<b>USD</b>	<b>6,284.00</b>

<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	Option	2344691	USD	1,330.00
<b>Options for belt conveyor</b>				
Support device for putting the discharge conveyor on the low-loader.	Standard	60603	USD	0.00
<b>Leveling</b>				
Expansion leveling system for scanning ahead of the milling drum right, with hydraulic sensor, connection cable and holder. (Can also be mounted on left)	Option	2112702	USD	2,999.00
Expansion leveling system for scanning ahead of the milling drum right and left, with hydraulic sensor, connection cable and holder	Standard	2112703	USD	0.00
<b>Additional control unit LEVEL PRO</b>				
Expansion LEVEL PRO with an additional operating display, including required connection cable	Standard	2137348	USD	0.00
<b>Leveling</b>				
Pre-fitting for multiplex system comprising 4 sensors sockets for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	Standard	2436230	USD	0.00
Expansion leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, connection cable and holder	Option	2436231	USD	3,026.00
Expansion of leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors, connection cable and holder	Option	2436232	USD	6,392.00
<b>Water system</b>				
Powerful, hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min (4 gpm) at 150 bar (2175 psi) pressure.	Option	2105701	USD	2,443.00

<b>Pick changing aids</b>				
Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in this case.	Standard	2105702	USD	0.00
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	Option	2178052	USD	3,461.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	Standard	2137372	USD	0.00
Fold-open seats on the rear track units for the pick change, with integrated storage compartment for pick change tools and 4 pick containers	Standard	2105678	USD	0.00
<b>Diesel tank filling systems</b>				
Electrically operated diesel suction and pressure pump for the diesel tank filling with 5.00 m suction hose.	Option	2125976	USD	896.00
<b>Wirtgen information and diagnostic system</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO display.	Standard	2219502	USD	0.00
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras. Each of these shows the area behind the machine as well as the area in front of the loading conveyor. The camera images are displayed on the machine control display.	Standard	2526011	USD	0.00
Extensive monitor system consisting of a total of 6 cameras and an additional monitor. Cameras 1 and 2 show the areas behind the machine as well as ahead of the load belt, and thus facilitate maneuvering and loading. Cameras 3-6 show the area in front of the milling drum unit, the milled area behind the milling unit as well as the side plate and the front right and left chassis units, thereby facilitating the working process. Camera images 1-2 are displayed in the machine control display, camera images 3-6 are output on the additional monitor.	Option	2530073	USD	9,364.00
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	Option	2658169	USD	434.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list

### W 200 Fi

#### Scope of supply – basic machine

- 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSX 15
- Maximum power at 1900 r.p.m.: 455 kW / 610 HP / 619 PS
- Exhaust standard: EU Stage 5 / US Tier 4f
- Standard milling width: 6 ft 7 in / 2000 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

#### STANDARD EQUIPMENT

- Basic machine with engine
- Machine frame featuring a single wasp waist at the rear right, and a dual wasp waist at the front
- Hydraulically opening, soundproof engine cowl
- Air compressor system
- Two cooling fans to minimize power consumption of the cooling system

#### MILLING DRUM HOUSING

- Adjustment of material depressor contact pressure via the control panel or automatically via the MILL ASSIST feature to reduce chunk formation
- Electrical adjustment of scraper contact pressure via the control panel
- Automatically controlled locking feature of scraper
- Single-piece water spray bar in the milling drum unit for reliable pick cooling and to prevent dust development
- Automatic control of the water quantity via the MILL ASSIST feature
- Height adjustment stroke increased by 150 mm to facilitate pick replacement and the exchange of milling drum units
- Pre-fitting to allow the quick exchange of milling drum units.
- Hydraulically lifting side plates, clearance right 450 mm (1 ft 6 in), clearance left 330 mm (1 ft 1 in)

#### LOADING OF MILLED MATERIAL

- Increased conveyor slewing angles of 65° each to the left and right
- Discharge conveyor with adjustable conveying speed
- Boost feature for a temporary increase of the belt speed and conveying performance of the discharge conveyor by 20%
- Water spray system in the primary conveyor
- Larger conveyor pump for a constant belt speed even at a low engine speed of 1300 rpm

#### MACHINE CONTROL AND LEVELLING SYSTEM

- User-friendly control panel including 7" color screen
- LEVEL PRO ACTIVE leveling system with numerous automated and complementary features relieving the operator of a part of his workload
- LEVEL PRO ACTIVE - automatic height control in transport mode

- LEVEL PRO ACTIVE - ramp milling and auto-start feature for the second milling cut
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- MILL ASSIST assistance system for automatic adjustment of the milling drum speed in accordance with the main area of application and the parameters selected in terms of engine load, advance rate, milling volume and quality of the milling pattern.
- Comprehensive machine diagnostics on the control panel including, for example, a diagnostic system for the CAN bus
- Voltmeter integrated into the control panel for voltage measurement in the event of a malfunction
- Two control panels for operating functions performed by ground crew

#### **OPERATOR'S PLATFORM**

- Convenient access to the operator's platform, right and left
- Anti-vibration mounted operator's platform across the full width of the machine including fold-out railing, right
- Electrical control cabinet on the operator's platform for optimum accessibility and fast troubleshooting
- Two mirrors at the front, one mirror at the rear of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- High travel speed of up to 100 m / min at low engine speeds (1,350 rpm), reduced diesel consumption and low noise emissions.
- Lifting speed of the height adjustment feature increased by 60%

#### **MISCELLANEOUS**

- "Welcome" and "Go home" lights feature in the area of the operator's platform and access
- Large storage compartment on the machine for pick containers
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Good accessibility to all maintenance points on the engine station
- Pneumatic hammer with pick extractor/insertor
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD**

**677,255.00**

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing FB2200 (7 ft 3 in) without milling drum	Standard	2598404	USD	0.00
Milling drums / milling units				
Milling drum with milling width 2200 mm (7 ft 3 in), milling depth max. 330 mm / 1 ft 1 in, tool spacing 18 mm / 45/64 in, equipped with quick-change toolholder system HT22 and 155 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2305117	USD	0.00
OPERATOR'S PLATFORM				
Flexibly mounted operator's platform with clear control panels and a simple stand-up seat.	Standard	2600317	USD	0.00
Material transport				
Heavy-duty 7,900 mm (25 ft 11 in) long discharge conveyor with conveyor belt system 850 mm (2 ft 9 in) and hydraulic folding device for shortening the transport length	Standard	2598432	USD	0.00
Crawler units				
Four track units type B1, 260 mm wide and 1,565 mm long, with extremely wear-resistant, two-piece EPS polyurethane track pads.	Standard	2663715	USD	0.00
Water tank filling				
Additional water tank filling from the rear of the machine using a shut-off cock.	Standard	2549116	USD	0.00
Paint				
Painting in cream RAL 9001 with orange stripes. The entire base of the machine is painted in slate gray RAL 7015.	Standard	2668740	USD	0.00
The film coating is applied in RAL colors and design according to the customer's wishes. Film coating provides protection against mechanical and weather-related damage and can be removed without leaving any marks, if required	Option	2728786	USD	4,044.00
Technical documentation				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
Service documentation				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00

<b>Telematics</b>				
WITOS FleetView (mobile phone standard 3, 4G) includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2770403	USD	0.00
The WIRTGEN PERFORMANCE TRACKER WPT is a laser and satellite-supported measuring system for precise milling performance determination for machines with FB2000 or FB2200 without a weather canopy or with an operator's cabin. Two laser scanners measure the actual milling width and milling depth over the distance of the milling path. The milling performance results are automatically sent to the corresponding users via the WITOS interface with precise GPS machine position data and consumption data such as diesel consumption, water consumption, tool consumption and truck loads, in an evaluation and then by e-mail. The milling performance reports that include an image of the milling position can also be used as an allowance report. The usability of WITOS hardware components for the existing mobile radio standard is guaranteed for 3 years from the date of delivery.	Option	2781330	USD	47,066.00
<b>Machine lighting</b>				
Standard lighting system consisting of 18 LED working lights for optimum illumination of the working area. The light output is approx. 20,600 lumens in total.	Standard	2598442	USD	0.00
<b>Additional devices</b>				
Battery-operated electrohydraulic unit for milling drum rotation device and hydraulic pick ejector. Weather canopy and engine cover can be lifted with the hydraulic unit. Furthermore, emergency functions such as raising the crawler units, releasing the parking brake, and other cylinder functions can be operated even when the engine is switched off.	Standard	2600320	USD	0.00

Equipment Options				
<b>Additional weight</b>				
Two-piece additional weight at the rear of the machine totaling 1,600 kg (3,527 lbs) which enables the machine to be individually ballasted. The individual weights of 850 kg and 750 kg can be easily and quickly inserted and fastened to the rear of the machine.	Option	2598492	USD	6,609.00
<b>Additional weight</b>				
Storage compartment on both the rear track units for 8 pick containers	Standard	2598662	USD	0.00
<b>Milling drum assembly options</b>				
Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in this case.	Standard	2598658	USD	0.00
Two wear protection rollers that can be attached to the side plates (left or right). The rollers protect the asphalt, curbs, and other surfaces from damage and prevent excessive wear to the side plates.	Option	2662818	USD	774.00
Mounting aid for lifting out the short primary conveyor when changing the milling unit.	Option	2598534	USD	434.00
Transport roller set consisting of 4 heavy-duty rollers for easy removal of milling units from FB1500 to FB3800 on level surfaces.	Option	2762958	USD	5,211.00
<b>Options for belt conveyor</b>				
VCS – vacuum cutting system on the discharge conveyor for the extraction of fine material particles and water vapor from the sealed milling drum unit.	Standard	2598495	USD	0.00
Support device for positioning the discharge conveyor on the flat bed truck	Standard	60603	USD	0.00
Semi-automatic ACTIVE CONVEYOR swing angle control that guides the discharge conveyor in construction site situations where milling is carried out at intersections or roundabouts	Option	2598541	USD	1,221.00
<b>Additional control unit LEVEL PRO</b>				
<b>2 Pieces</b> - Additional 5" control panel for controlling the LEVEL PRO ACTIVE leveling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Standard	2598631	USD	0.00
Additional 2" control panel that can be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Option	2598664	USD	1,954.00

Two additional 2" control panels that can each be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Option	2767151	USD	3,909.00
User-specific saving of individually adjustable machine settings such as the display configuration or the assignment of favorites buttons. The data can be saved on five different SMART KEY key fobs with tokens.	Option	2779480	USD	1,208.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with one hydraulic cylinder sensor for scanning a reference surface to the right of the milling drum.	Standard	2598629	USD	0.00
Extension of the LEVEL PRO ACTIVE leveling system with two hydraulic cylinder sensors for scanning a reference surface to the left and the right of the milling drum.	Option	2598630	USD	5,510.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2598636	USD	5,062.00
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the left and right. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2598641	USD	9,826.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines without a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2662822	USD	8,333.00
<b>Camera system</b>				
Two-fold camera system with one camera at the discharge conveyor and one camera with a view of the rear area. The camera images are displayed on the standard 7" control panel on the operator's platform.	Standard	2598677	USD	0.00

Other devices				
Electrical diesel suction and pressure pump with 7.50 m (24 ft 7 in) suction hose. The machine can be refueled with up to 50 l/min (13 gal/min) from external diesel tanks.	Option	2598663	USD	923.00
Hydraulically powered sweeping unit consisting of a central brush and side brushes on both sides used to sweep the milled surface behind the machine. The direction in which the brushes rotate can be changed depending on the desired direction of sweeping. The unit can be folded up hydraulically from the operator's platform during transport or when maneuvering. It is operated via the 2" control panel that comes with the unit.	Option	2779365	USD	44,541.00
Documentation				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

<sup>1</sup>Option must be ordered from headquarters.

Date: 6/25/2020

## Price list

# W 207 Fi

### Scope of supply – basic machine

- 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSX 15
- Maximum power at 1900 r.p.m.: 470 kW / 630 HP / 639 PS
- Exhaust standard: EU Stage V / US EPA Tier 4f
- Standard milling width: 6 ft 7 in / 2,000 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

### STANDARD EQUIPMENT

- Base machine with engine
- Machine frame featuring a single wasp waist at the rear right and a dual wasp waist at the front
- Hydraulically opening, soundproof engine cover
- Air compressor system
- Two cooling fans to minimize power consumption of the cooling system

### MILLING DRUM HOUSING

- Adjustment of material depressor contact pressure via the control panel or automatically via the MILL ASSIST feature to reduce chunk formation
- Electrical adjustment of scraper contact pressure via the control panel
- Automatically controlled locking feature of scraper
- Single-piece water spray bar in the milling drum unit for reliable pick cooling and to prevent dust development
- Automatic control of the water quantity via the MILL ASSIST feature
- Height adjustment stroke increased by 150 mm to facilitate pick replacement and the exchange of milling drum units
- Pre-fitting to allow the quick exchange of milling drum units.
- Hydraulically lifting side plates, clearance right 450 mm (1 ft 6 in), clearance left 330 mm (1 ft 1 in)

### LOADING OF MILLED MATERIAL

- Increased conveyor swing angles of 65° each to the left and right
- Discharge conveyor with adjustable conveying speed
- Boost feature for a temporary increase of the belt speed and conveying performance of the discharge conveyor by 20%
- Water spray system in the primary conveyor
- Larger conveyor pump for a constant belt speed even at a low engine speed of 1300 rpm

### MACHINE CONTROL AND LEVELLING SYSTEM

- User-friendly control panel including 7" color screen
- LEVEL PRO ACTIVE levelling system with numerous automated and complementary operator relieving features
- LEVEL PRO ACTIVE - automatic height control in transport mode

- LEVEL PRO ACTIVE - ramp milling and auto-start feature for the second milling cut
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- MILL ASSIST assistance system for automatic adjustment of the milling drum speed in accordance with the main area of application and the parameters selected in terms of engine load, advance rate, milling volume and quality of the milling pattern.
- Comprehensive machine diagnostics on the control panel including, for example, a diagnostic system for the CAN bus
- Voltmeter integrated into the control panel for voltage measurement in the event of a malfunction
- Two control panels for operating functions performed by ground crew

#### **OPERATOR'S PLATFORM**

- Convenient access to the operator's platform, left and right
- Anti-vibration mounted operator's platform across the full width of the machine including fold-out railing, right
- Electrical control cabinet on the operator's platform for optimum accessibility and fast troubleshooting
- Two mirrors at the front, one mirror at the rear of the machine

#### **TRACK UNIT AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- High travel speed of up to 100 m / min at low engine speeds (1,350 rpm), reduced diesel consumption and low noise emissions.
- Lifting speed of the height adjustment feature increased by 60%

Mandatory Options				
Milling drum housing				
FB2200 (7 ft 3 in) MCS BASIC quick-change milling drum unit that enables milling drums of the same milling width to be changed particularly quickly.	Standard	2598417	USD	0.00
Milling drums / milling units				
Milling drum MCS BASIC with milling width 2200 mm / 7 ft 3 in, milling depth max. 350 mm / 1 ft 2 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 176 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2611269	USD	0.00
OPERATOR'S PLATFORM				
Flexibly mounted operator's platform with clear control panels and a simple stand-up seat.	Standard	2600317	USD	0.00
Anti-vibration-mounted operator's platform with easy-to-read control panels and simple stand-up seat. A hydraulically height-adjustable weather canopy protects the operator from the wind and weather.	Option	2600319	USD	15,526.00
Material transport				
Heavy-duty 7,900 mm (25 ft 11 in) long discharge conveyor with conveyor belt system 850 mm (2 ft 9 in) and hydraulic folding device for shortening the transport length	Standard	2598432	USD	0.00
Crawler units				
Four track units type B3, 300 mm wide and 1,730 mm long, with extremely wear-resistant, two-piece EPS polyurethane track pads.	Standard	2663716	USD	0.00
Water tank filling				
Additional water tank filling from the rear of the machine using a shut-off cock.	Standard	2549116	USD	0.00
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filler pump	Option	2598434	USD	3,827.00
Paint				
Painting in cream RAL 9001 with orange stripes. The entire base of the machine is painted in slate gray RAL 7015.	Standard	2668745	USD	0.00
The film coating is applied in RAL colors and design according to the customer's wishes. Film coating provides protection against mechanical and weather-related damage and can be removed without leaving any marks, if required	Option	2728788	USD	4,044.00

<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Telematics</b>				
WITOS FleetView (mobile phone standard 3, 4G) includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2770403	USD	0.00
The WIRTGEN PERFORMANCE TRACKER WPT is a laser and satellite-supported measuring system for precise milling performance determination for machines with FB2000 or FB2200 without a weather canopy or with an operator's cabin. Two laser scanners measure the actual milling width and milling depth over the distance of the milling path. The milling performance results are automatically sent to the corresponding users via the WITOS interface with precise GPS machine position data and consumption data such as diesel consumption, water consumption, tool consumption and truck loads, in an evaluation and then by e-mail. <b>Machine lighting</b>				
Extended lighting system consisting of 21 extremely powerful LED working lights for optimum illumination of the working area. The light output is approx. 37,600 lumens in total.	Standard	2598443	USD	0.00
<b>Additional devices</b>				
Battery-operated electrohydraulic unit for milling drum rotation device and hydraulic pick ejector. Weather canopy and engine cover can be lifted with the hydraulic unit. Furthermore, emergency functions such as raising the crawler units, releasing the parking brake, and other cylinder functions can be operated even when the engine is switched off.	Standard	2600320	USD	0.00

Equipment Options				
<b>Additional weight</b>				
Two-piece additional weight at the rear of the machine totaling 1,600 kg (3,527 lbs) which enables the machine to be individually ballasted. The individual weights of 850 kg and 750 kg can be easily and quickly inserted and fastened to the rear of the machine.	Standard	2598492	USD	0.00
<b>Additional weight</b>				
Large sized storage compartment for 69 pick containers mounted at the rear of the machine instead of the standard storage compartment. The storage compartment is splash-proof and additionally contains a completely sealed area to safely store electronic components such as leveling sensors or tool extractors.	Option	2598494	USD	3,149.00
Storage compartment on both the rear track units for 8 pick containers	Standard	2598662	USD	0.00
<b>Milling drum assembly options</b>				
Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in this case.	Option	2598658	USD	2,389.00
The actual milling depth is determined by calculating the difference in readings from sensors on the side plate and sensors on the scraper. The actual milling depth is displayed on the LEVEL PRO ACTIVE panel.	Standard	2598665	USD	0.00
Overload sensors automatically lift the scraper whenever obstacles are detected that could damage the scraper.	Option	2598528	USD	1,574.00
Active floating position for the side plates on the left and right by continuously adjusting the milling depth and position of the plates. If necessary, the side plates can be briefly raised to prevent them from sinking into the soft ground.	Standard	2598531	USD	0.00
MCS BASIC extended with a hydraulically opening side door on the milling drum unit FB2000 (6 ft 7 in). With additional hydraulic cylinders, the side door can be easily unlocked and opened when changing the milling drum. This enables milling drums in MCS BASIC to be changed even faster.	Option	2614824	USD	9,269.00
MCS BASIC extended with a hydraulically opening side door on the milling drum unit FB2200 (7 ft 3 in). With additional hydraulic cylinders, the side door can be easily unlocked and opened when changing the milling drum. This enables milling drums in MCS BASIC to be changed even faster.	Standard	2688482	USD	0.00

Electrically switchable sectional water spray bar in the milling drum assembly FB2000 (6 ft 7 in). Four areas can be controlled as required from the control panel (automatically controlled with WPT). This reduces water consumption enormously.	<b>Option</b>	<b>2598537</b>	<b>USD</b>	<b>2,701.00</b>
Electrically switchable sectional water spray bar in the milling drum unit FB2200 (7 ft 3 in). Four areas can be controlled as required from the control panel (automatically controlled with WPT). This significantly reduces water consumption.	<b>Standard</b>	<b>2610096</b>	<b>USD</b>	<b>0.00</b>
Two wear protection rollers that can be attached to the side plates (left or right). The rollers protect the asphalt, curbs, and other surfaces from damage and prevent excessive wear to the side plates.	<b>Option</b>	<b>2662818</b>	<b>USD</b>	<b>774.00</b>
Mounting aid for lifting out the short primary conveyor when changing the milling unit.	<b>Option</b>	<b>2598534</b>	<b>USD</b>	<b>434.00</b>
Milling drum mounting and transport cart for milling drums from FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	<b>Option</b>	<b>2312515</b>	<b>USD</b>	<b>6,419.00</b>
Transport roller set consisting of 4 heavy-duty rollers for easy removal of milling units from FB1500 to FB3800 on level surfaces.	<b>Option</b>	<b>2762958</b>	<b>USD</b>	<b>5,211.00</b>

<b>Options for belt conveyor</b>				
VCS – vacuum cutting system on the discharge conveyor for the extraction of fine material particles and water vapor from the sealed milling drum unit.	Standard	2598495	USD	0.00
Support device for positioning the discharge conveyor on the flat bed truck	Standard	60603	USD	0.00
Semi-automatic ACTIVE CONVEYOR swing angle control that guides the discharge conveyor in construction site situations where milling is carried out at intersections or roundabouts	Option	2598541	USD	1,221.00
<b>Additional control unit LEVEL PRO</b>				
<b>Two pieces</b> - Additional 7" control panel that displays the machine control and controls the LEVEL PRO ACTIVE levelling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Standard	2598632	USD	0.00
Additional 2" control panel that can be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Standard	2598664	USD	0.00
Two additional 2" control panels that can each be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Option	2767151	USD	3,909.00
User-specific saving of individually adjustable machine settings such as the display configuration or the assignment of favorites buttons. The data can be saved on five different SMART KEY key fobs with tokens.	Option	2779480	USD	1,208.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE levelling system with levelling boom. Premounted and adjustable hydraulic cylinders on the left and right allow the use of a Sonic-Ski sensor that is able to scan a reference object up to 1,900 mm away from the milling edge. During machine transport, the sensor and cables are securely stowed in the corresponding transport boxes.	Option	2600969	USD	10,559.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with two hydraulic cylinder sensors for scanning a reference surface to the left and the right of the milling drum.	Standard	2598630	USD	0.00

<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2598636	USD	5,062.00
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the left and right. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2598641	USD	9,826.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines without a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2662822	USD	8,333.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines with a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2662824	USD	2,076.00
Extension of the LEVEL PRO ACTIVE leveling system with two linear laser sensors that can be installed using the pre-fitting equipment for 3D leveling.	Option	2662826	USD	12,635.00
<b>Water system</b>				
Powerful, hydraulically operated high pressure water cleaner with a maximum output of 15 l/min (4 gpm) at a pressure of 150 bar (2175 psi).	Option	2598657	USD	2,497.00
<b>Pick changing aids</b>				
Hydraulically driven pick ejector, including the holder and required electrical and hydraulic connections. Ideal for convenient, fast and low-noise pick changes.	Standard	2650081	USD	0.00
<b>Camera system</b>				
Four-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine as well as of the side plates, on the right and left. The camera images are displayed on the 10" control panel on the operator's platform.	Standard	2598678	USD	0.00

Eight-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine, of the side plates on the right and left and of the milled surface behind the milling drum unit. The camera images are displayed on the 10" control panel on the operator's platform.	option	2598679	USD	10,789.00
<b>Other devices</b>				
Electrical preheating of the fuel filter to maintain the flow of fuel at low outside temperatures. Serves to guarantee machine operation at temperatures below 0 32 degrees Fahrenheit (0 degrees Celsius).	Option	2622716	USD	584.00
Electrical diesel suction and pressure pump with 7.50 m (24 ft 7 in) suction hose. The machine can be refueled with up to 50 l/min (13 gal/min) from external diesel tanks.	Option	2598663	USD	923.00
License plate holder with LED lighting	Option	2654224	USD	475.00
Hydraulically powered sweeping unit consisting of a central brush and side brushes on both sides used to sweep the milled surface behind the machine. The direction in which the brushes rotate can be changed depending on the desired direction of sweeping. The unit can be folded up hydraulically from the operator's platform during transport or when maneuvering. It is operated via the 2" control panel that comes with the unit.	Option	2779365	USD	44,541.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

<sup>1</sup>Option must be ordered from headquarters.

Date: 6/25/2020

## Price list

### W 200 Hi

#### Scope of supply – basic machine

- Engine: 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSX 15
- Maximum power at 1900 r.p.m.: 455 kW / 610 HP / 619 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 6 ft 10 in / 2100 mm
- Theoretical milling depth: 1 ft / 300 mm

#### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with double-sided wasp waist
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Cooling system with temperature-controlled fan speed
- Storage compartments for pick containers

#### MILLING DRUM HOUSING

- Milling drum housing with infinitely variable lateral shift function permits milling up to the edge on the right or left side of the machine. The total adjustment range is 2 ft 7 in / 800 mm. (1 ft 4 in left / 1 ft 4 in right / 400 mm left / 400 mm right)
- Hydrostatic drive of the milling drum
- Three electrically selectable milling drum speeds
- Hydraulic material depressor with conveyor lifting function
- Hydraulically movable and positionable scraper plate
- Hydraulically lifting side plate, 1 ft 5 in / 420 mm clearance right and left
- Triple-divided water sprinkling strip in the milling drum unit, segments individually switchable

#### LOADING OF MILLED MATERIAL

- Conveyor system with manually or automatically adjustable conveying speed
- Water spray system in the primary conveyor
- Slewing angle discharge conveyor  $\pm 60^\circ$

#### MACHINE CONTROL AND LEVELLING SYSTEM

- Multi-function control display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Milling power control with automatic on/off function
- Two exterior panels for operating functions by ground crew

- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system

#### **OPERATOR'S PLATFORM**

- Fully anti-vibration mounted operator's platform
- Convenient, individually adjustable control panel
- Convenient access to the operator's platform, right and left
- Lockable control panel covers
- Two mirrors at the front, one mirror at the rear of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- Freely selectable steering functions for the four-track steering
- Extremely wear-resistant, two-piece EPS polyurethane track pads

#### **MISCELLANEOUS**

- Lighting system including 5 halogen floodlights and 4 LED lights in the area of the milling unit
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Pre-fitting for installing the WITOS FleetView control unit "WIRTGEN Road Technologies Telematics and on-site Solutions" (WITOS) is the intelligent telematics system of the WIRTGEN Road Technologies for efficient fleet and service management worldwide
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 819,185.00**

<b>Mandatory Options</b>				
<b>Milling drum housing</b>				
Wear-resistant milling drum housing FB2100 (6 ft 11 in) without milling drum	Standard	2193939	USD	0.00
<b>Milling drums / milling units</b>				
Milling drum with milling width 2100 mm / 6 ft 11 in, milling depth max. 300 mm / 0 ft 11 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 190 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2314413	USD	0.00
<b>Operator's platform</b>				
Flexibly mounted operator's platform with clearly laid-out control panel and control display as well as a large storage compartment (approx. 250 l / 66 gal) on the operator's platform and single standing seats on the right and left. The storage compartment has a variable, removable false floor and a lockable lid which can also be used as a seat. It is used for storing tools, pick elements, a toolbox, etc.	Standard	2488411	USD	0.00
Flexibly mounted operator's platform with clear control panels and control display as well as comfortable adjustable operator's seats right and left.	Option	2446210	USD	4,397.00
<b>Operator's platform</b>				
Complete mirror set: 2 mirrors front and one mirror on rear of the machine	Standard	2276347	USD	0.00
Complete mirror set, partial from operator's platform electrically folding as well as additionally heated and with truck stop and go indication	Option	2276348	USD	5,293.00
<b>Material transport</b>				
Robust 25 ft 11 in / 7,900 mm long discharge conveyor with conveyor belt system 2 ft 9 in / 850 mm and hydraulic folding device for shortening the transport length	Standard	2446319	USD	0.00
<b>Water tank filling</b>				
Additional water tank filling from the rear of the machine using a stopcock.	Standard	2193960	USD	0.00
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filling pump.	Option	2448383	USD	3,447.00
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2446558	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2446559	USD	2,334.00

<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 6 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 3 rotary beacons.	Standard	2346607	USD	0.00
Powerful LED lighting system 24 V. Consisting of 6 additional LED working lights for optimum illumination of the working area. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 3 LED rotary beacons.	Option	2346608	USD	4,085.00
<b>Equipment Options</b>				
<b>Additional weight</b>				
Additional weight 2,425 lbs / 1,100 kg	Standard	2346424	USD	0.00
Large sized storage compartment for 29 pick containers mounted on the rear of the machine instead of the standard storage compartment.	Option	2221603	USD	3,257.00
<b>Exhaust air filter</b>				
VCS extraction system on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit. For version with long discharge conveyor.	Standard	2566917	USD	0.00
<b>Equipment operator's platform</b>				
Operator's platform equipped with weather canopy including windscreen and rear window. The canopy is equipped with extensions on both sides and protects the entire operator's platform from rain and sunlight. The canopy itself is made of highly durable GFRP and the windscreen and rear window are scratch-resistant laminated protective glass. The canopy can be folded up electrohydraulically to facilitate machine transport.	Option	2492942	USD	14,304.00

Hot air heating in the footwell area of the operator's platform	Option	2174234	USD	1,696.00
<b>Device for milling drum change</b>				
Milling drum mounting and transport carriage FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,284.00
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	Option	2344691	USD	1,330.00
<b>Leveling</b>				
Expansion of leveling system by one ultrasonic sensor for scanning in front of the milling drum right or left. Including connection cable and holder.	Standard	2286567	USD	0.00
Expansion of leveling system by two ultrasonic sensors for scanning in front of the milling drum right and left. Including connection cable and holder.	Option	2283608	USD	2,606.00
<b>Additional control unit LEVEL PRO</b>				
Expansion LEVEL PRO with an additional operating display, including required connection cable	Standard	2137348	USD	0.00
<b>Leveling</b>				
Pre-fitting for multiplex system comprising 4 sensors sockets for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	Standard	2436230	USD	0.00
Expansion leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, connection cable and holder	Option	2436231	USD	3,026.00
Expansion of leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors, connection cable and holder	Option	2436232	USD	6,392.00
<b>Water system</b>				
Powerful, hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min (4 gpm) at 150 bar (2175 psi) pressure.	Option	2193973	USD	2,443.00

<b>Pick changing aids</b>				
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	Option	2178052	USD	3,461.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	Standard	2137372	USD	0.00
Fold-open seats on the rear track units for the pick change, with integrated storage compartment for pick change tools and 4 pick containers	Standard	2283946	USD	0.00
<b>Diesel tank filling systems</b>				
Electrically operated diesel suction and pressure pump for the diesel tank filling with 5.00 m suction hose.	Option	2125976	USD	896.00
<b>Wirtgen information and diagnostic system</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO display.	Standard	2219502	USD	0.00
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras. Each of these shows the area behind the machine as well as the area in front of the loading conveyor. The camera images are displayed on the machine control display.	Option	2526011	USD	2,687.00
Monitor system as maneuvering aid with 2 cameras. Camera 1 is installed on the rear of the machine pointing to the rear and camera 2 is installed between the front track units pointing to the front. The camera images are displayed on the machine control display	Standard	2286626	USD	0.00
Extensive monitor system consisting of a total of 6 cameras and an additional monitor. Cameras 1 and 2 show the areas behind the machine as well as ahead of the load belt, and thus facilitate maneuvering and loading. Cameras 3-6 show the area in front of the milling drum unit, the milled area behind the milling unit as well as the side plate and the front right and left chassis units, thereby facilitating the working process. Camera images 1-2 are displayed in the machine control display, camera images 3-6 are output on the additional monitor.	Option	2530073	USD	9,364.00
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	Option	2658169	USD	434.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list W 210i

### Scope of supply – basic machine

- Engine: 2x 6-cylinder diesel engines type: Cummins QSL 9
- Maximum power at 1900 r.p.m.: 537 kW / 720 HP / 730 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 6 ft 7 in / 2000 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with double-sided wasp waist
- Hydraulically opening, soundproof engine cowl
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Cooling system with temperature-controlled fan speed
- Large storage compartments for pick containers

### MILLING DRUM HOUSING

- Three milling drum rotation speeds with electric on/off function 127 r.p.m. - 109 r.p.m. - 97 r.p.m.
- Hydraulic material depressor with conveyor lifting function
- Hydraulically movable and positionable scraper plate with automatic locking
- Hydraulically lifting side plates, clearance right 450 mm (1 ft 6 in), clearance left 330 mm (1 ft 1 in)
- Water sprinkling strip in the milling drum unit

### LOADING OF MILLED MATERIAL

- Conveyor system with manually or automatically adjustable conveying speed
- Water spray system in the primary conveyor
- Slewing angle discharge conveyor  $\pm 60^\circ$

### MACHINE CONTROL AND LEVELLING SYSTEM

- Multi-function control display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Milling power control with automatic on/off function
- Two exterior panels for operating functions by ground crew
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system

### OPERATOR'S PLATFORM

- Fully anti-vibration mounted operator's platform
- Convenient, individually adjustable control panel
- Convenient access to the operator's platform, right and left
- Lockable control panel covers

#### CHASSIS AND HEIGHT ADJUSTMENT

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- Freely selectable steering functions for the four-track steering
- Extremely wear-resistant, two-piece EPS polyurethane track pads

#### MISCELLANEOUS

- Lighting system including 5 halogen floodlights and 4 LED lights in the area of the milling unit
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

List price ex subsidiary Wirtgen America

USD 809,671.00

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing FB2200 (7 ft 3 in) FCS-Light, with pre-fitting enabling a quick and easy change of milling drums with varying spacings and equal milling widths, without milling drum.	Standard	2436519	USD	0.00
Milling drums / milling units				
FCS milling drum with milling width 2200 mm / 7 ft / 3 in, milling depth max. 330 mm / 1 ft 1 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 181 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2375650	USD	0.00
Operator's platform				
Flexibly mounted operator's platform with clearly laid-out control panel and control display as well as a large storage compartment (approx. 250 l / 66 gal) on the operator's platform and single standing seats on the right and left. The storage compartment has a variable, removable false floor and a lockable lid which can also be used as a seat. It is used for storing tools, pick elements, a coolbox, etc.	Option	2488383	USD	3,026.00
Flexibly mounted operator's platform with clear control panels and control display as well as comfortable adjustable operator's seats right and left.	Standard	2430848	USD	0.00
Operator's platform in "Operator Comfort System" version, consisting of movable and fully air-conditioned comfort cab with air-sprung operator's seat, 6-way camera system, joystick machine control and radio. An integrated intercom provides good communication with the second machine operator.	Option	2430849	USD	87,074.00
Operator's platform				
Complete mirror set: two mirrors front, one mirror middle and one mirror on rear of the machine	Standard	2105659	USD	0.00
Complete mirror set, partial from operator's platform electrically folding as well as additionally heated and with truck stop and go indication	Option	2105660	USD	5,293.00
Material transport				
Robust 7,900 mm (25 ft 11 in) long discharge conveyor with conveyor belt system 850 mm (2 ft 9 in) and hydraulic folding device for shortening the transport length	Standard	2430852	USD	0.00

<b>Water tank filling</b>				
Additional water tank filling from the rear of the machine using a stopcock.	Standard	2120201	USD	0.00
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filling pump.	Option	2430853	USD	3,691.00
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2431869	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2431874	USD	2,334.00
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 6 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 3 rotary beacons.	Standard	2346607	USD	0.00
Powerful LED lighting system 24 V. Consisting of 6 additional LED working lights for optimum illumination of the working area. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 3 LED rotary beacons.	Option	2346608	USD	4,085.00
<b>Equipment Options</b>				
<b>Additional weight</b>				
Additional weight 3,748 lbs / 1,700 kg	Standard	2199810	USD	0.00
Large sized storage compartment for 29 pick containers mounted on the rear of the machine instead of the standard storage compartment.	Option	2221603	USD	3,257.00
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	Standard	2105684	USD	0.00

<b>Equipment operator's platform</b>				
Operator's platform equipped with weather canopy including windscreen and rear window. The canopy is equipped with extensions on both sides and protects the entire operator's platform from rain and sunlight. The canopy itself is made of highly durable GFRP and the windscreen and rear window are scratch-resistant laminated protective glass. The canopy can be folded up electrohydraulically to facilitate machine transport.	Option	2492942	USD	14,304.00
Hot air heating in the footwell area of the operator's platform	Option	2174234	USD	1,696.00
<b>Device for milling drum change</b>				
Milling drum mounting and transport carriage FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,284.00
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	Option	2440138	USD	1,330.00
<b>Options for belt conveyor</b>				
Support device for putting the discharge conveyor on the low-loader.	Standard	60603	USD	0.00
<b>Leveling</b>				
Expansion leveling system for scanning ahead of the milling drum right, with hydraulic sensor, connection cable and holder. (Can also be mounted on left)	Option	2112702	USD	2,999.00
Expansion leveling system for scanning ahead of the milling drum right and left, with hydraulic sensor, connection cable and holder	Standard	2112703	USD	0.00
<b>Additional control unit LEVEL PRO</b>				
Expansion LEVEL PRO with an additional operating display, including required connection cable	Standard	2137348	USD	0.00
<b>Leveling</b>				
Pre-fitting for multiplex system comprising 4 sensors sockets for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	Standard	2436230	USD	0.00
Expansion leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, connection cable and holder	Option	2436231	USD	3,026.00
Expansion of leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors, connection cable and holder	Option	2436232	USD	6,392.00
<b>Water system</b>				
Powerful, hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min (4 gpm) at 150 bar (2175 psi) pressure.	Option	2105701	USD	2,443.00

<b>Pick changing aids</b>				
Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in this case.	Standard	2105702	USD	0.00
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	Option	2178052	USD	3,461.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	Standard	2137372	USD	0.00
Fold-open seats on the rear track units for the pick change, with integrated storage compartment for pick change tools and 4 pick containers	Standard	2105678	USD	0.00
<b>Diesel tank filling systems</b>				
Electrically operated diesel suction and pressure pump for the diesel tank filling with 5.00 m suction hose.	Option	2125976	USD	896.00
<b>Wirtgen information and diagnostic system</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO display.	Standard	2219502	USD	0.00
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras. Each of these shows the area behind the machine as well as the area in front of the loading conveyor. The camera images are displayed on the machine control display.	Standard	2526011	USD	0.00
Extensive monitor system consisting of a total of 6 cameras and an additional monitor. Cameras 1 and 2 show the areas behind the machine as well as ahead of the load belt, and thus facilitate maneuvering and loading. Cameras 3-6 show the area in front of the milling drum unit, the milled area behind the milling unit as well as the side plate and the front right and left chassis units, thereby facilitating the working process. Camera images 1-2 are displayed in the machine control display, camera images 3-6 are output on the additional monitor.	Option	2530073	USD	9,364.00
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	Option	2658169	USD	434.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

**Price list****W 210 Fi - 2200 mm milling drum****Scope of supply – basic machine**

- Engine: 6-cylinder diesel engine: CATERPILLAR C18 ATAAC
- Rated power at 1,950 r.p.m.: 563 kW / 755 HP / 766 PS
- Exhaust standard: EU Stage 5 / US Tier 4f
- Standard milling width: 6 ft 7 in / 2000 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

**STANDARD EQUIPMENT**

- Basic machine with engine
- Machine frame featuring a single wasp waist at the rear right, and a dual wasp waist at the front
- DUAL SHIFT two-speed powershift transmission for efficient engine speeds combined with powerful milling drum speeds.
- Automatic pressure adjustment of the cylinder pump in accordance with performance requirements for reduced diesel consumption
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Two cooling fans to minimize power consumption of the cooling system

**MILLING DRUM HOUSING**

- Adjustment of material depressor contact pressure via the control panel or automatically via the MILL ASSIST feature to reduce chunk formation
- Electrical adjustment of scraper contact pressure via the control panel
- Automatically controlled locking feature of scraper
- Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement.
- Single-piece water spray bar in the milling drum unit for reliable pick cooling and to prevent dust development
- Automatic control of the water quantity via the MILL ASSIST feature
- Height adjustment stroke increased by 150 mm to facilitate pick replacement and the exchange of milling drum units
- Pre-fitting to allow the quick exchange of milling drum units.
- Hydraulically lifting side plates, clearance right 450 mm (1 ft 6 in), clearance left 330 mm (1 ft 1 in)

**LOADING OF MILLED MATERIAL**

- Increased conveyor slewing angles of 65° each to the left and right
- Discharge conveyor with adjustable conveying speed and two slewing speeds for precise loading
- Boost feature for a temporary increase of the belt speed and conveying performance of the discharge conveyor by 20%
- Water spray system in the primary conveyor

- Larger conveyor pump for a constant belt speed even at a low engine speed of 1300 rpm

#### **MACHINE CONTROL AND LEVELLING SYSTEM**

- User-friendly control panel including 7" color screen
- LEVEL PRO ACTIVE leveling system with numerous automated and complementary features relieving the operator of a part of his workload
- LEVEL PRO ACTIVE - automatic height control in transport mode
- LEVEL PRO ACTIVE - ramp milling and auto-start feature for the second milling cut
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- MILL ASSIST assistance system for automatic adjustment of the milling drum speed in accordance with the main area of application and the parameters selected in terms of engine load, advance rate, milling volume and quality of the milling pattern.
- Automatic start-stop feature of the milling drum to reduce diesel consumption
- Comprehensive machine diagnostics on the control panel including, for example, a diagnostic system for the CAN bus
- Voltmeter integrated into the control panel for voltage measurement in the event of a malfunction
- Two control panels for operating functions performed by ground crew

#### **OPERATOR'S PLATFORM**

- Convenient access to the operator's platform, right and left
- Anti-vibration mounted operator's platform across the full width of the machine including fold-out railing, right
- Electrical control cabinet on the operator's platform for optimum accessibility and fast troubleshooting
- Electrical level indicator for the water tank on the external control panels
- Time display on the main control panel and on the exterior control panels
- Two mirrors at the front, one mirror at the rear of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- High travel speed of up to 100 m / min at low engine speeds (1,350 rpm), reduced diesel consumption and low noise emissions.
- Lifting speed of the height adjustment feature increased by 60%

#### **MISCELLANEOUS**

- "Welcome" and "Go home" lights feature in the area of the operator's platform and access
- Large storage compartment on the machine for pick containers
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Good accessibility to all maintenance points on the engine station
- Pneumatic hammer with pick extractor/insertor
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD**

**827,056.00**

Mandatory Options				
Milling drum housing				
FB2200 (7 ft 3 in) MCS BASIC quick-change milling drum unit that enables milling drums of the same milling width to be changed particularly quickly.	Standard	2598417	USD	0.00
Milling drums / milling units				
Milling drum MCS BASIC with milling width 2200 mm / 7 ft 3 in, milling depth max. 350 mm / 1 ft 2 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 176 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2611269	USD	0.00
OPERATOR'S PLATFORM				
Anti-vibration-mounted operator's platform with easy-to-read control panels, functional stand-up seat and a large, lockable storage compartment with a capacity of approx 69 gal / 260 liters	Standard	2662840	USD	0.00
Anti-vibration-mounted operator's platform with easy-to-read control panels, functional stand-up seat and a large, lockable storage compartment with a capacity of approx 69 gal/260 liters. A hydraulically height-adjustable weather canopy with transparent side weather protection elements protects the operator from the wind and weather.	Option	2598429	USD	15,716.00
High-quality, soundproofed comfort cabin with windows on all sides for productive work. The cab can be moved to either side and rotated by up to 110° for optimum visibility. An air conditioner, a six-camera system and an intercom system create an ideal working environment. The cabin can be hydraulically swiveled into the machine chassis when transporting the machine.	Option	2598430	USD	86,219.00
Material transport				
Heavy-duty 7,900 mm (25 ft 11 in) long discharge conveyor with conveyor belt system 850 mm (2 ft 9 in) and hydraulic folding device for shortening the transport length	Standard	2598432	USD	0.00
Water tank filling				
Additional water tank filling from the rear of the machine using a shut-off cock.	Standard	2549116	USD	0.00
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filler pump	Option	2598434	USD	3,827.00

<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The entire base of the machine is painted in slate gray RAL 7015.	Standard	2598435	USD	0.00
The film coating is applied in RAL colors and design according to the customer's wishes. Film coating provides protection against mechanical and weather-related damage and can be removed without leaving any marks, if required	Option	2728766	USD	4,044.00
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Telematics</b>				
WITOS FleetView (mobile phone standard 3, 4G) includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2770403	USD	0.00
The WIRTGEN PERFORMANCE TRACKER WPT is a laser and satellite-supported measuring system for precise milling performance determination for machines with FB2000 or FB2200 without a weather canopy or with an operator's cabin. Two laser scanners measure the actual milling width and milling depth over the distance of the milling path. The milling performance results are automatically sent to the corresponding users via the WITOS interface with precise GPS machine position data and consumption data such as diesel consumption, water consumption, tool consumption and truck loads, in an evaluation and then by e-mail. The milling performance reports that include an image of the milling position can also be used as an allowance report. The usability of WITOS hardware components for the existing mobile radio standard is guaranteed for 3 years from the date of delivery.	Option	2781330	USD	47,066.00
<b>Machine lighting</b>				
Extended lighting system consisting of 21 extremely powerful LED working lights for optimum illumination of the working area. The light output is approx. 37,600 lumens in total.	Standard	2598443	USD	0.00

Extended lighting system with 19 particularly powerful LED working lights for optimum illumination of the working area. The light output of the working lights amounts to a total of 34,000 lumens. The additional lighting balloon is operated via the 24V power supply of the machine and achieves an additional luminous power of 16,000 lumens.	Option	2653969	USD	4,723.00
<b>Equipment Options</b>				
<b>Additional weight</b>				
Two-piece additional weight at the rear of the machine totaling 1,600 kg (3,527 lbs) which enables the machine to be individually ballasted. The individual weights of 850 kg and 750 kg can be easily and quickly inserted and fastened to the rear of the machine.	Standard	2598492	USD	6,609.00
<b>Additional weight</b>				
Large sized storage compartment for 69 pick containers mounted at the rear of the machine instead of the standard storage compartment. The storage compartment is splash-proof and additionally contains a completely sealed area to safely store electronic components such as leveling sensors or tool extractors.	Option	2598494	USD	3,149.00
Storage compartment on both the rear track units for 8 pick containers	Standard	2598662	USD	1,086.00
<b>Equipment operator's platform</b>				
A powerful hot-air heating system with intelligently arranged air vents close to the operator's hands and feet offers maximum comfort on the operator's platform	Option	2598527	USD	3,800.00
Operator's platform equipped with a height-adjustable stand-up seat for greater operator comfort	Option	2688479	USD	1,059.00
<b>Milling drum assembly options</b>				
The actual milling depth is determined by calculating the difference in readings from sensors on the side plate and sensors on the scraper. The actual milling depth is displayed on the LEVEL PRO ACTIVE panel.	Standard	2598665	USD	0.00
Overload sensors automatically lift the scraper whenever obstacles are detected that could damage the scraper.	Option	2598528	USD	1,574.00
Active floating position for the side plates on the left and right by continuously adjusting the milling depth and position of the plates. If necessary, the side plates can be briefly raised to prevent them from sinking into the soft ground.	Standard	2598531	USD	0.00

MCS BASIC extended with a hydraulically opening side door on the milling drum unit FB2200 (7 ft 3 in). With additional hydraulic cylinders, the side door can be easily unlocked and opened when changing the milling drum. This enables milling drums in MCS BASIC to be changed even faster.	Standard	2688482	USD	0.00
Electrically switchable sectional water spray bar in the milling drum unit FB2200 (7 ft 3 in). Four areas can be controlled as required from the control panel (automatically controlled with WPT). This significantly reduces water consumption.	Standard	2610096	USD	0.00
Two wear protection rollers that can be attached to the side plates (left or right). The rollers protect the asphalt, curbs, and other surfaces from damage and prevent excessive wear to the side plates.	Option	2662818	USD	774.00
Mounting aid for lifting out the short primary conveyor when changing the milling unit.	Option	2598534	USD	434.00
Milling drum mounting and transport cart for milling drums from FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,419.00
Transport roller set consisting of 4 heavy-duty rollers for easy removal of milling units from FB1500 to FB3800 on level surfaces.	Option	2762958	USD	5,211.00
<b>Options for belt conveyor</b>				
VCS – vacuum cutting system on the discharge conveyor for the extraction of fine material particles and water vapor from the sealed milling drum unit.	Standard	2598495	USD	0.00

Signal lights for visual "stop" and "go" instructions for the truck driver without the use of a horn. The signal lights can be folded in hydraulically from the operator's platform.	Option	2598539	USD	4,818.00
Support device for positioning the discharge conveyor on the flat bed truck	Standard	60603	USD	0.00
Semi-automatic ACTIVE CONVEYOR swing angle control that guides the discharge conveyor in construction site situations where milling is carried out at intersections or roundabouts	Option	2598541	USD	1,221.00
<b>Additional control unit LEVEL PRO</b>				
Additional 5" control panel for controlling the LEVEL PRO ACTIVE leveling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Option	2598631	USD	2,321.00
<b>Two pieces</b> - Additional 7" control panel that displays the machine control and controls the LEVEL PRO ACTIVE levelling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Standard	2598632	USD	0.00
Additional 2" control panel that can be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Standard	2598664	USD	0.00
Two additional 2" control panels that can each be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Option	2767151	USD	3,909.00
User-specific saving of individually adjustable machine settings such as the display configuration or the assignment of favorites buttons. The data can be saved on five different SMART KEY key fobs with tokens.	Option	2779470	USD	1,208.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE levelling system with levelling boom. Premounted and adjustable hydraulic cylinders on the left and right allow the use of a Sonic-Ski sensor that is able to scan a reference object up to 1,900 mm away from the milling edge. During machine transport, the sensor and cables are securely stowed in the corresponding transport boxes.	Option	2600969	USD	10,559.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with two hydraulic cylinder sensors for scanning a reference surface to the left and the right of the milling drum.	Standard	2598630	USD	0.00

<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2598636	USD	5,062.00
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the left and right. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2598641	USD	9,826.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines without a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2662822	USD	8,333.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines with a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2662824	USD	2,076.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines with a cabin. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2662844	USD	5,931.00
Extension of the LEVEL PRO ACTIVE leveling system with two linear laser sensors that can be installed using the pre-fitting equipment for 3D leveling.	Option	2662826	USD	12,635.00
<b>Water system</b>				
Powerful, hydraulically operated high pressure water cleaner with a maximum output of 15 l/min (4 gpm) at a pressure of 150 bar (2175 psi).	Option	2598657	USD	2,497.00
<b>Pick changing aids</b>				
Hydraulically driven pick ejector, including the holder and required electrical and hydraulic connections. Ideal for convenient, fast and low-noise pick changes.	Standard	2598659	USD	0.00

<b>Camera system</b>				
Four-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine as well as of the side plates, on the right and left. The camera images are displayed on the 10" control panel on the operator's platform.	<b>Standard</b>	<b>2598678</b>	<b>USD</b>	<b>0.00</b>
Eight-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine, of the side plates on the right and left and of the milled surface behind the milling drum unit. The camera images are displayed on the 10" control panel on the operator's platform.	<b>Option</b>	<b>2598679</b>	<b>USD</b>	<b>10,789.00</b>
<b>Other devices</b>				
Dual starter system for maximum starting reliability with an additional automatic engine stop function that reduces diesel consumption.	<b>Option</b>	<b>2647215</b>	<b>USD</b>	<b>4,818.00</b>
Electrical diesel suction and pressure pump with 7.50 m (24 ft 7 in) suction hose. The machine can be refueled with up to 50 l/min (13 gal/min) from external diesel tanks.	<b>Option</b>	<b>2598663</b>	<b>USD</b>	<b>923.00</b>
License plate holder with LED lighting	<b>Option</b>	<b>2654224</b>	<b>USD</b>	<b>475.00</b>
Hydraulically powered sweeping unit consisting of a central brush and side brushes on both sides used to sweep the milled surface behind the machine. The direction in which the brushes rotate can be changed depending on the desired direction of sweeping. The unit can be folded up hydraulically from the operator's platform during transport or when maneuvering. It is operated via the 2" control panel that comes with the unit.	<b>Option</b>	<b>2779365</b>	<b>USD</b>	<b>44,541.00</b>
<b>Documentation</b>				<b>0</b>
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.

The actual milling depth is determined by calculating the difference in readings from sensors on the side plate and sensors on the scraper. The actual milling depth is displayed on the LEVEL PRO ACTIVE panel.	Standard	2598665	USD	0.00
Overload sensors automatically lift the scraper whenever obstacles are detected that could damage the scraper.	Option	2598528	USD	1,574.00
Active floating position for the side plates on the left and right by continuously adjusting the milling depth and position of the plates. If necessary, the side plates can be briefly raised to prevent them from sinking into the soft ground.	Standard	2598531	USD	0.00

MCS BASIC extended with a hydraulically opening side door on the milling drum unit FB2500 (8 ft 2 in). With additional hydraulic cylinders, the side door can be easily unlocked and opened when changing the milling drum. This enables milling drums in MCS BASIC to be changed even faster.	Standard	2688484	USD	0.00
Sectional, electrically controlled water spray bar in the milling drum assembly FB2500 (8 ft 2 in). Four areas can be controlled from the control panel as needed. This reduces water consumption enormously.	Standard	2610097	USD	0.00
Two wear protection rollers that can be attached to the side plates (left or right). The rollers protect the asphalt, curbs, and other surfaces from damage and prevent excessive wear to the side plates.	Option	2662818	USD	774.00
Mounting aid for lifting out the short primary conveyor when changing the milling unit.	Option	2598534	USD	434.00
Milling drum mounting and transport cart for milling drums from FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,419.00
Transport roller set consisting of 4 heavy-duty rollers for easy removal of milling units from FB1500 to FB3800 on level surfaces.	Option	2762958	USD	5,211.00
<b>Options for belt conveyor</b>				
VCS – vacuum cutting system on the discharge conveyor for the extraction of fine material particles and water vapor from the sealed milling drum unit.	Standard	2598495	USD	0.00

Signal lights for visual "stop" and "go" instructions for the truck driver without the use of a horn. The signal lights can be folded in hydraulically from the operator's platform.	Option	2598539	USD	4,818.00
Support device for positioning the discharge conveyor on the flat bed truck	Standard	60603	USD	0.00
Semi-automatic ACTIVE CONVEYOR swing angle control that guides the discharge conveyor in construction site situations where milling is carried out at intersections or roundabouts	Option	2598541	USD	1,221.00
<b>Additional control unit LEVEL PRO</b>				
Additional 5" control panel for controlling the LEVEL PRO ACTIVE leveling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Option	2598631	USD	2,321.00
<b>Two pieces</b> - Additional 7" control panel that displays the machine control and controls the LEVEL PRO ACTIVE levelling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Standard	2598632	USD	0.00
Additional 2" control panel that can be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Standard	2598664	USD	0.00
Two additional 2" control panels that can each be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Option	2767151	USD	3,909.00
User-specific saving of individually adjustable machine settings such as the display configuration or the assignment of favorites buttons. The data can be saved on five different SMART KEY key fobs with tokens.	Option	2779470	USD	1,208.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE levelling system with levelling boom. Premounted and adjustable hydraulic cylinders on the left and right allow the use of a Sonic-Ski sensor that is able to scan a reference object up to 1,900 mm away from the milling edge. During machine transport, the sensor and cables are securely stowed in the corresponding transport boxes.	Option	2600969	USD	10,559.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with two hydraulic cylinder sensors for scanning a reference surface to the left and the right of the milling drum.	Standard	2598630	USD	0.00

<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2598636	USD	5,062.00
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the left and right. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2598641	USD	9,826.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines without a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2662822	USD	8,333.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines with a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2662824	USD	2,076.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines with a cabin. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2662844	USD	5,931.00
Extension of the LEVEL PRO ACTIVE leveling system with two linear laser sensors that can be installed using the pre-fitting equipment for 3D leveling.	Option	2662826	USD	12,635.00
<b>Water system</b>				
Powerful, hydraulically operated high pressure water cleaner with a maximum output of 15 l/min (4 gpm) at a pressure of 150 bar (2175 psi).	Option	2598657	USD	2,497.00
<b>Pick changing aids</b>				
Hydraulically driven pick ejector, including the holder and required electrical and hydraulic connections. Ideal for convenient, fast and low-noise pick changes.	Standard	2598659	USD	0.00

<b>Camera system</b>				
Four-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine as well as of the side plates, on the right and left. The camera images are displayed on the 10" control panel on the operator's platform.	<b>Standard</b>	<b>2598678</b>	<b>USD</b>	<b>0.00</b>
Eight-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine, of the side plates on the right and left and of the milled surface behind the milling drum unit. The camera images are displayed on the 10" control panel on the operator's platform.	<b>Option</b>	<b>2598679</b>	<b>USD</b>	<b>10,789.00</b>
<b>Other devices</b>				
Dual starter system for maximum starting reliability with an additional automatic engine stop function that reduces diesel consumption.	<b>Option</b>	<b>2647215</b>	<b>USD</b>	<b>4,818.00</b>
Electrical diesel suction and pressure pump with 7.50 m (24 ft 7 in) suction hose. The machine can be refueled with up to 50 l/min (13 gal/min) from external diesel tanks.	<b>Option</b>	<b>2598663</b>	<b>USD</b>	<b>923.00</b>
License plate holder with LED lighting	<b>Option</b>	<b>2654224</b>	<b>USD</b>	<b>475.00</b>
Hydraulically powered sweeping unit consisting of a central brush and side brushes on both sides used to sweep the milled surface behind the machine. The direction in which the brushes rotate can be changed depending on the desired direction of sweeping. The unit can be folded up hydraulically from the operator's platform during transport or when maneuvering. It is operated via the 2" control panel that comes with the unit.	<b>Option</b>	<b>2779365</b>	<b>USD</b>	<b>44,541.00</b>
<b>Documentation</b>				<b>0</b>
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.

Date: 6/25/2020

## Price list

# W 220i

### Scope of supply – basic machine

- Engine: 6-cylinder diesel engine: CATERPILLAR C18 ATAAC
- Rated power at 1,950 r.p.m.: 597 KW / 801 HP / 812 PS
- Exhaust standard: US Tier 4f
- Standard milling width: 7 ft 3 in / 2,200 mm
- Maximum milling depth: 1 ft 2 in / 350 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with double-sided wasp waist
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Cooling system with temperature-controlled fan speed
- Large storage compartments for pick containers

### MILLING DRUM HOUSING

- Three milling drum rotation speeds with electric on/off function 105 r.p.m. - 94 r.p.m. - 84 r.p.m.
- Hydraulic material depressor with conveyor lifting function
- Hydraulically movable and positionable scraper plate with automatic locking
- Hydraulically lifting side plate, right clearance 1 ft 6 in / 450 mm and left clearance 1 ft 2 in / 350 mm
- Two water sprinkling strips in the milling drum unit with separate on/off function

### LOADING OF MILLED MATERIAL

- Conveyor system with manually or automatically adjustable conveying speed
- Water spray system in the primary conveyor
- Slewing angle discharge conveyor  $\pm 60^\circ$

### MACHINE CONTROL AND LEVELLING SYSTEM

- Multi-function control display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Milling power control with automatic on/off function
- Two exterior panels for operating functions by ground crew
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system

### OPERATOR'S PLATFORM

- Fully anti-vibration mounted operator's platform
- Convenient, individually adjustable control panel
- Convenient access to the operator's platform, right and left
- Lockable control panel covers
- Two mirrors front, one mirror middle and one mirror in rear area of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- Freely selectable steering functions for the four-track steering
- Extremely wear-resistant, two-piece EPS polyurethane track pads

#### **MISCELLANEOUS**

- Lighting system including 3 halogen floodlights and 4 LED lights in the area of the milling unit
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- Water high-pressure system with automatic on/off function
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 897,017.00**

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing FB2200 (7 ft 3 in) FCS-Light, with pre-fitting enabling a quick and easy change of milling drums with varying spacings and equal milling widths, without milling drum.	Standard	2205464	USD	0.00
Milling drums / milling units				
FCS milling drum with milling width 2200 mm / 7 ft 3 in, milling depth max. 350 mm / 1 ft 2 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 188 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2309352	USD	0.00
Operator's platform				
Flexibly mounted operator's platform with clearly laid-out control panel and control display as well as a large storage compartment (approx. 250 l / 66 gal) on the operator's platform and single standing seats on the right and left. The storage compartment has a variable, removable false floor and a lockable lid which can also be used as a seat. It is used for storing tools, pick elements, a toolbox, etc.	Option	2546282	USD	3,026.00
Flexibly mounted operator's platform with clear control panels and control display as well as comfortable adjustable operator's seats right and left.	Standard	2546283	USD	0.00
Operator's platform in "Operator Comfort System" version, consisting of movable and fully air-conditioned comfort cab with air-sprung operator's seat, 6-way camera system, joystick machine control and radio. An integrated intercom provides good communication with the second machine operator.	Option	2542246	USD	87,074.00
Operator's platform				
Complete mirror set: two mirrors front, one mirror middle and one mirror on rear of the machine	Standard	2105659	USD	0.00
Complete mirror set, partial from operator's platform electrically folding as well as additionally heated and with truck stop and go indication	Option	2105660	USD	5,293.00
Material transport				
Robust 26 ft 9 in / 8,150 mm long discharge conveyor with conveyor belt system 3 ft 3 in / 1,000 mm and hydraulic folding device for shortening the transport length	Standard	2542405	USD	0.00

<b>Water tank filling</b>				
Additional water tank filling from the rear of the machine using a stopcock.	Standard	2466094	USD	0.00
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filling pump.	Option	2465765	USD	3,447.00
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2542404	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2542407	USD	2,348.00
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 6 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 3 rotary beacons.	Standard	2346607	USD	0.00
Powerful LED lighting system 24 V. Consisting of 6 additional LED working lights for optimum illumination of the working area. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 3 LED rotary beacons.	Option	2346608	USD	4,085.00
<b>Equipment Options</b>				
Large sized storage compartment for 34 pick containers mounted on the rear of the machine instead of the standard storage compartment.	Option	2223465	USD	3,257.00

<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	Standard	2159104	USD	0.00
<b>Equipment operator's platform</b>				
Operator's platform equipped with weather canopy including windscreen and rear window. The canopy is equipped with extensions on both sides and protects the entire operator's platform from rain and sunlight. The canopy itself is made of highly durable GFRP and the windscreen and rear window are scratch-resistant laminated protective glass. The canopy can be folded up electrohydraulically to facilitate machine transport.	Option	2492943	USD	14,304.00
Hot air heating in the footwell area of the operator's platform	Option	2174234	USD	1,696.00
<b>Device for milling drum change</b>				
Milling drum mounting and transport carriage FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,284.00
<b>Options for belt conveyor</b>				
Support device for putting the discharge conveyor on the low-loader.	Standard	60603	USD	0.00
<b>Leveling</b>				
Expansion leveling system for scanning ahead of the milling drum right, with hydraulic sensor, connection cable and holder. (Can also be mounted on left)	Standard	2125960	USD	0.00
Expansion leveling system for scanning ahead of the milling drum right and left, with hydraulic sensor, connection cable and holder	Option	2125961	USD	5,591.00
<b>Additional control unit LEVEL PRO</b>				
Expansion LEVEL PRO with an additional operating display, including required connection cable	Standard	2137348	USD	0.00
<b>Leveling</b>				
Pre-fitting for multiplex system comprising 4 sensors sockets for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	Standard	2436230	USD	0.00
Expansion leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, connection cable and holder	Standard	2436231	USD	0.00
<b>Water system</b>				
Powerful, hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min (4 gpm) at 150 bar (2175 psi) pressure.	Option	2210128	USD	2,443.00

<b>Pick changing aids</b>				
Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in this case.	Standard	2125977	USD	0.00
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	Option	2178052	USD	3,461.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	Standard	2137372	USD	0.00
Fold-open seats on the rear track units for the pick change, with integrated storage compartment for pick change tools and 4 pick containers	Option	2105678	USD	1,914.00
<b>Diesel tank filling systems</b>				
Electrically operated diesel suction and pressure pump for the diesel tank filling with 5.00 m suction hose.	Option	2125976	USD	896.00
<b>Wirtgen information and diagnostic system</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO display.	Standard	2219502	USD	0.00
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras. Each of these shows the area behind the machine as well as the area in front of the loading conveyor. The camera images are displayed on the machine control display.	Standard	2526011	USD	0.00
Extensive monitor system consisting of a total of 6 cameras and an additional monitor. Cameras 1 and 2 show the areas behind the machine as well as ahead of the load belt, and thus facilitate maneuvering and loading. Cameras 3-6 show the area in front of the milling drum unit, the milled area behind the milling unit as well as the side plate and the front right and left chassis units, thereby facilitating the working process. Camera images 1-2 are displayed in the machine control display, camera images 3-6 are output on the additional monitor.	Option	2530073	USD	9,364.00
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	Option	2658169	USD	434.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

**Price list****W 220 Fi - 2200 mm milling drum****Scope of supply – basic machine**

- Engine: 6-cylinder diesel engine: CATERPILLAR C18 ATAAC
- Rated power at 1,950 r.p.m.: 597 KW / 801 HP / 812 PS
- Exhaust standard: EU Stage V / US EPA Tier 4f
- Standard milling width: 7 ft 3 in / 2,200 mm
- Maximum milling depth: 1 ft 2 in / 350 mm

**STANDARD EQUIPMENT**

- Base machine with engine
- Machine frame featuring a single wasp waist at the rear right, and a dual wasp waist at the front
- DUAL SHIFT two-speed powershift transmission for efficient engine speeds combined with powerful milling drum speeds.
- Automatic pressure adjustment of the cylinder pump in accordance with performance requirements for reduced diesel consumption
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Two cooling fans to minimize power consumption of the cooling system

**MILLING DRUM HOUSING**

- Adjustment of material depressor contact pressure via the control panel or automatically via the MILL ASSIST feature to reduce chunk formation
- Electrical adjustment of scraper contact pressure via the control panel
- Automatically controlled locking feature of scraper
- Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement.
- Single-piece water spray bar in the milling drum unit for reliable pick cooling and to prevent dust development
- Automatic control of the water quantity via the MILL ASSIST feature
- Height adjustment stroke increased by 200 mm to facilitate pick replacement and the exchange of milling drum units
- Pre-fitting to allow the quick exchange of milling drum units.
- Hydraulically lifting side plates, clearance right 450 mm (1 ft 6 in), clearance left 330 mm (1 ft 1 in)

**LOADING OF MILLED MATERIAL**

- Increased conveyor slewing angles of 65° each to the left and right
- Discharge conveyor with adjustable conveying speed and two slewing speeds for precise loading
- Boost feature for a temporary increase of the belt speed and conveying performance of the discharge conveyor by 20%
- Water spray system in the primary conveyor

- Larger conveyor pump for a constant belt speed even at a low engine speed of 1300 rpm

#### **MACHINE CONTROL AND LEVELLING SYSTEM**

- User-friendly control panel including 7" color screen
- LEVEL PRO ACTIVE leveling system with numerous automated and complementary features relieving the operator of a part of his workload
- LEVEL PRO ACTIVE - automatic height control in transport mode
- LEVEL PRO ACTIVE - ramp milling and auto-start feature for the second milling cut
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- MILL ASSIST assistance system for automatic adjustment of the milling drum speed in accordance with the main area of application and the parameters selected in terms of engine load, advance rate, milling volume and quality of the milling pattern.
- Automatic start-stop feature of the milling drum to reduce diesel consumption
- Comprehensive machine diagnostics on the control panel including, for example, a diagnostic system for the CAN bus
- Voltmeter integrated into the control panel for voltage measurement in the event of a malfunction
- Two control panels for operating functions performed by ground crew

#### **OPERATOR'S PLATFORM**

- Convenient access to the operator's platform, right and left
- Anti-vibration mounted operator's platform across the full width of the machine including fold-out railing, right
- Electrical control cabinet on the operator's platform for optimum accessibility and fast troubleshooting
- Electrical level indicator for the water tank on the external control panels
- Time display on the main control panel and on the exterior control panels
- Two mirrors at the front, one mirror at the rear of the machine

#### **TRACK UNIT AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- High travel speed of up to 88 m / min at low engine speeds (1,350 rpm), reduced diesel consumption and low noise emissions.

#### **MISCELLANEOUS**

- "Welcome" and "Go home" lights feature in the area of the operator's platform and access
- Large storage compartment on the machine for pick containers
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Good accessibility to all maintenance points on the engine station
- Pneumatic hammer with pick extractor/insertor
- Large tool kit in lockable tool box
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- Pre-fitting for installing the WITOS FleetView control unit
- European type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD**

**912,339.00**

Mandatory Options				
Milling drum housing				
Wear-resistant, weight-optimized milling drum housing MCS BASIC FB2200 (7 ft 3 in) with pre-fitting enabling a quick and easy change of the milling drums with varying spacings, without milling drum.	Standard	2667113	USD	0.00
Milling drums / milling units				
Milling drum MCS BASIC with milling width 2200 mm / 7 ft / 3 in, milling depth max. 320 mm / 1ft / 0,5 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 182 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2679870	USD	0.00
OPERATOR'S PLATFORM				
Anti-vibration-mounted operator's platform with easy-to-read control panels, functional stand-up seat and a large, lockable storage compartment with a capacity of approx 69 gal / 260 liters	Standard	2700694	USD	0.00
Anti-vibration-mounted operator's platform with easy-to-read control panels, functional stand-up seat and a large, lockable storage compartment with a capacity of approx 69 gal/260 liters. A hydraulically height-adjustable weather canopy with transparent side weather protection elements protects the operator from the wind and weather.	in lieu of 2700694	2700695	USD	15,716.00
Material transport				
Heavy-duty 26 ft 9 in (8,150 mm) long discharge conveyor with 3 ft 3 in (1,000 mm) conveyor belt system and hydraulic folding device to shorten the transport length	Standard	2667116	USD	0.00
Robust 26 ft 9 in / 8,150 mm long discharge conveyor with conveyor belt system 3 ft 3 in / 1,000 mm	Option	2718941	USD	-13,694.00
Water tank filling				
Additional water tank filling from the rear of the machine using a shut-off cock.	Standard	2667152	USD	0.00
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filler pump	Option	2667153	USD	3,827.00
Paint				
Film coating in cream RAL 9001 with orange stripes. The entire base of the machine is covered in a slate grey RAL 7015 film coating.	Standard	2700380	USD	0.00

The film coating is applied in RAL colors and design according to the customer's wishes. Film coating provides protection against mechanical and weather-related damage and can be removed without leaving any marks, if required	In lieu of 2700380	2700381	USD	1,126.00
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Telematics</b>				
WITOS FleetView (mobile phone standard 3, 4G) includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2770403	USD	0.00
The WIRTGEN PERFORMANCE TRACKER WPT is a laser and satellite-supported measuring system for precise milling performance determination for machines with FB2000, FB 220 or FB2500 without a weather canopy or with an operator's cabin. Two laser scanners measure the actual milling width and milling depth over the distance of the milling path. The milling performance results are automatically sent to the corresponding users via the WITOS interface with precise GPS machine position data and consumption data such as diesel consumption, water consumption, tool consumption and truck loads, in an evaluation and then by e-mail. The milling performance reports that include an image of the milling position can also be used as an allowance report. The usability of WITOS hardware components for the existing mobile radio standard is guaranteed for 3 years from the date of delivery.	Option	2787665	USD	47,066.00
<b>Machine lighting</b>				
Extended lighting system consisting of 21 extremely powerful LED working lights for optimum illumination of the working area. Total light output of the working lights is approx. 43,600 lumens	Standard	2667172	USD	0.00

Extended lighting system consisting of 21 extremely powerful LED working lights for optimum illumination of the working area. Total light output of the working lights is approximately 43,600 lumens. The additional lighting balloon is powered via the machine's 24V electrical power supply and achieves an additional light output of 50,000 lumens	In lieu of <b>2667172</b>	<b>2667173</b>	<b>USD</b>	<b>4,723.00</b>
<b>Equipment Options</b>				
<b>Additional weight</b>				
Two additional weights located at the rear of the machine with a total weight of 1.500 kg (3,307 lbs) for individual machine ballasting. The individual weights, each weighing 750 kg (1,653 lbs), can be easily and quickly inserted and fastened to the rear of the machine.	<b>Option</b>	<b>2667175</b>	<b>USD</b>	<b>6,609.00</b>
<b>Additional weight</b>				
Large, generously sized storage compartment for 72 pick containers at the rear of the machine instead of the standard storage compartment. The storage compartment is lockable, splash-proof and additionally contains a completely sealed area to safely store electronic components, such as levelling sensors or pick ejectors	<b>Option</b>	<b>2667177</b>	<b>USD</b>	<b>3,149.00</b>
Storage compartment close to both rear track units for 10 pick containers	<b>Standard</b>	<b>2700383</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				
A powerful hot-air heating system with intelligently arranged air vents close to the operator's hands and feet offers maximum comfort on the operator's platform	<b>Option</b>	<b>2745118</b>	<b>USD</b>	<b>3,800.00</b>
Operator's platform equipped with a height-adjustable stand-up seat for greater operator comfort	<b>Standard</b>	<b>2688479</b>	<b>USD</b>	<b>0.00</b>
<b>Milling drum assembly options</b>				
The actual milling depth is determined by calculating the difference in readings from sensors on the side plate and sensors on the scraper. The actual milling depth is displayed on the LEVEL PRO ACTIVE panel.	<b>Standard</b>	<b>2598665</b>	<b>USD</b>	<b>1,045.00</b>
Overload sensors automatically lift the scraper whenever obstacles are detected that could damage the scraper.	<b>Option</b>	<b>2667192</b>	<b>USD</b>	<b>1,574.00</b>
Active floating position for the side plates on the left and right by continuously adjusting the milling depth and position of the plates. If necessary, the side plates can be briefly raised to prevent them from sinking into the soft ground.	<b>Standard</b>	<b>2598531</b>	<b>USD</b>	<b>0.00</b>

Extension of MCS BASIC with one hydraulically opening side panel on the milling drum unit FB2200/FB2500 (7 ft 3 in/8 ft 2 in).. An additional hydraulic cylinder enables the MCS side panel to be easily opened when changing milling drums. This enables MCS BASIC milling drums to be changed even faster.	Standard	2667195	USD	0.00
Electrically switchable sectional water spray bar in the milling drum unit FB2200 (7 ft 3 in). Four areas can be controlled as required from the control panel (automatically controlled with WPT). This significantly reduces water consumption.	Standard	2667199	USD	0.00
Electrically switchable sectional water spray bar in the milling drum assembly FB2500 (8 ft 2 in). Four areas can be controlled as required from the control panel (automatically controlled with WPT). This reduces water consumption enormously.	Option	2667200	USD	2,823.00
Electrically switchable sectional water spray bar in the milling drum assembly FB3500/3800 (11 ft 6 in / 12 ft 6 in). Four areas can be controlled as required from the control panel (automatically controlled with WPT). This reduces water consumption enormously.	Option	2667201	USD	3,434.00
Two wear protection rollers that can be attached to the side plates (left or right). The rollers protect the asphalt, curbs, and other surfaces from damage and prevent excessive wear to the side plates.	Option	2662818	USD	774.00
Mounting aid for lifting out the short primary conveyor when changing the milling unit.	Standard	2685194	USD	0.00
Transport carriage for milling drum units from FB2200 (7 ft 3 in) to FB4400 (14 ft 5 in) to make it easier to change milling drum units and handle them in the workshop or on the job site.	Option	2282163	USD	17,331.00
Milling drum mounting and transport cart for milling drums from FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,419.00
Transport roller set consisting of 4 heavy-duty rollers for easy removal of milling units from FB1500 to FB3800 on level surfaces.	Option	2762958	USD	5,211.00
<b>Options for belt conveyor</b>				
VCS – vacuum cutting system on the discharge conveyor for the extraction of fine material particles and water vapor from the sealed milling drum unit.	Standard	2667207	USD	0.00

Signal lights for visual "stop" and "go" instructions for the truck driver without the use of a horn. The signal lights can be folded in hydraulically from the operator's platform.	Option	2598539	USD	4,818.00
Semi-automatic ACTIVE CONVEYOR swing angle control that guides the discharge conveyor in construction site situations where milling is carried out at intersections or roundabouts	Standard	2703705	USD	0.00
Support device for positioning the discharge conveyor on the flat bed truck	Standard	60603	USD	0.00
<b>Additional control unit LEVEL PRO</b>				
Additional 5" control panel for controlling the LEVEL PRO ACTIVE leveling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Option	2598631	USD	2,321.00
<b>Two pieces</b> - Additional 7" control panel that displays the machine control and controls the LEVEL PRO ACTIVE levelling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Standard	2598632	USD	0.00
Additional 2" control panel that can be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Standard	2598664	USD	0.00
Two additional 2" control panels that can each be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Option	2767151	USD	3,909.00
User-specific saving of individually adjustable machine settings such as the display configuration or the assignment of favorites buttons. The data can be saved on five different SMART KEY key fobs with tokens.	Standard	2779470	USD	0.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE levelling system with levelling boom. Premounted and adjustable hydraulic cylinders on the left and right allow the use of a Sonic-Ski sensor that is able to scan a reference object up to 1,900 mm away from the milling edge. During machine transport, the sensor and cables are securely stowed in the corresponding transport boxes.	Option	2667237	USD	10,559.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with one hydraulic cylinder sensor for scanning a reference surface to the right of the milling drum.	Option	2667239	USD	3,067.00

Extension of the LEVEL PRO ACTIVE leveling system with two hydraulic cylinder sensors for scanning a reference surface to the left and the right of the milling drum.	<b>Standard</b>	<b>2667241</b>	<b>USD</b>	<b>0.00</b>
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	<b>Option</b>	<b>2673212</b>	<b>USD</b>	<b>5,062.00</b>
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the left and right. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	<b>Option</b>	<b>2673213</b>	<b>USD</b>	<b>9,826.00</b>
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box. (FB3500/FB3800) (11 ft 6 in / 12 ft 6 in)	<b>Option</b>	<b>2790513</b>	<b>USD</b>	<b>6,284.00</b>
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right and left. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box. (FB3500/FB3800) (11 ft 6 in / 12 ft 6 in)	<b>Option</b>	<b>2790514</b>	<b>USD</b>	<b>12,079.00</b>
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines without a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	<b>Option</b>	<b>2667342</b>	<b>USD</b>	<b>8,333.00</b>
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines with a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	<b>Option</b>	<b>2667343</b>	<b>USD</b>	<b>2,076.00</b>

Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines with a cabin. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2667344	USD	5,931.00
Extension of the LEVEL PRO ACTIVE leveling system with two linear laser sensors that can be installed using the pre-fitting equipment for 3D leveling.	Option	2662826	USD	12,635.00
<b>Water system</b>				
Powerful, hydraulically operated high pressure water cleaner with a maximum output of 15 l/min (4 gpm) at a pressure of 150 bar (2175 psi).	Option	2667357	USD	2,497.00
<b>Pick changing aids</b>				
One hydraulically powered pick ejector, including the required electrical and hydraulic connections. Ideal for convenient, fast and low-noise pick changes.	Standard	2745119	USD	0.00
Two hydraulically powered pick ejectors, including the required electrical and hydraulic connections. Ideal for convenient, fast and low-noise pick changes.	Option	2793518	USD	5,971.00
<b>Camera system</b>				
Two-fold camera system with one camera at the discharge conveyor and one camera with a view of the rear area. The camera images are displayed on the standard 7" control panel on the operator's platform.	Option	2673433	USD	2,904.00
Four-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine as well as of the side plates, on the right and left. The camera images are displayed on the 10" control panel on the operator's platform.	Standard	2673434	USD	0.00
Eight-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine, of the side plates on the right and left and of the milled surface behind the milling drum unit. The camera images are displayed on the 10" control panel on the operator's platform.	Option	2673435	USD	10,789.00
<b>Other devices</b>				
Dual starter system for maximum starting reliability with an additional automatic engine stop function that reduces diesel consumption.	Option	2745138	USD	4,818.00

Electrical diesel suction and pressure pump with 7.50 m (24 ft 7 in) suction hose. The machine can be refueled with up to 50 l/min (13 gal/min) from external diesel tanks.	Option	2673456	USD	923.00
License plate holder with LED lighting	Option	2654224	USD	475.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

Date: 6/25/2020

## Price list

### W 220 Fi - 2500 mm milling drum

#### Scope of supply – basic machine

- Engine: 6-cylinder diesel engine: CATERPILLAR C18 ATAAC
- Rated power at 1,950 r.p.m.: 597 KW / 801 HP / 812 PS
- Exhaust standard: EU Stage V / US EPA Tier 4f
- Standard milling width: 7 ft 3 in / 2,200 mm
- Maximum milling depth: 1 ft 2 in / 350 mm

#### STANDARD EQUIPMENT

- Base machine with engine
- Machine frame featuring a single wasp waist at the rear right, and a dual wasp waist at the front
- DUAL SHIFT two-speed powershift transmission for efficient engine speeds combined with powerful milling drum speeds.
- Automatic pressure adjustment of the cylinder pump in accordance with performance requirements for reduced diesel consumption
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Two cooling fans to minimize power consumption of the cooling system

#### MILLING DRUM HOUSING

- Adjustment of material depressor contact pressure via the control panel or automatically via the MILL ASSIST feature to reduce chunk formation
- Electrical adjustment of scraper contact pressure via the control panel
- Automatically controlled locking feature of scraper
- Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement.
- Single-piece water spray bar in the milling drum unit for reliable pick cooling and to prevent dust development
- Automatic control of the water quantity via the MILL ASSIST feature
- Height adjustment stroke increased by 200 mm to facilitate pick replacement and the exchange of milling drum units
- Pre-fitting to allow the quick exchange of milling drum units.
- Hydraulically lifting side plates, clearance right 450 mm (1 ft 6 in), clearance left 330 mm (1 ft 1 in)

#### LOADING OF MILLED MATERIAL

- Increased conveyor slewing angles of 65° each to the left and right
- Discharge conveyor with adjustable conveying speed and two slewing speeds for precise loading
- Boost feature for a temporary increase of the belt speed and conveying performance of the discharge conveyor by 20%
- Water spray system in the primary conveyor

- Larger conveyor pump for a constant belt speed even at a low engine speed of 1300 rpm

#### **MACHINE CONTROL AND LEVELLING SYSTEM**

- User-friendly control panel including 7" color screen
- LEVEL PRO ACTIVE leveling system with numerous automated and complementary features relieving the operator of a part of his workload
- LEVEL PRO ACTIVE - automatic height control in transport mode
- LEVEL PRO ACTIVE - ramp milling and auto-start feature for the second milling cut
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- MILL ASSIST assistance system for automatic adjustment of the milling drum speed in accordance with the main area of application and the parameters selected in terms of engine load, advance rate, milling volume and quality of the milling pattern.
- Automatic start-stop feature of the milling drum to reduce diesel consumption
- Comprehensive machine diagnostics on the control panel including, for example, a diagnostic system for the CAN bus
- Voltmeter integrated into the control panel for voltage measurement in the event of a malfunction
- Two control panels for operating functions performed by ground crew

#### **OPERATOR'S PLATFORM**

- Convenient access to the operator's platform, right and left
- Anti-vibration mounted operator's platform across the full width of the machine including fold-out railing, right
- Electrical control cabinet on the operator's platform for optimum accessibility and fast troubleshooting
- Electrical level indicator for the water tank on the external control panels
- Time display on the main control panel and on the exterior control panels
- Two mirrors at the front, one mirror at the rear of the machine

#### **TRACK UNIT AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- High travel speed of up to 88 m / min at low engine speeds (1,350 rpm), reduced diesel consumption and low noise emissions.

#### **MISCELLANEOUS**

- "Welcome" and "Go home" lights feature in the area of the operator's platform and access
- Large storage compartment on the machine for pick containers
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Good accessibility to all maintenance points on the engine station
- Pneumatic hammer with pick extractor/insertor
- Large tool kit in lockable tool box
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- Pre-fitting for installing the WITOS FleetView control unit
- European type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD**

**936,741.00**

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing MCS BASIC FB2500 (8 ft 2 in) with pre-fitting enabling a quick and easy change of the milling drums with varying spacings, without milling drum.	Standard	2782697	USD	0.00
Milling drums / milling units				
Milling drum MCS BASIC with milling width 2500 mm / 8 ft 2 in, milling depth max. 350 mm / 1 ft 2 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 196 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2679915	USD	0.00
OPERATOR'S PLATFORM				
Anti-vibration-mounted operator's platform with easy-to-read control panels, functional stand-up seat and a large, lockable storage compartment with a capacity of approx 69 gal / 260 liters	Standard	2700694	USD	0.00
Anti-vibration-mounted operator's platform with easy-to-read control panels, functional stand-up seat and a large, lockable storage compartment with a capacity of approx 69 gal/260 liters. A hydraulically height-adjustable weather canopy with transparent side weather protection elements protects the operator from the wind and weather.	In lieu of 2700694	2700695	USD	15,716.00
Material transport				
Heavy-duty 26 ft 9 in (8,150 mm) long discharge conveyor with 3 ft 3 in (1,000 mm) conveyor belt system and hydraulic folding device to shorten the transport length	Standard	2667116	USD	0.00
Robust 26 ft 9 in / 8,150 mm long discharge conveyor with conveyor belt system 3 ft 3 in / 1,000 mm	Option	2718941	USD	-13,694.00
Water tank filling				
Additional water tank filling from the rear of the machine using a shut-off cock.	Standard	2667152	USD	0.00
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filler pump	Option	2667153	USD	3,827.00
Paint				
Film coating in cream RAL 9001 with orange stripes. The entire base of the machine is covered in a slate grey RAL 7015 film coating.	Standard	2700380	USD	0.00

The film coating is applied in RAL colors and design according to the customer's wishes. Film coating provides protection against mechanical and weather-related damage and can be removed without leaving any marks, if required	In lieu of 2700380	2700381	USD	1,126.00
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Telematics</b>				
WITOS FleetView (mobile phone standard 3, 4G) includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2770403	USD	0.00
The WIRTGEN PERFORMANCE TRACKER WPT is a laser and satellite-supported measuring system for precise milling performance determination for machines with FB2000, FB 220 or FB2500 without a weather canopy or with an operator's cabin. Two laser scanners measure the actual milling width and milling depth over the distance of the milling path. The milling performance results are automatically sent to the corresponding users via the WITOS interface with precise GPS machine position data and consumption data such as diesel consumption, water consumption, tool consumption and truck loads, in an evaluation and then by e-mail. The milling performance reports that include an image of the milling position can also be used as an allowance report. The usability of WITOS hardware components for the existing mobile radio standard is guaranteed for 3 years from the date of delivery.	Option	2787665	USD	47,066.00
<b>Machine lighting</b>				
Extended lighting system consisting of 21 extremely powerful LED working lights for optimum illumination of the working area. Total light output of the working lights is approx. 43,600 lumens	Standard	2667172	USD	0.00

Extended lighting system consisting of 21 extremely powerful LED working lights for optimum illumination of the working area. Total light output of the working lights is approximately 43,600 lumens. The additional lighting balloon is powered via the machine's 24V electrical power supply and achieves an additional light output of 50,000 lumens	In lieu of <b>2667172</b>	<b>2667173</b>	<b>USD</b>	<b>4,723.00</b>
<b>Equipment Options</b>				
<b>Additional weight</b>				
Two additional weights located at the rear of the machine with a total weight of 1.500 kg (3,307 lbs) for individual machine ballasting. The individual weights, each weighing 750 kg (1,653 lbs), can be easily and quickly inserted and fastened to the rear of the machine.	<b>Option</b>	<b>2667175</b>	<b>USD</b>	<b>6,609.00</b>
<b>Additional weight</b>				
Large, generously sized storage compartment for 72 pick containers at the rear of the machine instead of the standard storage compartment. The storage compartment is lockable, splash-proof and additionally contains a completely sealed area to safely store electronic components, such as levelling sensors or pick ejectors	<b>Option</b>	<b>2667177</b>	<b>USD</b>	<b>3,149.00</b>
Storage compartment close to both rear track units for 10 pick containers	<b>Standard</b>	<b>2700383</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				
A powerful hot-air heating system with intelligently arranged air vents close to the operator's hands and feet offers maximum comfort on the operator's platform	<b>Option</b>	<b>2745118</b>	<b>USD</b>	<b>3,800.00</b>
Operator's platform equipped with a height-adjustable stand-up seat for greater operator comfort	<b>Standard</b>	<b>2688479</b>	<b>USD</b>	<b>0.00</b>
<b>Milling drum assembly options</b>				
The actual milling depth is determined by calculating the difference in readings from sensors on the side plate and sensors on the scraper. The actual milling depth is displayed on the LEVEL PRO ACTIVE panel.	<b>Standard</b>	<b>2598665</b>	<b>USD</b>	<b>1,045.00</b>
Overload sensors automatically lift the scraper whenever obstacles are detected that could damage the scraper.	<b>Option</b>	<b>2667192</b>	<b>USD</b>	<b>1,574.00</b>
Active floating position for the side plates on the left and right by continuously adjusting the milling depth and position of the plates. If necessary, the side plates can be briefly raised to prevent them from sinking into the soft ground.	<b>Standard</b>	<b>2598531</b>	<b>USD</b>	<b>0.00</b>

Extension of MCS BASIC with one hydraulically opening side panel on the milling drum unit FB2200/FB2500 (7 ft 3 in/8 ft 2 in).. An additional hydraulic cylinder enables the MCS side panel to be easily opened when changing milling drums. This enables MCS BASIC milling drums to be changed even faster.	Standard	2667195	USD	0.00
Electrically switchable sectional water spray bar in the milling drum assembly FB2500 (8 ft 2 in). Four areas can be controlled as required from the control panel (automatically controlled with WPT). This reduces water consumption enormously.	Standard	2667200	USD	0.00
Two wear protection rollers that can be attached to the side plates (left or right). The rollers protect the asphalt, curbs, and other surfaces from damage and prevent excessive wear to the side plates.	Option	2662818	USD	774.00
Mounting aid for lifting out the short primary conveyor when changing the milling unit.	Standard	2685194	USD	0.00
Transport carriage for milling drum units from FB2200 (7 ft 3 in) to FB4400 (14 ft 5 in) to make it easier to change milling drum units and handle them in the workshop or on the job site.	Option	2282163	USD	17,331.00
Milling drum mounting and transport cart for milling drums from FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,419.00
Transport roller set consisting of 4 heavy-duty rollers for easy removal of milling units from FB1500 to FB3800 on level surfaces.	Option	2762958	USD	5,211.00
<b>Options for belt conveyor</b>				
VCS – vacuum cutting system on the discharge conveyor for the extraction of fine material particles and water vapor from the sealed milling drum unit.	Standard	2667207	USD	0.00
Signal lights for visual "stop" and "go" instructions for the truck driver without the use of a horn. The signal lights can be folded in hydraulically from the operator's platform.	Option	2598539	USD	4,818.00
Semi-automatic ACTIVE CONVEYOR swing angle control that guides the discharge conveyor in construction site situations where milling is carried out at intersections or roundabouts	Standard	2703705	USD	0.00
Support device for positioning the discharge conveyor on the flat bed truck	Standard	60603	USD	0.00

<b>Additional control unit LEVEL PRO</b>				
Additional 5" control panel for controlling the LEVEL PRO ACTIVE leveling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Option	2598631	USD	2,321.00
<b>Two pieces</b> - Additional 7" control panel that displays the machine control and controls the LEVEL PRO ACTIVE levelling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Standard	2598632	USD	0.00
Additional 2" control panel that can be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Standard	2598664	USD	0.00
Two additional 2" control panels that can each be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Option	2767151	USD	3,909.00
User-specific saving of individually adjustable machine settings such as the display configuration or the assignment of favorites buttons. The data can be saved on five different SMART KEY key fobs with tokens.	Standard	2779470	USD	0.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE levelling system with levelling boom. Premounted and adjustable hydraulic cylinders on the left and right allow the use of a Sonic-Ski sensor that is able to scan a reference object up to 1,900 mm away from the milling edge. During machine transport, the sensor and cables are securely stowed in the corresponding transport boxes.	Option	2667237	USD	10,559.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with one hydraulic cylinder sensor for scanning a reference surface to the right of the milling drum.	Option	2667239	USD	3,067.00
Extension of the LEVEL PRO ACTIVE leveling system with two hydraulic cylinder sensors for scanning a reference surface to the left and the right of the milling drum.	Standard	2667241	USD	0.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2673212	USD	5,062.00

Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the left and right. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2673213	USD	9,826.00
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box. (FB3500/FB3800) (11 ft 6 in / 12 ft 6 in)	Option	2790513	USD	6,284.00
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right and left. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box. (FB3500/FB3800) (11 ft 6 in / 12 ft 6 in)	Option	2790514	USD	12,079.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines without a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2667342	USD	8,333.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines with a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2667343	USD	2,076.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines with a cabin. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2667344	USD	5,931.00
Extension of the LEVEL PRO ACTIVE leveling system with two linear laser sensors that can be installed using the pre-fitting equipment for 3D leveling.	Option	2662826	USD	12,635.00
<b>Water system</b>				
Powerful, hydraulically operated high pressure water cleaner with a maximum output of 15 l/min (4 gpm) at a pressure of 150 bar (2175 psi).	Option	2667357	USD	2,497.00
<b>Pick changing aids</b>				

One hydraulically powered pick ejector, including the required electrical and hydraulic connections. Ideal for convenient, fast and low-noise pick changes.	Standard	2745119	USD	0.00
Two hydraulically powered pick ejectors, including the required electrical and hydraulic connections. Ideal for convenient, fast and low-noise pick changes.	Option	2793518	USD	5,971.00
<b>Camera system</b>				
Two-fold camera system with one camera at the discharge conveyor and one camera with a view of the rear area. The camera images are displayed on the standard 7" control panel on the operator's platform.	Option	2673433	USD	2,904.00
Four-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine as well as of the side plates, on the right and left. The camera images are displayed on the 10" control panel on the operator's platform.	Standard	2673434	USD	0.00
Eight-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine, of the side plates on the right and left and of the milled surface behind the milling drum unit. The camera images are displayed on the 10" control panel on the operator's platform.	Option	2673435	USD	10,789.00
<b>Other devices</b>				
Dual starter system for maximum starting reliability with an additional automatic engine stop function that reduces diesel consumption.	Option	2745138	USD	4,818.00
Electrical diesel suction and pressure pump with 7.50 m (24 ft 7 in) suction hose. The machine can be refueled with up to 50 l/min (13 gal/min) from external diesel tanks.	Option	2673456	USD	923.00
License plate holder with LED lighting	Option	2654224	USD	475.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

Date: 6/25/2020

**Price list****W 250i - 2200 mm****Scope of supply – basic machine**

- Engine: 2x 6-cylinder diesel engines type Cummins QSX15 and QSL 9
- Rated engine power 2100 r.p.m.: 730 kW / 979 HP / 993 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 7 ft 3 in / 2,200 mm
- Theoretical milling depth: 1 ft 2 in / 350 mm

**STANDARD EQUIPMENT**

- Basic machine with engine
- Machine chassis with double-sided wasp waist
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Cooling system with temperature-controlled fan speed
- Large storage compartments for pick containers

**MILLING DRUM HOUSING**

- Three milling drum rotation speeds with electric on/off function 105 r.p.m. - 94 r.p.m. - 84 r.p.m.
- Hydraulic material depressor with conveyor lifting function
- Hydraulically movable and positionable scraper plate with automatic locking
- Hydraulically lifting side plate, right clearance 1 ft 6 in / 450 mm and left clearance 1 ft 2 in / 350 mm
- Two water sprinkling strips in the milling drum unit with separate on/off function

**LOADING OF MILLED MATERIAL**

- Conveyor system with manually or automatically adjustable conveying speed
- Water spray system in the primary conveyor
- Slewing angle discharge conveyor  $\pm 60^\circ$

**MACHINE CONTROL AND LEVELLING SYSTEM**

- Multi-function control display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Milling power control with automatic on/off function
- Two exterior panels for operating functions by ground crew
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system

**OPERATOR'S PLATFORM**

- Fully anti-vibration mounted operator's platform
- Convenient, individually adjustable control panel
- Convenient access to the operator's platform, right and left
- Lockable control panel covers
- Two mirrors front, one mirror middle and one mirror in rear area of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- Freely selectable steering functions for the four-track steering
- Extremely wear-resistant, two-part EPS Plus polyurethane track pads

#### **MISCELLANEOUS**

- Lighting system including 3 halogen floodlights and 4 LED lights in the area of the milling unit
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 1,003,906.00**

<b>Mandatory Options</b>				
<b>Milling drum housing</b>				
Wear-resistant milling drum housing FB2200 (7 ft 3 in) without milling drum	Standard	2473272	USD	0.00
<b>Milling drums / milling units</b>				
Multi-part FCS milling drum with milling width of 2,200 mm / 7 ft 3 in, milling depth of max. 350 mm / 1 ft 2 in, tool spacing of 15 mm / 19/32 in, equipped with HT22 toolholder system and 206 picks. For a wide range of applications, e.g. removal of surface course and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2309345	USD	0.00
<b>Operator's platform</b>				
Flexibly mounted operator's platform with clearly laid-out control panel and control display as well as a large storage compartment (approx. 250 l / 66 gal) on the operator's platform and single standing seats on the right and left. The storage compartment has a variable, removable false floor and a lockable lid which can also be used as a seat. It is used for storing tools, pick elements, a toolbox, etc.	Option	2488409	USD	3,026.00
Flexibly mounted operator's platform with clear control panels and control display as well as comfortable adjustable operator's seats right and left.	Standard	2465733	USD	0.00
Operator's platform in "Operator Comfort System" version, consisting of movable and fully air-conditioned comfort cab with air-sprung operator's seat, 6-way camera system, joystick machine control and radio. An integrated intercom provides good communication with the second machine operator.	Option	2465734	USD	87,074.00
<b>Operator's platform</b>				
Complete mirror set: two mirrors front, one mirror middle and one mirror on rear of the machine	Standard	2105659	USD	0.00
Complete mirror set, partial from operator's platform electrically folding as well as additionally heated and with truck stop and go indication	Option	2105660	USD	5,293.00
<b>Material transport</b>				
Robust 26 ft 9 in / 8,150 mm long discharge conveyor with conveyor belt system 3 ft 7 in / 1,100 mm and hydraulic folding device for shortening the transport length	Standard	2465982	USD	0.00
<b>Water tank filling</b>				
Additional water tank filling from the rear of the machine using a stopcock.	Standard	2466094	USD	0.00
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filling pump.	Option	2465765	USD	3,447.00

<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2465983	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2465985	USD	2,334.00
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 6 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 3 rotary beacons.	Standard	2346607	USD	0.00
Powerful LED lighting system 24 V. Consisting of 6 additional LED working lights for optimum illumination of the working area. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 3 LED rotary beacons.	Option	2346608	USD	4,085.00
<b>Equipment Options</b>				
<b>Additional weight</b>				
Large sized storage compartment for 34 pick containers mounted on the rear of the machine instead of the standard storage compartment.	Option	2474988	USD	3,257.00

<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	Standard	2125949	USD	0.00
VCS extraction system on the discharge double conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	Option	2488858	USD	8,251.00
<b>Equipment operator's platform</b>				
Operator's platform equipped with weather canopy including windscreen and rear window. The canopy is equipped with extensions on both sides and protects the entire operator's platform from rain and sunlight. The canopy itself is made of highly durable GFRP and the windscreen and rear window are scratch-resistant laminated protective glass. The canopy can be folded up electrohydraulically to facilitate machine transport.	Option	2492943	USD	14,304.00
Hot air heating in the footwell area of the operator's platform	Option	2174234	USD	1,696.00
<b>Device for milling drum change</b>				
Transport carriage for milling drum units from FB2200 (7 ft 3 in) to FB4400 (14 ft 5 in), for simplified milling drum unit change and handling in the workshop or the field.	Option	2282163	USD	16,964.00
Milling drum mounting and transport carriage FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,284.00
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	Option	2466044	USD	1,330.00
<b>Options for belt conveyor</b>				
Support device for putting the discharge conveyor on the low-loader.	Standard	60603	USD	0.00
<b>Leveling</b>				
Expansion leveling system for scanning ahead of the milling drum right, with hydraulic sensor, connection cable and holder. (Can also be mounted on left)	Standard	2125960	USD	0.00
Expansion leveling system for scanning ahead of the milling drum right and left, with hydraulic sensor, connection cable and holder	Option	2125961	USD	5,591.00

<b>Additional control unit LEVEL PRO</b>				
Expansion LEVEL PRO with an additional operating display, including required connection cable	Standard	2137348	USD	0.00
<b>Leveling</b>				
Pre-fitting for multiplex system comprising 4 sensors sockets for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	Standard	2436230	USD	0.00
Expansion leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, connection cable and holder	Option	2487117	USD	3,026.00
Expansion of leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors, connection cable and holder	Option	2487127	USD	6,392.00
<b>Water system</b>				
Powerful, hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min (4 gpm) at 150 bar (2175 psi) pressure.	Option	2125975	USD	2,443.00
<b>Pick changing aids</b>				
Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in this case.	Standard	2125977	USD	0.00
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	Option	2178052	USD	3,461.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	Standard	2137372	USD	0.00
Fold-open seats on the rear track units for the pick change, with integrated storage compartment for pick change tools and 4 pick containers	Standard	2105678	USD	0.00
<b>Diesel tank filling systems</b>				
Electrically operated diesel suction and pressure pump for the diesel tank filling with 5.00 m suction hose.	Option	2125976	USD	896.00

<b>Wirtgen information and diagnostic system</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO display.	<b>Standard</b>	<b>2219502</b>	<b>USD</b>	<b>0.00</b>
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras. Each of these shows the area behind the machine as well as the area in front of the loading conveyor. The camera images are displayed on the machine control display.	<b>Standard</b>	<b>2526011</b>	<b>USD</b>	<b>0.00</b>
Extensive monitor system consisting of a total of 6 cameras and an additional monitor. Cameras 1 and 2 show the areas behind the machine as well as ahead of the load belt, and thus facilitate maneuvering and loading. Cameras 3-6 show the area in front of the milling drum unit, the milled area behind the milling unit as well as the side plate and the front right and left chassis units, thereby facilitating the working process. Camera images 1-2 are displayed in the machine control display, camera images 3-6 are output on the additional monitor.	<b>Option</b>	<b>2530073</b>	<b>USD</b>	<b>9,364.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2658169</b>	<b>USD</b>	<b>434.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>
<sup>1</sup> Option must be ordered from headquarters.				
Date: 3/6/2019				

## Price list

### W 250i - 3800 mm

#### Scope of supply – basic machine

- Engine: 2x 6-cylinder diesel engines type Cummins QSX15 and QSL 9
- Rated engine power 2100 r.p.m.: 730 kW / 979 HP / 993 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 7 ft 3 in / 2,200 mm
- Theoretical milling depth: 1 ft 2 in / 350 mm

#### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with double-sided wasp waist
- Hydraulically opening, soundproof engine cowl
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Cooling system with temperature-controlled fan speed
- Large storage compartments for pick containers

#### MILLING DRUM HOUSING

- Three milling drum rotation speeds with electric on/off function 105 r.p.m. - 94 r.p.m. - 84 r.p.m.
- Hydraulic material depressor with conveyor lifting function
- Hydraulically movable and positionable scraper plate with automatic locking
- Hydraulically lifting side plate, right clearance 1 ft 6 in / 450 mm and left clearance 1 ft 2 in / 350 mm
- Two water sprinkling strips in the milling drum unit with separate on/off function

#### LOADING OF MILLED MATERIAL

- Conveyor system with manually or automatically adjustable conveying speed
- Water spray system in the primary conveyor
- Slewing angle discharge conveyor  $\pm 60^\circ$

#### MACHINE CONTROL AND LEVELLING SYSTEM

- Multi-function control display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Milling power control with automatic on/off function
- Two exterior panels for operating functions by ground crew
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system

#### OPERATOR'S PLATFORM

- Fully anti-vibration mounted operator's platform

- Convenient, individually adjustable control panel
- Convenient access to the operator's platform, right and left
- Lockable control panel covers
- Two mirrors front, one mirror middle and one mirror in rear area of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- Freely selectable steering functions for the four-track steering
- Extremely wear-resistant, two-part EPS Plus polyurethane track pads

#### **MISCELLANEOUS**

- Lighting system including 3 halogen floodlights and 4 LED lights in the area of the milling unit
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**USD 1,125,696.00**

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing FB3800 MCS EXTEND, without a milling drum, designed to be converted to other milling widths.	Standard	2473279	USD	0.00
Milling drums / milling units				
Multi-part FCS milling drum with milling width of 3,800 mm / 149 39/64 in, milling depth of max. 350 mm / 1 ft 2 in, tool spacing of 15 mm / 19/32 in, equipped with HT22 toolholder system and 314 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2309342	USD	0.00
Operator's platform				
Flexibly mounted operator's platform with clearly laid out control panel and control display as well as a large storage compartment (approx. 250 l / 66 gal) on the operator's platform and single standing seats on the right and left. The storage compartment has a variable, removable false floor and a lockable lid which can also be used as a seat. It is used for storing tools, pick elements, a toolbox, etc.	Option	2488409	USD	3,026.00
Flexibly mounted operator's platform with clear control panels and control display as well as comfortable adjustable operator's seats right and left.	Standard	2465733	USD	0.00
Operator's platform in "Operator Comfort System" version, consisting of movable and fully air-conditioned comfort cab with air-sprung operator's seat, 6-way camera system, joystick machine control and radio. An integrated intercom provides good communication with the second machine operator.	Option	2465734	USD	87,074.00
Operator's platform				
Complete mirror set: two mirrors front, one mirror middle and one mirror on rear of the machine	Standard	2105659	USD	0.00
Complete mirror set, partial from operator's platform electrically folding as well as additionally heated and with truck stop and go indication	Option	2105660	USD	5,293.00
Material transport				
Robust 26 ft 9 in / 8,150 mm long discharge conveyor with conveyor belt system 3 ft 7 in / 1,100 mm and hydraulic folding device for shortening the transport length	Standard	2465982	USD	0.00
Water tank filling				
Additional water tank filling from the rear of the machine using a stopcock.	Standard	2466094	USD	0.00
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filling pump.	Option	2465765	USD	3,447.00

<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2465983	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2465985	USD	2,334.00
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 6 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 3 rotary beacons.	Standard	2346607	USD	0.00
Powerful LED lighting system 24 V. Consisting of 6 additional LED working lights for optimum illumination of the working area. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 3 LED rotary beacons.	Option	2346608	USD	4,085.00
<b>Equipment Options</b>				
<b>Additional weight</b>				
Large sized storage compartment for 34 pick containers mounted on the rear of the machine instead of the standard storage compartment.	Option	2474988	USD	3,257.00
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	Standard	2125949	USD	0.00
VCS extraction system on the discharge double conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	Option	2488858	USD	8,251.00

<b>Equipment operator's platform</b>				
Operator's platform equipped with weather canopy including windscreen and rear window. The canopy is equipped with extensions on both sides and protects the entire operator's platform from rain and sunlight. The canopy itself is made of highly durable GFRP and the windscreen and rear window are scratch-resistant laminated protective glass. The canopy can be folded up electrohydraulically to facilitate machine transport.	Option	2492943	USD	14,304.00
Hot air heating in the footwell area of the operator's platform	Option	2174234	USD	1,696.00
<b>Device for milling drum change</b>				
Transport carriage for milling drum units from FB2200 (7 ft 3 in) to FB4400 (14 ft 5 in), for simplified milling drum unit change and handling in the workshop or the field.	Option	2282163	USD	16,964.00
Milling drum mounting and transport carriage FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,284.00
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	Option	2466044	USD	1,330.00
<b>Options for belt conveyor</b>				
Support device for putting the discharge conveyor on the low-loader.	Standard	60603	USD	0.00
<b>Leveling</b>				
Expansion leveling system for scanning ahead of the milling drum right, with hydraulic sensor, connection cable and holder. (Can also be mounted on left)	Standard	2125960	USD	0.00
Expansion leveling system for scanning ahead of the milling drum right and left, with hydraulic sensor, connection cable and holder	Option	2125961	USD	5,591.00
<b>Additional control unit LEVEL PRO</b>				
Expansion LEVEL PRO with an additional operating display, including required connection cable	Standard	2137348	USD	0.00

<b>Leveling</b>				
Pre-fitting for multiplex system comprising 4 sensors sockets for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	Standard	2436230	USD	0.00
Expansion leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, connection cable and holder	Option	2487117	USD	3,026.00
Expansion of leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors, connection cable and holder	Option	2487127	USD	6,392.00
<b>Water system</b>				
Powerful, hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min (4 gpm) at 150 bar (2175 psi) pressure.	Option	2125975	USD	2,443.00
<b>Pick changing aids</b>				
Milling drum rotation device for the XXL milling drum unit with electro-hydraulic milling drum drive for slowly turning the milling drum in the pick change. The diesel engine can be switched off in this case.	Standard	2125978	USD	0.00
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	Option	2178052	USD	3,461.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	Standard	2137372	USD	0.00
Fold-open seats on the rear track units for the pick change, with integrated storage compartment for pick change tools and 4 pick containers	Standard	2105678	USD	0.00
<b>Diesel tank filling systems</b>				
Electrically operated diesel suction and pressure pump for the diesel tank filling with 5.00 m suction hose.	Option	2125976	USD	896.00
<b>Wirtgen information and diagnostic system</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO display.	Standard	2219502	USD	0.00

<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras. Each of these shows the area behind the machine as well as the area in front of the loading conveyor. The camera images are displayed on the machine control display.	<b>Standard</b>	<b>2526011</b>	<b>USD</b>	<b>0.00</b>
Extensive monitor system consisting of a total of 6 cameras and an additional monitor. Cameras 1 and 2 show the areas behind the machine as well as ahead of the load belt, and thus facilitate maneuvering and loading. Cameras 3-6 show the area in front of the milling drum unit, the milled area behind the milling unit as well as the side plate and the front right and left chassis units, thereby facilitating the working process. Camera images 1-2 are displayed in the machine control display, camera images 3-6 are output on the additional monitor.	<b>Option</b>	<b>2530073</b>	<b>USD</b>	<b>9,364.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2658169</b>	<b>USD</b>	<b>434.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>
<sup>1</sup> Option must be ordered from headquarters. Date: 3/6/2019				

**Price list****W 250 Fi - 2200 mm milling drum****Scope of supply – basic machine**

- Engine: 2x 6-cylinder diesel engines type Cummins L9 and X15
- Rated power at 2,100 r.p.m.: 742 kW / 995 HP / 1,009 PS
- Exhaust standard: EU Stage V / US Tier 4f
- Standard milling width: 7 ft 3 in / 2,200 mm
- Theoretical milling depth: 1 ft 2 in / 350 mm

**STANDARD EQUIPMENT**

- Basic machine with dual motor drive
- Machine frame featuring a single wasp waist at the rear right, and a dual wasp waist at the front
- Automatic pressure adjustment of the cylinder pump in accordance with performance requirements for reduced diesel consumption
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Two cooling fans to minimize power consumption of the cooling system

**MILLING DRUM HOUSING**

- Adjustment of material depressor contact pressure via the control panel or automatically via the MILL ASSIST feature to reduce chunk formation
- Electrical adjustment of scraper contact pressure via the control panel
- Automatically controlled locking feature of scraper
- Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement.
- Single-piece water spray bar in the milling drum unit for reliable pick cooling and to prevent dust development
- Automatic control of the water quantity via the MILL ASSIST feature
- Height adjustment stroke increased by 200 mm to facilitate pick replacement and the exchange of milling drum units
- Pre-fitting to allow the quick exchange of milling drum units.
- Hydraulically lifting side plate, right clearance 1 ft 6 in / 450 mm and left clearance 1 ft 2 in / 350 mm

**LOADING OF MILLED MATERIAL**

- Increased conveyor slewing angles of 65° each to the left and right
- Discharge conveyor with adjustable conveying speed and two slewing speeds for precise loading
- Boost feature for a temporary increase of the belt speed and conveying performance of the discharge conveyor by 20%
- Water spray system in the primary conveyor
- Larger conveyor pump for a constant belt speed even at a low engine speed of 1300 rpm

#### **MACHINE CONTROL AND LEVELLING SYSTEM**

- User-friendly control panel including 7" color screen
- LEVEL PRO ACTIVE leveling system with numerous automated and complementary features relieving the operator of a part of his workload
- LEVEL PRO ACTIVE - automatic height control in transport mode
- LEVEL PRO ACTIVE - ramp milling and auto-start feature for the second milling cut
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- MILL ASSIST assistance system for automatic adjustment of the milling drum speed in accordance with the main area of application and the parameters selected in terms of engine load, advance rate, milling volume and quality of the milling pattern.
- Comprehensive machine diagnostics on the control panel including, for example, a diagnostic system for the CAN bus
- Voltmeter integrated into the control panel for voltage measurement in the event of a malfunction
- Two control panels for operating functions performed by ground crew

#### **OPERATOR'S PLATFORM**

- Convenient access to the operator's platform, right and left
- Anti-vibration mounted operator's platform across the full width of the machine including fold-out railing, right
- Electrical control cabinet on the operator's platform for optimum accessibility and fast troubleshooting
- Electrical level indicator for the water tank on the external control panels
- Time display on the main control panel and on the exterior control panels
- Two mirrors at the front, one mirror at the rear of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- High travel speed of up to 88 m / min at low engine speeds (1,350 rpm), reduced diesel consumption and low noise emissions.

#### **MISCELLANEOUS**

- "Welcome" and "Go home" lights feature in the area of the operator's platform and access
- Large storage compartment on the machine for pick containers
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Good accessibility to all maintenance points on the engine station
- Pneumatic hammer with pick extractor/insertor
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 1,037,468.00**

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing MCS BASIC FB2200 (7 ft 3 in), with pre-fitting to quickly and easily change milling drums of varying tool spacings, without milling drum.	Standard	2667109	USD	0.00
Milling drums / milling units				
Milling drum MCS BASIC with milling width 2200 mm / 7 ft 3 in, milling depth max. 320 mm / 1ft / 0,5 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 182 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2679870	USD	0.00
OPERATOR'S PLATFORM				
Anti-vibration-mounted operator's platform with easy-to-read control panels, functional stand-up seat and a large, lockable storage compartment with a capacity of approx 69 gal / 260 liters	Standard	2667135	USD	0.00
Anti-vibration-mounted operator's platform with easy-to-read control panels, functional stand-up seat and a large, lockable storage compartment with a capacity of approx 69 gal/260 liters. A hydraulically height-adjustable weather canopy with transparent side weather protection elements protects the operator from the wind and weather.	In lieu of 2667135	2667138	USD	15,716.00
Material transport				
Robust 26 ft 9 in (8,150 mm) long discharge conveyor with conveyor belt system 3 ft 7 in (1,100 mm) and hydraulic folding device for shortening the transport length	Standard	2667148	USD	0.00
Heavy-duty 26 ft 9 in (8,150 mm) long double discharge conveyor with 3 ft 3 in (1,000 mm) conveyor belt system and hydraulic folding device to shorten the transport length. An additional shroud on the upper part of the discharge conveyor guides the flow of material, enabling controlled loading and minimizing wear and tear.	Option	2667149	USD	22,949.00
Water tank filling				
Additional water tank filling from the rear of the machine using a shut-off cock.	Standard	2667152	USD	0.00
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filler pump	Option	2667153	USD	3,827.00
Paint				
Film coating in cream RAL 9001 with orange stripes. The entire base of the machine is covered in a slate grey RAL 7015 film coating.	Standard	2667167	USD	0.00

The film coating is applied in RAL colors and design according to the customer's wishes. Film coating provides protection against mechanical and weather-related damage and can be removed without leaving any marks, if required	<b>In lieu of 2667167</b>	<b>2667169</b>	<b>USD</b>	<b>1,126.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView (mobile phone standard 3, 4G) includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2770403</b>	<b>USD</b>	<b>0.00</b>
The WIRTGEN PERFORMANCE TRACKER WPT is a laser and satellite-supported measuring system for precise milling performance determination for machines with FB2000, FB 220 or FB2500 without a weather canopy or with an operator's cabin. Two laser scanners measure the actual milling width and milling depth over the distance of the milling path. The milling performance results are automatically sent to the corresponding users via the WITOS interface with precise GPS machine position data and consumption data such as diesel consumption, water consumption, tool consumption and truck loads, in an evaluation and then by e-mail. The milling performance reports that include an image of the milling position can also be used as an allowance report. The usability of WITOS hardware components for the existing mobile radio standard is guaranteed for 3 years from the date of delivery.	<b>Additional price instead of standard</b>	<b>2787665</b>	<b>USD</b>	<b>47,066.00</b>
<b>Machine lighting</b>				
Extended lighting system consisting of 21 extremely powerful LED working lights for optimum illumination of the working area. Total light output of the working lights is approx. 43,600 lumens	<b>Standard</b>	<b>2667172</b>	<b>USD</b>	<b>0.00</b>

Extended lighting system consisting of 21 extremely powerful LED working lights for optimum illumination of the working area. Total light output of the working lights is approximately 43,600 lumens. The additional lighting balloon is powered via the machine's 24V electrical power supply and achieves an additional light output of 50,000 lumens	In lieu of <b>2667172</b>	<b>2667173</b>	<b>USD</b>	<b>4,723.00</b>
<b>Equipment Options</b>				
<b>Additional weight</b>				
Two additional weights located at the rear of the machine with a total weight of 1.500 kg (3,307 lbs) for individual machine ballasting. The individual weights, each weighing 750 kg (1,653 lbs), can be easily and quickly inserted and fastened to the rear of the machine.	<b>Option</b>	<b>2667175</b>	<b>USD</b>	<b>6,609.00</b>
<b>Additional weight</b>				
Large, generously sized storage compartment for 72 pick containers at the rear of the machine instead of the standard storage compartment. The storage compartment is lockable, splash-proof and additionally contains a completely sealed area to safely store electronic components, such as levelling sensors or pick ejectors	<b>Option</b>	<b>2667177</b>	<b>USD</b>	<b>3,149.00</b>
Storage compartment close to both rear track units for 10 pick containers	<b>Standard</b>	<b>2667178</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				
A powerful hot-air heating system with intelligently arranged air vents close to the operator's hands and feet offers maximum comfort on the operator's platform	<b>Option</b>	<b>2667179</b>	<b>USD</b>	<b>3,800.00</b>
Operator's platform equipped with a height-adjustable stand-up seat for greater operator comfort	<b>Standard</b>	<b>2688479</b>	<b>USD</b>	<b>0.00</b>
<b>Milling drum assembly options</b>				
The actual milling depth is determined by calculating the difference in readings from sensors on the side plate and sensors on the scraper. The actual milling depth is displayed on the LEVEL PRO ACTIVE panel.	<b>Standard</b>	<b>2598665</b>	<b>USD</b>	<b>0.00</b>
Overload sensors automatically lift the scraper whenever obstacles are detected that could damage the scraper.	<b>Option</b>	<b>2667192</b>	<b>USD</b>	<b>1,574.00</b>
Active floating position for the side plates on the left and right by continuously adjusting the milling depth and position of the plates. If necessary, the side plates can be briefly raised to prevent them from sinking into the soft ground.	<b>Standard</b>	<b>2598531</b>	<b>USD</b>	<b>0.00</b>

Extension of MCS BASIC with one hydraulically opening side panel on the milling drum unit FB2200/FB2500 (7 ft 3 in/8 ft 2 in).. An additional hydraulic cylinder enables the MCS side panel to be easily opened when changing milling drums. This enables MCS BASIC milling drums to be changed even faster.	Standard	2667195	USD	0.00
Electrically switchable sectional water spray bar in the milling drum unit FB2200 (7 ft 3 in). Four areas can be controlled as required from the control panel (automatically controlled with WPT). This significantly reduces water consumption.	Standard	2667199	USD	0.00
Two wear protection rollers that can be attached to the side plates (left or right). The rollers protect the asphalt, curbs, and other surfaces from damage and prevent excessive wear to the side plates.	Option	2662818	USD	774.00
Mounting aid for lifting out the short primary conveyor when changing the milling unit.	Standard	2685194	USD	0.00
Transport carriage for milling drum units from FB2200 (7 ft 3 in) to FB4400 (14 ft 5 in) to make it easier to change milling drum units and handle them in the workshop or on the job site.	Option	2282163	USD	17,331.00
Milling drum mounting and transport cart for milling drums from FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,419.00
Transport roller set consisting of 4 heavy-duty rollers for easy removal of milling units from FB1500 to FB3800 on level surfaces.	Option	2762958	USD	5,211.00
<b>Options for belt conveyor</b>				
VCS – vacuum cutting system on the discharge conveyor for the extraction of fine material particles and water vapor from the sealed milling drum unit.	Standard	2667207	USD	0.00
Signal lights for visual "stop" and "go" instructions for the truck driver without the use of a horn. The signal lights can be folded in hydraulically from the operator's platform.	Option	2598539	USD	4,818.00
Semi-automatic ACTIVE CONVEYOR swing angle control that guides the discharge conveyor in construction site situations where milling is carried out at intersections or roundabouts	Standard	2703705	USD	0.00
Support device for positioning the discharge conveyor on the flat bed truck	Standard	60603	USD	0.00
<b>Additional control unit LEVEL PRO</b>				
Additional 5" control panel for controlling the LEVEL PRO ACTIVE leveling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Option	2598631	USD	2,321.00

Two pieces - Additional 7" control panel that displays the machine control and controls the LEVEL PRO ACTIVE levelling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Standard	2598632	USD	0.00
Additional 2" control panel that can be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Standard	2598664	USD	0.00
Two additional 2" control panels that can each be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Option	2767151	USD	3,909.00
User-specific saving of individually adjustable machine settings such as the display configuration or the assignment of favorites buttons. The data can be saved on five different SMART KEY key fobs with tokens.	Standard	2779470	USD	0.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE levelling system with levelling boom. Premounted and adjustable hydraulic cylinders on the left and right allow the use of a Sonic-Ski sensor that is able to scan a reference object up to 1,900 mm away from the milling edge. During machine transport, the sensor and cables are securely stowed in the corresponding transport boxes.	Option	2667237	USD	10,559.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with one hydraulic cylinder sensor for scanning a reference surface to the right of the milling drum.	Option	2667239	USD	3,067.00
Extension of the LEVEL PRO ACTIVE leveling system with two hydraulic cylinder sensors for scanning a reference surface to the left and the right of the milling drum.	Standard	2667241	USD	0.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2673212	USD	5,062.00
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the left and right. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2673213	USD	9,826.00

Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box. (FB3500/FB3800) (11 ft 6 in / 12 ft 6 in)	Option	2790513	USD	6,284.00
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right and left. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box. (FB3500/FB3800) (11 ft 6 in / 12 ft 6 in)	Option	2790514	USD	12,079.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines without a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2667342	USD	8,333.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines with a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2667343	USD	2,076.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines with a cabin. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2667344	USD	5,931.00
Extension of the LEVEL PRO ACTIVE leveling system with two linear laser sensors that can be installed using the pre-fitting equipment for 3D leveling.	Option	2662826	USD	12,635.00
<b>Water system</b>				
Powerful, hydraulically operated high pressure water cleaner with a maximum output of 15 l/min (4 gpm) at a pressure of 150 bar (2175 psi).	Option	2667357	USD	2,497.00
<b>Pick changing aids</b>				
One hydraulically powered pick ejector, including the required electrical and hydraulic connections. Ideal for convenient, fast and low-noise pick changes.	Standard	2667497	USD	0.00

Two hydraulically powered pick ejectors, including the required electrical and hydraulic connections. Ideal for convenient, fast and low-noise pick changes.	Option	2793479	USD	5,971.00
<b>Camera system</b>				
Two-fold camera system with one camera at the discharge conveyor and one camera with a view of the rear area. The camera images are displayed on the standard 7" control panel on the operator's platform.	Option	2673433	USD	2,904.00
Four-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine as well as of the side plates, on the right and left. The camera images are displayed on the 10" control panel on the operator's platform.	Standard	2673434	USD	0.00
Eight-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine, of the side plates on the right and left and of the milled surface behind the milling drum unit. The camera images are displayed on the 10" control panel on the operator's platform.	Option	2673435	USD	10,789.00
<b>Other devices</b>				
Electrical preheating of the fuel filter to maintain the flow of fuel at low outside temperatures. Serves to guarantee machine operation at temperatures below 0 32 degrees Fahrenheit (0 degrees Celsius).	Option	2673455	USD	1,357.00
Electrical diesel suction and pressure pump with 7.50 m (24 ft 7 in) suction hose. The machine can be refueled with up to 50 l/min (13 gal/min) from external diesel tanks.	Option	2673456	USD	923.00
License plate holder with LED lighting	Option	2654224	USD	475.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

Date: 6/25/2020

**Price list****W 250 Fi - 3800 mm milling drum****Scope of supply – basic machine**

- Engine: 2x 6-cylinder diesel engines type Cummins L9 and X15
- Rated power at 2,100 r.p.m.: 742 kW / 995 HP / 1,009 PS
- Exhaust standard: EU Stage V / US Tier 4f
- Standard milling width: 7 ft 3 in / 2,200 mm
- Theoretical milling depth: 1 ft 2 in / 350 mm

**STANDARD EQUIPMENT**

- Basic machine with dual motor drive
- Machine frame featuring a single wasp waist at the rear right, and a dual wasp waist at the front
- Automatic pressure adjustment of the cylinder pump in accordance with performance requirements for reduced diesel consumption
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Two cooling fans to minimize power consumption of the cooling system

**MILLING DRUM HOUSING**

- Adjustment of material depressor contact pressure via the control panel or automatically via the MILL ASSIST feature to reduce chunk formation
- Electrical adjustment of scraper contact pressure via the control panel
- Automatically controlled locking feature of scraper
- Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement.
- Single-piece water spray bar in the milling drum unit for reliable pick cooling and to prevent dust development
- Automatic control of the water quantity via the MILL ASSIST feature
- Height adjustment stroke increased by 200 mm to facilitate pick replacement and the exchange of milling drum units
- Pre-fitting to allow the quick exchange of milling drum units.
- Hydraulically lifting side plate, right clearance 1 ft 6 in / 450 mm and left clearance 1 ft 2 in / 350 mm

**LOADING OF MILLED MATERIAL**

- Increased conveyor slewing angles of 65° each to the left and right
- Discharge conveyor with adjustable conveying speed and two slewing speeds for precise loading
- Boost feature for a temporary increase of the belt speed and conveying performance of the discharge conveyor by 20%
- Water spray system in the primary conveyor
- Larger conveyor pump for a constant belt speed even at a low engine speed of 1300 rpm

#### **MACHINE CONTROL AND LEVELLING SYSTEM**

- User-friendly control panel including 7" color screen
- LEVEL PRO ACTIVE leveling system with numerous automated and complementary features relieving the operator of a part of his workload
- LEVEL PRO ACTIVE - automatic height control in transport mode
- LEVEL PRO ACTIVE - ramp milling and auto-start feature for the second milling cut
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- MILL ASSIST assistance system for automatic adjustment of the milling drum speed in accordance with the main area of application and the parameters selected in terms of engine load, advance rate, milling volume and quality of the milling pattern.
- Comprehensive machine diagnostics on the control panel including, for example, a diagnostic system for the CAN bus
- Voltmeter integrated into the control panel for voltage measurement in the event of a malfunction
- Two control panels for operating functions performed by ground crew

#### **OPERATOR'S PLATFORM**

- Convenient access to the operator's platform, right and left
- Anti-vibration mounted operator's platform across the full width of the machine including fold-out railing, right
- Electrical control cabinet on the operator's platform for optimum accessibility and fast troubleshooting
- Electrical level indicator for the water tank on the external control panels
- Time display on the main control panel and on the exterior control panels
- Two mirrors at the front, one mirror at the rear of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface

The milling performance results are automatically sent to the corresponding users via the WITOS interface with precise GPS machine position data and consumption data such as diesel consumption, water consumption, tool consumption and truck loads, in an evaluation and then by e-mail. The milling performance reports that include an image of the milling position can also be used as an allowance report. The usability of WITOS hardware components for the existing mobile radio standard is guaranteed for 3 years from the date of delivery.	<b>Additional price instead of standard</b>	<b>2787665</b>	<b>USD</b>	<b>47,066.00</b>

<b>Machine lighting</b>				
Extended lighting system consisting of 21 extremely powerful LED working lights for optimum illumination of the working area. Total light output of the working lights is approx. 43,600 lumens	Standard	2667172	USD	0.00
Extended lighting system consisting of 21 extremely powerful LED working lights for optimum illumination of the working area. Total light output of the working lights is approximately 43,600 lumens. The additional lighting balloon is powered via the machine's 24V electrical power supply and achieves an additional light output of 50,000 lumens	In lieu of 2667172	2667173	USD	4,723.00
<b>Equipment Options</b>				
<b>Additional weight</b>				
Two additional weights located at the rear of the machine with a total weight of 1.500 kg (3,307 lbs) for individual machine ballasting. The individual weights, each weighing 750 kg (1,653 lbs), can be easily and quickly inserted and fastened to the rear of the machine.	Option	2667175	USD	6,609.00
<b>Additional weight</b>				
Large, generously sized storage compartment for 72 pick containers at the rear of the machine instead of the standard storage compartment. The storage compartment is lockable, splash-proof and additionally contains a completely sealed area to safely store electronic components, such as levelling sensors or pick ejectors	Option	2667177	USD	3,149.00
Storage compartment close to both rear track units for 10 pick containers	Standard	2667178	USD	0.00
<b>Equipment operator's platform</b>				
A powerful hot-air heating system with intelligently arranged air vents close to the operator's hands and feet offers maximum comfort on the operator's platform	Option	2667179	USD	3,800.00
Operator's platform equipped with a height-adjustable stand-up seat for greater operator comfort	Standard	2688479	USD	0.00
<b>Milling drum assembly options</b>				
The actual milling depth is determined by calculating the difference in readings from sensors on the side plate and sensors on the scraper. The actual milling depth is displayed on the LEVEL PRO ACTIVE panel.	Standard	2598665	USD	0.00
Overload sensors automatically lift the scraper whenever obstacles are detected that could damage the scraper.	Option	2667192	USD	1,574.00

Active floating position for the side plates on the left and right by continuously adjusting the milling depth and position of the plates. If necessary, the side plates can be briefly raised to prevent them from sinking into the soft ground.	Standard	2598531	USD	0.00
Electrically switchable sectional water spray bar in the milling drum assembly FB3500/3800 (11 ft 6 in / 12 ft 6 in). Four areas can be controlled as required from the control panel (automatically controlled with WPT). This reduces water consumption enormously.	Standard	2667201	USD	0.00
Two wear protection rollers that can be attached to the side plates (left or right). The rollers protect the asphalt, curbs, and other surfaces from damage and prevent excessive wear to the side plates.	Option	2662818	USD	774.00
Mounting aid for lifting out the short primary conveyor when changing the milling unit.	Standard	2685194	USD	0.00
Transport carriage for milling drum units from FB2200 (7 ft 3 in) to FB4400 (14 ft 5 in) to make it easier to change milling drum units and handle them in the workshop or on the job site.	Option	2282163	USD	17,331.00
Milling drum mounting and transport cart for milling drums from FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,419.00
Transport roller set consisting of 4 heavy-duty rollers for easy removal of milling units from FB1500 to FB3800 on level surfaces.	Option	2762958	USD	5,211.00
<b>Options for belt conveyor</b>				
VCS – vacuum cutting system on the discharge conveyor for the extraction of fine material particles and water vapor from the sealed milling drum unit.	Standard	2667207	USD	0.00
Signal lights for visual "stop" and "go" instructions for the truck driver without the use of a horn. The signal lights can be folded in hydraulically from the operator's platform.	Option	2598539	USD	4,818.00
Semi-automatic ACTIVE CONVEYOR swing angle control that guides the discharge conveyor in construction site situations where milling is carried out at intersections or roundabouts	Standard	2703705	USD	0.00
Support device for positioning the discharge conveyor on the flat bed truck	Standard	60603	USD	0.00
<b>Additional control unit LEVEL PRO</b>				
Additional 5" control panel for controlling the LEVEL PRO ACTIVE leveling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Option	2598631	USD	2,321.00

Two pieces - Additional 7" control panel that displays the machine control and controls the LEVEL PRO ACTIVE levelling system. Up to two additional control panels can be mounted in the rear lower area of the machines	Standard	2598632	USD	0.00
Additional 2" control panel that can be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Standard	2598664	USD	0.00
Two additional 2" control panels that can each be programmed with up to 16 individually selected functions. Up to two additional control panels can be mounted on the outside railing of the operator's platform	Option	2767151	USD	3,909.00
User-specific saving of individually adjustable machine settings such as the display configuration or the assignment of favorites buttons. The data can be saved on five different SMART KEY key fobs with tokens.	Standard	2779470	USD	0.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE levelling system with levelling boom. Premounted and adjustable hydraulic cylinders on the left and right allow the use of a Sonic-Ski sensor that is able to scan a reference object up to 1,900 mm away from the milling edge. During machine transport, the sensor and cables are securely stowed in the corresponding transport boxes.	Option	2667237	USD	10,559.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with one hydraulic cylinder sensor for scanning a reference surface to the right of the milling drum.	Option	2667239	USD	3,067.00
Extension of the LEVEL PRO ACTIVE leveling system with two hydraulic cylinder sensors for scanning a reference surface to the left and the right of the milling drum.	Standard	2667241	USD	0.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2673212	USD	5,062.00
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the left and right. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box.	Option	2673213	USD	9,826.00

Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box. (FB3500/FB3800) (11 ft 6 in / 12 ft 6 in)	Option	2790513	USD	6,284.00
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right and left. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in a corresponding transport box. (FB3500/FB3800) (11 ft 6 in / 12 ft 6 in)	Option	2790514	USD	12,079.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines without a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2667342	USD	8,333.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines with a weather canopy. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2667343	USD	2,076.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3D milling with machines with a cabin. The pre-fitting equipment consists of robust and exactly positioned mounting adapters for a 3D system as well as sensor sockets for connecting the sensors to the LEVEL PRO ACTIVE system.	Option	2667344	USD	5,931.00
Extension of the LEVEL PRO ACTIVE leveling system with two linear laser sensors that can be installed using the pre-fitting equipment for 3D leveling.	Option	2662826	USD	12,635.00
<b>Water system</b>				
Powerful, hydraulically operated high pressure water cleaner with a maximum output of 15 l/min (4 gpm) at a pressure of 150 bar (2175 psi).	Option	2667357	USD	2,497.00
<b>Pick changing aids</b>				
One hydraulically powered pick ejector, including the required electrical and hydraulic connections. Ideal for convenient, fast and low-noise pick changes.	Standard	2667497	USD	0.00

Two hydraulically powered pick ejectors, including the required electrical and hydraulic connections. Ideal for convenient, fast and low-noise pick changes.	Option	2793479	USD	5,971.00
<b>Camera system</b>				
Two-fold camera system with one camera at the discharge conveyor and one camera with a view of the rear area. The camera images are displayed on the standard 7" control panel on the operator's platform.	Option	2673433	USD	2,904.00
Four-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine as well as of the side plates, on the right and left. The camera images are displayed on the 10" control panel on the operator's platform.	Standard	2673434	USD	0.00
Eight-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine, of the side plates on the right and left and of the milled surface behind the milling drum unit. The camera images are displayed on the 10" control panel on the operator's platform.	Option	2673435	USD	10,789.00
<b>Other devices</b>				
Electrical preheating of the fuel filter to maintain the flow of fuel at low outside temperatures. Serves to guarantee machine operation at temperatures below 0 32 degrees Fahrenheit (0 degrees Celsius).	Option	2673455	USD	1,357.00
Electrical diesel suction and pressure pump with 7.50 m (24 ft 7 in) suction hose. The machine can be refueled with up to 50 l/min (13 gal/min) from external diesel tanks.	Option	2673456	USD	923.00
License plate holder with LED lighting	Option	2654224	USD	475.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

Date: 6/25/2020

## Price list

## W 35 Ri

### Scope of supply – basic machine

- Engine: 4-cylinder diesel engine type DEUTZ TCD 2.9 L4
- Rated engine power at 2100 - 2300 rpm: 45 kW / 60 HP / 61 PS
- Emission standard: EU Stage 3b / US Tier 4f
- Standard milling width: 1 ft 2 in / 350 mm
- Theoretical milling depth: 4 in / 110 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Robust machine chassis
- Wide opening engine cowlings, with gas spring support and highly effective noise insulation
- Radiator with temperature-dependent fan speed
- Integrated 72 gal / 275 liter water tank
- Integrated 18 gal / 70 liter diesel tank
- Loading and tie-down points integrated in the chassis

### MILLING DRUM UNIT

- Water sprayingstrip with on/off function for pick cooling with water pump with load-dependent control
- Wide opening milling drum door with automatic electrical safety shut-down
- Right side plate in hinged configuration in conjunction with centering pin system on the milling drum holder for quick and easy change of milling drums
- The right-hand side plate can be easily lifted using the foot pedal on the operator's stand

### MACHINE CONTROL AND LEVELLING SYSTEM

- WIDRIVE machine controller to reduce operator workload and increase performance

### OPERATOR'S PLATFORM

- Flexibly mounted operator's platform on the top of the machine
- Multi-function armrest on right with up/down and front/back adjustment with joystick and various controls ergonomically arranged
- Display for important machine parameters on the left control panel
- Convenient operating console with practical switches
- Convenient footstep to the operator's platform
- Operator's platform with vibration damping
- Steering console with adjustable inclination
- Lockable control panel covers

### CHASSIS AND HEIGHT ADJUSTMENT

- Hydraulic 3-wheel all-wheel drive with hydraulic flow distributor
- Two manually engageable milling speeds as well as one traveling gear
- Hydraulic, easy front wheel steering
- Hydraulic spring-loaded multi-disc brake
- Hydraulic height adjustment with two speeds at the rear track units
- Manually folding-in rear right wheel

#### **MISCELLANEOUS**

- Lockable tool box with set of tools for maintenance and servicing
- Additional mount for a pick container
- Device for towing away for releasing the spring-loaded multi-disc brake
- Reversing horn
- Extensive safety package with EMERGENCY STOP switch
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 178,627.00**

Mandatory Options				
Exhaust Gas After Treatment				
Exhaust after-treatment by diesel oxidation catalytic converter DOC in exhaust emissions category EU Stage 3b / US Tier 4f. Without diesel particulate filter.	Standard	2368620	USD	0.00
Exhaust after-treatment by diesel oxidation catalyst DOC in exhaust emissions category EU Stage 3b / US Tier 4f. Additionally equipped with diesel particulate filter (DPF) - for operation e.g. in halls or in environmental zones with limited fine dust emission.	Option	2378316	USD	4,736.00
Milling drum housing				
Ancillary parts for milling drum housing for extending to FB350. For operation without discharge conveyor. With single closing cap. Without scraper and milling drum.	Standard	2435407	USD	0.00
Ancillary parts for milling drum housing for extending to FB350. For operation with discharge conveyor. Including scraper and scraper bottom part. Without milling drum.	Option	2434106	USD	1,588.00
Ancillary parts for milling drum housing for extending to FB500. For operation without discharge conveyor. With single closing cap. Without scraper and milling drum.	Option	2430304	USD	2,470.00
Ancillary parts for milling drum housing for extending to FB500. For operation with discharge conveyor. Including scraper and scraper bottom part. Without milling drum.	Option	2430301	USD	4,397.00
Hydraulic connection				
Hydraulic drive with quick-release connection and additional hydraulic pump for operation of discharge conveyor or hydraulic jack hammer.	Standard	2433900	USD	0.00
Milling drums / milling units				
Milling drum FB350 LA15, with welded pick holders HT08 with increased service life, milling depth max. 4 in / 110 mm, equipped with 31 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2430057	USD	0.00
Milling depth regulation				
Mechanical milling depth indicator by a cable right and left connected to the side plate. Separate display on the left and right by a milling depth gage.	Standard	2435408	USD	0.00
LEVEL PRO PLUS leveling system. The measurement is made using wire-rope sensors on the side plate right and left. The milling depth is displayed and set intuitively on the LEVEL PRO PLUS operating display. The milling depth is regulated automatically. Incl. pre-fitting for additional sensors (e.g. Rapid Slope cross-slope sensor).	Option	2376183	USD	7,817.00

<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2376118	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2376119	USD	787.00
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
<b>Machine lighting</b>				
Lighting system consisting of 2 halogen and 4 LED working lights. The headlights illuminate the area in front of the machine and the area in front of the milling drum unit. The light output of the working lights is approx. 9,700 lumens in total.	Standard	2435593	USD	0.00
High-performance lighting system consisting of 1 halogen and 5 LED working lights. The headlights illuminate the area in front of the machine and the area in front of the milling drum unit. The light output of the working lights is approx. 10,300 lumens in total. LED working lights are extremely bright, shock-resistant and durable.	Option	2435594	USD	244.00
<b>Equipment Options</b>				
<b>Additional weight</b>				
Modular additional weight 3086 lbs / 1,400 kg for individual ballasting of the machine. The weight plates can be carried and easily mounted by one person.	Standard	2450844	USD	0.00
<b>Equipment operator's platform</b>				
Equipment of the operator's platform with a height adjustable standing seat for increasing operating comfort	Standard	2460736	USD	0.00

<b>Slot cutting ring</b>				
Ancillary parts and adapter with saw blade FB14 (5 in), milling depth max. 4 in / 100 mm, for the installation on zero edge right	Option	2074431	USD	2,049.00
Ancillary parts and adapter with saw blade FB19 (7 in), milling depth max. 4 in / 100 mm, for the installation on zero edge right	Option	2120815	USD	2,036.00
<b>Options for belt conveyor</b>				
Robust 6 ft 1 in / 1,870 mm long discharge conveyor with conveyor belt width 8 in / 250 mm. Includes comfortable rope winch height adjustment. Using a foldable roller unit, the discharge conveyor can be mounted and removed in just a few steps and is easy to transport on a construction site. When replacing the picks, the belt can simply be swung to the side without the hydraulic connections having to be disconnected.	Option	2605148	USD	6,854.00
<b>Lateral slope control</b>				
Expansion of the LEVEL PRO PLUS leveling system by a RAPID SLOPE cross-slope sensor. Ideal, for example for aligning the machine in a defined lateral tilt on a one-sided reference.	Option	2368617	USD	4,004.00
<b>Leveling</b>				
Pre-programmable height positions with automatic positioning. 3 freely selectable workings heights each on left and right can be predefined. E.g. for quickly moving to milling depths or lifting the machine out of the cut. The left and right positions can be moved to separately.	Standard	2435844	USD	0.00
<b>Attachments</b>				
Powerful hydraulic hammer including 32 ft 8 in / 10-m connecting hose for residual jobs	Option	2435414	USD	5,171.00
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	Option	2656383	USD	434.00
<b>Additional milling drums</b>				
Fine milling drum, with milling width 350 mm / 1 ft 2 in, milling depth max. 100 mm / 3 15/16 in, tool spacing 6 mm / 15/64 in, equipped with welded holder system HT5 and 57 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	Option	187302	USD	5,605.00
Microfine milling drum FB350 (14") LA3, with welded pick holders HT4, milling depth max. 1.2 in / 30 mm, equipped with 117 picks	Option	187301	USD	8,319.00

Microfine milling drum gutter profile, FB150 + lateral taper 2 x 1 in / 25 mm. With welded pick holders HT4, LA3, milling depth max. 1 in / 25 mm, equipped with 67 picks. Suitable for milling gutter shapes without edge and for removing road markings.	Option	193397	USD	5,700.00
Mark removing milling drum FB200+2x25 LA3, with welded pick holders HT4, milling depth max. 1.2 in / 30 mm, equipped with 83 picks.	Option	198782	USD	6,514.00
Mark removing milling drum FB250+2x25 LA3, with welded pick holders HT4, milling depth max. 1.2 in / 30 mm, equipped with 99 picks.	Option	198783	USD	7,396.00
Mark removing milling drum FB300+2x25 (12" + 2x 1") LA3, with welded pick holders HT4, milling depth max. 1.2 in / 30 mm, equipped with 117 picks.	Option	193339	USD	8,360.00
Milling drum FB80 (3") with welded pick holders HT02, milling depth max. 4 in / 110 mm, equipped with 12 picks, for the installation in the milling drum housing with zero edge right	Option	187307	USD	1,384.00
Milling drum FB500 LA15, with welded pick holders HT08 with increased service life, milling depth max. 4 in / 110 mm, equipped with 39 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Option	2430054	USD	3,800.00
Fine milling drum, with milling width 500 mm (1 ft 7 in), milling depth max. 100 mm, tool spacing 6 mm / 15/64 in, equipped with welded holder system HT05 and 82 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	Option	193398	USD	6,894.00
Mark removing milling drum FB450 +2x25 (18" + 2x 1") LA3, with welded pick holders HT4, milling depth max. 1.2 in / 30 mm, equipped with 166 picks.	Option	193396	USD	11,115.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list W 50 Ri

### Scope of supply – basic machine

- Engine: 4-CYLINDER DIESEL ENGINE TYPE DEUTZ TCD 4.1 L4
- Rated engine power 2300 r.p.m.: 105 kW / 141 HP / 143 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 1 ft 7 in / 500 mm
- Theoretical milling depth: 8 in / 210 mm

### STANDARD EQUIPMENT

- Engine cover with noise insulation and flexibly decoupled engine mounting for especially quiet running and low noise emissions

### MILLING DRUM UNIT

- Automatically activating, hydraulic drive belt tensioner for reliable power transmission to the milling drum
- Hydraulically lifting side plates with position measuring sensors in the hydraulic cylinders for measuring the milling depth.
- Round milling drum housing and straight left side plate for optimum material transport, making for low left-over amounts when lifting out the milling drum
- Prepared for using a scraper decoupled from the conveyor suspension for loading material using discharge conveyor
- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Optimized for quick change of the milling drum, including by using centering pins with the side door of the milling drum housing
- With automatic electrical safety shut-off for the milling drum

### LOADING OF MILLED MATERIAL

- Machine prepared for optional material loading by discharge conveyor
- Conveyor speed continuously variable
- Conveyor slewing angle right/left 30 degrees each for significantly improved loading procedures
- Slender conveyor suspension permits improved visibility to the rear

### OPERATOR'S PLATFORM

- Operator's platform with ergonomically arranged operator's seat, control panel arranged on the right and digital milling depth indicator in the control display
- Steering console with adjustable rake and reach for ideal adaptation of the operator's platform to the operator
- 2 rear-view mirrors left
- Machine design permits unobstructed view of the milled edge at the right and left as well as the working area in front of the milling drum on the right

- Conveniently accessible ladder/footstep to the operator's platform with night-time lighting and especially low, folding bottom edge of the latter/footstep
- Robust anti-vandalism protection for the controls

#### CHASSIS AND HEIGHT ADJUSTMENT

- Precise machine height adjustment in 0.04 or 0.2 in /1 or 5 mm steps from the machine control panel
- Infinitely variable, hydraulic all-wheel drive with three speed ranges
- Digital load control, manual engageable, hydraulic differential lock (by flow distributor)
- Particularly wide solid rubber tires (1 ft / 300 mm) for the lowest ground pressures and optimum traction
- For milling along curb edges, the rear right support wheel can be swiveled hydraulically from the operator's platform in front of the milling drum. In addition, the machine does not have to be lowered.
- Hydraulic spring-loaded brake
- Proportional height adjustment at rear
- Additional machine controller for automatic milling of intermittent rumble strip sections. Only in combination with a rumble strip kit.

#### MISCELLANEOUS

- Optimized center of gravity position, irrespective of the filling levels of the water and fuel tanks
- Particularly low machine center of gravity for high stability of the machine
- Robust and easily maintained machine chassis with optimum ground clearance and short overhangs
- Device for towing away
- Reversing horn
- Large tool package with lockable tool box and additional storage space for two pick containers
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

List price ex subsidiary Wirtgen America

USD 287,538.00

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing FB500 (20") with scraper system. For use with discharge conveyor.	Standard	2288339	USD	0.00
Milling drums / milling units				
Milling drum with milling width 500 mm / 1 ft 7 in, milling depth max. 210 mm / 8 in, tool spacing 15 mm / 19/32 in, equipped with welded pick holders HT08 with increased service life and 60 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2288343	USD	0.00
Material depressor / milling unit seal front				
Front milling drum unit seal FB500 (20") with hydraulic height and contact pressure adjustment. An overload sensor with control function lifts the seal briefly in case of a collision and thus prevents damage.	Standard	2288347	USD	0.00
Operator's platform				
Standard operator's seat with shock absorption and lengthways adjustment	Standard	2288348	USD	0.00
Comfort operator's seat incl. seat heating. The operator's seat has shock absorption, lengthways adjustment and can be swiveled through 20 degrees.	Option	2288349	USD	1,031.00
Milling depth regulation				
Digital milling depth indicator in the control display. The measurement is made using cylinder sensors in the lifting columns. Regulation is performed manually by the operator. With 3 freely assignable milling depth memory slots each for the left and right sides of the machine.	Standard	2288350	USD	0.00
LEVEL PRO PLUS leveling system. The measurement is made using cylinder sensors on the side plate right and left. The milling depth is displayed and set intuitively on the LEVEL PRO PLUS control display. The milling depth is regulated automatically. Incl. pre-fitting for additional sensors (e.g. Rapid Slope).	Option	2288352	USD	9,568.00
Hydraulic connection				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	Standard	2288355	USD	0.00
Machine with hydraulic pre-fitting for a discharge conveyor with quick-change coupling. For quick change of the discharge conveyor. Each contains the coupling element on the machine side and the discharge conveyor side.	Option	2329169	USD	3,501.00
Material transport				
Transport lock for locking the ejection opening for machine with loading conveyor removed	Option	2368733	USD	258.00

Shortened discharge conveyor 3 ft 7 in / 1,100 mm long with conveyor belt system 1 ft 2 in / 350 mm. Including hydraulic conveyor cylinder and installation material. Ideal for loading wheel loader buckets and wheelbarrows or for depositing the milled material at the side.	<b>Option</b>	<b>2288358</b>	<b>USD</b>	<b>12,038.00</b>
Discharge conveyor 18 ft 4 in / 5,600 mm long with conveyor belt width 1 ft 2 in / 350 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields. Including mechanical installation and removal assistance.	<b>Standard</b>	<b>2288359</b>	<b>USD</b>	<b>0.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2288360</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2288361</b>	<b>USD</b>	<b>1,262.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>

<b>Machine lighting</b>				
Lighting system consisting of 1 LED strip, 3 halogen and 8 LED working lights. The headlights illuminate the area in front of the machine, the left machine side, the area in front of the milling drum unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 16,700 lumen in total.	<b>Standard</b>	<b>2487449</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 2 LED strips, 1 halogen and 12 LED working lights. The headlights illuminate the area in front of the machine, the rear of the machine, the left machine side from the front and rear, the area in front of the milling drum unit, the wheel arch, the weather canopy, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 23,300 lumen in total. LED working lights are extremely bright, shock-resistant and durable.	<b>Option</b>	<b>2487450</b>	<b>USD</b>	<b>923.00</b>
<b>Crawler units</b>				
Chassis with 4 driven wheeled track units for a quick and maneuverable change of field with optimum traction and better distribution of ground pressure. The front wheels are arranged slightly offset and so permit larger steering angles as well as greater comfort and safety when crossing lateral steps.	<b>Standard</b>	<b>2286790</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment Options</b>				
<b>Additional weight</b>				
Machine equipment with an additional weight 838 lbs / 380 kg behind the front axle. The additional weight increases the machine traction.	<b>Option</b>	<b>2288394</b>	<b>USD</b>	<b>2,076.00</b>
<b>Advance drive</b>				
Equipment of the machine with 4-wheel chassis with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine. The right rear wheel also steers, thereby enabling the smallest turning circles within a compact space.	<b>Standard</b>	<b>2478478</b>	<b>USD</b>	<b>0.00</b>
Equipment of the machine for increased transport speed by using more powerful hydraulic components, (3-wheel up to 8 km/h / 5 mph, 4-wheel up to 12 km/h / 7.5 mph). Working in the field is significantly accelerated by an increased transport speed of the machine. Option only possible in conjunction with precision steering.	<b>Standard</b>	<b>2478476</b>	<b>USD</b>	<b>0.00</b>

<b>Equipment operator's platform</b>				
Operator's platform with weather canopy and lateral weather protection elements. The weather canopy can be adjusted in height hydraulically. The transparent weather protection elements on the side on the roof and the right of the operator's platform protect the operator against the effects of weather driving in from the sides, and ensure additional comfort when working.	Option	2309414	USD	8,862.00
<b>Milling drum assembly options</b>				
Overload sensor on the scraper FB500/600 for automatic lifting function in case of obstacles. Effectively prevents the scraper from sinking into the loose sub-base, as well as getting stuck on obstacles.	Option	2478474	USD	909.00
Active floating position on the side plate right and left by continuous comparison between the milling depth and position of the side plate. If required, the side plate is lifted briefly to prevent tilting or sinking into a soft sub-base. (Only possible in conjunction with LEVEL PRO PLUS.)	Option	2478486	USD	1,656.00
<b>Side milling ring</b>				
Side milling ring with protective cover and ancillary parts FB80 (3") cpl., with welded pick holders HT02, milling depth max. 0 ft 11 in / 300 mm, equipped with 30 picks	Option	2288386	USD	9,446.00
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB600 (24"), for straightforward milling drum change.	Option	177240	USD	665.00
<b>Additional milling units</b>				
FCS milling unit FB400 (15,75") LA15, with welded pick holders HT08, milling depth max. 8 in / 210 mm, equipped with 54 picks. Including corresponding scraper bottom parts.	Option	2288388	USD	6,949.00
FCS milling unit FB300 (12") LA15, with welded pick holders HT08, milling depth max. 8 in / 210 mm, equipped with 47 picks. Including corresponding scraper bottom parts.	Option	2288389	USD	5,985.00
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	Option	2411669	USD	394.00
<b>Options for belt conveyor</b>				
Additional shortened discharge conveyor 3 ft 7 in / 1,100 mm long with conveyor belt system 1 ft 2 in / 350 mm. Including hydraulic conveyor cylinder and installation material. Ideal for loading wheel loader buckets and wheelbarrows or for depositing the milled material at the side.	Option	2288390	USD	11,251.00

<b>Lateral slope control</b>				
Expansion of the LEVEL PRO PLUS leveling system by a RAPID SLOPE sensor. Ideal, for example for aligning the machine in a defined lateral tilt on a one-sided reference.	Option	2547902	USD	4,004.00
Expansion of the LEVEL PRO PLUS leveling system by a leveling boom that can be moved out on the left side. The boom can be moved out hydraulically if required by up to 43 in / 1,080 mm and mechanically by a further 40 in / 1,020 mm. Including sensor and cable as well as LED position lights for indicating the moved-out boom.	Option	2288393	USD	5,496.00
<b>Attachments</b>				
Hydraulic control valves and hydraulic connection on machine rear for the use of a hydraulic hammer or further hydraulically driven additional devices.	Option	2363218	USD	936.00
<b>Attachments</b>				
Powerful hydraulic hammer with 33 ft / 10 m connection hose. Ideal for removing left-over areas.	Option	2288398	USD	4,058.00
<b>Water system / spraying agent system</b>				
Hydraulically driven water filler pump. For rapid filling of the water tank. The filler pump is located in an easily accessible position and is protected in the storage compartment at the ladder/footstep to the operator's platform.	Option	2288387	USD	2,755.00
<b>Pick changing aids</b>				
Hydraulically driven pick extractor drift, complete with holder and corresponding electrical and hydraulic connectors. Ideal for convenient and quiet pick change.	Option	2288399	USD	5,904.00
<b>Wirtgen information and diagnostic system</b>				
Equipment of the machine with job data acquisition. The information is shown in the control display.	Option	2410294	USD	1,113.00
<b>Camera system</b>				
Monitor system with 2 cameras and an additional screen. A camera is mounted on the discharge conveyor and displays the ejection area. The 2nd camera can be freely positioned on the machine using a magnetic base and spiral cable, and thus offers complete flexibility in use.	Option	2487626	USD	4,967.00

<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.		2655776	USD	434.00
<b>Additional milling drums</b>				
Milling drum FB80 (3") with welded pick holders HT02, milling depth max. 8 in / 210 mm, equipped with 24 RS picks, for the installation in the milling drum housing with zero edge right	Option	2078806	USD	3,257.00
Milling drum with milling width 300 mm / 0 ft 11 in, milling depth max. 210 mm / 8 in, tool spacing 15 mm / 19/32 in, equipped with welded pick holders HT08 with increased service life and 47 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Option	2334037	USD	5,089.00
Milling drum with milling width 400 mm / 15 3/4 in, milling depth max. 210 mm / 8 in, tool spacing 15 mm / 19/32 in, equipped with welded pick holders HT08 with increased service life and 54 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Option	2334038	USD	5,768.00
Microfine milling drum FB500 (20") LA3, with welded pick holders HT4, milling depth max. 0.8 in / 20 mm, equipped with 166 mini-picks.	Option	178460	USD	11,617.00
Fine milling drum, with milling width 500 mm / 1 ft 8 in, milling depth max. 50 mm / 2 in, tool spacing 6 mm / 15/64 in, equipped with welded holder system HT5 and 84 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	Option	177181	USD	8,767.00
FCS milling drum with milling width 500 mm / 1 ft 7 in, milling depth max. 210 mm / 8 in, tool spacing 20 mm / 25/32 in, equipped with welded pick holders HT08 and 54 picks. For applications with high requirements for milling volume, e.g. complete removal of road surfaces or concrete milling work.	Option	2389515	USD	5,863.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00
<sup>1</sup> Option must be ordered from headquarters. Date: 3/6/2019				

## Price list

### W 60 Ri

#### Scope of supply – basic machine

- Engine: 4-CYLINDER DIESEL ENGINE TYPE DEUTZ TCD 4.1 L4
- Rated engine power 2300 r.p.m.: 105 kW / 141 HP / 143 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 1 ft 7 in / 500 mm
- Theoretical milling depth: 8 in / 210 mm

#### STANDARD EQUIPMENT

- Engine cover with noise insulation and flexibly decoupled engine mounting for especially quiet running and low noise emissions

#### MILLING DRUM UNIT

- Automatically activating, hydraulic drive belt tensioner for reliable power transmission to the milling drum
- Hydraulically lifting side plates with position measuring sensors in the hydraulic cylinders for measuring the milling depth.
- Round milling drum housing and straight left side plate for optimum material transport, making for low left-over amounts when lifting out the milling drum
- Prepared for using a scraper decoupled from the conveyor suspension for loading material using discharge conveyor
- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Optimized for quick change of the milling drum, including by using centering pins with the side door of the milling drum housing
- With automatic electrical safety shut-off for the milling drum

#### LOADING OF MILLED MATERIAL

- Machine prepared for optional material loading by discharge conveyor
- Conveyor speed continuously variable
- Conveyor slewing angle right/left 30 degrees each for significantly improved loading procedures
- Slender conveyor suspension permits improved visibility to the rear

#### OPERATOR'S PLATFORM

- Operator's platform with ergonomically arranged operator's seat, control panel arranged on the right and digital milling depth indicator in the control display
- Steering console with adjustable rake and reach for ideal adaptation of the operator's platform to the operator
- 2 rear-view mirrors left
- Machine design permits unobstructed view of the milled edge at the right and left as well as the working area in front of the milling drum on the right
- Conveniently accessible ladder/footstep to the operator's platform with night-time lighting and especially low, folding bottom edge of the latter/footstep

- Robust anti-vandalism protection for the controls

#### CHASSIS AND HEIGHT ADJUSTMENT

- Precise machine height adjustment in 0.04 or 0.2 in /1 or 5 mm steps from the machine control panel
- Infinitely variable, hydraulic all-wheel drive with three speed ranges
- Digital load control, manual engageable, hydraulic differential lock (by flow distributor)
- Particularly wide solid rubber tires (1 ft / 300 mm) for the lowest ground pressures and optimum traction
- For milling along curb edges, the rear right support wheel can be swiveled hydraulically from the operator's platform in front of the milling drum. In addition, the machine does not have to be lowered.
- Hydraulic spring-loaded brake
- Proportional height adjustment at rear
- Additional machine controller for automatic milling of intermittent rumble strip sections. Only in combination with a rumble strip kit.

#### MISCELLANEOUS

- Optimized center of gravity position, irrespective of the filling levels of the water and fuel tanks
- Particularly low machine center of gravity for high stability of the machine
- Robust and easily maintained machine chassis with optimum ground clearance and short overhangs
- Device for towing away
- Reversing horn
- Machine equipment with an additional weight 838 lbs / 380 kg behind the front axle. The additional weight increases the machine traction.
- Large tool package with lockable tool box and additional storage space for two pick containers
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

List price ex subsidiary Wirtgen America

USD 292,966.00

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing FB600 (24") with scraper system. For use with discharge conveyor.	Standard	2381026	USD	0.00
Milling drums / milling units				
Milling drum with milling width 600 mm / 23 5/8 in, milling depth max. 210 mm / 8 in, tool spacing 15 mm / 19/32 in, equipped with welded pick holders HT08 with increased service life and 70 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2288345	USD	0.00
Material depressor / milling unit seal front				
Front milling drum unit seal FB600 (24") with hydraulic height and contact pressure adjustment. An overload sensor with lifting function lifts the seal briefly in case of a collision and thus prevents damage.	Standard	2297529	USD	0.00
Operator's platform				
Standard operator's seat with shock absorption and lengthways adjustment	Standard	2288348	USD	0.00
Comfort operator's seat incl. seat heating. The operator's seat has shock absorption, lengthways adjustment and can be swiveled through 20 degrees.	Option	2288349	USD	1,031.00
Milling depth regulation				
Digital milling depth indicator in the control display. The measurement is made using cylinder sensors in the lifting columns. Regulation is performed manually by the operator. With 3 freely assignable milling depth memory slots each for the left and right sides of the machine.	Standard	2288350	USD	0.00
LEVEL PRO PLUS leveling system. The measurement is made using cylinder sensors on the side plate right and left. The milling depth is displayed and set intuitively on the LEVEL PRO PLUS control display. The milling depth is regulated automatically. Incl. pre-fitting for additional sensors (e.g. Rapid Slope).	Option	2288352	USD	9,568.00
Hydraulic connection				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	Standard	2288355	USD	0.00
Machine with hydraulic pre-fitting for a discharge conveyor with quick-change coupling. For quick change of the discharge conveyor. Each contains the coupling element on the machine side and the discharge conveyor side.	Option	2329169	USD	3,501.00

<b>Material transport</b>				
Transport lock for locking the ejection opening for machine with loading conveyor removed	Option	2368733	USD	258.00
Shortened discharge conveyor 3 ft 7 in / 1,100 mm long with conveyor belt system 1 ft 2 in / 350 mm. Including hydraulic conveyor cylinder and installation material. Ideal for loading wheel loader buckets and wheelbarrows or for depositing the milled material at the side.	Option	2288358	USD	12,038.00
Discharge conveyor 18 ft 4 in / 5,600 mm long with conveyor belt width 1 ft 2 in / 350 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields. Including mechanical installation and removal assistance.	Standard	2288359	USD	0.00
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2380455	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2380457	USD	1,262.00
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
<b>Machine lighting</b>				
Lighting system consisting of 1 LED strip, 3 halogen and 8 LED working lights. The headlights illuminate the area in front of the machine, the left machine side, the area in front of the milling drum unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 16,700 lumen in total.	Standard	2487449	USD	0.00
High-performance lighting system consisting of 2 LED strips, 1 halogen and 12 LED working lights. The headlights illuminate the area in front of the machine, the rear of the machine, the left machine side from the front and rear, the area in front of the milling drum unit, the wheel arch, the weather canopy, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 23,300 lumen in total. LED working lights are extremely bright, shock-resistant and durable.	Option	2487450	USD	923.00

<b>Crawler units</b>				
Chassis with 4 driven wheeled track units for a quick and maneuverable change of field with optimum traction and better distribution of ground pressure. The front wheels are arranged slightly offset and so permit larger steering angles as well as greater comfort and safety when crossing lateral steps.	<b>Standard</b>	<b>2286790</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment Options</b>				
<b>Additional weight</b>				
Equipment of the machine with an additional weight 620 kg / 1367 lbs on the underbody. For the W 50 Ri, only in conjunction with the additional weight 380 kg / 838 lbs. The additional weight increases the machine traction.	<b>Option</b>	<b>2288395</b>	<b>USD</b>	<b>2,836.00</b>
<b>Advance drive</b>				
Equipment of the machine with 4-wheel chassis with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine. The right rear wheel also steers, thereby enabling the smallest turning circles within a compact space.	<b>Standard</b>	<b>2481423</b>	<b>USD</b>	<b>0.00</b>
Equipment of the machine for increased transport speed by using more powerful hydraulic components, (3-wheel up to 8 km/h / 5 mph, 4-wheel up to 12 km/h / 7.5 mph). Working in the field is significantly accelerated by an increased transport speed of the machine. Option only possible in conjunction with precision steering.	<b>Standard</b>	<b>2478476</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				
Operator's platform with weather canopy and lateral weather protection elements. The weather canopy can be adjusted in height hydraulically. The transparent weather protection elements on the side on the roof and the right of the operator's platform protect the operator against the effects of weather driving in from the sides, and ensure additional comfort when working.	<b>Option</b>	<b>2309414</b>	<b>USD</b>	<b>8,862.00</b>
<b>Milling drum assembly options</b>				
Overload sensor on the scraper FB500/600 for automatic lifting function in case of obstacles. Effectively prevents the scraper from sinking into the loose sub-base, as well as getting stuck on obstacles.	<b>Option</b>	<b>2478474</b>	<b>USD</b>	<b>909.00</b>
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB600 (24"), for straightforward milling drum change.	<b>Option</b>	<b>177240</b>	<b>USD</b>	<b>665.00</b>
<b>Additional milling units</b>				
FCS milling unit FB500 (1 ft 6 in) LA15, with welded pick holders HT08, milling depth max. 8 in / 210 mm, equipped with 60 picks. Including corresponding scraper bottom parts.	<b>Option</b>	<b>2542455</b>	<b>USD</b>	<b>9,052.00</b>
FCS milling unit FB400 (15,75") LA15, with welded pick holders HT08, milling depth max. 8 in / 210 mm, equipped with 54 picks. Including corresponding scraper bottom parts.	<b>Option</b>	<b>2542456</b>	<b>USD</b>	<b>8,645.00</b>

<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	Option	2411669	USD	394.00
<b>Options for belt conveyor</b>				
Additional shortened discharge conveyor 3 ft 7 in / 1,100 mm long with conveyor belt system 1 ft 2 in / 350 mm. Including hydraulic conveyor cylinder and installation material. Ideal for loading wheel loader buckets and wheelbarrows or for depositing the milled material at the side.	Option	2288390	USD	11,251.00
<b>Attachments</b>				
Hydraulic control valves and hydraulic connection on machine rear for the use of a hydraulic hammer or further hydraulically driven additional devices.	Option	2363218	USD	936.00
<b>Attachments</b>				
Powerful hydraulic hammer with 33 ft / 10 m connection hose. Ideal for removing left-over areas.	Option	2288398	USD	4,058.00
<b>Water system / spraying agent system</b>				
Hydraulically driven water filler pump. For rapid filling of the water tank. The filler pump is located in an easily accessible position and is protected in the storage compartment at the ladder/footstep to the operator's platform.	Option	2288387	USD	2,755.00
<b>Pick changing aids</b>				
Hydraulically driven pick extractor drift, complete with holder and corresponding electrical and hydraulic connectors. Ideal for convenient and quiet pick change.	Option	2288399	USD	5,904.00
<b>Wirtgen information and diagnostic system</b>				
Equipment of the machine with job data acquisition. The information is shown in the control display.	Option	2410294	USD	1,113.00
<b>Camera system</b>				
Monitor system with 2 cameras and an additional screen. A camera is mounted on the discharge conveyor and displays the ejection area. The 2nd camera can be freely positioned on the machine using a magnetic base and spiral cable, and thus offers complete flexibility in use.	Option	2487626	USD	4,967.00
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	Option	2655776	USD	434.00

<b>Additional milling drums</b>				
Milling drum FB80 (3") with welded pick holders HT02, milling depth max. 8 in / 210 mm, equipped with 24 picks	Option	2389524	USD	3,176.00
Fine milling drum, with milling width 600 mm, milling depth max. 100 mm, tool spacing 6 mm / 15/64 in, equipped with welded holder system HT5 and 101 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	Option	2389522	USD	10,084.00
Milling drum Eco-Cutter FB600 (24") LA20 with welded pick holders HT08 with increased service life. Milling depth max. 8 in / 210 mm, equipped with 58 picks.	Option	2389521	USD	6,216.00
Microfine milling drum FB500 (20") LA3, with welded pick holders HT4, milling depth max. 0.8 in / 20 mm, equipped with 166 mini-picks.	Option	178460	USD	11,617.00
Fine milling drum, with milling width 500 mm / 1 ft 8 in, milling depth max. 50 mm / 2 in, tool spacing 6 mm / 15/64 in, equipped with welded holder system HT5 and 84 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	Option	177181	USD	8,767.00
FCS milling drum with milling width 500 mm / 1 ft 7 in, milling depth max. 210 mm / 8 in, tool spacing 20 mm / 25/32 in, equipped with welded pick holders HT08 and 54 picks. For applications with high requirements for milling volume, e.g. complete removal of road surfaces or concrete milling work.	Option	2389515	USD	5,863.00
Milling drum with milling width 400 mm / 15 3/4 in, milling depth max. 210 mm / 8 in, tool spacing 15 mm / 19/32 in, equipped with welded pick holders HT08 with increased service life and 54 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Option	2334038	USD	5,768.00
Adapter for installing a milling drum with FB500 in an FB600 milling drum housing The milling drum remains right-aligned in the milling drum housing, thus maintaining the zero-clearance side on the right during the milling process.	Option	2542993	USD	1,425.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

**Price list****WR 200 XLi****Scope of supply – basic machine**

- Engine: 6-cylinder diesel engine: Mercedes-Benz OM 470 LA
- Power at 1,900 r.p.m.: 308 kW / 412 HP / 418 PS
- Maximum power at 1,700 r.p.m.: 320 kW / 429 HP / 435 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 7 ft 10 in / 2400 mm
- Theoretical milling depth: 1 ft 8 in / 500 mm

**STANDARD EQUIPMENT**

- Basic machine with engine
- Machine chassis with integrated water tank and free visibility onto the right milled edge
- The right wheels are for working right up to the edges within the milling width
- Diesel engine power controller for optimum milling and mixing results
- Engine cooling system with temperature-controlled fan speed
- Air system with compressor max. 116 psi / 8 bar (not suitable for filling the S-Pack!)
- Lockable, engine cowling with integrated sound insulation package
- Mechanical milling drum drive via a drive belt with automatic belt tensioner
- Variable cutting speed by combination of 3 selectable engine speeds and 3 adjustable drive belt pulley arrangements to achieve optimum working results
- Depending on the working direction possible synchronous rotation or counterrotating mode
- Hydraulic adjustable rotor plate front
- Hydraulically adjustable scraper plates behind the drum
- Infinitely variable working depth setting by lowering or raising of the complete milling drum
- Automatic mixing space adaptation to the particular working depth (larger mixing space with lower working depth)
- Power-controlled lowering speed of the milling drum in starting mode

**MACHINE CONTROL AND LEVELLING SYSTEM**

- Multi-function control color display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Programmable automatic system for initiating and completing the milling process at the particular working depth
- Automated features relieving the operator of a part of his workload

**OPERATOR'S PLATFORM**

- Comfortable, high-quality cabin with flexible mountings, with roof hatch and individually adjustable heating

- Ergonomic, air-cushioned operator's seat
- Roll-over protection system (ROPS and FOPS) integrated in the cab frame
- Large windows with optimum visibility of the particular working area and integrated window wipers
- Recirculating and fresh air filters can be changed without tools
- Various shelves and storage compartments as well as 12 V and 24 V sockets
- In order to provide an ideal view over the zero edge, the operator's cabin can be shifted over the right-hand side of the machine.
- Rotation of the operator's platform through 90° offers optimum adaptation to the particular working situation
- Individually adjustable control panel with color display
- Reversing camera with graphical reversing assistant
- Mirrors on right and left in the the front area of the machine
- Working lights integrated in the cab roof

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Infinitely adjustable, hydraulic all-wheel drive
- Four-way penduluming of the lifting columns to compensate for unevennesses in the ground
- Electrohydraulic, light all-wheel steering, with the "crab", "cornering" or "straight ahead" steering types

#### **MISCELLANEOUS**

- "Welcome-and-go-home light" function with LED lighting in the ladder area
- Extensive safety package with 3 EMERGENCY STOP switches
- Comprehensive toolkit in lockable toolbox
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 463,899.00**

Mandatory Options				
Milling drums / milling units				
Milling and mixing rotor with working width 2400 mm / 7 ft / 10 in, working depth max. 500 mm / 1 ft 7 in, tool spacing 20 mm / 25/32 in, equipped with welded holder system HT5 and 170 picks with shank diameter D20 with exchangeable edge ring segments. For a wide range of applications in soil stabilization and cold recycling.	Standard	2417611	USD	0.00
DURAFORCE milling and mixing rotor with working width 2400 mm (7 ft 10 in), working depth max. 510 mm, tool spacing 20 mm, equipped with quick-change toolholder system HT22 and 170 RS picks with shank diameter D20 with exchangeable edge ring segments. For a wide range of applications in soil stabilization and cold recycling.	Option	2314431	USD	18,864.00
Spraying unit				
Machine without spraying system. The existing drum housing openings are locked by cover strips.	Standard	2418106	USD	0.00
A spraying system for adding water or bitumen emulsion, with eccentric auger pump (max. 211 gal/min / 800 l/min), flow-through meter and a spray bar with 16 nozzles. The spray bar has a special, automatically operating nozzle cleaning function. The spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck.	Option	2494989	USD	32,639.00
System only suitable for the addition of large quantities of water in the soil stabilization process. A spraying system for the addition of water (max. 475 gal/min / 1800 l/min) with centrifugal pump, hydraulically operated shut-off device, flow meter and spraying beam with 16 nozzles. The spraying width can be set individually. The quantities added are controlled by a microprocessor. The effective control range is between 400 and 1800 l/ min. Straightforward operation on a color display. Including a push bar for pushing a tanker vehicle. (FB2400)	Option	2494986	USD	30,346.00
Paint				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2418129	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2418132	USD	1,900.00
Technical documentation				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
Service documentation				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00

<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 8 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 2 rotary beacons.	<b>Standard</b>	<b>2184631</b>	<b>USD</b>	<b>0.00</b>
Powerful LED / halogen lighting system 24 V. Consisting of 6 additional LED working lights and 2 additional halogen working lights with magnetic flux for optimum illumination of the working area. Also, the 6 standard halogen working lights on the cabin roof are replaced by 6 LED working lights. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 2 LED patrol lights.	<b>Option</b>	<b>2184632</b>	<b>USD</b>	<b>3,339.00</b>
<b>Equipment Options</b>				
<b>Equipment in cabin</b>				
Air-conditioner integrated in the cabin roof with automatic air conditioning, infinitely variable fan and recirculating air filters that can be changed without tools.	<b>Standard</b>	<b>2297350</b>	<b>USD</b>	<b>0.00</b>
Radio system with two speakers and antenna - radio with CD/MP3/USB/Bluetooth	<b>Standard</b>	<b>2184420</b>	<b>USD</b>	<b>0.00</b>
<b>Lateral slope control</b>				
Expansion of leveling system with electronic cross-slope sensor. Ideal, for example for aligning the machine in a defined lateral tilt on a one-sided reference.	<b>Standard</b>	<b>2417051</b>	<b>USD</b>	<b>0.00</b>
<b>Water system</b>				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min at 150 bar pressure. Ideal for daily cleaning of the machine.	<b>Option</b>	<b>2223766</b>	<b>USD</b>	<b>3,515.00</b>
<b>Other devices</b>				
Battery-operated hydraulic unit for milling drum rotation device and hydraulic pick extractor drift as well as for auxiliary drive.	<b>Option</b>	<b>2302704</b>	<b>USD</b>	<b>2,443.00</b>

<b>Pick changing aids</b>				
Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in conjunction with the "electric hydraulic unit" option.	Option	2326246	USD	2,660.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	Option	60604	USD	394.00
Additional, lockable storage compartment for 8 pick containers, mounted on the left side of the machine.	Option	2658350	USD	1,316.00
<b>Camera system</b>				
Monitor system with 3 cameras and 7" color display, in addition to the reversing camera of the standard equipment. The 2nd camera is directed towards the area in front of the milling drum housing and the 3rd towards the rear rotor plate. The 4th camera permits good visibility of the left side of the machine. The camera images are displayed on the monitor in the operator's platform. For model without spraying system.	Option	2320392	USD	5,904.00
Monitor system with 3 cameras and 7" color display, in addition to the reversing camera of the standard equipment. The 2nd camera is directed towards the area in front of the milling drum housing and the 3rd towards the rear rotor plate. The 4th camera permits good visibility of the left side of the machine. The camera images are displayed on the monitor in the operator's platform. For model with spraying system.	Option	2505868	USD	5,904.00
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	Option	2657943	USD	380.00
<b>Miscellaneous</b>				
Additional push bar 9 ft 11 in / 3.00 m - for a second tank truck. Drawbar/ push-bar eye 1x inner diameter 1x inner diameter = 1.57 in / 40 mm and 1x inner diameter = 1.97 in / 50 mm.	Option	2269834	USD	611.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	68.00

<sup>1</sup>Option must be ordered from headquarters.

## Price list

# WR 240i

### Scope of supply – basic machine

- Engine: 6-cylinder diesel engine: Cummins QSX 15
- Maximum power at 1,900 r.p.m.: 455 kW / 610 HP / 618 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 7 ft 10 in / 2400 mm
- Theoretical milling depth: 1 ft 8 in / 510 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with integrated water tank and free visibility onto the right milled edge
- The right wheels are for working right up to the edges within the milling width
- Diesel engine power controller for optimum milling and mixing results
- Engine cooling system with temperature-controlled fan speed
- Air system with compressor max. 116 psi / 8 bar (not suitable for filling the S-Pack!)
- Lockable, engine cowl with integrated sound insulation package
- Mechanical milling drum drive via a drive belt with automatic belt tensioner
- Variable cutting speed by combination of 3 selectable engine speeds and 3 adjustable drive belt pulley arrangements to achieve optimum working results
- Depending on the working direction possible synchronous rotation or counterrotating mode
- Hydraulic adjustable rotor plate front
- Hydraulically adjustable scraper plates behind the drum
- Infinitely variable working depth setting by lowering or raising of the complete milling drum
- Automatic mixing space adaptation to the particular working depth (larger mixing space with lower working depth)
- Power-controlled lowering speed of the milling drum in starting mode

### MACHINE CONTROL AND LEVELLING SYSTEM

- Multi-function control color display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Programmable automatic system for initiating and completing the milling process at the particular working depth
- Automated features relieving the operator of a part of his workload

### OPERATOR'S PLATFORM

- Comfortable, high-quality cabin with flexible mountings, with roof hatch and individually adjustable heating
- Ergonomic, air-cushioned operator's seat

- Roll-over protection system (ROPS and FOPS) integrated in the cab frame
- Large windows with optimum visibility of the particular working area and integrated window wipers
- Recirculating and fresh air filters can be changed without tools
- Various shelves and storage compartments as well as 12 V and 24 V sockets
- In order to provide an ideal view over the zero edge, the operator's cabin can be shifted over the right-hand side of the machine.
- Rotation of the operator's platform through 90° offers optimum adaptation to the particular working situation
- Individually adjustable control panel with color display
- Reversing camera with graphical reversing assistant
- Mirrors on right and left in the the front area of the machine
- Working lights integrated in the cab roof
- Folding ladder/footstep to the operator's platform

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Infinitely adjustable, hydraulic all-wheel drive
- Four-way penduluming of the lifting columns to compensate for unevennesses in the ground
- Electrohydraulic, light all-wheel steering, with the "crab", "cornering" or "straight ahead" steering types

#### **MISCELLANEOUS**

- "Welcome-and-go-home light" function with LED lighting in the ladder area
- Extensive safety package with 3 EMERGENCY STOP switches
- Comprehensive toolkit in lockable toolbox
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 725,909.00**

Mandatory Options				
Milling drums / milling units				
DURAFORCE milling and mixing rotor with working width 2400 mm (7 ft 10 in), working depth max. 510 mm, tool spacing 20 mm, equipped with quick-change toolholder system HT22 and 170 RS picks with shank diameter D20 with exchangeable edge ring segments. For a wide range of applications in soil stabilization and cold recycling.	Standard	2314431	USD	0.00
Spraying unit				
Machine without spraying system. The existing drum housing openings are locked by cover strips.	Standard	2182574	USD	0.00
A spraying system for adding water or bitumen emulsion, with eccentric auger pump (max. 211 gal/min / 800 l/min), flow-through meter and a spray bar with 12 nozzles. The spray bar has a special, automatically operating nozzle cleaning function. The spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck. (FB2400)	Option	2494991	USD	37,959.00
Two spraying systems for separate addition of water and bitumen emulsion, with eccentric auger pumps (each max. 211 gal/min / 800 l/min), flow-through meters and spray bars with 12 nozzles each. The spray bars have a special, automatically operating nozzle cleaning function. Furthermore, the spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck. (FB2400)	Option	2494992	USD	73,218.00
System suitable for the precise addition of water, emulsion and foamed bitumen. Two spraying systems for separate addition of water and foamed bitumen, with an eccentric auger pump for adding water (max. 211 gal/min / 800 l/min), flow-through meter and a spray bar with 12 nozzles as well as electrically heated bitumen spraying system consisting of geared pump (max. 1102 lb/min / 500 kg/min), bitumen filter, flow-through meter, process water pump for foamed bitumen manufacture and a spray bar with 12 nozzles. Both spray bars have a special, automatically operating nozzle cleaning function. Furthermore, the spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck. (FB2400)	Option	2494993	USD	185,128.00

System only suitable for the addition of large quantities of water in the soil stabilisation process. A spraying system for the addition of water (max. 475 gal/min / 1800 l/min) with centrifugal pump, hydraulically operated shut-off device, flow meter and spraying beam with 12 nozzles. The spraying width can be set individually. The quantities added are controlled by a microprocessor. The effective control range is between 400 and 1800 l/ min. Straightforward operation on a color display. Including a push bar for pushing a tanker vehicle. (FB2400)	Option	2494987	USD	35,299.00
<b>Binder spreader</b>				
Model without binder spreader device	Standard	2406146	USD	0.00
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2441058	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2441059	USD	2,199.00
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 8 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 2 rotary beacons.	Standard	2184631	USD	0.00
<b>Exhaust air filter</b>				
Model without waste air filtering. Only for machines without integrated binder spreader (S-Pack).	Standard	2418221	USD	0.00

Equipment Options				
Equipment in cabin				
Air-conditioner integrated in the cabin roof with automatic air conditioning, infinitely variable fan and recirculating air filters that can be changed without tools.	Standard	2184409	USD	0.00
Radio system with two speakers and antenna - radio with CD/MP3/USB/Bluetooth	Standard	2184420	USD	0.00
Control for binder addition				
Equipment of the machine with an external dosing control unit. The additional operating display can be attached at the bottom left or right on the machine. For specific setting of important dosing parameters of the spraying strips and/or the S-pack.	Option	2418222	USD	3,827.00
Lateral slope control				
Expansion of leveling system with electronic cross-slope sensor. Ideal, for example for aligning the machine in a defined lateral tilt on a one-sided reference.	Standard	2417051	USD	0.00
Water system				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min at 150 bar pressure. Ideal for daily cleaning of the machine.	Option	2184414	USD	4,099.00
Other devices				
Battery-operated hydraulic unit for milling drum rotation device and hydraulic pick extractor drift as well as for auxiliary drive.	Option	2201333	USD	2,850.00
Pick changing aids				
Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in conjunction with the "electric hydraulic unit" option.	Standard	2184416	USD	0.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	Option	60604	USD	461.00
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	Option	2210777	USD	3,461.00
Additional, lockable storage compartment for 8 pick containers, mounted on the left side of the machine.	Option	2658085	USD	1,859.00
Camera system				

Monitor system with 3 cameras and 7" color display, in addition to the reversing camera of the standard equipment. The 2nd camera is directed towards the area in front of the milling drum housing and the 3rd towards the rear rotor plate. The 4th camera permits good visibility of the left side of the machine. The camera images are displayed on the monitor in the operator's platform. For model without spraying system.	<b>Standard</b>	<b>2184412</b>	<b>USD</b>	<b>0.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2657943</b>	<b>USD</b>	<b>434.00</b>
<b>Miscellaneous</b>				
Additional push bar 9 ft 11 in / 3.00 m - for a second tank truck. Drawbar/ push-bar eye 1x inner diameter 1x inner diameter = 1.57 in / 40 mm and 1x inner diameter = 1.97 in / 50 mm.	<b>Option</b>	<b>2269834</b>	<b>USD</b>	<b>611.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list WR 250i

### Scope of supply – basic machine

- Engine: 6-cylinder diesel engine: CATERPILLAR C18 ATAAC
- Rated power at 1,900 r.p.m.: 563 kW / 755 HP / 766 PS
- Exhaust standard: EU not regulated / US Tier 4
- Standard milling width: 7 ft 10 in / 2400 mm
- Theoretical milling depth: 1 ft 10 in / 560 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with integrated water tank and free visibility onto the right milled edge
- The right wheels are for working right up to the edges within the milling width
- Diesel engine power controller for optimum milling and mixing results
- Engine cooling system with temperature-controlled fan speed
- Air system with compressor max. 116 psi / 8 bar (not suitable for filling the S-Pack!)
- Lockable, engine cowling with integrated sound insulation package
- Mechanical milling drum drive via a drive belt with automatic belt tensioner
- Variable cutting speed by a combination of 3 selectable motor speeds, 2 variable drive belt pulley arrangements and one milling drum gearbox with 2-gear stages for achieving optimum working results
- Depending on the working direction possible synchronous rotation or counterrotating mode
- Hydraulic adjustable rotor plate front
- Hydraulically adjustable scraper plates behind the drum
- Infinitely variable working depth setting by lowering or raising of the complete milling drum
- Automatic mixing space adaptation to the particular working depth (larger mixing space with lower working depth)
- Milling drum rotation device with hydraulic milling drum drive for slowly turning the milling drum in the pick change
- Power-controlled lowering speed of the milling drum in starting mode

### MACHINE CONTROL AND LEVELLING SYSTEM

- Multi-function control color display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Programmable automatic system for initiating and completing the milling process at the particular working depth
- Automated features relieving the operator of a part of his workload

### OPERATOR'S PLATFORM

- Comfortable, high-quality cabin with flexible mountings, with roof hatch and individually adjustable heating
- Ergonomic, air-cushioned operator's seat
- Roll-over protection system (ROPS and FOPS) integrated in the cab frame
- Large windows with optimum visibility of the particular working area and integrated window wipers
- Recirculating and fresh air filters can be changed without tools
- Various shelves and storage compartments as well as 12 V and 24 V sockets
- In order to provide an ideal view over the zero edge, the operator's cabin can be shifted over the right-hand side of the machine.
- Rotation of the operator's platform through 90° offers optimum adaptation to the particular working situation
- Individually adjustable control panel with color display

- Reversing camera with graphical reversing assistant
- Mirrors on right and left in the the front area of the machine
- Working lights integrated in the cab roof
- Folding ladder/footstep to the operator's platform

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Infinitely adjustable, hydraulic all-wheel drive
- Four-way penduluming of the lifting columns to compensate for unevennesses in the ground
- Electrohydraulic, light all-wheel steering, with the "crab", "cornering" or "straight ahead" steering types

#### **MISCELLANEOUS**

- "Welcome-and-go-home light" function with LED lighting in the ladder area
- Extensive safety package with 3 EMERGENCY STOP switches
- Comprehensive toolkit in lockable toolbox
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 890,829.00**

Mandatory Options				
<b>Milling drum housing</b>				
Extremely wear-resistant FB2400 (7 ft 10 in) milling drum housing without milling drum. For pulverisation of asphalt pavement and abrasive material.	Standard	2540058	USD	0.00
<b>Milling drums / milling units</b>				
DURAFORCE milling and mixing rotor with working width 2400 mm (7ft 10 in), working depth max. 560 mm (1ft 10 in), tool spacing 30 mm x 2, equipped with quick-change toolholder system HT22 and 208 picks with shank diameter D20 with exchangeable edge ring segments. For a wide range of applications in soil stabilization and cold recycling.	Standard	2314515	USD	0.00
<b>Spraying unit</b>				
Machine without spraying system. The existing drum housing openings are locked by cover strips.	Standard	2182574	USD	0.00
A spraying system for adding water or bitumen emulsion, with eccentric auger pump (max. 211 gal/min / 800 l/min), flow-through meter and a spray bar with 12 nozzles. The spray bar has a special, automatically operating nozzle cleaning function. The spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck. (FB2400)	Option	2494991	USD	37,959.00
Two spraying systems for separate addition of water and bitumen emulsion, with eccentric auger pumps (each max. 211 gal/min / 800 l/min), flow-through meters and spray bars with 12 nozzles each. The spray bars have a special, automatically operating nozzle cleaning function. Furthermore, the spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck. (FB2400)	Option	2494992	USD	73,218.00
System suitable for the precise addition of water, emulsion and foamed bitumen. Two spraying systems for separate addition of water and foamed bitumen, with an eccentric auger pump for adding water (max. 211 gal/min / 800 l/min), flow-through meter and a spray bar with 12 nozzles as well as electrically heated bitumen spraying system consisting of geared pump (max. 1102 lb/min / 500 kg/min), bitumen filter, flow-through meter, process water pump for foamed bitumen manufacture and a spray bar with 12 nozzles. Both spray bars have a special, automatically operating nozzle cleaning function. Furthermore, the spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck. (FB2400)	Option	2494993	USD	185,128.00
System only suitable for the addition of large quantities of water in the soil stabilisation process. A spraying system for the addition of water (max. 475 gal/min / 1800 l/min) with centrifugal pump, hydraulically operated shut-off device, flow meter and spraying beam with 12 nozzles. The spraying width can be set individually. The quantities added are controlled by a microprocessor. The effective control range is between 400 and 1800 l/ min. Straightforward operation on a color display. Including a push bar for pushing a tanker vehicle. (FB2400)	Option	2494987	USD	35,299.00

<b>Binder spreader</b>				
Model without binder spreader device	<b>Standard</b>	<b>2184406</b>	<b>USD</b>	<b>0.00</b>
Integrated spreading device S-Pack for dust-free discharge of binder in front of the milling and mixing rotor. Container volume 194 ft <sup>3</sup> / 5.5 m <sup>3</sup> (effectively fillable to 159 ft <sup>3</sup> / 4.5 m <sup>3</sup> ). Advance-dependent dosing of the spreading quantity from 0,3 lb/ft <sup>2</sup> to 8,2 lb/ft <sup>2</sup> / 1.5 to 40 kg/m <sup>2</sup> . The spreading width can be divided into three segments. Operation is perfectly integrated into the machine control display.	<b>Option</b>	<b>2375512</b>	<b>USD</b>	<b>143,464.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2470007</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2470008</b>	<b>USD</b>	<b>2,199.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 8 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 2 rotary beacons.	<b>Standard</b>	<b>2184631</b>	<b>USD</b>	<b>0.00</b>
Powerful LED / halogen lighting system 24 V. Consisting of 6 additional LED working lights and 2 additional halogen working lights with magnetic flux for optimum illumination of the working area. Also, the 6 standard halogen working lights on the cabin roof are replaced by 6 LED working lights. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 2 LED patrol lights.	<b>Option</b>	<b>2184632</b>	<b>USD</b>	<b>3,895.00</b>
<b>Exhaust air filter</b>				
Model without waste air filtering. Only for machines without integrated binder spreader (S-Pack).	<b>Standard</b>	<b>2418221</b>	<b>USD</b>	<b>0.00</b>

Equipment Options				
Equipment in cabin				
Air-conditioner integrated in the cabin roof with automatic air conditioning, infinitely variable fan and recirculating air filters that can be changed without tools.	Standard	2184409	USD	0.00
Radio system with two speakers and antenna - radio with CD/MP3/USB/Bluetooth	Standard	2184420	USD	0.00
Lateral slope control				
Expansion of leveling system with electronic cross-slope sensor. Ideal, for example for aligning the machine in a defined lateral tilt on a one-sided reference.	Standard	2417051	USD	0.00
Water system				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min at 150 bar pressure. Ideal for daily cleaning of the machine.	Option	2184414	USD	4,099.00
Water system				
Additional water tank with a capacity of 250 gals / 950 liters, for holding large quantities of water for foamed bitumen manufacture.	Option	2185820	USD	8,509.00
Other devices				
Battery-operated hydraulic unit for milling drum rotation device and hydraulic pick extractor drift as well as for auxiliary drive.	Option	2201333	USD	2,850.00
Pick changing aids				
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	Standard	60604	USD	0.00
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	Option	2210777	USD	3,461.00
Additional, lockable storage compartment for 8 pick containers, mounted on the left side of the machine.	Option	2658290	USD	1,534.00
Camera system				
Monitor system with 3 cameras and 7" color display, in addition to the reversing camera of the standard equipment. The 2nd camera is directed towards the area in front of the milling drum housing and the 3rd towards the rear rotor plate. The 4th camera permits good visibility of the left side of the machine. The camera images are displayed on the monitor in the operator's platform. For model without spraying system.	Standard	2184412	USD	0.00
Other devices				
License plate holder with LED lighting to comply with country-specific regulations.	Option	2657943	USD	434.00
Miscellaneous				
Connection pipe for the through-line of the suspension to the spray bar. In conjunction with the suction hose option, this means working with the WM1000 is possible. Option only possible in conjunction with: ESL 1-way, dual ESL or ESL foamed bitumen.	Option	2223550	USD	3,067.00
Documentation				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

\*Option must be ordered from headquarters.

Date: 3/6/2019

## Price list

# WS 150

### Scope of supply – basic machine

- Standard working width: 4 ft 9 in / 1500 mm
- Theoretical working depth: 1 ft 8 in / 500 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Stabilizer for mounting on tractors with rear three-point linkage, ISO 730-1 category 3 (cat. III) and category 4 (cat. IV)
- The working depth is set using the tractor's rear power lift
- The rear rotor plate is adjusted hydraulically from the tractor
- The rotor plate is additionally fitted with a levelling blade with spring preload adjustment
- The stone guard is adjusted hydraulically from the tractor

### DRIVE

- Mechanical drive via the tractor's driveshaft (driveshaft speed 1,000 rpm), bevel gearbox, two four-rib high-power V-belts with automatic belt tensioners and two spur gearboxes

### MISCELLANEOUS

- CE Declaration of Conformity

List price ex subsidiary Wirtgen America

USD 117,067.00

Mandatory Options				
Milling drum housing				
Movable side plates on the drum housing that cover the milling and mixing rotor. During operation, the milling unit is kept at the pre-set milling depth by the side plates. In the process, the tractor's three-point connection is in a floating position and the machine moves on the skids. The skids are roughly 7 in / 170 mm wide which means they comply with the corresponding permissible transport widths. The milling depth is limited to the desired level with the help of mechanical stops.	Standard	2218261	USD	0.00
Milling drums / milling units				
Milling and mixing rotor with working width 1500 mm / 4 ft / 9 in, working depth max. 500 mm / 1 ft 7 in, tool spacing 40 mm / 1 37/64 in, equipped with quick-change toolholder system HT22 and 82 picks with shank diameter D20. For a wide range of applications in soil stabilization and cold recycling.	Standard	2659046	USD	0.00
Paint				
Painting in cream RAL 9001 with orange stripes.	Standard	2391102	USD	0.00
Single-color special paint. Cream color is replaced by a special color (RAL acc. to customer request).	Option	2539872	USD	746.00
Technical documentation				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
Service documentation				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
Warranty				
Standard warranty 12 months	Standard	2112212	USD	0.00
Drive adaptations				
Splined shaft on bevel gearbox with 20 external toothing, 20 teeth, for connection of the drive shaft on the WS220/WS250. Required for coupling the stabiliser to the John Deere tractor 8320R.	Standard	2047307	USD	0.00
Trailer drawbar				
Lifting tackle for mounting the stabilizer on John-Deere series 8000 tractor vehicles with rear three-point mounting ISO 730-1 category 4 (CAT IV), including ball sleeves and spacer washers CAT IV for equipment pin 37, including hydraulic top link in reinforced version, with arrester hook CAT IV, yoke D45 and integrated load-holding valve. The length and pulling force of the top link are optimized for the attachment of the add-on stabilizer.	Standard	2136304	USD	0.00

Equipment Options				
Additional spraying strip				
Water spraying system FB1500 (4 ft 9 in), with 6 spray nozzles to spray water into the milling and mixing process. Distributor pipe for connecting the external water supply with shut-off valves to the individual nozzles	Option	2539866	USD	2,253.00
Leveling				
Digital milling depth display with an ultrasonic sensor, right or left mountable, the milling depth display is shown by one additional display in the cab.	Option	2123664	USD	4,031.00
Digital milling depth display, with two ultrasonic sensors right and left mounted, the milling depth display is shown by an additional display in the operator's cabin, changeover for the right or left side.	Option	2123665	USD	5,659.00
Other devices				
Drive shaft P600 1¾" for connecting the tractor-towed stabilizer to the tractor. Wirtgen recommends using this drive shaft as it offers great freedom of movement. Both ends of the propshaft with 20-way internal gearing. CAUTION: The drive shaft must be shortened to the length of the corresponding tractor vehicle/stabiliser combination before first use. Authorised when using a stabiliser on tractor vehicles up to a maximum of 280 kW/376 HP/381 PS.	Standard	2539795	USD	0.00
Drive shaft P700 1¾" for connecting the tractor-towed stabilizer to the tractor. This drive shaft is equipped with larger spherical bearings but offers less freedom of movement and should only be supplied after prior consultation. Both ends of the propshaft with 20-way internal gearing. CAUTION: The drive shaft must be shortened to the length of the corresponding tractor vehicle/stabiliser combination before first use. Authorised when using a stabiliser on tractor vehicles up to a maximum of 280 kW/376 HP/381 PS.	Option	2539797	USD	3,393.00
Pick changing aids				
Pneumatic hammer with two pick extractor and inserter tools each as well as 7.00 m hose.	Option	2123666	USD	448.00
Documentation				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00
Date: 3/6/2019

## Price list

### W 200 Fi

#### Scope of supply – basic machine

- 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSX 15
- Maximum power at 1900 r.p.m.: 455 kW / 610 HP / 619 PS
- Exhaust standard: EU Stage 5 / US Tier 4f
- Standard milling width: 6 ft 7 in / 2000 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

#### STANDARD EQUIPMENT

- Basic machine with engine
- Machine frame featuring a single wasp waist at the rear right, and a dual wasp waist at the front
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Two cooling fans to minimize power consumption of the cooling system

#### MILLING DRUM HOUSING

- Adjustment of material depressor contact pressure via the control panel or automatically via the MILL ASSIST feature to reduce chunk formation
- Electrical adjustment of scraper contact pressure via the control panel
- Automatically controlled locking feature of scraper
- Single-piece water spray bar in the milling drum unit for reliable pick cooling and to prevent dust development
- Automatic control of the water quantity via the MILL ASSIST feature
- Height adjustment stroke increased by 150 mm to facilitate pick replacement and the exchange of milling drum units
- Pre-fitting to allow the quick exchange of milling drum units.
- Hydraulically lifting side plates, clearance right 450 mm (1 ft 6 in), clearance left 330 mm (1 ft 1 in)

#### LOADING OF MILLED MATERIAL

- Increased conveyor slewing angles of 65° each to the left and right
- Discharge conveyor with adjustable conveying speed
- Boost feature for a temporary increase of the belt speed and conveying performance of the discharge conveyor by 20%
- Water spray system in the primary conveyor
- Larger conveyor pump for a constant belt speed even at a low engine speed of 1300 rpm

#### MACHINE CONTROL AND LEVELLING SYSTEM

- User-friendly control panel including 7" color screen
- LEVEL PRO ACTIVE leveling system with numerous automated and complementary features relieving the operator of a part of his workload
- LEVEL PRO ACTIVE - automatic height control in transport mode
- LEVEL PRO ACTIVE - ramp milling and auto-start feature for the second milling cut
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- MILL ASSIST assistance system for automatic adjustment of the milling drum speed in accordance with the main area of application and the parameters selected in terms of engine load, advance rate, milling volume and quality of the milling pattern.
- Comprehensive machine diagnostics on the control panel including, for example, a diagnostic system for the CAN bus
- Voltmeter integrated into the control panel for voltage measurement in the event of a malfunction
- Two control panels for operating functions performed by ground crew

#### OPERATOR'S PLATFORM

- Convenient access to the operator's platform, right and left
- Anti-vibration mounted operator's platform across the full width of the machine including fold-out railing, right
- Electrical control cabinet on the operator's platform for optimum accessibility and fast troubleshooting
- Two mirrors at the front, one mirror at the rear of the machine

#### CHASSIS AND HEIGHT ADJUSTMENT

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- High travel speed of up to 100 m / min at low engine speeds (1,350 rpm), reduced diesel consumption and low noise emissions.
- Lifting speed of the height adjustment feature increased by 60%

**MISCELLANEOUS**

- "Welcome" and "Go home" lights feature in the area of the operator's platform and access
- Large storage compartment on the machine for pick containers
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Good accessibility to all maintenance points on the engine station
- Pneumatic hammer with pick extractor/insertor
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America****USD****677,255.00****Mandatory Options****Milling drum housing**

Wear-resistant milling drum housing FB2000 (6 ft 7 in) without milling drum	<b>Option</b>	<b>2549112</b>	<b>USD</b>	<b>-4,126.00</b>
Wear-resistant milling drum housing FB2200 (7 ft 3 in) without milling drum	<b>Standard</b>	<b>2598404</b>	<b>USD</b>	<b>0.00</b>

**Milling drums / milling units**

Milling drum with milling width 2000 mm / 6 ft / 7 in, milling depth max. 330 mm / 1 ft 1 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 162 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	<b>Option</b>	<b>2319406</b>	<b>USD</b>	<b>-1,900.00</b>
Milling drum with milling width 2000 mm / 6 ft / 7 in, milling depth max. 330 mm / 1 ft 1 in, tool spacing 18 mm / 45/64 in, equipped with quick-change toolholder system HT22 and 148 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	<b>Option</b>	<b>2293275</b>	<b>USD</b>	<b>-3,501.00</b>
Milling drum with milling width 2200 mm (7 ft 3 in), milling depth max. 330 mm / 1 ft 1 in, tool spacing 18 mm / 45/64 in, equipped with quick-change toolholder system HT22 and 159 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	<b>Standard</b>	<b>2305117</b>	<b>USD</b>	<b>0.00</b>

**Operator's platform**

Flexibly mounted operator's platform with clear control panels and a simple stand-up seat.	<b>Standard</b>	<b>2600317</b>	<b>USD</b>	<b>0.00</b>
--	-----------------	----------------	------------	-------------

**Material transport**

Robust 7,900 mm (25 ft 11 in) long discharge conveyor with conveyor belt system 850 mm (2 ft 9 in) and hydraulic folding device for shortening the transport length	<b>Standard</b>	<b>2598432</b>	<b>USD</b>	<b>0.00</b>

<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
<b>Machine lighting</b>				
Standard lighting system consisting of 18 LED working lights for optimum illumination of the working area. The light output is approx. 20,600 lumens in total.	Standard	2598442	USD	0.00
<b>Additional devices</b>				
Battery-operated electro-hydraulic unit for milling drum rotation device and hydraulic pick extractor drift. Weather canopy and engine cowling can be lifted with the hydraulic unit. Moreover, emergency functions such as lifting the chassis units, releasing the parking brake and other cylinder functions can also be operated when the engine is switched off.	Standard	2600320	USD	0.00
<b>Equipment Options</b>				
<b>Additional weight</b>				
Two-piece additional weight at the rear of the machine totaling 1,600 kg (3,527 lbs) which enables the machine to be individually ballasted. The individual weights of 850 kg and 750 kg can be easily and quickly inserted and fastened to the rear of the machine.	Option	2598492	USD	6,460.00
<b>Additional weight</b>				
Storage compartment on both the rear track units for 8 pick containers	Standard	2598662	USD	0.00
<b>Milling drum assembly options</b>				
Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in this case.	Standard	2598658	USD	0.00
Two wear protection rollers to be attached to the side plates (right or left). The rollers protect asphalt, kerbstones and other surfaces from damage and prevent excessive wear on the side plates.	Option	2662818	USD	760.00
<b>Options for belt conveyor</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	Standard	2598495	USD	0.00
Support device for putting the discharge conveyor on the low-loader.	Standard	60603	USD	0.00
<b>Additional control unit LEVEL PRO</b>				
Additional control panel 5" for controlling the leveling system LEVEL PRO ACTIVE. Up to two additional control panels can be arranged in the rear lower area of the machines.	Standard	2598631	USD	0.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with one hydraulic cylinder sensor for scanning a reference surface to the right of the milling drum.	Standard	2598629	USD	0.00
Extension of the LEVEL PRO ACTIVE leveling system with two hydraulic cylinder sensors for scanning a reference surface to the right and left of the milling drum.	Option	2598630	USD	5,401.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in an appropriate transport box.	Option	2598636	USD	4,954.00
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right and left. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in an appropriate transport box.	Option	2598641	USD	9,622.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE levelling system with pre-fitting for 3-D milling with machines without a weather canopy. The pre-fitting consists of robust and exactly positioned mounting adapters for a 3-D system as well as sensor sockets for connecting the LEVEL PRO ACTIVE.	Option	2662822	USD	6,949.00
<b>Camera system</b>				
2-fold camera system with a camera on the loading conveyor and a camera with a view of the rear area. The camera images are displayed on the standard 7" control panel on the operator's platform.	Standard	2598677	USD	0.00
<b>Other devices</b>				
Electrical diesel suction and pressure pump with 7.50 m (24 ft 7 in) suction hose. The machine can be refuelled with up to 50 l/min (13 gal/min) from external diesel tanks.	Option	2598663	USD	896.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00
<sup>1</sup> Option must be ordered from headquarters. Date: 8/23/2019				

## Price list

### W 207 Fi

#### Scope of supply – basic machine

- 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSX 15
- Maximum power at 1900 r.p.m.: 470 kW / 630 HP / 639 PS
- Exhaust standard: EU Stage 5 / US Tier 4f
- Standard milling width: 6 ft 7 in / 2000 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

#### STANDARD EQUIPMENT

- Basic machine with engine
- Machine frame featuring a single wasp waist at the rear right, and a dual wasp waist at the front
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Two cooling fans to minimize power consumption of the cooling system

#### MILLING DRUM HOUSING

- Adjustment of material depressor contact pressure via the control panel or automatically via the MILL ASSIST feature to reduce chunk formation
- Electrical adjustment of scraper contact pressure via the control panel
- Automatically controlled locking feature of scraper
- Single-piece water spray bar in the milling drum unit for reliable pick cooling and to prevent dust development
- Automatic control of the water quantity via the MILL ASSIST feature
- Height adjustment stroke increased by 150 mm to facilitate pick replacement and the exchange of milling drum units
- Pre-fitting to allow the quick exchange of milling drum units.
- Hydraulically lifting side plates, clearance right 450 mm (1 ft 6 in), clearance left 330 mm (1 ft 1 in)

#### LOADING OF MILLED MATERIAL

- Increased conveyor slewing angles of 65° each to the left and right
- Discharge conveyor with adjustable conveying speed
- Boost feature for a temporary increase of the belt speed and conveying performance of the discharge conveyor by 20%
- Water spray system in the primary conveyor
- Larger conveyor pump for a constant belt speed even at a low engine speed of 1300 rpm

#### MACHINE CONTROL AND LEVELLING SYSTEM

- User-friendly control panel including 7" color screen
- LEVEL PRO ACTIVE leveling system with numerous automated and complementary features relieving the operator of a part of his workload
- LEVEL PRO ACTIVE - automatic height control in transport mode
- LEVEL PRO ACTIVE - ramp milling and auto-start feature for the second milling cut
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- MILL ASSIST assistance system for automatic adjustment of the milling drum speed in accordance with the main area of application and the parameters selected in terms of engine load, advance rate, milling volume and quality of the milling pattern.
- Comprehensive machine diagnostics on the control panel including, for example, a diagnostic system for the CAN bus
- Voltmeter integrated into the control panel for voltage measurement in the event of a malfunction
- Two control panels for operating functions performed by ground crew

#### OPERATOR'S PLATFORM

- Convenient access to the operator's platform, right and left
- Anti-vibration mounted operator's platform across the full width of the machine including fold-out railing, right
- Electrical control cabinet on the operator's platform for optimum accessibility and fast troubleshooting
- Two mirrors at the front, one mirror at the rear of the machine

#### CHASSIS AND HEIGHT ADJUSTMENT

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- High travel speed of up to 100 m / min at low engine speeds (1,350 rpm), reduced diesel consumption and low noise emissions.
- Lifting speed of the height adjustment feature increased by 60%

**MISCELLANEOUS**

- "Welcome" and "Go home" lights feature in the area of the operator's platform and access
- Large storage compartment on the machine for pick containers
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Good accessibility to all maintenance points on the engine station
- Pneumatic hammer with pick extractor/insertor
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America****USD****744,311.00****Mandatory Options****Milling drum housing**

FB2000 (6 ft 7 in) MCS BASIC quick-change milling drum unit that enables milling drums of the same milling width to be changed particularly quickly.

**Option****2598416****USD****-4,126.00**

FB2200 (7 ft 3 in) MCS BASIC quick-change milling drum unit that enables milling drums of the same milling width to be changed particularly quickly.

**Standard****2598417****USD****0.00****Milling drums / milling units**

Milling drum MCS BASIC with milling width 2000 mm / 6 ft 7 in, milling depth max. 320 mm / 1 ft 0,5 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 162 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.

**Option****2611265****USD****-4,017.00**

Milling drum MCS BASIC with milling width 2200 mm / 7 ft 3 in, milling depth max. 350 mm / 1 ft 2 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 176 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.

**Standard****2611269****USD****0.00**

Milling drum MCS BASIC with milling width 2200 mm / 7 ft 3 in, milling depth max. 330 mm / 1 ft 1 in, tool spacing 18 mm / 45/64 in, equipped with quick-change toolholder system HT22 and 155 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.

**Option****2602602****USD****-1,683.00****Operator's platform**

Flexibly mounted operator's platform with clear control panels and a simple stand-up seat.

**Standard****2600317****USD****0.00**

Flexibly mounted operator's platform with clear control panels and a single stand-up seat. A hydraulically height-adjustable weather protection roof protects the driver from the wind and weather.

**Option****2600319****USD****15,200.00****Material transport**

Robust 7,900 mm (25 ft 11 in) long discharge conveyor with conveyor belt system 850 mm (2 ft 9 in) and hydraulic folding device for shortening the transport length

**Standard****2598432****USD****0.00****Crawler units**

Four track units type B3, 300 mm wide and 1,730 mm long, with extremely wear-resistant, two-piece EPS polyurethane track pads.

**Standard****2663716****USD****0.00****Water tank filling**

Additional water tank filling from the rear of the machine using a stopcock.

**Standard****2549116****USD****0.00**

Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filling pump.

**Option****2598434****USD****3,746.00****Paint**

Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.

**Standard****2668745****USD****0.00**

Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.

**Option****2668746****USD****2,321.00**

<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
The WIRTGEN PERFORMANCE TRACKER WPT is a laser and satellite-supported measuring system for precise milling performance determination for machines with FB2000 or FB2200 without a weather canopy or with an operator's cabin. Two laser scanners measure the actual milling width and milling depth over the distance of the milling path. The milling performance results are automatically sent to the corresponding users via the WITOS interface with precise GPS machine position data and consumption data such as diesel consumption, water consumption, tool consumption and truck loads, in an evaluation and then by e-mail. The milling performance reports that include an image of the milling position can also be used as an allowance report. The usability of WITOS hardware components for the existing mobile radio standard is guaranteed for 3 years from the date of delivery.	Option	2598668	USD	47,066.00
<b>Machine lighting</b>				
Extended lighting system consisting of 21 extremely powerful LED working lights for optimum illumination of the working area. The light output is approx. 37,600 lumens in total.	Standard	2598443	USD	0.00
<b>Additional devices</b>				
Battery-operated electro-hydraulic unit for milling drum rotation device and hydraulic pick extractor drift. Weather canopy and engine cowling can be lifted with the hydraulic unit. Moreover, emergency functions such as lifting the chassis units, releasing the parking brake and other cylinder functions can also be operated when the engine is switched off.	Standard	2600320	USD	0.00
<b>Equipment Options</b>				
<b>Additional weight</b>				
Two-piece additional weight at the rear of the machine totaling 1,600 kg (3,527 lbs) which enables the machine to be individually ballasted. The individual weights of 850 kg and 750 kg can be easily and quickly inserted and fastened to the rear of the machine.	Standard	2598492	USD	0.00
<b>Additional weight</b>				
Large sized storage compartment for 69 pick containers mounted at the rear of the machine instead of the standard storage compartment. The storage compartment is splash-proof and additionally contains a completely sealed area to safely store electronic components such as leveling sensors or tool extractors.	Option	2598494	USD	3,094.00
Storage compartment on both the rear track units for 8 pick containers	Standard	2598662	USD	0.00
<b>Milling drum assembly options</b>				
Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in this case.	Option	2598658	USD	2,334.00
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed on the LEVEL PRO ACTIVE panel.	Standard	2598665	USD	0.00
Overload sensors automatically lift the scraper whenever there are obstacles that could damage the scraper.	Option	2598528	USD	1,547.00
Active floating position on the right and left side plates achieved by continuously adjusting the milling depth and position of the plate. If necessary, the side plates can be briefly raised to prevent them from sinking into the soft ground.	Standard	2598531	USD	0.00
MCS BASIC extended with a hydraulically opening side door on the milling drum unit FB2000 (6 ft 7 in). With additional hydraulic cylinders, the side door can be easily unlocked and opened when changing the milling drum. This enables milling drums in MCS BASIC to be changed even faster.	Option	2614824	USD	9,066.00
MCS BASIC extended with a hydraulically opening side door on the milling drum unit FB2200 (7 ft 3 in). With additional hydraulic cylinders, the side door can be easily unlocked and opened when changing the milling drum. This enables milling drums in MCS BASIC to be changed even faster.	Standard	2688482	USD	0.00
Electrically switchable sectional water spray bar in the milling drum assembly FB2000 (6 ft 7 in). Four areas can be controlled as required from the control panel (automatically controlled with WPT). This reduces water consumption enormously.	Option	2598537	USD	2,646.00

Electrically switchable sectional water spray bar in the milling drum assembly FB2200 (7 ft 3 in). Four areas can be controlled as required from the control panel (automatically controlled with WPT). This reduces water consumption enormously.	Standard	2610096	USD	0.00
Two wear protection rollers to be attached to the side plates (right or left). The rollers protect asphalt, kerbstones and other surfaces from damage and prevent excessive wear on the side plates.	Option	2662818	USD	760.00
Milling drum mounting and transport carriage FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,284.00
<b>Options for belt conveyor</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	Standard	2598495	USD	0.00
Support device for putting the discharge conveyor on the low-loader.	Standard	60603	USD	0.00
<b>Additional control unit LEVEL PRO</b>				
Additional 7" control panel that visualizes the machine control and controls the LEVEL PRO ACTIVE leveling system. Up to two additional control panels can be arranged in the rear lower area of the machines.	Standard	2598632	USD	0.00
<b>Leveling</b>				
Expansion of the LEVEL PRO PLUS leveling system with leveling boom Premounted and adjustable hydraulic cylinders on the right and left allow the use of a sonic-ski sensor that is able to scan a reference object up to 1,900 mm away from the milling edge. During machine transport, the sensor and cables are securely stowed in the corresponding transport boxes.	Option	2600969	USD	10,341.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with two hydraulic cylinder sensors for scanning a reference surface to the right and left of the milling drum.	Standard	2598630	USD	0.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in an appropriate transport box.	Option	2598636	USD	4,954.00
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right and left. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in an appropriate transport box.	Option	2598641	USD	9,622.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE levelling system with pre-fitting for 3-D milling with machines without a weather canopy. The pre-fitting consists of robust and exactly positioned mounting adapters for a 3-D system as well as sensor sockets for connecting the LEVEL PRO ACTIVE.	Option	2662822	USD	6,949.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3-D milling with machines with a weather canopy. The pre-fitting consists of robust and exactly positioned mounting adapters for a 3-D system as well as sensor sockets for connecting the LEVEL PRO ACTIVE.	Option	2662824	USD	2,036.00
LEVEL PRO ACTIVE leveling system extended with two laser receivers that are to be attached to the pre-fitting for 3D leveling.	Option	2662826	USD	12,364.00
<b>Water system</b>				
Powerful, hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min (4 gpm) at 150 bar (2175 psi) pressure.	Option	2598657	USD	2,443.00
<b>Pick changing aids</b>				
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	Standard	2650081	USD	0.00
<b>Camera system</b>				
4-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine as well as of the side plates, on the right and left. The camera images are displayed on the 10" control panel on the operator's platform.	Standard	2598678	USD	0.00
8-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine, of the side plates on the right and left and of the milled surface behind the milling drum unit. The camera images are displayed on the 10" control panel on the operator's platform.	Option	2598679	USD	10,559.00
<b>Other devices</b>				
Electrical preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	Option	2622716	USD	584.00
Electrical diesel suction and pressure pump with 7.50 m (24 ft 7 in) suction hose. The machine can be refuelled with up to 50 l/min (13 gal/min) from external diesel tanks.	Option	2598663	USD	896.00
License plate holder with LED lighting	Option	2654224	USD	475.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)			USD	81.00
¹Option must be ordered from headquarters.

## Price list

### W 210 Fi

#### Scope of supply – basic machine

- Engine: 6-cylinder diesel engine: CATERPILLAR C18 ATAAC
- Rated power at 1,950 r.p.m.: 563 kW / 755 HP / 766 PS
- Exhaust standard: US Tier 4f
- Standard milling width: 6 ft 7 in / 2000 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

#### STANDARD EQUIPMENT

- Basic machine with engine
- Machine frame featuring a single wasp waist at the rear right, and a dual wasp waist at the front
- DUAL SHIFT two-speed powershift transmission for efficient engine speeds combined with powerful milling drum speeds.
- Automatic pressure adjustment of the cylinder pump in accordance with performance requirements for reduced diesel consumption
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Two cooling fans to minimize power consumption of the cooling system

#### MILLING DRUM HOUSING

- Adjustment of material depressor contact pressure via the control panel or automatically via the MILL ASSIST feature to reduce chunk formation
- Electrical adjustment of scraper contact pressure via the control panel
- Automatically controlled locking feature of scraper
- Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement.
- Single-piece water spray bar in the milling drum unit for reliable pick cooling and to prevent dust development
- Automatic control of the water quantity via the MILL ASSIST feature
- Height adjustment stroke increased by 150 mm to facilitate pick replacement and the exchange of milling drum units
- Pre-fitting to allow the quick exchange of milling drum units.
- Hydraulically lifting side plates, clearance right 450 mm (1 ft 6 in), clearance left 330 mm (1 ft 1 in)

#### LOADING OF MILLED MATERIAL

- Increased conveyor slewing angles of 65° each to the left and right
- Discharge conveyor with adjustable conveying speed and two slewing speeds for precise loading
- Boost feature for a temporary increase of the belt speed and conveying performance of the discharge conveyor by 20%
- Water spray system in the primary conveyor
- Larger conveyor pump for a constant belt speed even at a low engine speed of 1300 rpm

#### MACHINE CONTROL AND LEVELLING SYSTEM

- User-friendly control panel including 7" color screen
- LEVEL PRO ACTIVE leveling system with numerous automated and complementary features relieving the operator of a part of his workload
- LEVEL PRO ACTIVE - automatic height control in transport mode
- LEVEL PRO ACTIVE - ramp milling and auto-start feature for the second milling cut
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- MILL ASSIST assistance system for automatic adjustment of the milling drum speed in accordance with the main area of application and the parameters selected in terms of engine load, advance rate, milling volume and quality of the milling pattern.
- Automatic start-stop feature of the milling drum to reduce diesel consumption
- Comprehensive machine diagnostics on the control panel including, for example, a diagnostic system for the CAN bus
- Voltmeter integrated into the control panel for voltage measurement in the event of a malfunction
- Two control panels for operating functions performed by ground crew

#### OPERATOR'S PLATFORM

- Convenient access to the operator's platform, right and left
- Anti-vibration mounted operator's platform across the full width of the machine including fold-out railing, right
- Electrical control cabinet on the operator's platform for optimum accessibility and fast troubleshooting
- Electrical level indicator for the water tank on the external control panels
- Time display on the main control panel and on the exterior control panels
- Two mirrors at the front, one mirror at the rear of the machine

## CHASSIS AND HEIGHT ADJUSTMENT

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- High travel speed of up to 100 m / min at low engine speeds (1,350 rpm), reduced diesel consumption and low noise emissions.
- Lifting speed of the height adjustment feature increased by 60%

## MISCELLANEOUS

- "Welcome" and "Go home" lights feature in the area of the operator's platform and access
- Large storage compartment on the machine for pick containers
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Good accessibility to all maintenance points on the engine station
- Pneumatic hammer with pick extractor/insertor
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

List price ex subsidiary Wirtgen America

825,089.00

## Mandatory Options

### Milling drum housing

FB2000 (6 ft 7 in) MCS BASIC quick-change milling drum unit that enables milling drums of the same milling width to be changed particularly quickly.	Option	2598416	USD	-4,126.00
FB2200 (7 ft 3 in) MCS BASIC quick-change milling drum unit that enables milling drums of the same milling width to be changed particularly quickly.	Standard	2598417	USD	0.00
FB2500 (8 ft 2 in) MCS BASIC quick-change milling drum unit that enables milling drums of the same milling width to be changed particularly quickly.	Option	2602549	USD	12,201.00

### Milling drums / milling units

Milling drum MCS BASIC with milling width 2000 mm / 6 ft 7 in, milling depth max. 320 mm / 1ft / 0,5 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 162 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Option	2611265	USD	-4,017.00
Milling drum MCS BASIC with a milling width of 2,000 mm (6 ft 7 in), a maximum milling depth of 320 mm (1 ft 6 in), a tool spacing of 18 mm (45/64 in), equipped with the toolholder system HT22 and 164 cutting tools. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Option	2602601	USD	-5,619.00
Milling drum MCS BASIC with milling width 2200 mm / 7 ft 3 in, milling depth max. 350 mm / 1 ft 2 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 176 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2611269	USD	0.00
Milling drum MCS BASIC with milling width 2200 mm / 7 ft 3 in, milling depth max. 330 mm / 1 ft 1 in, tool spacing 18 mm / 45/64 in, equipped with quick-change toolholder system HT22 and 155 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Option	2602602	USD	-1,683.00
Milling drum MCS BASIC with milling width 2500 mm / 8 ft 2 in, milling depth max. 350 mm / 1 ft 2 in, tool spacing 18 mm / 45/64 in, equipped with quick-change toolholder system HT22 and 171 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Option	2602605	USD	3,257.00

### Operator's platform

Flexibly mounted operator's platform with clearly laid-out control panel, a functional stand-up seat and a large, lockable storage compartment with a capacity of approx. 69 gal / 260 l.	Standard	2662840	USD	0.00
Elastically mounted operator's platform with clear control panels, a functional stand-up seat and a large, lockable storage compartment with a capacity of approx. 69 gal / 260 litres. A hydraulically height-adjustable weather canopy with transparent side weather protection elements protects the driver from the wind and weather.	Option	2598429	USD	15,390.00
A high-quality, all-round glazed and soundproof comfort cabin for efficient working. The cab can be moved to either side and rotated by up to 110° for optimum visibility. An air-conditioning system, a 6-fold camera system and an intercom system ensure optimum working conditions. The cab is hydraulically swivelled into the machine chassis for transport.	Option	2598430	USD	84,414.00

### Material transport

Robust 7,900 mm (25 ft 11 in) long discharge conveyor with conveyor belt system 850 mm (2 ft 9 in) and hydraulic folding device for shortening the transport length	Standard	2598432	USD	0.00
---	----------	---------	-----	------

<b>Water tank filling</b>				
Additional water tank filling from the rear of the machine using a stopcock.	Standard	2549116	USD	0.00
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filling pump.	Option	2598434	USD	3,746.00
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2598435	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2598436	USD	2,321.00
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
The WIRTGEN PERFORMANCE TRACKER WPT is a laser and satellite-supported measuring system for precise milling performance determination for machines with FB2000 or FB2200 without a weather canopy or with an operator's cabin. Two laser scanners measure the actual milling width and milling depth over the distance of the milling path. The milling performance results are automatically sent to the corresponding users via the WITOS interface with precise GPS machine position data and consumption data such as diesel consumption, water consumption, tool consumption and truck loads, in an evaluation and then by e-mail. The milling performance reports that include an image of the milling position can also be used as an allowance report. The usability of WITOS hardware components for the existing mobile radio standard is guaranteed for 3 years from the date of delivery.	Option	2598668	USD	47,066.00
The WIRTGEN PERFORMANCE TRACKER WPT is a laser and satellite-supported measuring system for precise milling performance determination for machines with FB2000 or FB2200 with a weather canopy. Two laser scanners measure the actual milling width and milling depth over the distance of the milling path. The milling performance results are automatically sent to the corresponding users via the WITOS interface with precise GPS machine position data and consumption data such as diesel consumption, water consumption, tool consumption and truck loads, in an evaluation and then by e-mail. The milling performance reports that include an image of the milling position can also be used as an allowance report. The usability of WITOS hardware components for the existing mobile radio standard is guaranteed for 3 years from the date of delivery.	Option	2598670	USD	47,066.00
<b>Machine lighting</b>				
Extended lighting system consisting of 21 extremely powerful LED working lights for optimum illumination of the working area. The light output is approx. 37,600 lumens in total.	Standard	2598443	USD	0.00
Extended lighting system with 19 particularly powerful LED working lights for optimum illumination of the working area. The light output of the working lights amounts to a total of 34,000 lumens. The additional lighting balloon is operated via the 24V power supply of the machine and achieves an additional luminous power of 16,000 lumens.	Option	2653969	USD	4,628.00
<b>Equipment Options</b>				
<b>Additional weight</b>				
Two-piece additional weight at the rear of the machine totaling 1,600 kg (3,527 lbs) which enables the machine to be individually ballasted. The individual weights of 850 kg and 750 kg can be easily and quickly inserted and fastened to the rear of the machine.	Standard	2598492	USD	0.00
<b>Additional weight</b>				
Large sized storage compartment for 69 pick containers mounted at the rear of the machine instead of the standard storage compartment. The storage compartment is splash-proof and additionally contains a completely sealed area to safely store electronic components such as leveling sensors or tool extractors.	Option	2598494	USD	3,094.00
Storage compartment on both the rear track units for 8 pick containers	Standard	2598662	USD	0.00
<b>Equipment operator's platform</b>				
A powerful hot-air heating system with intelligently arranged air vents close to the operator's hands and feet ensures maximum comfort in the operator's platform.	Option	2598527	USD	3,719.00
Equipment of the operator's platform with a height adjustable stand-up seat for increasing operating comfort	Option	2688479	USD	1,031.00

<b>Milling drum assembly options</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed on the LEVEL PRO ACTIVE panel.	Standard	2598665	USD	0.00
Overload sensors automatically lift the scraper whenever there are obstacles that could damage the scraper.	Option	2598528	USD	1,547.00
Active floating position on the right and left side plates achieved by continuously adjusting the milling depth and position of the plate. If necessary, the side plates can be briefly raised to prevent them from sinking into the soft ground.	Standard	2598531	USD	0.00
MCS BASIC extended with a hydraulically opening side door on the milling drum unit FB2000 (6 ft 7 in). With additional hydraulic cylinders, the side door can be easily unlocked and opened when changing the milling drum. This enables milling drums in MCS BASIC to be changed even faster.	Option	2614824	USD	9,066.00
MCS BASIC extended with a hydraulically opening side door on the milling drum unit FB2200 (7 ft 3 in). With additional hydraulic cylinders, the side door can be easily unlocked and opened when changing the milling drum. This enables milling drums in MCS BASIC to be changed even faster.	Standard	2688482	USD	0.00
MCS BASIC extended with a hydraulically opening side door on the milling drum unit FB2500 (8 ft 2 in). With additional hydraulic cylinders, the side door can be easily unlocked and opened when changing the milling drum. This enables milling drums in MCS BASIC to be changed even faster.	Option	2688484	USD	9,066.00
Electrically switchable sectional water spray bar in the milling drum assembly FB2000 (6 ft 7 in). Four areas can be controlled as required from the control panel (automatically controlled with WPT). This reduces water consumption enormously.	Option	2598537	USD	2,646.00
Electrically switchable sectional water spray bar in the milling drum assembly FB2200 (7 ft 3 in). Four areas can be controlled as required from the control panel (automatically controlled with WPT). This reduces water consumption enormously.	Standard	2610096	USD	0.00
Sectional, electrically controlled water spray bar in the milling drum assembly FB2500 (8 ft 2 in). Four areas can be controlled from the control panel as needed. This reduces water consumption enormously.	Option	2610097	USD	2,769.00
Two wear protection rollers to be attached to the side plates (right or left). The rollers protect asphalt, kerbstones and other surfaces from damage and prevent excessive wear on the side plates.	Option	2662818	USD	760.00
Mounting aid when lifting out the short primary conveyor when changing the milling unit.	Option	2598534	USD	434.00
Milling drum mounting and transport carriage FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,284.00
<b>Options for belt conveyor</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	Standard	2598495	USD	0.00
Signal lights on the loading conveyor for a visual truck stop-and-go control without using the horn. The signal lights can be folded in hydraulically from the operator's platform.	Option	2598539	USD	4,709.00
Support device for putting the discharge conveyor on the low-loader.	Standard	60603	USD	0.00
<b>Additional control unit LEVEL PRO</b>				
Additional control panel 5" for controlling the leveling system LEVEL PRO ACTIVE. Up to two additional control panels can be arranged in the rear lower area of the machines.	Option	2598631	USD	2,266.00
Additional 7" control panel that visualizes the machine control and controls the LEVEL PRO ACTIVE leveling system. Up to two additional control panels can be arranged in the rear lower area of the machines.	Standard	2598632	USD	0.00
Additional 2" control panel which can have 16 priority functions assigned to it. Up to two additional control panels can be mounted on the outside railing of the operator's platform.	Option	2598664	USD	1,914.00
Two additional 2" control panels which can each have 16 priority functions assigned to it. Up to two additional control panels can be mounted on the outside railing of the operator's platform.	Option	2767151	USD	3,827.00
<b>Leveling</b>				
Expansion of the LEVEL PRO PLUS leveling system with leveling boom Premounted and adjustable hydraulic cylinders on the right and left allow the use of a sonic-ski sensor that is able to scan a reference object up to 1,900 mm away from the milling edge. During machine transport, the sensor and cables are securely stowed in the corresponding transport boxes.	Option	2600969	USD	10,341.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with two hydraulic cylinder sensors for scanning a reference surface to the right and left of the milling drum.	Standard	2598630	USD	0.00
<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right. Two additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in an appropriate transport box.	Option	2598636	USD	4,954.00
Extension of the LEVEL PRO ACTIVE leveling system with multiplex scanning on the right and left. Four additional ultrasonic sensors scan reference surfaces in front of and behind the machine. During machine transport, the sensors and cables are securely stowed in an appropriate transport box.	Option	2598641	USD	9,622.00

<b>Leveling</b>				
Extension of the LEVEL PRO ACTIVE levelling system with pre-fitting for 3-D milling with machines without a weather canopy. The pre-fitting consists of robust and exactly positioned mounting adapters for a 3-D system as well as sensor sockets for connecting the LEVEL PRO ACTIVE.	Option	2662822	USD	6,949.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3-D milling with machines with a weather canopy. The pre-fitting consists of robust and exactly positioned mounting adapters for a 3-D system as well as sensor sockets for connecting the LEVEL PRO ACTIVE.	Option	2662824	USD	2,036.00
Extension of the LEVEL PRO ACTIVE leveling system with pre-fitting for 3-D milling with machines with a cabin. The pre-fitting consists of robust and exactly positioned mounting adapters for a 3-D system as well as sensor sockets for the LEVEL PRO ACTIVE.	Option	2662844	USD	5,809.00
LEVEL PRO ACTIVE leveling system extended with two laser receivers that are to be attached to the pre-fitting for 3D leveling.	Option	2662826	USD	12,364.00
<b>Water system</b>				
Powerful, hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min (4 gpm) at 150 bar (2175 psi) pressure.	Option	2598657	USD	2,443.00
<b>Pick changing aids</b>				
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	Standard	2598659	USD	0.00
<b>Camera system</b>				
4-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine as well as of the side plates, on the right and left. The camera images are displayed on the 10" control panel on the operator's platform.	Standard	2598678	USD	0.00
8-fold camera system with an additional 10" control panel for an optimised view of the work processes being executed in front of and behind the machine, of the side plates on the right and left and of the milled surface behind the milling drum unit. The camera images are displayed on the 10" control panel on the operator's platform.	Option	2598679	USD	10,559.00
<b>Other devices</b>				
Dual starter system for maximum starting reliability with an additional automatic engine stop function that reduces diesel consumption.	Option	2647215	USD	4,723.00
Electrical diesel suction and pressure pump with 7.50 m (24 ft 7 in) suction hose. The machine can be refuelled with up to 50 l/min (13 gal/min) from external diesel tanks.	Option	2598663	USD	896.00
License plate holder with LED lighting	Option	2654224	USD	475.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00
<sup>1</sup> Option must be ordered from headquarters.				
Date: 8/23/2019				

## Price list

### W 120 XTi

#### Scope of supply – basic machine

- Engine: 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSL9 C-300
- Rated engine power 2100 r.p.m.: 248 kW / 333 HP / 337 PS
- Maximum power at 1900 r.p.m.: 257 kW / 345 HP / 350 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 3 ft 11 in / 1200 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

#### STANDARD EQUIPMENT

- Basic machine with engine
- Mechanically opening engine cowling with noise insulation
- Radiator with temperature-dependent fan speed
- Highly effective noise insulation throughout the engine compartment
- Automatic engine speed control depending on driving situation

#### MILLING DRUM HOUSING

- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Hydraulically operated scraper with mechanical locking

#### LOADING OF MILLED MATERIAL

- Discharge conveyor slewing angle left 60 degrees – right 60 degrees
- Two slewing speeds on the hydraulically foldable discharge conveyor with an adjustable conveying speed for precise loading

#### MACHINE CONTROL AND LEVELLING SYSTEM

- Digital milling depth indicator in the machine control display
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- Precise machine height adjustment in 1 or 5 mm steps on the main control panel of the machine
- Digital load control, manual engageable, hydraulic differential lock (by flow distributor)

#### OPERATOR'S PLATFORM

- Hydraulically extending operator's platform for optimum visibility of the working area
- Slender machine design permits unobstructed view of the milled edge as well as the working area in front of the milling drum on the right
- Mirror package comprising rear-view mirrors at front left and right as well as a forward-pointing mirror at the left of the operator's platform
- Reversing horn with clear audible signal
- Scraper height is shown on the display

#### CHASSIS AND HEIGHT ADJUSTMENT

- Hydraulic height adjustment of the front and rear track units at two speeds

#### MISCELLANEOUS

- Large tool package
- Device for towing away
- Extensive safety package with several EMERGENCY STOP switches
- European design type certification, EuroTest mark and CE conformity

List price ex subsidiary Wirtgen America

USD

505,427.00

<b>Mandatory Options</b>				
<b>Exhaust Gas After Treatment</b>				
Exhaust after-treatment by diesel oxidation catalytic converter DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Without diesel particulate filter.	Standard	2490140	USD	0.00
Exhaust after-treatment by diesel oxidation catalyst DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Additionally equipped with diesel particulate filter (DPF) - for operation e.g. in halls or in environmental zones with limited fine dust emission.	Option	2490141	USD	13,504.00
<b>Crawler units</b>				
Configuration with 4 driven track units. The two front track units are steered. The track unit at the rear right is hydraulically slewing and also steers. Traveling speed max. 3.6 mph / 5.8 km/h.	Standard	2777141	USD	0.00
<b>Milling drum housing</b>				
Wear-resistant milling drum housing FB1200 (3 ft 11 in) without milling drum	Standard	2336167	USD	0.00
<b>Milling drums / milling units</b>				
Milling drum with milling width 1200 mm / 3 ft / 11 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 115 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2308578	USD	0.00
<b>Operator's platform</b>				
Standard operator's seat with shock absorption and lengthways adjustment	Standard	2412488	USD	0.00
Comfort operator's seat incl. seat heating. The operator's seat has shock absorption, lengthways adjustment and can be swiveled through a total of 50 degrees.	Option	2412489	USD	1,154.00
<b>Hydraulic connection</b>				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	Standard	2412477	USD	0.00
<b>Material transport</b>				
Discharge conveyor 26 ft 9 in / 8,150 mm long with conveyor belt width 2 ft / 600 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields.	Standard	2336175	USD	0.00
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2764944	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2764945	USD	1,561.00
Film coating in cream RAL 9001 with orange stripes. The complete lower part of the machine is foiled in slate grey RAL 7015.	Option	2763472	USD	2,348.00
The film coating is done in RAL colours according to the customer's wishes. Film coating provides protection against mechanical and weather-related conditions and can be removed, if necessary, without leaving any marks.	Option	2763473	USD	3,162.00
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
<b>Machine lighting</b>				
Lighting system consisting of 4 halogen and 8 LED working lights. The headlights illuminate the area in front of the machine, both machine sides, the area in front of the milling drum unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 19,500 lumen in total.	Standard	2487614	USD	0.00
High-performance lighting system consisting of 1 halogen and 14 LED working lights. The headlights illuminate the area in front of and behind the machine, both machine sides, the area in front of the milling drum unit, the loading area, the weather canopy, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 26,300 lumen in total. LED working lights are extremely bright, shock-resistant and durable.	Option	2487615	USD	936.00

Equipment Options				
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	Option	2336913	USD	8,251.00
<b>Advance drive</b>				
Equipment of the machine with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine.	Option	2478488	USD	1,710.00
<b>Equipment operator's platform</b>				
Operator's platform with weather canopy. The weather canopy is hydraulically adjustable in height and provides additional comfort during on-site operation. Including LED working light for illuminating the footstep. (Only in conjunction with electrohydraulic unit.)	Option	2336173	USD	8,156.00
<b>Milling drum assembly options</b>				
Overload sensor on the scraper FB1200 for automatic lifting function in case of obstacles. Effectively prevents the scraper from sinking into the loose sub-base, as well as getting stuck on obstacles.	Option	2478959	USD	2,701.00
Active floating position on the side plate right and left by continuous comparison between the milling depth and position of the side plate. If required, the side plate is lifted briefly to prevent tilting or sinking into a soft sub-base. (Only possible in conjunction with LEVEL PRO PLUS.)	Standard	2478486	USD	0.00
<b>Cold-start device</b>				
Electrical preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	Option	2377357	USD	746.00
<b>Options for belt conveyor</b>				
Signal lights on the loading conveyor for a visual truck stop-and-go control without using the horn. The signal lights can be folded in hydraulically from the operator's platform.	Option	2409818	USD	6,392.00
<b>Leveling</b>				
Expansion of the LEVEL PRO PLUS leveling system by a SONIC SKI sensor. Ideal for contact-free wire and soil scanning. Including connection cable and holder.	Option	2352878	USD	5,727.00
<b>Leveling</b>				
Expansion of the leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, and connection cable. (FB1000/1200)	Option	2544246	USD	3,651.00
Expansion of the leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors and connection cable. (FB1000/1200)	Option	2544249	USD	7,288.00
Expansion of the leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, and connection cable. (FB1300)	Option	2603878	USD	3,651.00
Expansion of the leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors and connection cable. (FB1300)	Option	2603881	USD	7,288.00
<b>Leveling</b>				
The pre-fitting 3D laser leveling includes the required mechanical and electrical components for adaptation of a 3D laser leveling system on the machine. The exact positioning and robust configuration of the sensor masts form the basis for optimum working results. The supplied connection box provides for a simple and safe connection of the 3D system, without 3D system.	Option	2544251	USD	4,479.00
Expansion leveling system with basic equipment laser leveling, including holder and laser receiver, without laser transmitter	Option	2544252	USD	15,227.00
<b>Attachments</b>				
Battery-operated electro-hydraulic unit for operation of the machine hydraulics with the diesel engine switched off. (e.g. height adjustment of weather canopy, milling drum rotation device and hydraulic pick extractor drift)	Option	2412494	USD	3,379.00
<b>Water system</b>				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min at 150 bar pressure. Ideal for daily cleaning of the machine.	Option	2336231	USD	3,909.00
<b>Pick changing aids</b>				
Integrated air compressor system with pressure accumulator and filling points. Precondition for operation of compressed air tools (e.g. pneumatic hammers).	Option	2353106	USD	6,216.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	Option	60604	USD	461.00
Hydraulically driven pick extractor drift, complete with holder and corresponding electrical and hydraulic connectors. Ideal for convenient and quiet pick change.	Option	2352889	USD	3,461.00
Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement.	Option	2352893	USD	3,379.00

<b>Wirtgen information and diagnostic system</b>				
Equipment of the machine with job data acquisition. The information is shown in the control display.	<b>Option</b>	<b>2410294</b>	<b>USD</b>	<b>1,113.00</b>
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras and screen. A camera is mounted on the discharge conveyor and displays the loading of the truck. The 2nd camera shows the area in front of the milling drum housing. The camera images are displayed on the screen.	<b>Option</b>	<b>2487637</b>	<b>USD</b>	<b>5,496.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>
<sup>1</sup> Option must be ordered from headquarters.				
Date: 8/28/2019				

## Statewide Contract Addendum

## Price list

# SUPER 1300-3i (4f) / AB 340 V Extending Screed

### Scope of supply – basic machine

#### Delivery scope for a basic machine:

##### Power Unit

- Water-cooled Deutz diesel engine, TCD 3.6L4 with 100 hp (74.4 kW) at 2,000 rpm
- With its diesel oxidation catalyst (DOC), the engine fulfills all applicable exhaust emissions standards of the European Union (Stage 3b) and the USA (EPA Tier 4i).
- Electronic engine management with ECO mode
- Variable-speed fan

##### Undercarriage

- Hydrostatic traction drive.
- Crawler tracks with rubber pads, ground contact 6 ft. 6 in. x 10 in. (1,990 mm x 260 mm)
- Low-maintenance multiple-disc brakes lock on automatically without oil pressure.

##### Material Feed, Conveyance and Spreading

- Wide push-rollers, displaceable forwards by 3 in. (80 mm)
- Material hopper with 22,000 lbs. (10 tonnes) capacity, hopper apron can be raised for servicing.
- Four separate hydraulic drives for conveyors and augers.
- Conveyors can be reversed temporarily
- Augers reversible and mechanically adjustable in height
- Auger override
- Mechanical, paddle-type sensors for controlling the conveyors
- Automatic filling of the auger tunnel when the paver is in idle
- Set of limiting plates, hinged and extending at the rear of the paver

##### Electrical System

- On-board voltage 24 V
- Four working lights, halogen H3

##### Screed Heating

- Three-phase AC generator with generator management.
- Heating of screed when diesel engine is running at idle.

##### Operator's Platform

- Two driver's seats, swing beyond the width of the machine, with side panelling.
- Driver's seats and operator's consoles can easily and conveniently be adjusted for ergonomic working
- ErgoPlus 3 operator's console with modular layout. The large, high-contrast color display makes for simple operation and monitoring of the paver
- Two ErgoPlus 3 screed consoles for the left and right sides, with color displays for setting up and monitoring the paver and screed

##### Miscellaneous

- Machine documentation

## Price list

# SUPER 1700-3i (4f) / Carlson EZIV-08 Screed

### Scope of supply – basic machine

#### Drive Unit

- Liquid-cooled Cummins 4-cylinder diesel engine, QSB4.5-C173, 173 hp (129 kW) at 2,000rpm
- Engine complies with the applicable exhaust emission standards of the European Union (COM) 4 and USA (EPA, CARB) Tier 4f
- Electronic engine management

#### Undercarriage

- Hydrostatic traction drive
- Crawler tracks with rubber pads, ground contact 8 ft. 6 in. (2,594 x 355mm)
- Low-maintenance multiple-disk brakes, lock on automatically without oil pressure

#### Material Feed, Conveyors and Augers

- Wide push-rollers, can be displaced forwards by 6 in. (150mm)
- 14.3 tons (13 tonnes) material hopper
- Hopper apron hydraulically operated
- 4 separate hydraulic drives for conveyors and augers
- Mechanical sensors for controlling the conveyors, conveyors can briefly be reversed
- Sonic sensors for controlling the augers
- Augers hydraulically adjustable in height, complete with limiting plates for the auger tunnel and bracing
- Manual auger override
- Automatic filling function for the auger tunnel during breaks in paving
- 3 left hand and 3 right hand 1 ft. (30.5 cm) stackable augers for a total of 6 ft. of augers

#### Electrical System

- On-board voltage 24V

#### Screed Heating

- Three-phase AC generator, air-cooled with electronic generator management
- Screed is also heated when diesel engine is running at idle
- Screed heating with electronic temperature control

#### Operator's Platform

- 2 Luxury operator's seats including seat heating, with side paneling and armrests, can be pivoted outwards
- Operator's seats and console can be easily and conveniently adjusted for ergonomic working
- Modular ErgoPlus 3 paver operator's console; large high-contrast colour display ensures easy operation and monitoring of paver functions
- 2 ErgoPlus 3 screed consoles for the right and left-hand screed sides, with colour display for setting up and monitoring paver and screed functions

#### Miscellaneous

- Centralized lubrication system for tractor unit
- Machine documentation
- Crown is set hydraulically

## Price list

# SUPER 1703-3i (4f) / Carlson EZIV-08 Screed

### Scope of supply – basic machine

#### Drive Unit

- Liquid-cooled Cummins 4-cylinder diesel engine, QSB4.5-C173, 173 hp (129 kW) at 2,000rpm
- Engine complies with the applicable exhaust emission standards of the European Union (COM) 4 and USA (EPA, CARB) Tier 4f
- Electronic engine management

#### Undercarriage

- Hydrostatic traction drive (separate drives for powered wheels) with electronic traction control
- 2 powered rear wheels with tubeless tyres 14.00 R 25
- 4 front wheels of solid elastic rubber, 540/300-390, mounted on bogies
- Second steering axle, powered (6x4)
- Extremely small turning radius (11 ft. 5 in. (3.5 m) outside) thanks to "Pivot Steer"
- Service brake (multiple-disk brake, hydraulically pressurized) and hydraulically actuated parking brake

#### Material Feed, Conveyors and Augers

- Wide push-rollers, can be displaced forwards by 6 in. (150mm)
- 14.3 tons (13 tonnes) material hopper
- Hopper apron hydraulically operated
- 4 separate hydraulic drives for conveyors and augers
- Mechanical sensors for controlling the conveyors, conveyors can briefly be reversed
- Sonic sensors for controlling the augers
- Augers hydraulically adjustable in height, complete with limiting plates for the auger tunnel and bracing
- Manual auger override
- Automatic filling function for the auger tunnel during breaks in paving
- 3 left hand and 3 right hand 1 ft. (30.5 cm) stackable augers for a total of 6 ft. of augers

#### Electrical System

- On-board voltage 24V

#### Screed Heating

- Three-phase AC generator, air-cooled with electronic generator management
- Screed is also heated when diesel engine is running at idle
- Screed heating with electronic temperature control

#### Operator's Platform

- 2 Luxury operator's seats including seat heating, with side paneling and armrests, can be pivoted outwards
- Operator's seats and console can be easily and conveniently adjusted for ergonomic working
- Modular ErgoPlus 3 paver operator's console; large high-contrast colour display ensures easy operation and monitoring of paver functions
- 2 ErgoPlus 3 screed consoles for the right and left-hand screed sides, with colour display for setting up and monitoring paver and screed functions

#### Miscellaneous

- Centralized lubrication system for tractor unit
- Machine documentation
- Crown is set hydraulically

## Price list

# SUPER 2000-3i (4f) / Carlson EZIV-10 Screed

### Scope of supply – basic machine

#### Drive Unit

- Liquid-cooled Cummins 6-cylinder diesel engine, QSB6.7-C250, 250 hp (186kW) at 2,000rpm
- Engine complies with the applicable exhaust emission standards of the European Union (COM) 4 and USA (EPA) Tier 4f
- Electronic engine management

#### Undercarriage

- Hydrostatic traction drive
- Continuous rubber tracks, ground contact 9 ft. 10 in. x 1 ft. 6 in. (2,994 x 457 mm)
- Low-maintenance multiple-disk brakes, lock on automatically without oil pressure

#### Material Feed, Conveyors and Augers

- Wide push-rollers, oscillating, can be displaced forwards by 3 in. (75 mm) or 6 in. (150 mm)
- 16.5 tons (15 tonnes) material hopper
- Hopper apron hydraulically operated
- 4 separate hydraulic drives for conveyors and augers
- Mechanical sensors for controlling the conveyors, conveyors can briefly be reversed
- Sonic sensors for controlling the augers
- Augers reversible and hydraulically adjustable in height, complete with limiting plates for auger tunnel and bracing
- Manual auger override
- Automatic filling function for the auger tunnel during breaks in paving
- 3 left hand and 3 right hand 1 ft. (30.5 cm) stackable augers for a total of 6 ft. of augers

#### Electrical System

- On-board voltage 24V

#### Screed Heating

- Three-phase AC generator, oil-cooled with electronic generator management
- Screed is also heated when diesel engine is running at idle
- Screed heating with electronic temperature control

#### Operator's Platform

- 2 comfortable heated operator's seats, can be pivoted outwards
- Operator's seats and console can be easily and conveniently adjusted for ergonomic working
- Modular ErgoPlus paver operator's console; large high-contrast colour display ensures easy operation and monitoring of paver functions
- 2 ErgoPlus screed consoles for the right and left-hand screed sides, with colour display for setting up and monitoring paver and screed functions

#### Miscellaneous

- Centralized lubrication system for tractor unit with electronic level indication on the display
- Machine documentation
- Crown is set hydraulically

## Price list

# SUPER 2000-3i (4f) / VF 600-2 V Extending Screed

### Scope of supply – basic machine

#### Drive Unit

- Liquid-cooled Cummins 6-cylinder diesel engine, QSB6.7-C250, 250 hp (186kW) at 2,000rpm
- Engine complies with the applicable exhaust emission standards of the European Union (COM) 4 and USA (EPA) Tier 4f
- Electronic engine management

#### Undercarriage

- Hydrostatic traction drive
- Continuous rubber tracks, ground contact 9 ft. 10 in. x 1 ft. 6 in. (2,994 x 457 mm)
- Low-maintenance multiple-disk brakes, lock on automatically without oil pressure

#### Material Feed, Conveyors and Augers

- Wide push-rollers, oscillating, can be displaced forwards by 3 in. (75 mm) or 6 in. (150 mm)
- 16.5 tons (15 tonnes) material hopper
- Hopper apron hydraulically operated
- 4 separate hydraulic drives for conveyors and augers
- Mechanical sensors for controlling the conveyors, conveyors can briefly be reversed
- Sonic sensors for controlling the augers
- Augers reversible and hydraulically adjustable in height, complete with limiting plates for auger tunnel and bracing
- Manual auger override
- Automatic filling function for the auger tunnel during breaks in paving
- 3 left hand and 3 right hand 1 ft. (30.5 cm) stackable augers for a total of 6 ft. of augers

#### Electrical System

- On-board voltage 24V

#### Screed Heating

- Three-phase AC generator, oil-cooled with electronic generator management
- Screed is also heated when diesel engine is running at idle
- Screed heating with electronic temperature control

#### Operator's Platform

- 2 comfortable heated operator's seats, can be pivoted outwards
- Operator's seats and console can be easily and conveniently adjusted for ergonomic working
- Modular ErgoPlus paver operator's console; large high-contrast colour display ensures easy operation and monitoring of paver functions
- 2 ErgoPlus screed consoles for the right and left-hand screed sides, with colour display for setting up and monitoring paver and screed functions

#### Miscellaneous

- Centralized lubrication system for tractor unit with electronic level indication on the display
- Machine documentation
- Crown is set hydraulically

**Price list****SUPER 2000-3i (4f) / VR 600-2 V Extending  
Screed****Scope of supply – basic machine****Drive Unit**

- Liquid-cooled Cummins 6-cylinder diesel engine, QSB6.7-C250, 250 hp (186kW) at 2,000rpm
- Engine complies with the applicable exhaust emission standards of the European Union (COM) 4 and USA (EPA) Tier 4f
- Electronic engine management

**Undercarriage**

- Hydrostatic traction drive
- Continuous rubber tracks, ground contact 9 ft. 10 in. x 1 ft. 6 in. (2,994 x 457 mm)
- Low-maintenance multiple-disk brakes, lock on automatically without oil pressure

**Material Feed, Conveyors and Augers**

- Wide push-rollers, oscillating, can be displaced forwards by 3 in. (75 mm) or 6 in. (150 mm)
- 16.5 tons (15 tonnes) material hopper
- Hopper apron hydraulically operated
- 4 separate hydraulic drives for conveyors and augers
- Mechanical sensors for controlling the conveyors, conveyors can briefly be reversed
- Sonic sensors for controlling the augers
- Augers reversible and hydraulically adjustable in height, complete with limiting plates for auger tunnel and bracing
- Manual auger override
- Automatic filling function for the auger tunnel during breaks in paving
- 3 left hand and 3 right hand 1 ft. (30.5 cm) stackable augers for a total of 6 ft. of augers

**Electrical System**

- On-board voltage 24V

**Screed Heating**

- Three-phase AC generator, oil-cooled with electronic generator management
- Screed is also heated when diesel engine is running at idle
- Screed heating with electronic temperature control

**Operator's Platform**

- 2 comfortable heated operator's seats, can be pivoted outwards
- Operator's seats and console can be easily and conveniently adjusted for ergonomic working
- Modular ErgoPlus paver operator's console; large high-contrast colour display ensures easy operation and monitoring of paver functions
- 2 ErgoPlus screed consoles for the right and left-hand screed sides, with colour display for setting up and monitoring paver and screed functions

**Miscellaneous**

- Centralized lubrication system for tractor unit with electronic level indication on the display
- Machine documentation
- Crown is set hydraulically

## Price list

# SUPER 2003-3i (4f) / Carlson EZIV-10 Screed

### Scope of supply – basic machine

#### Drive Unit

- Liquid-cooled Cummins 6-cylinder diesel engine, QSB6.7-C240, 240 hp (179kW) at 2,000rpm
- Engine complies with the applicable exhaust emission standards of the European Union (COM) 4 and USA (EPA) Tier 4f
- Electronic engine management

#### Undercarriage

- Hydrostatic traction drive (separate drives for powered wheels) with electronic traction control
- 4 front wheels of solid elastic rubber, 540/300-390, mounted on bogies
- 2 powered wheels with tubeless tyres 445/95 R25
- Extremely small outside turning radius to not more than 18 ft. 4 in. (5.6 m) with "Pivot Steer"
- Service brake (multiple-disk brake, hydraulically pressurized) and hydraulically actuated parking brake

#### Material Feed, Conveyors and Augers

- Wide push-rollers, oscillating, can be displaced forwards by 3 in. (75 mm) or 6 in. (150 mm)
- 16.5 tons (15 tonnes) material hopper
- Hopper apron hydraulically operated
- 4 separate hydraulic drives for conveyors and augers
- Mechanical sensors for controlling the conveyors, conveyors can briefly be reversed
- Sonic sensors for controlling the augers
- Augers reversible and hydraulically adjustable in height, complete with limiting plates for auger tunnel and bracing
- Manual auger override
- Automatic filling function for the auger tunnel during breaks in paving
- 3 left hand and 3 right hand 1 ft. (30.5 cm) stackable augers for a total of 6 ft. of augers

#### Electrical System

- On-board voltage 24V

#### Screed Heating

- Three-phase AC generator, oil-cooled with electronic generator management
- Screed is also heated when diesel engine is running at idle
- Screed heating with electronic temperature control

#### Operator's Platform

- 2 comfortable heated operator's seats, can be pivoted outwards
- Operator's seats and console can be easily and conveniently adjusted for ergonomic working
- Modular ErgoPlus paver operator's console; large high-contrast colour display ensures easy operation and monitoring of paver functions
- 2 ErgoPlus screed consoles for the right and left-hand screed sides, with colour display for setting up and monitoring paver and screed functions

#### Miscellaneous

- Centralized lubrication system for tractor unit with electronic level indication on the display
- Machine documentation
- Crown is set hydraulically

**Price list****SUPER 2003-3i (4f) / VF 600-2 V Extending  
Screed****Scope of supply – basic machine****Drive Unit**

- Liquid-cooled Cummins 6-cylinder diesel engine, QSB6.7-C240, 240 hp (179kW) at 2,000rpm
- Engine complies with the applicable exhaust emission standards of the European Union (COM) 4 and USA (EPA) Tier 4f
- Electronic engine management

**Undercarriage**

- Hydrostatic traction drive (separate drives for powered wheels) with electronic traction control
- 4 front wheels of solid elastic rubber, 540/300-390, mounted on bogies
- 2 powered wheels with tubeless tyres 445/95 R25
- Extremely small outside turning radius to not more than 18 ft. 4 in. (5.6 m) with "Pivot Steer"
- Service brake (multiple-disk brake, hydraulically pressurized) and hydraulically actuated parking brake

**Material Feed, Conveyors and Augers**

- Wide push-rollers, oscillating, can be displaced forwards by 3 in. (75 mm) or 6 in. (150 mm)
- 16.5 tons (15 tonnes) material hopper
- Hopper apron hydraulically operated
- 4 separate hydraulic drives for conveyors and augers
- Mechanical sensors for controlling the conveyors, conveyors can briefly be reversed
- Sonic sensors for controlling the augers
- Augers reversible and hydraulically adjustable in height, complete with limiting plates for auger tunnel and bracing
- Manual auger override
- Automatic filling function for the auger tunnel during breaks in paving
- 3 left hand and 3 right hand 1 ft. (30.5 cm) stackable augers for a total of 6 ft. of augers

**Electrical System**

- On-board voltage 24V

**Screed Heating**

- Three-phase AC generator, oil-cooled with electronic generator management
- Screed is also heated when diesel engine is running at idle
- Screed heating with electronic temperature control

**Operator's Platform**

- 2 comfortable heated operator's seats, can be pivoted outwards
- Operator's seats and console can be easily and conveniently adjusted for ergonomic working
- Modular ErgoPlus paver operator's console; large high-contrast colour display ensures easy operation and monitoring of paver functions
- 2 ErgoPlus screed consoles for the right and left-hand screed sides, with colour display for setting up and monitoring paver and screed functions

**Miscellaneous**

- Centralized lubrication system for tractor unit with electronic level indication on the display
- Machine documentation
- Crown is set hydraulically

Bracket for grade sensor at VF screed, 1 piece		V684_0975_03	USD	591.00
For attachment of a mechanical or sonic grade sensor.				
Bracket for grade sensor at VF screed, 2 pieces		V684_0975_04	USD	1,170.00
Bracket, attachment of grade sensor to screed arm				
Bracket, Attachment of Grade Sensor to Screed Arm, 1 piece		V686_0975_01	USD	553.00
Brackets, Attachment of Grade Sensor to Screed Arm, 2 pieces		V686_0975_02	USD	1,093.00
Variable mechanical grade sensor				
Variable mechanical grade sensor (Dash 3), 1 unit		V680_0975_01	USD	4,256.00
Variable mechanical grade sensor (Dash 3), 2 units		V680_0975_02	USD	8,511.00
Ski 6 ft. 7 in.				
Ski 2m, 1 piece		V689_0975_01	USD	167.00
Ski 2m, 2 pieces		V689_0975_02	USD	347.00
Single-Cell Sonic Sensor				
Single-cell sonic sensor, 1 piece		V681_0975_03	USD	4,474.00
Single-cell sonic sensor, 2 pieces		V681_0975_04	USD	8,949.00
Multi-Cell Sonic Sensor (CAN/Analog)				
Multi-cell sonic sensor (Dash 3), 1 unit		V683_0975_03	USD	5,400.00
Multi-cell sonic sensor (Dash 3), 2 units		V683_0975_04	USD	10,800.00
Big MultiPlex Ski				
Big MultiPlex Ski, 1 piece		V688_0975_03	USD	28,479.00
Big MultiPlex Ski, 2 pieces		V688_0975_04	USD	56,957.00
Big MultiPlex Ski, electronic				
Big MultiPlex Ski, electronic		V687_0975_01	USD	16,547.00
Tractor Unit / Screed Interface				
Screed lock				
Screed lock, manual	Standard	V400_0975_01	USD	-1,273.00
Screed lock, hydraulic		V400_0975_02	USD	0.00
Screed Arm Guidance				
Standard Guide for Screed Arm	Standard	V405_0975_01	USD	0.00
Guide rollers for screed arm		V405_0975_02	USD	1,221.00

Screed Assist				
Screed Assist	Standard	V420_0975_01	USD	0.00
ErgoPlus 3 screed remote controls				
ErgoPlus 3 screed remote controls		V438_0975_01	USD	1,157.00
Others				
Low-emissions package				
EcoPlus low-emissions package	Standard	V202_0975_03	USD	0.00
Traction drive				
Traction drive (6x4)	Standard	V215_0975_02	USD	0.00
Traction drive (6x6)		V215_0975_03	USD	9,964.00
Hydraulic oil				
Hydraulic system filled with mineral oil	Standard	V700_01	USD	0.00
Washdown system				
Washdown system with tank and hose reel	Standard	V705_0975_01	USD	0.00
Tools				
Tools		V715_0975_01	USD	553.00

Maintenance kit, 500 service hours		V734_0975_05	USD	386.00
Maintenance kit, 1,000 service hours		V734_0975_06	USD	707.00

WITOS FleetView Telematics System				
WITOS FleetView telematics system including 3-year operating period	Standard	V777_0975_01	USD	0.00
WITOS FleetView Telematics System. Includes the WITOS TCU control unit and a hybrid antenna (Quadband-GSM, GPS). Includes maintenance fee for the first 3 years after machine goes into service for the first time. (Can be extended after expiry.)				
WIRTGEN GROUP Telematics and On-Site Solutions (WITOS) is the intelligent telematics system from the WIRTGEN GROUP for efficient fleet, service and process management worldwide.				
Screed Options				
Operating Instructions, Screed				
Operating Instructions for Screed, American	Standard	V951_US	USD	0.00
Operating Instructions for Screed, German		V951_DE	USD	0.00
Operating Instructions for Screed, English		V951_EN	USD	0.00
Monitoring system for screed heating				
Without Monitoring System for Screed Heating	Standard	V110_18AB_00	USD	0.00
Monitoring of heating rods		V110_18AB_01	USD	6,094.00
Measuring sensors, screed				
Display of vibration speed		V120_18AB_02	USD	591.00
Heating rod for end gate ski				
Heating rod for end gate ski		V131_18AB_01	USD	1,080.00
Edger plates				
Edger plate, 52°, 1 in., 2 pieces		V132_18AB_01	USD	1,067.00
Edger plate, 52°, 2 in., 2 pieces		V132_18AB_02	USD	1,311.00
Heating rod for edger plate, 2 pieces		V134_18AB	USD	874.00
Angle of attack adjustment				
Angle of attack adjustment, counterclockwise to increase mat thickness	Standard	V150_18AB_01	USD	0.00
Angle of attack adjustment, clockwise to increase mat thickness		V150_18AB_02	USD	0.00
Date: 3/5/2019				

**Price list****SUPER 700-3i (4f) / AB 220 V Extending  
Screed****Scope of supply – basic machine****Drive Unit**

- Liquid-cooled Deutz diesel engine, TCD 2.9 L4, 55.4kW at 2,200 rpm
- Engine complies with the applicable exhaust emission standards of the European Union (COM) 4 and USA (EPA) Tier 4f
- Electronic engine management with ECO mode and variable-speed fan

**Undercarriage**

- Hydrostatic traction drive, closed circuit
- Crawler tracks with rubber pads, ground contact 1500 x 180mm
- Low-maintenance multiple-disk brakes, lock on automatically without oil pressure

**Material Feed, Conveyor and Augers**

- Push-rollers, oscillating, can be displaced forwards by 100mm and folded inwards to the basic width together with the hopper sides
- Hopper capacity 5.8 tonnes, feed height 500mm
- Hopper sides can be folded individually
- 3 separate hydraulic drives for conveyor and augers
- Mechanical sensor for controlling the conveyor
- Conveyor can briefly be reversed
- Augers can be reversed and adjusted in height
- Manual auger override
- Automatic filling of auger tunnel during breaks in paving

**Electrical System**

- On-board voltage 24V
- 4 working lights 24V, two at front, two at rear

**Screed Heating**

- Three-phase AC generator with generator management
- Screed is also heated when diesel engine is running at idle

**Operator's Platform**

- Ergonomically designed operator's workplace; operator stands on the walkway behind the screed, with additional fold-down step for elevated operator position
- Paver operator's ErgoBasic console
- 2 ErgoBasic remote control units for the screeds on the right and left-hand sides

**Miscellaneous**

- Machine documentation

Total price of basic configuration				
Bolt-on extension	Pave width	Generator		Price

## Price list

### SP 15i

#### Scope of supply – basic machine

- Engine: 4-CYLINDER DIESEL ENGINE TYPE DEUTZ TCD 4.1 L4
- Rated power at 2,100 r.p.m.: 95 kW / 127.4 HP / 129.2 PS
- Exhaust standard: EU Stage 4 / US Tier 4f

#### MAIN FRAME

- Sturdy machine frame for accommodating two track units at the front and one track unit at the rear

#### DRIVE UNIT AND HYDRAULIC SYSTEM

- 58 gal / 220 l fuel tank
- 58 gal / 220 l hydraulic oil tank
- Electrical system (24 V)
- Pressure-and-flow-controlled hydraulic pump in the open circuit for driving the track units
- Pressure-and-flow-controlled hydraulic pump in the open circuit for driving the hydraulic or electric vibrators
- Pressure-controlled hydraulic pump in the open circuit for all cylinder functions
- Proportionally controlled hydraulic pump, closed circuit, for driving the auger conveyor or belt conveyor
- Digital control system with LCD display providing the operator with all pertinent information and allowing parameter settings, e.g. free choice of languages (D / GB / F / E / NL), to be made via a menu.
- Proportional electrohydraulic levelling and steering by means of a PLC system including two leveling sensors, two steering sensors and one slope sensor
- Sensor mounting brackets, adjustable in height and range

#### ADVANCE DRIVE

- Three hydraulically driven track units, 4 ft 5 in / 1.34 m long; gear ratio 1:42; including towing device
- Continuously adjustable paving speed from 0 to 49 ft / min / 15 m / min
- Continuously adjustable transport speed from 0 to 115 ft / min / 35 m / min
- Three hydraulic leveling cylinders with a stroke of 3 ft 3 in / 1.00 m
- The rear track unit can be moved along the rear suspension in order to select the most favourable position for the particular application

#### SUSPENSION FOR MOULDS ATTACHED TO THE SIDE

- The offset paving moulds can be mounted on the left or right side of the machine
- The mould mount can be telescoped outwards by 2 ft 3 in / 0.70 m per side

#### MISCELLANEOUS

- Water tank with 42 gal / 160 l capacity and additional water tank with 76 gal / 290 l capacity
- Pre-fitting for installing the WITOS FleetView control unit

- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America** **USD** **297,377.00**

#### Mandatory Options

##### Paint

Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2229554</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2229556</b>	<b>USD</b>	<b>1,425.00</b>
Two-color special painting. Cream color is replaced by two special colors (each RAL acc. to customer request). The complete lower part of the machine is painted in slate gray RAL 7015.	<b>Option</b>	<b>2229557</b>	<b>USD</b>	<b>8,224.00</b>
Multi-color special painting. Cream color is replaced by a maximum of two special colors (RAL acc. to customer request). In addition, the lower part of the machine is painted in one special color (RAL acc. to customer request).	<b>Option</b>	<b>2229558</b>	<b>USD</b>	<b>23,180.00</b>

##### Technical documentation

Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
--	-----------------	----------------	------------	-------------

##### Service documentation

Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
---	-----------------	----------------	------------	-------------

##### Warranty

Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
--	-----------------	---------------	------------	-------------

##### Telematics

WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
---	-----------------	----------------	------------	-------------

##### Trimmer

Trimmer for creating a datum surface before using offset molds. Basic width 2 ft / 0.60 m for mounting on left, material transport to the inside. Diameter 1 ft 8 in / 0.50 m, max. trim depth approx. 0.10 m with	<b>Standard</b>	<b>2133789</b>	<b>USD</b>	<b>0.00</b>
--	-----------------	----------------	------------	-------------

##### Crawler units

Two pivoting front track units (parallelogram arms). The parallelogram arm makes it possible to slew the front track units by 7 in / 180 mm inwards each as well as 2 ft 3 in / 680 mm outwards each	<b>Standard</b>	<b>2133798</b>	<b>USD</b>	<b>0.00</b>
--	-----------------	----------------	------------	-------------

<b>Crawler units</b>				
Three track units fitted with polyurethane track pads	<b>Standard</b>	<b>2487561</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Lighting system consisting of 3 halogen working lights 24 V for illuminating the working area. The light output is approx. 1750 lumens per headlight. For protection against theft, installation is by plug-in tube masts on each of the track units.	<b>Standard</b>	<b>2152687</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 3 LED working lights 24 V for optimum illumination of the working area. Extremely bright light, shock-resistant and durable. The light output is approx. 3000 lumens per headlight. For protection against theft, installation is by plug-in tube masts on the track units.	<b>Option</b>	<b>2342924</b>	<b>USD</b>	<b>1,737.00</b>
<b>Vibration</b>				
Hydraulic vibrator drive for up to 5 vibrators	<b>Standard</b>	<b>2133795</b>	<b>USD</b>	<b>0.00</b>
Hydraulic vibrator, straight	<b>Option</b>	<b>75721</b>	<b>USD</b>	<b>1,294.00</b>
Hydraulic vibrator, bent	<b>Option</b>	<b>75722</b>	<b>USD</b>	<b>1,294.00</b>
<b>Concrete compacting</b>				
Model without vibrator	<b>Standard</b>	<b>2302880</b>	<b>USD</b>	<b>0.00</b>
<b>Concrete feeding</b>				
Belt conveyor 16 ft 1 in / 4.90 m x 2 ft / 0.60 m, with reversible hydraulic drive. Permits lateral turning hydraulically, setting of the pitch angle and traversing in the lengthways direction	<b>Standard</b>	<b>2131799</b>	<b>USD</b>	<b>0.00</b>
Belt conveyor 18 ft 1 in / 5.50 m x 2 ft / 0.60 m in folding design with reversible hydraulic drive. Permits lateral turning hydraulically, setting of the pitch angle and traversing in the lengthways direction as well as the folding procedure.	<b>Option</b>	<b>2152901</b>	<b>USD</b>	<b>17,073.00</b>
Charging auger 15 ft 1 in x 1 ft 4 in with reversible hydraulic drive. Permits lateral turning hydraulically, setting of the pitch angle and traversing in the lengthways direction	<b>Option</b>	<b>2131802</b>	<b>USD</b>	<b>5,809.00</b>
<b>Concrete feeding</b>				
Steel chute for guiding the concrete from the conveyor/auger into the funnel of the offset molds. Attachment option both on the conveyor belt, folding conveyor belt and on the charging auger	<b>Standard</b>	<b>2153567</b>	<b>USD</b>	<b>0.00</b>
Chute consisting of a steel flange and a rubber hose extension for guiding the concrete from the conveyor/auger into the funnel of the offset molds. Attachment option both on the conveyor belt, folding conveyor belt and on the charging auger	<b>Option</b>	<b>2153568</b>	<b>USD</b>	<b>434.00</b>
<b>Concrete molding</b>				
Model without offset molds	<b>Standard</b>	<b>2094303</b>	<b>USD</b>	<b>0.00</b>
Hopper for C&G mold	<b>Option</b>	<b>2150660</b>	<b>USD</b>	<b>2,382.00</b>

Equipment Options				
Chassis options				
Hydraulic positioning feature for the rear track unit out of the middle position by 2 ft 3 in / 0.675 m to the left or right	Standard	2133804	USD	0.00
Equipment operator's platform				
Umbrella for operator's platform	Standard	2153566	USD	0.00
Trimmer equipment				
Trimmer - extension, 8 in wide, for mounting on the left side	Option	2139662	USD	3,257.00
Trimmer - extension, 1 ft 4 in wide, for mounting on the left side	Standard	2139663	USD	0.00
Water system				
Hydraulically operated high-pressure cleaner for connection to the 510 l water tank.	Standard	2133815	USD	0.00
Leveling				
Two slab tracers for one-sided height scanning of existing reference surfaces	Option	87923	USD	529.00
Third height and steering sensor for tight radii, incl. suspension and changeover box	Standard	2134423	USD	0.00
Leveling				
The 3D leveling pre-fitting includes the mechanical and electrical components needed to use a 3D leveling system. Please specify 3D system manufacturer. (Price without startup on the construction site).	Option	2144823	USD	12,391.00
Wirtgen AutoPilot				
AutoPilot 2.0 is a satellite-based navigation system for offset applications. It controls the steering, height and lateral tilt of the machine fully automatically and allows concrete profiles to be paved without stringlines. It does not require a digital terrain model to be created in advance, but is rather created by the user directly on the construction site using the corresponding rover, taking into account constraint points such as water inlets, hydrants, etc. The rover is an intelligent surveying tool that can record, save and edit position data. The objects created are stored on the corresponding tablet computer, which is then mounted on the machine without any further data transmission and provides the machine with the control data. The system is operated in combination with a laser receiver, an ultrasonic sensor, a slab tracer or a total station (tachymeter) for precise height control. Radio frequency: 868 - 870 MHz (e.g. for Europe). Note that application with reduced satellite reception (e.g. in tree-lined avenues, inner-city areas or tunnel constructions) is only possible	Option	2618721	USD	65,061.00

AutoPilot 2.0 is a satellite-based navigation system for offset applications. It controls the steering, height and lateral tilt of the machine fully automatically and allows concrete profiles to be paved without stringlines. It does not require a digital terrain model to be created in advance, but is rather created by the user directly on the construction site using the corresponding rover, taking into account constraint points such as water inlets, hydrants, etc. The rover is an intelligent surveying tool that can record, save and edit position data. The objects created are stored on the corresponding tablet computer, which is then mounted on the machine without any further data transmission and provides the machine with the control data. The system is operated in combination with a laser receiver, an ultrasonic sensor, a slab tracer or a total station (tachymeter) for precise height control. Radio frequency: 902 - 928 MHz (e.g. for USA). Note that application with reduced satellite reception (e.g. in tree-lined avenues, inner-city areas or tunnel constructions) is only possible with	Option	2618722	USD	65,061.00
Purchasing the AutoPilot System 2.0 requires additional customer training. This is charged separately. The requirement for training must be defined more precisely and depends on previous knowledge. Costs can be arranged on request after clarifying the requirements beforehand.	Option	2680909	USD	0.00
<b>Wirtgen AutoPilot</b>				
Self-leveling rotation laser. Wavelength 635 nm (invisible) with 10 rotations per second (for use in combination with a laser receiver).	Option	2201314	USD	5,551.00
Proportional laser receiver for use in combination with a rotation laser with 468.4 ft pds / 635 nm and at least 10 rotations/second. Measuring range 24 in / 60 cm. Receiver including terminals for connecting to the sensor holder of the AutoPilot. The measuring radius of the laser to laser receiver combination is approx. 328 ft 1 in / 100 m.	Option	2201316	USD	10,314.00
Ultrasonic sensor for proximity-type scanning on a homogeneous sub-base. The sensor has 6 individual transponders which perform automatic temperature compensation and averaging for scanning uneven ground or detecting obstacles. The minimum distance from the sub-base is 8 in / 0.20 m, the maximum distance is 3 ft 3 in / 1.00 m.	Option	2201318	USD	4,356.00
Expansion to the elevation control options of the AutoPilot 2.0 with the total station Leica iCON robot 50 – The fully automatic and intuitively operated total station for maximum flexibility with maximum accuracy (0.04 in / 1 mm). The vertically unlimited measuring range has a radius of 656 ft 2 in / 200 m for concrete paving without interruption. The equipment allows precise on-site operation even under difficult weather conditions. Contains the Leica total station incl. tripod, battery and charger, radio transmitter, radio receiver, stand and a 360 degree prism.	Option	2655154	USD	38,624.00

Additional tablet computer used to create the digital stringline and to inspect the objects that have already been concreted. The tablet can also be used as a replacement for the machine. Including all necessary equipment and a robust splash-proof case to safely store the materials.	<b>Option</b>	<b>2657472</b>	<b>USD</b>	<b>7,546.00</b>
<b>Other devices</b>				
Large, spacious storage compartment for storing tools at the rear of the machine instead of the standard storage compartment.	<b>Standard</b>	<b>2553350</b>	<b>USD</b>	<b>0.00</b>
<b>Mold offset</b>				
One set of hydraulic components for telescoping the offset mould mount on left or right by 2 ft 4 in / 0.70 m	<b>Standard</b>	<b>2134425</b>	<b>USD</b>	<b>0.00</b>
Height-adjustable mould mount with 1 ft 4 in / 0.40 m lift for split offset mold	<b>Standard</b>	<b>2134062</b>	<b>USD</b>	<b>0.00</b>
Hydraulically operated quick-change system for connecting an EV offset mold to the machine.	<b>Standard</b>	<b>2134064</b>	<b>USD</b>	<b>0.00</b>
Additional adapter plate for quick-change system. Required for equipping any troughs with the quick-change system.	<b>Option</b>	<b>2342927</b>	<b>USD</b>	<b>1,208.00</b>
Hydraulically operated quick-change system for connecting an AV offset mold to the machine.	<b>Option</b>	<b>2668513</b>	<b>USD</b>	<b>3,149.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/8/2019

## Price list

### SP 25i

#### Scope of supply – basic machine

- Engine station, chassis rear section and telescoping chassis front section in driving direction and three track units
- Diesel engine: DEUTZ TCD 4.1 L4 with 4 cylinders
- Rated power at 2,100 r.p.m.: 115 kW / 154 HP / 156 PS
- Exhaust standard: EU Stage 4 / US Tier 4f

#### MAIN FRAME

- Stable machine frame for attaching two track units at the rear and one or two track units at the front
- Extendable by 2 ft 3 in / 0.70 m in length, in order to allow the machine to adapt to conditions on the construction site or to allow a trimmer set to be fitted.
- Extendable in width by 2 ft 4 in / 0.715 m hydraulically in the area of each rear crawler unit by one or both track units moving out, therefore either the machine stability is improved in the offset process when paving certain profiles, or the machine can be equipped with molds between the rear track units for a working width up to 8 ft 2 in / 2.5 m.

#### DRIVE UNIT AND HYDRAULIC SYSTEM

- 99 gal / 375 l fuel tank.
- 66 gal / 250 l hydraulic oil tank
- Electrical system (24 V)
- Hydraulic pump system
- A hydraulic pump controlled by pressure and delivery flow, open circuit, for driving the hydraulic or electrical vibrators or for driving the track units in 2nd gear.
- A pressure-controlled hydraulic pump, open circuit, for all cylinder functions.
- Proportionally controlled hydraulic pump, closed circuit, for driving the auger conveyor or belt conveyor
- Digital control system with LCD display providing the operator with all pertinent information and allowing parameter settings, e.g. free choice of languages (D / GB / F / E / NL), to be made via a menu.
- Proportional electrohydraulic levelling and steering by means of a PLC system including two leveling sensors, two steering sensors and one slope sensor
- Sensor mounting brackets, adjustable in height and range

#### ADVANCE DRIVE

- Hydraulically driven track units, 5 ft 1 in / 1.56 m long, gear ratio 1:122, including towing device
- Continuously adjustable paving speed from 0 to 49 ft / min / 15 m / min
- Continuously adjustable transport speed from 0 to 115 ft / min / 35 m / min
- Hydraulic levelling cylinders with a stroke of 4 ft 1 in / 1.25 m

**SUSPENSION FOR MOULDS ATTACHED TO THE SIDE**

- The offset paving moulds can be mounted on the left or right side of the machine

**MISCELLANEOUS**

- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America****USD 375,236.00****Mandatory Options****Paint**

Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2229555</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2229559</b>	<b>USD</b>	<b>1,425.00</b>
Two-color special painting. Cream color is replaced by two special colors (each RAL acc. to customer request). The complete lower part of the machine is painted in slate gray RAL 7015.	<b>Option</b>	<b>2229560</b>	<b>USD</b>	<b>8,224.00</b>
Multi-color special painting. Cream color is replaced by a maximum of two special colors (RAL acc. to customer request). In addition, the lower part of the machine is painted in one special color (RAL acc. to customer request).	<b>Option</b>	<b>2229561</b>	<b>USD</b>	<b>23,180.00</b>

**Technical documentation**

Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
--	-----------------	----------------	------------	-------------

**Service documentation**

Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
---	-----------------	----------------	------------	-------------

**Warranty**

Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
--	-----------------	---------------	------------	-------------

**Telematics**

WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
---	-----------------	----------------	------------	-------------

**Crawler units**

4. crawler unit and two pivoting front crawler attachments. The parallelogram arms make it possible to pivot each of the front track units 1 ft 10 in / 560 mm inwards each as well as 2 ft 10 in / 870 mm outwards.	<b>Standard</b>	<b>2492572</b>	<b>USD</b>	<b>0.00</b>
--	-----------------	----------------	------------	-------------

<b>Crawler units</b>				
Four track units fitted with polyurethane track pads	<b>Standard</b>	<b>2487565</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Lighting system consisting of 4 halogen working lights 24 V for illuminating the working area. The light output is approx. 1,750 lumens per headlight. For protection against theft, installation is by plug-in tube masts on each of the track units.	<b>Standard</b>	<b>2152928</b>	<b>USD</b>	<b>0.00</b>
<b>Vibration</b>				
Hydraulic vibrator drive for up to 5 vibrators	<b>Standard</b>	<b>2152471</b>	<b>USD</b>	<b>0.00</b>
<b>Concrete compacting</b>				
Model without vibrator	<b>Standard</b>	<b>2302880</b>	<b>USD</b>	<b>0.00</b>
<b>Concrete feeding</b>				
Belt conveyor 19 ft 8 in x 2 ft, in folding design, with reversible hydraulic drive. Permits lateral turning hydraulically, setting of the pitch angle and traversing in the lengthways direction as well as the folding procedure	<b>Standard</b>	<b>2153770</b>	<b>USD</b>	<b>0.00</b>
<b>Concrete feeding</b>				
Steel chute for guiding the concrete from the conveyor/auger into the funnel of the offset molds. Attachment option both on the conveyor belt, folding conveyor belt and on the charging auger	<b>Standard</b>	<b>2153567</b>	<b>USD</b>	<b>0.00</b>
Chute consisting of a steel flange and a rubber hose extension for guiding the concrete from the conveyor/auger into the funnel of the offset molds. Attachment option both on the conveyor belt, folding conveyor belt and on the charging auger	<b>Option</b>	<b>2153568</b>	<b>USD</b>	<b>434.00</b>
<b>Mold offset</b>				
Hydraulically telescoping suspension for offset molds in one direction, stroke: 3 ft 7 in / 1.10 m	<b>Standard</b>	<b>2146344</b>	<b>USD</b>	<b>0.00</b>
Hydraulically telescoping suspension for offset molds in both directions, stroke: 3 ft 7 in / 1.10 m	<b>Option</b>	<b>2148853</b>	<b>USD</b>	<b>4,736.00</b>
Model without suspension for offset molds.	<b>Option</b>	<b>2425779</b>	<b>USD</b>	<b>-12,608.00</b>
<b>Concrete molding</b>				
Offset molds left or right, for curb edges, hard shoulders, pedestrian and cycle paths up to 2 ft wide (max. height of 1 ft 4 in). (Attention: profile to be created must be specified in form TEI #2170960.)	<b>Standard</b>	<b>2144827</b>	<b>USD</b>	<b>0.00</b>
Model without offset molds	<b>Option</b>	<b>2094303</b>	<b>USD</b>	<b>-8,740.00</b>

Equipment Options				
Chassis options				
The sliding piece mounted between the chassis and front crawler unit connection makes it possible to move the front track units sideways by 1.40 m in relation to the machine chassis. It is used for stabilizing the machine in large offset applications.	Option	2163878	USD	15,078.00
Chassis options				
Frame extension elements for the two rear track units, required to be able to mount molds between 8 ft 2 in / 2.50 m and 11 ft 6 in / 3.50 m.	Option	2153632	USD	10,111.00
Frame extension elements for the two front track units, required when using molds between 8 ft 2 in / 2.50 m and 11 ft 6 in / 3.50 m in conjunction with previously laid reinforcement.	Option	2225029	USD	7,152.00
Equipment operator's platform				
Umbrella for operator's platform	Standard	2153630	USD	0.00
Lateral spreader auger				
Lateral spreading auger, length 8 ft 2 in / 2.5 m, ø 1 ft 4 in / 0.4 m, stroke 2 ft / 0.6 m, hydraulic drive, loading from right or left, recommended with crash barrier trough, necessary for crash barrier trough and trimmer insert	Option	2153642	USD	20,357.00
Trimmer equipment				
Trimmer for creating a datum surface before using offset molds. Basic width 2 ft / 0.60 m for mounting on left, material transport to the inside. Diameter 1 ft 8 in / 0.50 m, max. trim depth approx. 0.10 m with scraper. (Trimmer completely hydraulically adjustable in height through 1 ft 4 in / 0.40 m and side-to-side through 4 ft 3 in / 1.30 m.) Trimmer widening up to max. 5 ft 3 in / 1.60 m possible. For curb, curb gutter and rectangular profiles.	Option	2145133	USD	57,461.00
Trimmer for creating a datum surface before using offset molds. Basic width 2 ft / 0.60 m for mounting on right, material transport to the inside. Diameter 1 ft 8 in / 0.50 m, max. trim depth approx. 0.10 m with scraper. (Trimmer completely hydraulically adjustable in height through 1 ft 4 in / 0.40 m and side-to-side through 4 ft 3 in / 1.30 m.) Trimmer widening up to max. 5 ft 3 in / 1.60 m possible. For curb, curb gutter and rectangular profiles.	Option	2145134	USD	57,081.00
Water system				
High-pressure water cleaning system for optimum cleaning of the machine. Consisting of a hydraulically driven pump with a flow rate of 20 l/min at a pressure of 200 bar, a plastic tank with a capacity of 154 gal / 550 litres, a 49 ft 3 in / 15 m long hose and a spray gun with a handle. The water tank is located on one of the machine's front chassis columns, and includes a foldable attached ladder for filling the tank from above.	Option	2638074	USD	9,527.00

<b>Leveling</b>				
Two slab tracers for one-sided height scanning of existing reference surfaces	<b>Option</b>	<b>87923</b>	<b>USD</b>	<b>529.00</b>
Third height and steering sensor for tight radii, incl. suspension and changeover box	<b>Option</b>	<b>2163871</b>	<b>USD</b>	<b>5,089.00</b>
<b>Leveling</b>				
The 3D leveling pre-fitting includes the mechanical and electrical components needed to use a 3D leveling system. Please specify 3D system manufacturer. (Price without startup on the construction site).	<b>Option</b>	<b>2144823</b>	<b>USD</b>	<b>12,391.00</b>
<b>Wirtgen AutoPilot</b>				
AutoPilot 2.0 is a satellite-based navigation system for offset applications. It controls the steering, height and lateral tilt of the machine fully automatically and allows concrete profiles to be paved without stringlines. It does not require a digital terrain model to be created in advance, but is rather created by the user directly on the construction site using the corresponding rover, taking into account constraint points such as water inlets, hydrants, etc. The rover is an intelligent surveying tool that can record, save and edit position data. The objects created are stored on the corresponding tablet computer, which is then mounted on the machine without any further data transmission and provides the machine with the control data. The system is operated in combination with a laser receiver, an ultrasonic sensor, a slab tracer or a total station (tachymeter) for precise height control. Radio frequency: 902 - 928 MHz (e.g. for USA). Note that application with reduced satellite reception (e.g. in tree-lined avenues, inner-city areas or tunnel constructions) is only possible with limitations.	<b>Option</b>	<b>2618727</b>	<b>USD</b>	<b>65,061.00</b>
<b>Wirtgen AutoPilot</b>				
Self-leveling rotation laser. Wavelength 635 nm (invisible) with 10 rotations per second (for use in combination with a laser receiver).	<b>Option</b>	<b>2201314</b>	<b>USD</b>	<b>5,551.00</b>
Proportional laser receiver for use in combination with a rotation laser with 468.4 ft pds / 635 nm and at least 10 rotations/second. Measuring range 24 in / 60 cm. Receiver including terminals for connecting to the sensor holder of the AutoPilot. The measuring radius of the laser to laser receiver combination is approx. 328 ft 1 in / 100 m.	<b>Option</b>	<b>2201316</b>	<b>USD</b>	<b>10,314.00</b>
Ultrasonic sensor for proximity-type scanning on a homogeneous sub-base. The sensor has 6 individual transponders which perform automatic temperature compensation and averaging for scanning uneven ground or detecting obstacles. The minimum distance from the sub-base is 8 in / 0.20 m, the maximum distance is 3 ft 3 in / 1.00 m.	<b>Option</b>	<b>2201318</b>	<b>USD</b>	<b>4,356.00</b>

Expansion to the elevation control options of the AutoPilot 2.0 with the total station Leica iCON robot 50 – The fully automatic and intuitively operated total station for maximum flexibility with maximum accuracy (0.04 in / 1 mm). The vertically unlimited measuring range has a radius of 656 ft 2 in / 200 m for concrete paving without interruption. The equipment allows precise on-site operation even under difficult weather conditions. Contains the Leica total station incl. tripod, battery and charger, radio transmitter, radio receiver, stand and a 360 degree prism.	<b>Option</b>	<b>2655154</b>	<b>USD</b>	<b>38,624.00</b>
Additional tablet computer used to create the digital stringline and to inspect the objects that have already been concreted. The tablet can also be used as a replacement for the machine. Including all necessary equipment and a robust splash-proof case to safely store the materials.	<b>Option</b>	<b>2657472</b>	<b>USD</b>	<b>7,546.00</b>
<b>Concrete molding</b>				
Paving mold series 1200i without central crown, basic width 3.0 ft consisting of: Vibrator mount, forming sole with "edge slump control" (ESC). Working widths up to 12 ft are possible using optional expansion pieces.	<b>Option</b>	<b>2372368</b>	<b>USD</b>	<b>30,400.00</b>
<b>Concrete molding</b>				
Paving mold series 1200i - extension element 1.0 ft wide	<b>Option</b>	<b>2372017</b>	<b>USD</b>	<b>3,691.00</b>
Paving mold series 1200i - extension element 1.5 ft wide	<b>Option</b>	<b>2372018</b>	<b>USD</b>	<b>4,166.00</b>
Paving mold series 1200i - extension element 2.0 ft wide	<b>Option</b>	<b>2372019</b>	<b>USD</b>	<b>4,546.00</b>
Paving mold series 1200i - extension element 3.0 ft wide	<b>Option</b>	<b>2425755</b>	<b>USD</b>	<b>5,401.00</b>
Configuration with suspension for paving mold with a working width of more than 6.0 ft.	<b>Option</b>	<b>2372475</b>	<b>USD</b>	<b>3,244.00</b>
<b>Spreading auger</b>				
Spreading auger - without central crown, basic width 1.83 m / 6 ft, hydraulic drive with reversible sense of rotation, ø 400 mm / 15 3/4 in - in conjunction with molds with 1.83 m / 6 ft width (basic molds + extension elements). Recommended with concrete placed in advance.	<b>Option</b>	<b>2226583</b>	<b>USD</b>	<b>20,398.00</b>
<b>Extensions for spreader auger</b>				
Spreading auger - extension element 1.00 ft, right-hand pitch	<b>Option</b>	<b>2226586</b>	<b>USD</b>	<b>1,113.00</b>
Spreading auger - extension element 1.50 ft, right-hand pitch	<b>Option</b>	<b>2233461</b>	<b>USD</b>	<b>1,479.00</b>
Spreading auger - extension element 2.00 ft, right-hand pitch	<b>Option</b>	<b>2226587</b>	<b>USD</b>	<b>1,601.00</b>
Spreading auger - extension element 3.00 ft, right-hand pitch	<b>Option</b>	<b>2425757</b>	<b>USD</b>	<b>1,886.00</b>

<b>Metering gates</b>				
Metering gate for molds 3.00 ft. The metering gate regulates the concrete level in the compaction compartment.	Option	2229398	USD	1,696.00
<b>Additional vibrator drives</b>				
Extension of the hydraulic vibrator drive by another max. 5 pcs. vibrators to a total of 10 hydraulic vibrator drives. The frequency of each vibrator can be adjusted separately.	Option	2152473	USD	3,162.00
<b>Additional vibrators</b>				
Hydraulic vibrator, straight	Option	75721	USD	1,294.00
Hydraulic vibrator, bent	Option	75722	USD	1,294.00
<b>Grout box auger USA</b>				
Grout box auger basic width 6 ft for use without central crown, incl. one hydraulic drive. For distributing the sludge within the compaction compartment. Supplied expansion pieces allow the working width to be reduced to 5 ft. Working widths up to 12 ft are possible using optional expansion pieces.	Option	2372038	USD	9,676.00
<b>Tamper USA</b>				
Tamper bar basic width 6 ft for use without central crown, incl. one hydraulic drive. For optimally incorporating the coarser components under the surface of the concrete. Working widths up to 12 ft are possible using optional expansion pieces. No reinstallation on working widths less than 6ft.	Option	2372031	USD	4,506.00
<b>Super smoother</b>				
Super smoother - basic width 2.00 m / 6.0 ft with controllable hydraulic drive, smoother length 3.00 m / 10 ft. Working widths up to 3.50 m / 12 ft are possible using optional expansion pieces.	Option	2215757	USD	37,036.00
<b>Offset molds</b>				
Offset molds left or right, for curb edges, hard shoulders, pedestrian and cycle paths up to 2 ft wide (max. height of 1 ft 4 in). (Attention: profile to be created must be specified in form TEI #2170960.)	Option	2144827	USD	8,754.00
<b>Mold offset</b>				
Hydraulically operated quick-change system for connecting an EV offset mold to the machine.	Option	2191407	USD	4,343.00
<b>Sideplates for offset moulds</b>				
One set of hydraulic components for adjusting the side plates of an EV offset mold	Option	2134795	USD	5,225.00
<b>Stringline tensioning system</b>				
Stringline tensioning system consisting of 3280 ft 10 in wire rope, 1x tensioning winch, 200 steel pins with leveling wire suspension, adjustable in height and range	Option	55987	USD	3,990.00
Second tensioning winch for leveling the machine using two steel wire ropes	Option	79802	USD	882.00

Stringline tensioning system consisting of 4 x 984 ft / 4 x 300 m nylon rope, 4x tensioning winches, 200 posts, 200 rods, 200 clamps	<b>Option</b>	<b>2153800</b>	<b>USD</b>	<b>6,148.00</b>
Fibreglass rod as stringline replacement on corners with different radii, consisting of 196 ft 10 in fiberglass rod in 6 ft 7 in pieces, 50 clips for rod mounting and 15 connection pieces	<b>Option</b>	<b>2153801</b>	<b>USD</b>	<b>1,411.00</b>
<b>Export packaging</b>				
Export packaging	<b>Option</b>	<b>2163870</b>	<b>USD</b>	<b>3,013.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list

### SW 16 MC (3 axle)

#### Scope of supply – basic machine

- Container with a capacity of 565 ft<sup>3</sup> / 16 m<sup>3</sup>, internal stiffeners and lockable side doors
- Volumetric dosing, fully automatic and independent of the transport speed
- Pneumatic filling devices on both container sides with connection coupling, shut-off cock and ventilation valve
- Large ventilation pipe
- Display for "Container full" and "empty" by a visual signal
- Sensor-controlled chain conveyor made of drop-forged chain links and transport strips, 3 ft 1 in / 950 mm wide
- Hydraulic shut-off valve for sealing the container when filling, controlled by on-board electronics
- Filling chute with 2 integrated horizontal augers that are controlled automatically by a sensor
- On-board computer consisting of a programmable logic controller and a control terminal in the cab with color display. This unit permits exact output of the preselected spreading quantity in kg/m<sup>2</sup>, even at different transport speeds
- Closed on-board hydraulic with integrated hydraulic oil cooling
- Auxiliary frame produced especially for the particular carrier vehicle
- Safety acceptance by the employers' professional liability insurance association
- Collecting trough and suspended weigher for checking the weights
- Technical documentation, 2 copies on paper and on USB stick

List price ex subsidiary Wirtgen America

USD 150,643.00

Mandatory Options				
Chassis variants				
Binder spreading superstructure without carrier vehicle. Customer provides a suitable carrier vehicle. Attention: The customer must fill in the Streumaster "Truck specifications" form and submit it with the order confirmation. The superstructure is delivered without rear lighting equipment and reversing alert if they are not originally present on the truck. (S032794)	Standard	2350866	USD	0.00
Crawler units				
Front axle tyres 315/80 R22.5. Rear axle tyres 385/65 R22.5 (S041149)	Standard	2542312	USD	0.00
Installation				
Final assembly is carried out by the customer independently. The spreading tank is connected by the customer to the pre-existing or additionally ordered carrier vehicle. (S036175)	Standard	2418563	USD	0.00
Installation in the factory Streumaster (S015736)	Option	2078237	USD	8,374.00
Paint				
Standard paint: Container in cream (RAL 9001), lower part of the machine and spreading mechanism in slate grey (RAL 7015). (S015771)	Standard	2078241	USD	0.00
Single-color special paint. Cream color is replaced by a special color (RAL acc. to customer request). (S015772)	Option	2078243	USD	3,936.00
Warranty				
Standard warranty 12 months or 1000 operational hours. (S032834)	Standard	2352900	USD	0.00
On-board hydraulics drive				
Drive of the entire spreader hydraulics driven by hydraulic pump via the auxiliary drive of the carrier vehicle (800- 2,500 1/min) (S032772)	Standard	2349726	USD	0.00
Auxiliary diesel engine 12 volts. Use of the auxiliary diesel engine means the spreader operates fully independently of the carrier or towing vehicle. The engine has a power of 48.6 kW at 2,700 r.p.m. It includes an enclosure and comes with a hydraulic pump for operating the on-board hydraulic system on the spreader device. Includes brackets, holding devices, a diesel tank and a complete installation on the spreading grit container. Emission level EU Stage 3b / US Tier 4f. Country-specific specifications are to be taken into account. (S047244)	Option	2671245	USD	35,150.00

<b>Road traffic registration</b>				
Machine not authorised for public roads - the binder spreader is not authorised for driving on public roads. The vehicle is not allowed to be driven to or from the field under its own power. (S032775)	<b>Standard</b>	<b>2349729</b>	<b>USD</b>	<b>0.00</b>
<b>Binder filling</b>				
The pneumatic filling device size R 3" is used for filling the binder spreader. It is supplied with connection coupling, shut-off valve, stone screen and ventilation valve. (S025180)	<b>Standard</b>	<b>2230267</b>	<b>USD</b>	<b>0.00</b>
The high-speed filling device size R 4" is used for faster filling of the binder container. It is supplied with a connector coupling, shut-off valve, stone screen, ventilation valve and R3" adapter (only supplied with Guillemín or Storz couplings). (S025145)	<b>Option</b>	<b>2290094</b>	<b>USD</b>	<b>2,836.00</b>
The filling device size R 5" is used for faster filling of the binder container. It is supplied with connection coupling, shut-off valve, ventilation valve. (S037287)	<b>Option</b>	<b>2489219</b>	<b>USD</b>	<b>3,257.00</b>
<b>Binder distribution</b>				
Double-sided hydraulic chain conveyor drive for reliable and economical operation (S030072)	<b>Standard</b>	<b>2293650</b>	<b>USD</b>	<b>0.00</b>
<b>Binder spreader</b>				
Equipment of the machine with a universal spreading mechanism type DN 230-10 for soil stabilization or cold recycling - working width 7 ft 9 in / 2.36 m. The spreading material is output using a flexible rotary valve (10 cells). The metering feeders are self-cleaning. The working width is divided into three power-switchable subsections from 2 ft 8 in to 7 ft 9 in / 0.82 to 2.36 m. The output quantity at a transport speed of 1.2 mph / 2 km/h is approx. 0.6 lb/ft² to 8.6 lb/ft² / 3 to 42 kg/m² (assuming a bulk weight of 8.3 lbs per gal / 1.00 kg per liter). (S032798)	<b>Standard</b>	<b>2351768</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment Options</b>				
<b>Exhaust air filter</b>				
The hose filter minimizes dust pollution when filling the container. The hose filter including connection hose to the connection port is supplied with bleeding and filter connection port as well as a blow-off flap on the container. (S027925)	<b>Option</b>	<b>2260768</b>	<b>USD</b>	<b>2,850.00</b>
The dust separation filter is used for filtering the waste air and reducing dust levels during the filling procedure. It consists of 6 filter elements for an air flow rate of 20,400 m³/h / 720,419 cu ft/h in total, an automatic purification system with electromagnetic control as well as a lockable, folding cover panel. - The compressed air supply must be from the carrier or towing vehicle - (S018949)	<b>Option</b>	<b>2201451</b>	<b>USD</b>	<b>6,989.00</b>

Dust collection system with compressor for filtering the waste air and reducing dust levels during the filling process. The system consists of 6 filter elements for a total air flow rate of 20,400 m <sup>3</sup> /h , an automatic purification system with electromagnetic control as well as a lockable, folding cover panel. - Compressed air is supplied via a separate compressor mounted on the binder spreader (HK450) (S041150)	<b>Option</b>	<b>2542341</b>	<b>USD</b>	<b>16,204.00</b>
<b>Machine lighting</b>				
Working headlights with LED technology (4 pcs.) for illuminating the complete working area. All headlights are switched using the control terminal in the cab of the carrier or tractor vehicle. 2 headlights are mounted on the rear wall of the container and 1 headlight each on the right and left sides of the container. (S018581)	<b>Option</b>	<b>2173033</b>	<b>USD</b>	<b>2,253.00</b>
<b>Printer</b>				
The needle printer is used for printing out all important working values. The data can be printed conveniently at adjustable intervals. (S015755)	<b>Option</b>	<b>2078248</b>	<b>USD</b>	<b>1,276.00</b>
<b>Camera system</b>				
The monitor system mounted on the rear of the vehicle is used for monitoring the working area at the rear. The pictures from the camera are displayed on a separate 7-inch color monitor in the cab. (S015819)	<b>Option</b>	<b>2125804</b>	<b>USD</b>	<b>3,501.00</b>
<b>Weighing system</b>				
Equipment of the machine with the active weighing device "Weightronic". For highly precise application of binder. Consisting of 4 weighing cells mounted between the frame and the binder container. The required spreading quantity is set using a separate control display. With the Weightronic, there is a continuous comparison between the actual and nominal values during spreading. Subsequent control of the spreading quantity is performed continuously and fully automatically. This means incorrect operation is almost excluded.(S032780)	<b>Option</b>	<b>2349725</b>	<b>USD</b>	<b>16,041.00</b>

<b>Compressed air system</b>				
High-performance air compressor (8,000 liters/minute / 2113 gal/minute at max. 2 bar) incl. 15-meter / 50 ft high-pressure hose, hose roller and compressed air lance. For filling the binder spreader from an upright silo without its own compressor system, or for cleaning purposes. Drive via the machine hydraulics of the binder spreader. Not in conjunction with water misting system and compressor HK450. (S036499)	<b>Option</b>	<b>2418729</b>	<b>USD</b>	<b>25,256.00</b>
<b>Other devices</b>				
Side underbody guard on both sides with fastening components for the truck. This is required, for example, for the authorization for driving on public roads. (S015793)	<b>Option</b>	<b>2078255</b>	<b>USD</b>	<b>2,009.00</b>
Long fenders for tandem axle with fixation parts. These are required, for example, for the authorization for driving on public roads. The wheel cover is also used as splash protection for the machine (S015794)	<b>Option</b>	<b>2078256</b>	<b>USD</b>	<b>3,203.00</b>
<b>Other devices</b>				
The storage compartments on the side with 2 lockable sheet metal doors on each side of the container offer enough room for carrying tools and implements for daily on-site operation securely and close to hand on the binder spreader. Gas springs support the opening and closing of the doors. (S015820)	<b>Option</b>	<b>2125805</b>	<b>USD</b>	<b>9,446.00</b>
<b>Vehicles and auxiliary equipment</b>				
Filling chute for binder spreader device in truck with frame overhang (at least 1500 mm / 59 in). Truck must be equipped with trailer coupling, compressed air lines and electrical power cables with a 24 volt, 7-pin socket. Only in conjunction with DN230 (S039159)	<b>Option</b>	<b>2485557</b>	<b>USD</b>	<b>1,954.00</b>
Hydraulic connections on the frame extension for operating the drive-up ramps of a low-loader, incorporated in the hydraulic system of the spreading. - Only possible with truck frame extension - (S015822)	<b>Option</b>	<b>2089912</b>	<b>USD</b>	<b>1,113.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>
Date: 3/6/2019

## Price list

### SW 16 TC

#### Scope of supply – basic machine

- High-performance binder spreader for soil stabilization and cold recycling as a trailer with tandem axle
- Volumetric dosing, fully automatic and independent of the transport speed
- Container with a capacity 18 m<sup>3</sup>, internal stiffeners and lockable side doors
- Pneumatic filling devices on both container sides with connection coupling, shut-off cock and ventilation valve
- Large ventilation pipe
- Display for "Container full" and "empty" by a visual signal
- Sensor-controlled chain conveyor made of drop-forged chain links and transport strips, 3 ft 1 in / 950 mm wide
- Hydraulic shut-off valve for sealing the container when filling, controlled by on-board electronics
- Filling chute with 2 integrated horizontal augers that are controlled automatically by a sensor
- On-board computer consisting of a programmable logic controller and a control terminal in the cab with color display. This unit permits exact output of the preselected spreading quantity in kg/m<sup>2</sup>, even at different transport speeds
- Closed on-board hydraulic with integrated hydraulic oil cooling
- Tandem-axle chassis with spring-loaded drawbar
- Manual parking brake
- Hydraulic support foot with hand pump
- Safety acceptance by the employers' professional liability insurance association
- Collecting trough and suspended weigher for checking the weights
- Technical documentation, 2 copies on paper and on USB stick

**List price ex subsidiary Wirtgen America****USD 227,525.00**

Mandatory Options				
Paint				
Standard paint: Container in cream (RAL 9001), lower part of the machine and spreading mechanism in slate grey (RAL 7015). (S015771)	Standard	2078241	USD	0.00
Single-color special paint. Cream color is replaced by a special color (RAL acc. to customer request). (S015772)	Option	2078243	USD	3,936.00
Warranty				
Standard warranty 12 months or 1000 operational hours. (S032834)	Standard	2352900	USD	0.00
On-board hydraulics drive				
Drive of the complete spreading hydraulics driven by hydraulic pump via the power take-off shaft of the tractor vehicle (1000 r.p.m.) (S036174)	Standard	2418567	USD	0.00
Auxiliary diesel engine 12 volts. Use of the auxiliary diesel engine means the spreader operates fully independently of the carrier or towing vehicle. The engine has a power of 48.6 kW at 2,700 r.p.m. It includes an enclosure and comes with a hydraulic pump for operating the on-board hydraulic system on the spreader device. Includes brackets, holding devices, a diesel tank and a complete installation on the spreading grit container. Emission level EU Stage 3b / US Tier 4f. Country-specific specifications are to be taken into account. (S047244)	Option	2671245	USD	35,150.00
Drive adaptations				
The wide-angle cardan shaft is used for spreading drive and is provided for a 1-3/8", 6-spline connection to the traction vehicle (truck). It offers good mobility for cornering, a high transmission power and economy during everyday use. (S015795)	Standard	2078771	USD	0.00
The wide-angle cardan shaft is used for spreader drive and is provided for a 1-3/4", 6-spline connection to the traction vehicle (truck). It offers good mobility for cornering, a high transmission power and economy during everyday use. (S015796)	Option	2078772	USD	190.00
The wide-angle cardan shaft is used for spreader drive and is provided for a 1-3/4", 20-spline connection to the traction vehicle (truck). It offers good mobility for cornering, a high transmission power and economy during everyday use. (S015797)	Option	2078773	USD	190.00
Trailer drawbar				
Low-mounting towing device (Hitch type) with drawbar eye 50 mm diameter. The low mounting offers a higher vertical load, better traction and driving stability. (S015784)	Standard	2078761	USD	0.00
Low-mounting towing device (Hitch type) with hitch ball towing system K 80 (diameter 3 in / 80 mm). The low mounting offers a higher vertical load, better traction and driving stability. (S015786)	Option	2094658	USD	556.00
Road traffic registration				

Machine not authorised for public roads - the binder spreader is not authorised for driving on public roads. The vehicle is not allowed to be driven to or from the field under its own power. (S032775)	<b>Standard</b>	<b>2349729</b>	<b>USD</b>	<b>0.00</b>
The data confirmation can be used as a basis for road approval in the corresponding country of use. (S047245)	<b>Option</b>	<b>2670902</b>	<b>USD</b>	<b>1,126.00</b>
<b>Brake system</b>				
Hydraulic brake system - If you are considering use on the public roads, please bear in mind the road traffic registration regulations in the country where the machine will be used when you select the brake system. (S015782)	<b>Standard</b>	<b>2078886</b>	<b>USD</b>	<b>0.00</b>
Compressed air dual-circuit brake system with manual controller - If you are considering use on the public roads, please bear in mind the road traffic registration regulations in the country where the machine will be used when you select the brake system. (S015783)	<b>Option</b>	<b>2078887</b>	<b>USD</b>	<b>2,348.00</b>
Combination brake system comprising a hydraulic brake and a compressed air brake. For maximum flexibility in selecting the tractor vehicle. - If you are considering use on the public roads, please bear in mind the road traffic registration regulations in the country where the machine will be used when you select the brake system. (S034601)	<b>Option</b>	<b>2418562</b>	<b>USD</b>	<b>7,152.00</b>
<b>Crawler units</b>				
Low-pressure tyres 700/50-26.5 with an outside diameter of 1,350 mm. The total width of the spreader is 2,760 mm. (S018096)	<b>Standard</b>	<b>2671170</b>	<b>USD</b>	<b>0.00</b>
Low-pressure tyres 800/40-26.5 with an outside diameter of 1,350 mm. The wide ground contact area of the tyres makes them ideal for difficult ground. The total width of the spreader is 2,960 mm. (S015792)	<b>Option</b>	<b>2078889</b>	<b>USD</b>	<b>2,239.00</b>
<b>Binder filling</b>				
The high-speed filling device size R 4" is used for faster filling of the binder container. It is supplied with a connector coupling, shut-off valve, stone screen, ventilation valve and R3" adapter (only supplied with Guillemín or Storz couplings). (S025145)	<b>Standard</b>	<b>2290094</b>	<b>USD</b>	<b>0.00</b>
The filling device size R 5" is used for faster filling of the binder container. It is supplied with connection coupling, shut-off valve, ventilation valve. (S037287)	<b>Option</b>	<b>2489219</b>	<b>USD</b>	<b>3,257.00</b>
<b>Binder distribution</b>				
Double-sided hydraulic chain conveyor drive for reliable and economical operation (S030072)	<b>Standard</b>	<b>2293650</b>	<b>USD</b>	<b>0.00</b>
The OptiPower chain conveyor drive is ideal for heavy binders. Two variable hydraulic motors and planetary gearboxes achieve an increased level of traction and a high conveying rate during binder transport. (S028086)	<b>Option</b>	<b>2293651</b>	<b>USD</b>	<b>8,048.00</b>
<b>Binder spreader</b>				

Equipment of the machine with a universal spreading mechanism type DN 230-10 for soil stabilization or cold recycling - working width 7 ft 9 in / 2.36 m. The spreading material is output using a flexible rotary valve (10 cells). The metering feeders are self-cleaning. The working width is divided into three power-switchable subsections from 2 ft 8 in to 7 ft 9 in / 0.82 to 2.36 m. The output quantity at a transport speed of 1.2 mph / 2 km/h is approx. 0.6 lb/ft² to 8.6 lb/ft² / 3 to 42 kg/m² (assuming a bulk weight of 8.3 lbs per gal / 1.00 kg per liter). (S032798)	<b>Standard</b>	<b>2351768</b>	<b>USD</b>	<b>0.00</b>
<b>Additional devices</b>				
The vehicle is delivered without fenders. Please note that fenders must be fitted if an approval for driving on public roads is planned. (S047241)	<b>Standard</b>	<b>2671293</b>	<b>USD</b>	<b>0.00</b>
Long fenders for tandem axle with fixation parts. These are required, for example, for the authorization for driving on public roads. The wheel cover is also used as splash protection for the machine (S015794)	<b>Option</b>	<b>2078256</b>	<b>USD</b>	<b>3,203.00</b>
<b>Equipment Options</b>				
<b>Exhaust air filter</b>				
Dust collection system with compressor for filtering the waste air and reducing dust levels during the filling process. The system consists of 6 filter elements for a total air flow rate of 20,400 m³/h , an automatic purification system with electromagnetic control as well as a lockable, folding cover panel. - Compressed air is supplied via a separate compressor mounted on the binder spreader (HK450) (S041150)	<b>Standard</b>	<b>2542341</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Working headlights with LED technology (4 pcs.) for illuminating the complete working area. All headlights are switched using the control terminal in the cab of the carrier or tractor vehicle. 2 headlights are mounted on the rear wall of the container and 1 headlight each on the right and left sides of the container. (S018581)	<b>Standard</b>	<b>2173033</b>	<b>USD</b>	<b>0.00</b>

<b>Printer</b>				
The needle printer is used for printing out all important working values. The data can be printed conveniently at adjustable intervals. (S015755)	<b>Option</b>	<b>2078248</b>	<b>USD</b>	<b>1,276.00</b>
<b>Camera system</b>				
The monitor system mounted on the rear of the vehicle is used for monitoring the working area at the rear. The pictures from the camera are displayed on a separate 7-inch color monitor in the cab. (S015819)	<b>Option</b>	<b>2125804</b>	<b>USD</b>	<b>3,501.00</b>
<b>Weighing system</b>				
Equipment of the machine with the active weighing device "Weightronic". For highly precise application of binder. Consisting of 4 weighing cells mounted between the frame and the binder container. The required spreading quantity is set using a separate control display. With the Weightronic, there is a continuous comparison between the actual and nominal values during spreading. Subsequent control of the spreading quantity is performed continuously and fully automatically. This means incorrect operation is almost excluded.(S032780)	<b>Standard</b>	<b>2349725</b>	<b>USD</b>	<b>0.00</b>
<b>Compressed air system</b>				
High-performance air compressor (8,000 liters/minute / 2113 gal/minute at max. 2 bar) incl. 15-meter / 50 ft high-pressure hose, hose roller and compressed air lance. For filling the binder spreader from an upright silo without its own compressor system, or for cleaning purposes. Drive via the machine hydraulics of the binder spreader. Not in conjunction with water misting system and compressor HK450. (S036499)	<b>Option</b>	<b>2418729</b>	<b>USD</b>	<b>25,256.00</b>
<b>Other devices</b>				
The storage compartments on the side with 3 lockable sheet metal doors on each side of the container offer enough room for carrying tools and implements for daily on-site operation securely and close to hand on the binder spreader. Gas springs support the opening and closing of the doors. (S015821)	<b>Standard</b>	<b>2125806</b>	<b>USD</b>	<b>0.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>68.00</b>

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list

# W 100 Cfi - FCS

### Scope of supply – basic machine

- Engine: 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSL9 C-300
- Rated engine power 2100 r.p.m.: 248 kW / 333 HP / 337 PS
- Maximum power at 1900 r.p.m.: 257 kW / 345 HP / 350 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 3 ft 3 in / 1000 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Mechanically opening engine cowling with noise insulation
- Radiator with temperature-dependent fan speed
- Highly effective noise insulation throughout the engine compartment
- Automatic engine speed control depending on driving situation
- Elastically mounted engine station with low vibration and low noise

### MILLING DRUM HOUSING

- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Hydraulically operated scraper with mechanical locking

### LOADING OF MILLED MATERIAL

- Discharge conveyor slewing angle left 60 degrees – right 60 degrees
- Two slewing speeds on the hydraulically foldable discharge conveyor with an adjustable conveying speed for precise loading

### MACHINE CONTROL AND LEVELLING SYSTEM

- Digital milling depth indicator in the machine control display
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- Precise machine height adjustment in 1 or 5 mm steps on the main control panel of the machine
- Digital load control, manual engageable, hydraulic differential lock (by flow distributor)

### OPERATOR'S PLATFORM

- Hydraulically extending operator's platform for optimum visibility of the working area
- Steering console with adjustable rake and reach for ideal adaptation of the operator's platform to the operator
- Slender machine design permits unobstructed view of the milled edge as well as the working area in front of the milling drum on the right
- Conveniently accessible ladder/footstep to the operator's platform with night-time lighting and especially low bottom edge of the latter/footstep
- Robust anti-vandalism protection for the controls
- Mirror package comprising rear-view mirrors at front left and right as well as a forward-pointing mirror at the left of the operator's platform

- Reversing horn with clear audible signal
- Illuminated control panel / nighttime design
- Scraper height is shown on the display

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Hydraulic height adjustment of the front and rear track units at two speeds

#### **MISCELLANEOUS**

- Large tool package
- Device for towing away
- Generously sized water and diesel tanks
- Extensive safety package with several EMERGENCY STOP switches
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 581,861.00**

<b>Mandatory Options</b>				
<b>Exhaust Gas After Treatment</b>				
Exhaust after-treatment by diesel oxidation catalytic converter DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Without diesel particulate filter.	<b>Standard</b>	<b>2490138</b>	<b>USD</b>	<b>0.00</b>
Exhaust after-treatment by diesel oxidation catalyst DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Additionally equipped with diesel particulate filter (DPF) - for operation e.g. in halls or in environmental zones with limited fine dust emission.	<b>Option</b>	<b>2490139</b>	<b>USD</b>	<b>13,504.00</b>
<b>Crawler units</b>				
Configuration with 4 driven track units. The two front track units are steered. The crawler unit at the rear right is hydraulically slewing and also steers. Traveling speed max. 3.6 mph / 5.8 km/h.	<b>Standard</b>	<b>2490142</b>	<b>USD</b>	<b>0.00</b>
<b>Milling drum housing</b>				
Wear-resistant milling drum housing FB1000 (3 ft 3 in) FCS with pre-fitting enabling a quick and easy change of the milling drums with varying spacings and milling widths, without milling drum.	<b>Standard</b>	<b>2336166</b>	<b>USD</b>	<b>0.00</b>
<b>Milling drums / milling units</b>				
FCS milling drum with milling width 1000 mm / 3 ft 3 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 99 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	<b>Standard</b>	<b>2308062</b>	<b>USD</b>	<b>0.00</b>
<b>Operator's platform</b>				
Standard operator's seat with shock absorption and lengthways adjustment	<b>Standard</b>	<b>2412488</b>	<b>USD</b>	<b>0.00</b>
<b>Hydraulic connection</b>				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	<b>Standard</b>	<b>2412477</b>	<b>USD</b>	<b>0.00</b>
<b>Material transport</b>				
Discharge conveyor 26 ft 9 in / 8,150 mm long with conveyor belt width 2 ft / 600 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields.	<b>Standard</b>	<b>2336175</b>	<b>USD</b>	<b>0.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2336172</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2335240</b>	<b>USD</b>	<b>1,561.00</b>

<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Lighting system consisting of 4 halogen and 8 LED working lights. The headlights illuminate the area in front of the machine, both machine sides, the area in front of the milling drum unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 19,500 lumen in total.	<b>Standard</b>	<b>2487614</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 1 halogen and 14 LED working lights. The headlights illuminate the area in front of and behind the machine, both machine sides, the area in front of the milling drum unit, the loading area, the weather canopy, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 26,300 lumen in total. LED working lights are extremely bright, shock-resistant and durable.	<b>Option</b>	<b>2487615</b>	<b>USD</b>	<b>936.00</b>
<b>Equipment Options</b>				
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	<b>Option</b>	<b>2336913</b>	<b>USD</b>	<b>8,251.00</b>
<b>Advance drive</b>				
Equipment of the machine with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine.	<b>Standard</b>	<b>2478488</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				
Operator's platform with weather canopy. The weather canopy is hydraulically adjustable in height and provides additional comfort during on-site operation. Including LED working light for illuminating the footstep. (Only in conjunction with electrohydraulic unit.)	<b>Option</b>	<b>2336173</b>	<b>USD</b>	<b>8,156.00</b>
<b>Milling drum assembly options</b>				
Overload sensor on the scraper FB1000 for automatic lifting function in case of obstacles. Effectively prevents the scraper from sinking into the loose sub-base, as well as getting stuck on obstacles.	<b>Option</b>	<b>2478485</b>	<b>USD</b>	<b>2,701.00</b>

Active floating position on the side plate right and left by continuous comparison between the milling depth and position of the side plate. If required, the side plate is lifted briefly to prevent tilting or sinking into a soft sub-base. (Only possible in conjunction with LEVEL PRO PLUS.)	<b>Standard</b>	<b>2478486</b>	<b>USD</b>	<b>0.00</b>
<b>Side milling ring</b>				
Pre-fitting for using a deep milling unit, including all necessary electro, hydraulic and water connections.	<b>Option</b>	<b>2596465</b>	<b>USD</b>	<b>2,076.00</b>
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB1300 (4 ft 3 in), for straightforward milling drum change	<b>Option</b>	<b>105240</b>	<b>USD</b>	<b>2,633.00</b>
<b>Additional milling units</b>				
FCS tandem scraper FB1000 (39") with necessary hydraulic and electrical systems. For the use of milling drums smaller than FB1000 (39"). The min. milling width for material loading onto the loading belt is FB600 (24")	<b>Standard</b>	<b>2351463</b>	<b>USD</b>	<b>0.00</b>
FCS milling unit FB300 (12") LA15, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 61 RS picks, including scraper bottom part FB300 (12")	<b>Option</b>	<b>2308611</b>	<b>USD</b>	<b>14,983.00</b>
FCS milling unit FB600 (24") LA12, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 80 picks, including scraper bottom part FB600 (24")	<b>Option</b>	<b>2308615</b>	<b>USD</b>	<b>24,225.00</b>
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	<b>Option</b>	<b>2377357</b>	<b>USD</b>	<b>746.00</b>
<b>Options for belt conveyor</b>				
Signal lights on the loading conveyor for a visual truck stop-and-go control without using the horn. The signal lights can be folded in hydraulically from the operator's platform.	<b>Option</b>	<b>2409818</b>	<b>USD</b>	<b>6,392.00</b>
<b>Leveling</b>				
Expansion of the LEVEL PRO PLUS leveling system by a SONIC SKI sensor. Ideal for contact-free wire and soil scanning. Including connection cable and holder.	<b>Option</b>	<b>2352878</b>	<b>USD</b>	<b>5,727.00</b>
<b>Leveling</b>				
Expansion of the leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, and connection cable. (FB1000/1200)	<b>Option</b>	<b>2544246</b>	<b>USD</b>	<b>3,651.00</b>
Expansion of the leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors and connection cable. (FB1000/1200)	<b>Option</b>	<b>2544249</b>	<b>USD</b>	<b>7,288.00</b>

<b>Leveling</b>				
The pre-fitting 3D laser leveling includes the required mechanical and electrical components for adaptation of a 3D laser leveling system on the machine. The exact positioning and robust configuration of the sensor masts form the basis for optimum working results. The supplied connection box provides for a simple and safe connection of the 3D system, without 3D system.	<b>Option</b>	<b>2544251</b>	<b>USD</b>	<b>4,479.00</b>
Expansion leveling system with basic equipment laser leveling, including holder and laser receiver, without laser transmitter	<b>Option</b>	<b>2544252</b>	<b>USD</b>	<b>15,227.00</b>
<b>Attachments</b>				
Battery-operated electro-hydraulic unit for operation of the machine hydraulics with the diesel engine switched off. (e.g. height adjustment of weather canopy, milling drum rotation device and hydraulic pick extractor drift)	<b>Standard</b>	<b>2412494</b>	<b>USD</b>	<b>0.00</b>
<b>Water system</b>				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min at 150 bar pressure. Ideal for daily cleaning of the machine.	<b>Option</b>	<b>2336231</b>	<b>USD</b>	<b>3,909.00</b>
<b>Pick changing aids</b>				
Integrated air compressor system with pressure accumulator and filling points. Precondition for operation of compressed air tools (e.g. pneumatic hammers).	<b>Option</b>	<b>2353106</b>	<b>USD</b>	<b>6,216.00</b>
Hydraulically driven pick extractor drift, complete with holder and corresponding electrical and hydraulic connectors. Ideal for convenient and quiet pick change.	<b>Option</b>	<b>2352889</b>	<b>USD</b>	<b>3,461.00</b>
Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement.	<b>Standard</b>	<b>2352893</b>	<b>USD</b>	<b>0.00</b>
<b>Wirtgen information and diagnostic system</b>				
Equipment of the machine with job data acquisition. The information is shown in the control display.	<b>Standard</b>	<b>2410294</b>	<b>USD</b>	<b>0.00</b>
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras and screen. A camera is mounted on the discharge conveyor and displays the loading of the truck. The 2nd camera shows the area in front of the milling drum housing. The camera images are displayed on the screen.	<b>Option</b>	<b>2487637</b>	<b>USD</b>	<b>5,496.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2659037</b>	<b>USD</b>	<b>434.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.  
Date: 3/9/2019

## Price list

### W 100 Cfi - non FCS

#### Scope of supply – basic machine

- Engine: 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSL9 C-300
- Rated engine power 2100 r.p.m.: 248 kW / 333 HP / 337 PS
- Maximum power at 1900 r.p.m.: 257 kW / 345 HP / 350 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 3 ft 3 in / 1000 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

#### STANDARD EQUIPMENT

- Basic machine with engine
- Mechanically opening engine cowling with noise insulation
- Radiator with temperature-dependent fan speed
- Highly effective noise insulation throughout the engine compartment
- Automatic engine speed control depending on driving situation
- Elastically mounted engine station with low vibration and low noise

#### MILLING DRUM HOUSING

- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Hydraulically operated scraper with mechanical locking

#### LOADING OF MILLED MATERIAL

- Discharge conveyor slewing angle left 60 degrees – right 60 degrees
- Two slewing speeds on the hydraulically foldable discharge conveyor with an adjustable conveying speed for precise loading

#### MACHINE CONTROL AND LEVELLING SYSTEM

- Digital milling depth indicator in the machine control display
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- Precise machine height adjustment in 1 or 5 mm steps on the main control panel of the machine
- Digital load control, manual engageable, hydraulic differential lock (by flow distributor)

#### OPERATOR'S PLATFORM

- Hydraulically extending operator's platform for optimum visibility of the working area
- Steering console with adjustable rake and reach for ideal adaptation of the operator's platform to the operator

- Slender machine design permits unobstructed view of the milled edge as well as the working area in front of the milling drum on the right
- Conveniently accessible ladder/footstep to the operator's platform with night-time lighting and especially low bottom edge of the latter/footstep
- Robust anti-vandalism protection for the controls
- Mirror package comprising rear-view mirrors at front left and right as well as a forward-pointing mirror at the left of the operator's platform
- Reversing horn with clear audible signal
- Illuminated control panel / nighttime design
- Scraper height is shown on the display

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Hydraulic height adjustment of the front and rear track units at two speeds

#### **MISCELLANEOUS**

- Large tool package
- Device for towing away
- Generously sized water and diesel tanks
- Extensive safety package with several EMERGENCY STOP switches
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 562,427.00**

Mandatory Options				
Exhaust Gas After Treatment				
Exhaust after-treatment by diesel oxidation catalytic converter DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Without diesel particulate filter.	Standard	2490138	USD	0.00
Exhaust after-treatment by diesel oxidation catalyst DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Additionally equipped with diesel particulate filter (DPF) - for operation e.g. in halls or in environmental zones with limited fine dust emission.	Option	2490139	USD	13,504.00
Crawler units				
Configuration with 4 driven track units. The two front track units are steered. The crawler unit at the rear right is hydraulically slewing and also steers. Traveling speed max. 3.6 mph / 5.8 km/h.	Standard	2490142	USD	0.00
Milling drum housing				
Wear-resistant milling drum housing FB1000 (3 ft 3 in) without milling drum	Standard	2336164	USD	0.00
Milling drums / milling units				
Milling drum with milling width 1000 mm / 3 ft / 3 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 99 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2308576	USD	0.00
Operator's platform				
Standard operator's seat with shock absorption and lengthways adjustment	Standard	2412488	USD	0.00
Hydraulic connection				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	Standard	2412477	USD	0.00
Material transport				
Discharge conveyor 26 ft 9 in / 8,150 mm long with conveyor belt width 2 ft / 600 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields.	Standard	2336175	USD	0.00
Paint				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2336172	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2335240	USD	1,561.00
Technical documentation				

Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Lighting system consisting of 4 halogen and 8 LED working lights. The headlights illuminate the area in front of the machine, both machine sides, the area in front of the milling drum unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 19,500 lumen in total.	<b>Standard</b>	<b>2487614</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 1 halogen and 14 LED working lights. The headlights illuminate the area in front of and behind the machine, both machine sides, the area in front of the milling drum unit, the loading area, the weather canopy, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 26,300 lumen in total. LED working lights are extremely bright, shock-resistant and durable.	<b>Option</b>	<b>2487615</b>	<b>USD</b>	<b>936.00</b>
<b>Equipment Options</b>				
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	<b>Option</b>	<b>2336913</b>	<b>USD</b>	<b>8,251.00</b>
<b>Advance drive</b>				
Equipment of the machine with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine.	<b>Standard</b>	<b>2478488</b>	<b>USD</b>	<b>0.00</b>

<b>Equipment operator's platform</b>				
Operator's platform with weather canopy. The weather canopy is hydraulically adjustable in height and provides additional comfort during on-site operation. Including LED working light for illuminating the footstep. (Only in conjunction with electrohydraulic unit.)	<b>Option</b>	<b>2336173</b>	<b>USD</b>	<b>8,156.00</b>
<b>Milling drum assembly options</b>				
Overload sensor on the scraper FB1000 for automatic lifting function in case of obstacles. Effectively prevents the scraper from sinking into the loose sub-base, as well as getting stuck on obstacles.	<b>Option</b>	<b>2478485</b>	<b>USD</b>	<b>2,701.00</b>
Active floating position on the side plate right and left by continuous comparison between the milling depth and position of the side plate. If required, the side plate is lifted briefly to prevent tilting or sinking into a soft sub-base. (Only possible in conjunction with LEVEL PRO PLUS.)	<b>Standard</b>	<b>2478486</b>	<b>USD</b>	<b>0.00</b>
<b>Side milling ring</b>				
Pre-fitting for using a deep milling unit, including all necessary electro, hydraulic and water connections.	<b>Option</b>	<b>2596465</b>	<b>USD</b>	<b>2,076.00</b>
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB1300 (4 ft 3 in), for straightforward milling drum change	<b>Option</b>	<b>105240</b>	<b>USD</b>	<b>2,633.00</b>
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	<b>Option</b>	<b>2377357</b>	<b>USD</b>	<b>746.00</b>

<b>Options for belt conveyor</b>				
Signal lights on the loading conveyor for a visual truck stop-and-go control without using the horn. The signal lights can be folded in hydraulically from the operator's platform.	<b>Option</b>	<b>2409818</b>	<b>USD</b>	<b>6,392.00</b>
<b>Leveling</b>				
Expansion of the LEVEL PRO PLUS leveling system by a SONIC SKI sensor. Ideal for contact-free wire and soil scanning. Including connection cable and holder.	<b>Option</b>	<b>2352878</b>	<b>USD</b>	<b>5,727.00</b>
<b>Leveling</b>				
Expansion of the leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, and connection cable. (FB1000/1200)	<b>Option</b>	<b>2544246</b>	<b>USD</b>	<b>3,651.00</b>
Expansion of the leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors and connection cable. (FB1000/1200)	<b>Option</b>	<b>2544249</b>	<b>USD</b>	<b>7,288.00</b>
<b>Leveling</b>				
The pre-fitting 3D laser leveling includes the required mechanical and electrical components for adaptation of a 3D laser leveling system on the machine. The exact positioning and robust configuration of the sensor masts form the basis for optimum working results. The supplied connection box provides for a simple and safe connection of the 3D system, without 3D system.	<b>Option</b>	<b>2544251</b>	<b>USD</b>	<b>4,479.00</b>
Expansion leveling system with basic equipment laser leveling, including holder and laser receiver, without laser transmitter	<b>Option</b>	<b>2544252</b>	<b>USD</b>	<b>15,227.00</b>
<b>Attachments</b>				
Battery-operated electro-hydraulic unit for operation of the machine hydraulics with the diesel engine switched off. (e.g. height adjustment of weather canopy, milling drum rotation device and hydraulic pick extractor drift)	<b>Standard</b>	<b>2412494</b>	<b>USD</b>	<b>0.00</b>
<b>Water system</b>				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min at 150 bar pressure. Ideal for daily cleaning of the machine.	<b>Option</b>	<b>2336231</b>	<b>USD</b>	<b>3,909.00</b>
<b>Pick changing aids</b>				
Integrated air compressor system with pressure accumulator and filling points. Precondition for operation of compressed air tools (e.g. pneumatic hammers).	<b>Option</b>	<b>2353106</b>	<b>USD</b>	<b>6,216.00</b>
Hydraulically driven pick extractor drift, complete with holder and corresponding electrical and hydraulic connectors. Ideal for convenient and quiet pick change.	<b>Option</b>	<b>2352889</b>	<b>USD</b>	<b>3,461.00</b>

Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement.	<b>Standard</b>	<b>2352893</b>	<b>USD</b>	<b>0.00</b>
<b>Wirtgen information and diagnostic system</b>				
Equipment of the machine with job data acquisition. The information is shown in the control display.	<b>Standard</b>	<b>2410294</b>	<b>USD</b>	<b>0.00</b>
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras and screen. A camera is mounted on the discharge conveyor and displays the loading of the truck. The 2nd camera shows the area in front of the milling drum housing. The camera images are displayed on the screen.	<b>Option</b>	<b>2487637</b>	<b>USD</b>	<b>5,496.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2659037</b>	<b>USD</b>	<b>434.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>
<sup>1</sup> Option must be ordered from headquarters. Date: 3/9/2019				

**Price list****W 100 Ri****Scope of supply – basic machine**

- Engine: 6-CYLINDER DIESEL ENGINE TYPEDEUTZ TCD 6.1 L6 AG 4f
- Rated engine power 2300 r.p.m.: 160 kW / 214.6 HP / 217.5 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 3 ft 3 in / 1000 mm
- Theoretical milling depth: 1 ft / 300 mm

**SCOPE OF SUPPLY OF THE BASIC MACHINE**

- Engine cover with noise insulation and flexibly decoupled engine mounting for especially quiet running and low noise emissions

**MILLING DRUM UNIT**

- Automatically activating, hydraulic drive belt tensioner for reliable power transmission to the milling drum
- Hydraulically lifting side plate right and left
- Round milling drum housing and straight left side plate for optimum material transport, making for low left-over amounts when lifting out the milling drum
- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Optimized for quick change of the milling drum, including by using centering pins with the side door of the milling drum housing
- With automatic electrical safety shut-off for the milling drum

**LOADING OF MILLED MATERIAL**

- Machine prepared for optional material loading by discharge conveyor
- Conveyor speed continuously variable
- Conveyor slewing angle right/left 25 degrees each for significantly improved loading procedures

**OPERATOR'S PLATFORM**

- Operator's platform with ergonomically arranged operator's seat, control panel arranged on the right and digital milling depth indicator in the control display
- Steering console with adjustable rake and reach for ideal adaptation of the operator's platform to the operator
- 3 mirrors
- Machine design permits unobstructed view of the milled edge at the right and left as well as the working area in front of the milling drum on the right
- Conveniently accessible ladder/footstep to the operator's platform with night-time lighting and especially low, folding bottom edge of the latter/footstep
- Robust anti-vandalism protection for the controls

**CHASSIS AND HEIGHT ADJUSTMENT**

- Precise machine height adjustment in 0.04 or 0.2 in / 1 or 5 mm steps from the machine control panel
- Infinitely variable, hydraulic all-wheel drive with three speed ranges
- Digital load control, manual engageable, hydraulic differential lock (by flow distributor)
- Wide solid rubber tires for the lowest ground pressures and optimum traction
- For milling along curb edges, the rear right support wheel can be swiveled hydraulically from the operator's platform in front of the milling drum.

- Hydraulic spring-loaded brake
- Proportional height adjustment at rear

#### **MISCELLANEOUS**

- Flexible weight concept by optional additional weights
- Particularly low machine center of gravity for high stability of the machine
- Robust and easily maintained machine chassis with optimum ground clearance and short overhangs
- Device for towing away
- Reversing horn
- Large tool package with lockable tool box and additional storage space for two pick containers
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 351,622.00**

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing FB1000 (3 ft 3 in) without milling drum	Standard	2365918	USD	0.00
Wear-resistant milling drum housing FB1000 (3 ft 3 in) FCS-Light, with pre-fitting for quick and easy milling drum changes with different tool spacings while keeping the same working widths, without milling drum.	Option	2365919	USD	7,193.00
Wear-resistant milling drum housing FB600 (3 ft 3 in) FCS with pre-fitting enabling a quick and easy change of the milling drums with varying spacings and milling widths, without milling drum.	Option	2459677	USD	9,581.00
Milling drums / milling units				
Milling drum with milling width 1000 mm / (3 ft, 3 in) milling depth max. 300 mm / 1 ft, tool spacing 15 mm / 0.6 in, equipped with quick-change toolholder system HT22 and 100 picks. For a wide range of applications, e.g. removal of surface and binder layer or complete removal of road surfaces.	Standard	2311420	USD	0.00
Material depressor / milling unit seal front				
Front milling drum unit seal FB1000 (3 ft 3 in) with hydraulic height and contact pressure adjustment. An overload sensor with lifting function lifts the seal briefly in case of a collision and thus prevents damage.	Standard	2365926	USD	0.00
Operator's platform				
Standard operator's seat with shock absorption and lengthways adjustment	Standard	2365928	USD	0.00
Comfort operator's seat incl. seat heating. The operator's seat has shock absorption, lengthways adjustment and can be swiveled through 20 degrees.	Option	2365929	USD	1,031.00
Operator's platform				
Flexibly mounted operator's platform, without weather canopy.	Standard	2365930	USD	0.00
Operator's platform with weather canopy and lateral weather protection elements. The weather canopy can be adjusted in height hydraulically. The transparent weather protection elements on the side on the roof and the right of the operator's platform protect the operator against the effects of weather driving in from the sides, and ensure additional comfort when working. (FB1000)	Option	2436568	USD	8,564.00
Operator's platform with weather canopy and lateral weather protection elements. The weather canopy can be adjusted in height hydraulically. The transparent weather protection elements on the side on the roof and the right of the operator's platform protect the operator against the effects of weather driving in from the sides, and ensure additional comfort when working. (FB1200)	Option	2523456	USD	8,564.00
Milling depth regulation				
LEVEL PRO PLUS leveling system. The measurement is made using cylinder sensors on the side plate right and left. The milling depth is displayed and set intuitively on the LEVEL PRO PLUS control display. The milling depth is regulated automatically. Incl. pre-fitting for additional sensors (e.g. Rapid Slope).	Standard	2365933	USD	0.00

<b>Hydraulic connection</b>				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	<b>Standard</b>	<b>2370564</b>	<b>USD</b>	<b>0.00</b>
Machine with hydraulic pre-fitting for a discharge conveyor with quick-change coupling. For quick change of the discharge conveyor. Each contains the coupling element on the machine side and the discharge conveyor side.	<b>Option</b>	<b>2370565</b>	<b>USD</b>	<b>1,086.00</b>
<b>Material transport</b>				
Discharge conveyor 7,350 mm / 24 ft 1 in long with conveyor belt width 500 mm / 1 ft 8 in and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields. Including an LED working light for illuminating the ejection area. Discharge conveyor including mechanical installation and removal assistance.	<b>Standard</b>	<b>2370568</b>	<b>USD</b>	<b>0.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2370429</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2370430</b>	<b>USD</b>	<b>1,561.00</b>
Two-color special painting. Cream color is replaced by two special colors (each RAL acc. to customer request). The complete lower part of the machine is painted in slate gray RAL 7015.	<b>Option</b>	<b>2370431</b>	<b>USD</b>	<b>10,029.00</b>
Multi-color special painting. Cream color is replaced by a maximum of two special colors (RAL acc. to customer request). In addition, the lower part of the machine is painted in one special color (RAL acc. to customer request).	<b>Option</b>	<b>2370432</b>	<b>USD</b>	<b>15,756.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>

<b>Machine lighting</b>				
Lighting system consisting of 1 LED strip, 3 halogen and 8 LED working lights. The headlights illuminate the area in front of the machine, the left machine side, the area in front of the milling drum unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 16,700 lumen in total.	<b>Standard</b>	<b>2487612</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 2 LED strips, 1 halogen and 12 LED working lights. The headlights illuminate the area in front of the machine, the rear of the machine, the left machine side from the front and rear, the area in front of the milling drum unit, the wheel arch, the weather canopy, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 23,300 lumen in total. LED working lights are extremely bright, shock-resistant and durable.	<b>Option</b>	<b>2487613</b>	<b>USD</b>	<b>923.00</b>
<b>Crawler units</b>				
The machine is equipped with a front axle for using a milling unit with a width of 1.000 mm / 1.200 mm.	<b>Standard</b>	<b>2589208</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment Options</b>				
<b>Additional weight</b>				
Additional weight 400 kg / 881 lb for four-wheel machine. 100 kg / 220 lb additional weight can be mounted in each rim. The additional weight can improve working under extreme conditions, although does increase the transport weight of the machine.	<b>Option</b>	<b>2462950</b>	<b>USD</b>	<b>5,374.00</b>
<b>Advance drive</b>				
Machine (FB1000 / FB1200) equipped for increased transfer speed with more powerful hydraulic components (up to 7,5 km/h / 4,5 mph). Construction site operations are significantly faster due to the increased transfer speed of the machine.	<b>Standard</b>	<b>2370563</b>	<b>USD</b>	<b>0.00</b>
Machine equipped with precision steering (FB1000/1200). Proportional push-buttons on the multi-function armrest enable the machine to be steered more precisely.	<b>Standard</b>	<b>2478483</b>	<b>USD</b>	<b>0.00</b>
<b>Milling drum assembly options</b>				
Overload sensor on the scraper FB1000/1200 for automatic lifting function in case of obstacles. Effectively prevents the scraper from sinking into the loose sub-base, as well as getting stuck on obstacles.	<b>Option</b>	<b>2478481</b>	<b>USD</b>	<b>1,751.00</b>
Active floating position on the side plate right and left by continuous comparison between the milling depth and position of the side plate. If required, the side plate is lifted briefly to prevent tilting or sinking into a soft sub-base. (Only possible in conjunction with LEVEL PRO PLUS.)	<b>Option</b>	<b>2478486</b>	<b>USD</b>	<b>1,656.00</b>
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB1300 (4 ft 3 in), for straightforward milling drum change	<b>Option</b>	<b>105240</b>	<b>USD</b>	<b>2,633.00</b>
Assembly aid for the fast milling drum change	<b>Option</b>	<b>101056</b>	<b>USD</b>	<b>1,276.00</b>
<b>Additional milling units</b>				

FCS milling unit FB400 (15,75") LA15, with quick-change toolholder system HT22, milling depth max. 0 ft 11 in / 300 mm, equipped with 59 RS picks, including scraper bottom part FB400 (15,75")	Option	2478482	USD	17,589.00
FCS milling unit FB500 (20") LA15, with quick-change toolholder system HT22, milling depth max. 0 ft 11 in / 300 mm, equipped with 65 RS picks, including scraper bottom part FB500 (20")	Option	2478484	USD	18,403.00
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	Option	2468568	USD	394.00
<b>Options for belt conveyor</b>				
Hydraulic coupler on conveyor side for mounting on an additional discharge conveyor. For use on a machine pre-equipped with screw coupling.	Option	2370616	USD	163.00
<b>Lateral slope control</b>				
Expansion of the LEVEL PRO PLUS leveling system by a RAPID SLOPE sensor. Ideal, for example for aligning the machine in a defined lateral tilt on a one-sided reference.	Option	2370620	USD	4,004.00
Expansion of the LEVEL PRO PLUS leveling system by a leveling boom that can be moved out on the left side. The boom can be moved out hydraulically if required by up to 43 in / 1,080 mm and mechanically by a further 40 in / 1,020 mm. Including sensor and cable as well as LED position lights for indicating the moved-out boom.	Option	2417339	USD	5,496.00
<b>Water system / spraying agent system</b>				
Hydraulically driven water filler pump. For rapid filling of the water tank. The filler pump is located in an easily accessible position and is protected in the storage compartment at the ladder/footstep to the operator's platform.	Option	2511836	USD	2,701.00
<b>Pick changing aids</b>				
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	Option	2370621	USD	3,461.00
<b>Wirtgen information and diagnostic system</b>				
Equipment of the machine with job data acquisition. The information is shown in the control display.	Standard	2410294	USD	0.00
<b>Camera system</b>				
Monitor system as maneuvering aid with two cameras and screen. A camera is mounted on the discharge conveyor and displays the loading of the truck. The 2nd camera shows the area in front of the milling drum housing. The camera images are displayed on the screen.	Option	2487627	USD	4,967.00
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	Option	2655778	USD	434.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00
Date: 3/6/2019				

**Price list****W 120 Cfi - FCS****Scope of supply – basic machine**

- Engine: 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSL9 C-300
- Rated engine power 2100 r.p.m.: 248 kW / 333 HP / 337 PS
- Maximum power at 1900 r.p.m.: 257 kW / 345 HP / 350 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 3 ft 11 in / 1200 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

**STANDARD EQUIPMENT**

- Basic machine with engine
- Mechanically opening engine cowling with noise insulation
- Radiator with temperature-dependent fan speed
- Highly effective noise insulation throughout the engine compartment
- Automatic engine speed control depending on driving situation
- Elastically mounted engine station with low vibration and low noise

**MILLING DRUM HOUSING**

- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Hydraulically operated scraper with mechanical locking

**LOADING OF MILLED MATERIAL**

- Discharge conveyor slewing angle left 60 degrees – right 60 degrees
- Two slewing speeds on the hydraulically foldable discharge conveyor with an adjustable conveying speed for precise loading

**MACHINE CONTROL AND LEVELLING SYSTEM**

- Digital milling depth indicator in the machine control display
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- Precise machine height adjustment in 1 or 5 mm steps on the main control panel of the machine
- Digital load control, manual engageable, hydraulic differential lock (by flow distributor)

**OPERATOR'S PLATFORM**

- Hydraulically extending operator's platform for optimum visibility of the working area
- Steering console with adjustable rake and reach for ideal adaptation of the operator's platform to the operator
- Slender machine design permits unobstructed view of the milled edge as well as the working area in front of the milling drum on the right
- Conveniently accessible ladder/footstep to the operator's platform with night-time lighting and especially low bottom edge of the latter/footstep
- Robust anti-vandalism protection for the controls
- Mirror package comprising rear-view mirrors at front left and right as well as a forward-pointing mirror at the left of the operator's platform
- Reversing horn with clear audible signal
- Illuminated control panel / nighttime design
- Scraper height is shown on the display

**CHASSIS AND HEIGHT ADJUSTMENT**

- Hydraulic height adjustment of the front and rear track units at two speeds

**MISCELLANEOUS**

<b>List price ex subsidiary Wirtgen America</b>			<b>USD</b>	<b>591,144.00</b>
<b>Mandatory Options</b>				
<b>Exhaust Gas After Treatment</b>				
Exhaust after-treatment by diesel oxidation catalytic converter DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Without diesel particulate filter.	<b>Standard</b>	<b>2490140</b>	<b>USD</b>	<b>0.00</b>
Exhaust after-treatment by diesel oxidation catalyst DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Additionally equipped with diesel particulate filter (DPF) - for operation e.g. in halls or in environmental zones with limited fine dust emission.	<b>Option</b>	<b>2490141</b>	<b>USD</b>	<b>13,504.00</b>
<b>Crawler units</b>				
Configuration with 4 driven track units. The two front track units are steered. The crawler unit at the rear right is hydraulically slewing and also steers. Traveling speed max. 3.6 mph / 5.8 km/h.	<b>Standard</b>	<b>2490142</b>	<b>USD</b>	<b>0.00</b>
<b>Milling drum housing</b>				
Wear-resistant milling drum housing FB1200 (3 ft 11 in) FCS, with pre-fitting for quick and easy milling drum change, without milling drum	<b>Standard</b>	<b>2336168</b>	<b>USD</b>	<b>0.00</b>
<b>Milling drums / milling units</b>				
FCS milling drum with milling width 1200 mm / 3 ft / 11 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 115 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	<b>Standard</b>	<b>2308142</b>	<b>USD</b>	<b>0.00</b>
<b>Operator's platform</b>				
Standard operator's seat with shock absorption and lengthways adjustment	<b>Standard</b>	<b>2412488</b>	<b>USD</b>	<b>0.00</b>
Comfort operator's seat incl. seat heating. The operator's seat has shock absorption, lengthways adjustment and can be swiveled through a total of 50 degrees.	<b>Option</b>	<b>2412489</b>	<b>USD</b>	<b>1,154.00</b>
<b>Hydraulic connection</b>				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	<b>Standard</b>	<b>2412477</b>	<b>USD</b>	<b>0.00</b>
<b>Material transport</b>				
Discharge conveyor 26 ft 9 in / 8,150 mm long with conveyor belt width 2 ft / 600 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields.	<b>Standard</b>	<b>2336175</b>	<b>USD</b>	<b>0.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2336244</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2336246</b>	<b>USD</b>	<b>1,561.00</b>

<b>Technical documentation</b>				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
<b>Service documentation</b>				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	Standard	2483436	USD	0.00
<b>Machine lighting</b>				
Lighting system consisting of 4 halogen and 8 LED working lights. The headlights illuminate the area in front of the machine, both machine sides, the area in front of the milling drum unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 19,500 lumen in total.	Standard	2487614	USD	0.00
High-performance lighting system consisting of 1 halogen and 14 LED working lights. The headlights illuminate the area in front of and behind the machine, both machine sides, the area in front of the milling drum unit, the loading area, the weather canopy, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 26,300 lumen in total. LED working lights are extremely bright, shock-resistant and durable.	Option	2487615	USD	936.00
<b>Equipment Options</b>				
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	Option	2336913	USD	8,251.00
<b>Advance drive</b>				
Equipment of the machine with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine.	Standard	2478488	USD	0.00
<b>Equipment operator's platform</b>				
Operator's platform with weather canopy. The weather canopy is hydraulically adjustable in height and provides additional comfort during on-site operation. Including LED working light for illuminating the footstep. (Only in conjunction with electrohydraulic unit.)	Option	2336173	USD	8,156.00

<b>Milling drum assembly options</b>				
Active floating position on the side plate right and left by continuous comparison between the milling depth and position of the side plate. If required, the side plate is lifted briefly to prevent tilting or sinking into a soft sub-base. (Only possible in conjunction with LEVEL PRO PLUS.)	<b>Standard</b>	<b>2478486</b>	<b>USD</b>	<b>0.00</b>
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB1300 (4 ft 3 in), for straightforward milling drum change	<b>Option</b>	<b>105240</b>	<b>USD</b>	<b>2,633.00</b>
<b>Additional milling units</b>				
FCS tandem scraper FB1200 (3 ft 11 in) with necessary hydraulic and electrical systems. For the use of milling drums smaller than FB1200 (3 ft 11 in). The min. milling width for material loading onto the loading belt is FB750	<b>Standard</b>	<b>2351465</b>	<b>USD</b>	<b>0.00</b>
FCS milling unit FB300 (12") LA15, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 61 RS picks, including scraper bottom part FB300 (12")	<b>Option</b>	<b>2308611</b>	<b>USD</b>	<b>14,983.00</b>
FCS milling unit FB600 (24") LA12, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 80 picks, including scraper bottom part FB600 (24")	<b>Option</b>	<b>2308615</b>	<b>USD</b>	<b>24,225.00</b>
FCS milling unit FB900 (2 ft 11 in) LA15, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 102 RS picks, including scraper bottom part FB900 (2 ft 11 in)	<b>Option</b>	<b>2308616</b>	<b>USD</b>	<b>37,864.00</b>
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	<b>Option</b>	<b>2377357</b>	<b>USD</b>	<b>746.00</b>
<b>Options for belt conveyor</b>				
Signal lights on the loading conveyor for a visual truck stop-and-go control without using the horn. The signal lights can be folded in hydraulically from the operator's platform.	<b>Option</b>	<b>2409818</b>	<b>USD</b>	<b>6,392.00</b>
<b>Leveling</b>				
Expansion of the LEVEL PRO PLUS leveling system by a SONIC SKI sensor. Ideal for contact-free wire and soil scanning. Including connection cable and holder.	<b>Option</b>	<b>2352878</b>	<b>USD</b>	<b>5,727.00</b>
<b>Leveling</b>				
Expansion of the leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, and connection cable. (FB1000/1200)	<b>Option</b>	<b>2544246</b>	<b>USD</b>	<b>3,651.00</b>
Expansion of the leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors and connection cable. (FB1000/1200)	<b>Option</b>	<b>2544249</b>	<b>USD</b>	<b>7,288.00</b>

<b>Attachments</b>				
Battery-operated electro-hydraulic unit for operation of the machine hydraulics with the diesel engine switched off. (e.g. height adjustment of weather canopy, milling drum rotation device and hydraulic pick extractor drift)	<b>Standard</b>	<b>2412494</b>	<b>USD</b>	<b>0.00</b>
<b>Water system</b>				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min at 150 bar pressure. Ideal for daily cleaning of the machine.	<b>Option</b>	<b>2336231</b>	<b>USD</b>	<b>3,909.00</b>
<b>Pick changing aids</b>				
Integrated air compressor system with pressure accumulator and filling points. Precondition for operation of compressed air tools (e.g. pneumatic hammers).	<b>Option</b>	<b>2353106</b>	<b>USD</b>	<b>6,216.00</b>
Hydraulically driven pick extractor drift, complete with holder and corresponding electrical and hydraulic connectors. Ideal for convenient and quiet pick change.	<b>Option</b>	<b>2352889</b>	<b>USD</b>	<b>3,461.00</b>
Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement.	<b>Standard</b>	<b>2352893</b>	<b>USD</b>	<b>0.00</b>
<b>Wirtgen information and diagnostic system</b>				
Equipment of the machine with job data acquisition. The information is shown in the control display.	<b>Standard</b>	<b>2410294</b>	<b>USD</b>	<b>0.00</b>
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras and screen. A camera is mounted on the discharge conveyor and displays the loading of the truck. The 2nd camera shows the area in front of the milling drum housing. The camera images are displayed on the screen.	<b>Option</b>	<b>2487637</b>	<b>USD</b>	<b>5,496.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2659037</b>	<b>USD</b>	<b>434.00</b>
<b>Additional milling drums</b>				
FCS milling drum with milling width 1200 mm / 3 ft / 11 in, milling depth max. 100 mm / 3 15/16 in, tool spacing 8 mm / 5/16 in, equipped with quick-change toolholder system HT22 and 174 picks. For applications with a high requirement on macro and micro-profile of the road surface, e.g. fine milling with increased evenness or correction milling work.	<b>Option</b>	<b>2308216</b>	<b>USD</b>	<b>47,961.00</b>
FCS milling drum, with milling width 1200 mm / 3 ft / 11 in, milling depth max. 50 mm / 1 31/32 in, tool spacing 6x2 mm / 15/64 x / 5/64 in, equipped with welded holder system HT5 and 410 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	<b>Option</b>	<b>2061125</b>	<b>USD</b>	<b>56,566.00</b>
FCS milling drum with milling width 1200 mm / 3 ft / 11 in, tool spacing 25 mm / 63/64 in, equipped with quick-change toolholder system HT22 and 87 picks. For applications with high requirements for milling volume, e.g. complete removal of road surfaces or concrete milling work.	<b>Option</b>	<b>2308286</b>	<b>USD</b>	<b>22,542.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>
<sup>1</sup> Option must be ordered from headquarters. Date: 3/6/2019				

## Price list

# W 120 Cfi - FCS

### Scope of supply – basic machine

- Engine: 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSL9 C-300
- Rated engine power 2100 r.p.m.: 248 kW / 333 HP / 337 PS
- Maximum power at 1900 r.p.m.: 257 kW / 345 HP / 350 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 3 ft 11 in / 1200 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Mechanically opening engine cowling with noise insulation
- Radiator with temperature-dependent fan speed
- Highly effective noise insulation throughout the engine compartment
- Automatic engine speed control depending on driving situation
- Elastically mounted engine station with low vibration and low noise

### MILLING DRUM HOUSING

- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Hydraulically operated scraper with mechanical locking

### LOADING OF MILLED MATERIAL

- Discharge conveyor slewing angle left 60 degrees – right 60 degrees
- Two slewing speeds on the hydraulically foldable discharge conveyor with an adjustable conveying speed for precise loading

### MACHINE CONTROL AND LEVELLING SYSTEM

- Digital milling depth indicator in the machine control display
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- Precise machine height adjustment in 1 or 5 mm steps on the main control panel of the machine
- Digital load control, manual engageable, hydraulic differential lock (by flow distributor)

### OPERATOR'S PLATFORM

- Hydraulically extending operator's platform for optimum visibility of the working area
- Steering console with adjustable rake and reach for ideal adaptation of the operator's platform to the operator
- Slender machine design permits unobstructed view of the milled edge as well as the working area in front of the milling drum on the right

- Conveniently accessible ladder/footstep to the operator's platform with night-time lighting and especially low bottom edge of the latter/footstep
- Robust anti-vandalism protection for the controls
- Mirror package comprising rear-view mirrors at front left and right as well as a forward-pointing mirror at the left of the operator's platform
- Reversing horn with clear audible signal
- Illuminated control panel / nighttime design
- Scraper height is shown on the display

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Hydraulic height adjustment of the front and rear track units at two speeds

#### **MISCELLANEOUS**

- Large tool package
- Device for towing away
- Generously sized water and diesel tanks
- Extensive safety package with several EMERGENCY STOP switches
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 570,977.00**

Mandatory Options				
Exhaust Gas After Treatment				
Exhaust after-treatment by diesel oxidation catalytic converter DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Without diesel particulate filter.	Standard	2490140	USD	0.00
Exhaust after-treatment by diesel oxidation catalyst DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Additionally equipped with diesel particulate filter (DPF) - for operation e.g. in halls or in environmental zones with limited fine dust emission.	Option	2490141	USD	13,504.00
Crawler units				
Configuration with 4 driven track units. The two front track units are steered. The crawler unit at the rear right is hydraulically slewing and also steers. Traveling speed max. 3.6 mph / 5.8 km/h.	Standard	2490142	USD	0.00
Milling drum housing				
Wear-resistant milling drum housing FB1200 (3 ft 11 in) without milling drum	Standard	2336167	USD	0.00
Milling drums / milling units				
Milling drum with milling width 1200 mm / 3 ft / 11 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 115 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2308578	USD	0.00
Operator's platform				
Standard operator's seat with shock absorption and lengthways adjustment	Standard	2412488	USD	0.00
Comfort operator's seat incl. seat heating. The operator's seat has shock absorption, lengthways adjustment and can be swiveled through a total of 50 degrees.	Option	2412489	USD	1,154.00
Hydraulic connection				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	Standard	2412477	USD	0.00
Material transport				
Discharge conveyor 26 ft 9 in / 8,150 mm long with conveyor belt width 2 ft / 600 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields.	Standard	2336175	USD	0.00

<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2336244</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2336246</b>	<b>USD</b>	<b>1,561.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Lighting system consisting of 4 halogen and 8 LED working lights. The headlights illuminate the area in front of the machine, both machine sides, the area in front of the milling drum unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 19,500 lumen in total.	<b>Standard</b>	<b>2487614</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 1 halogen and 14 LED working lights. The headlights illuminate the area in front of and behind the machine, both machine sides, the area in front of the milling drum unit, the loading area, the weather canopy, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 26,300 lumen in total. LED working lights are extremely bright, shock-resistant and durable.	<b>Option</b>	<b>2487615</b>	<b>USD</b>	<b>936.00</b>

Equipment Options				
Exhaust air filter				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	Option	2336913	USD	8,251.00
Advance drive				
Equipment of the machine with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine.	Standard	2478488	USD	0.00
Equipment operator's platform				
Operator's platform with weather canopy. The weather canopy is hydraulically adjustable in height and provides additional comfort during on-site operation. Including LED working light for illuminating the footstep. (Only in conjunction with electrohydraulic unit.)	Option	2336173	USD	8,156.00
Milling drum assembly options				
Active floating position on the side plate right and left by continuous comparison between the milling depth and position of the side plate. If required, the side plate is lifted briefly to prevent tilting or sinking into a soft sub-base. (Only possible in conjunction with LEVEL PRO PLUS.)	Standard	2478486	USD	0.00
Device for milling drum change				
Milling drum assembly trolley for milling drums up to FB1300 (4 ft 3 in), for straightforward milling drum change	Option	105240	USD	2,633.00
Cold-start device				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	Option	2377357	USD	746.00
Options for belt conveyor				
Signal lights on the loading conveyor for a visual truck stop-and-go control without using the horn. The signal lights can be folded in hydraulically from the operator's platform.	Option	2409818	USD	6,392.00
Leveling				
Expansion of the LEVEL PRO PLUS leveling system by a SONIC SKI sensor. Ideal for contact-free wire and soil scanning. Including connection cable and holder.	Option	2352878	USD	5,727.00

<b>Leveling</b>				
Expansion of the leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, and connection cable. (FB1000/1200)	Option	2544246	USD	3,651.00
Expansion of the leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors and connection cable. (FB1000/1200)	Option	2544249	USD	7,288.00
<b>Attachments</b>				
Battery-operated electro-hydraulic unit for operation of the machine hydraulics with the diesel engine switched off. (e.g. height adjustment of weather canopy, milling drum rotation device and hydraulic pick extractor drift)	Standard	2412494	USD	0.00
<b>Water system</b>				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min at 150 bar pressure. Ideal for daily cleaning of the machine.	Option	2336231	USD	3,909.00
<b>Pick changing aids</b>				
Integrated air compressor system with pressure accumulator and filling points. Precondition for operation of compressed air tools (e.g. pneumatic hammers).	Option	2353106	USD	6,216.00
Hydraulically driven pick extractor drift, complete with holder and corresponding electrical and hydraulic connectors. Ideal for convenient and quiet pick change.	Option	2352889	USD	3,461.00
Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement.	Standard	2352893	USD	0.00
<b>Wirtgen information and diagnostic system</b>				
Equipment of the machine with job data acquisition. The information is shown in the control display.	Standard	2410294	USD	0.00
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras and screen. A camera is mounted on the discharge conveyor and displays the loading of the truck. The 2nd camera shows the area in front of the milling drum housing. The camera images are displayed on the screen.	Option	2487637	USD	5,496.00
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	Option	2659037	USD	434.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list

### W 120 Ri

#### Scope of supply – basic machine

- Engine: 6-CYLINDER DIESEL ENGINE TYPEDEUTZ TCD 6.1 L6 AG 4f
- Rated engine power 2300 r.p.m.: 160 kW / 214.6 HP / 217.5 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 3 ft 11 in / 1200 mm
- Theoretical milling depth: 1 ft / 300 mm

#### SCOPE OF SUPPLY OF THE BASIC MACHINE

- Engine cover with noise insulation and flexibly decoupled engine mounting for especially quiet running and low noise emissions

#### MILLING DRUM UNIT

- Automatically activating, hydraulic drive belt tensioner for reliable power transmission to the milling drum
- Hydraulically lifting side plate right and left
- Round milling drum housing and straight left side plate for optimum material transport, making for low left-over amounts when lifting out the milling drum
- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Optimized for quick change of the milling drum, including by using centering pins with the side door of the milling drum housing
- With automatic electrical safety shut-off for the milling drum

#### LOADING OF MILLED MATERIAL

- Machine prepared for optional material loading by discharge conveyor
- Conveyor speed continuously variable
- Conveyor slewing angle right/left 25 degrees each for significantly improved loading procedures

#### OPERATOR'S PLATFORM

- Operator's platform with ergonomically arranged operator's seat, control panel arranged on the right and digital milling depth indicator in the control display
- Steering console with adjustable rake and reach for ideal adaptation of the operator's platform to the operator
- 3 mirrors
- Machine design permits unobstructed view of the milled edge at the right and left as well as the working area in front of the milling drum on the right
- Conveniently accessible ladder/footstep to the operator's platform with night-time lighting and especially low, folding bottom edge of the latter/footstep
- Robust anti-vandalism protection for the controls

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Precise machine height adjustment in 0.04 or 0.2 in /1 or 5 mm steps from the machine control panel
- Infinitely variable, hydraulic all-wheel drive with three speed ranges
- Digital load control, manual engageable, hydraulic differential lock (by flow distributor)
- Wide solid rubber tires for the lowest ground pressures and optimum traction
- For milling along curb edges, the rear right support wheel can be swiveled hydraulically from the operator's platform in front of the milling drum.
- Hydraulic spring-loaded brake
- Proportional height adjustment at rear

#### **MISCELLANEOUS**

- Flexible weight concept by optional additional weights
- Particularly low machine center of gravity for high stability of the machine
- Robust and easily maintained machine chassis with optimum ground clearance and short overhangs
- Device for towing away
- Reversing horn
- Large tool package with lockable tool box and additional storage space for two pick containers
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 359,765.00**

<b>Mandatory Options</b>				
<b>Milling drum housing</b>				
Wear-resistant milling drum housing FB1200 (3 ft 11 in) without milling drum	<b>Standard</b>	<b>2365921</b>	<b>USD</b>	<b>0.00</b>
Wear-resistant milling drum housing FB1200 (3 ft 11 in) FCS-Light, with pre-fitting enabling a quick and easy change of milling drums with varying spacings and equal milling widths, without milling drum.	<b>Option</b>	<b>2365922</b>	<b>USD</b>	<b>7,193.00</b>
<b>Milling drums / milling units</b>				
Milling drum with milling width 1200 mm / (3 ft 11 in), tool spacing 18 mm / 45/64 in, equipped with quick-change toolholder system HT22 and 101 picks. For a wide range of applications, e.g. removal of surface and binder layer or complete removal of road surfaces.	<b>Standard</b>	<b>2371942</b>	<b>USD</b>	<b>0.00</b>
<b>Material depressor / milling unit seal front</b>				
Front milling drum unit seal FB1200 (3 ft 11 in) with hydraulic height and contact pressure adjustment. An overload sensor with lifting function lifts the seal briefly in case of a collision and thus prevents damage.	<b>Standard</b>	<b>2365927</b>	<b>USD</b>	<b>0.00</b>
<b>Operator's platform</b>				
Standard operator's seat with shock absorption and lengthways adjustment	<b>Standard</b>	<b>2365928</b>	<b>USD</b>	<b>0.00</b>
Comfort operator's seat incl. seat heating. The operator's seat has shock absorption, lengthways adjustment and can be swiveled through 20 degrees.	<b>Option</b>	<b>2365929</b>	<b>USD</b>	<b>1,031.00</b>
<b>Operator's platform</b>				
Flexibly mounted operator's platform, without weather canopy.	<b>Standard</b>	<b>2365930</b>	<b>USD</b>	<b>0.00</b>
Operator's platform with weather canopy and lateral weather protection elements. The weather canopy can be adjusted in height hydraulically. The transparent weather protection elements on the side on the roof and the right of the operator's platform protect the operator against the effects of weather driving in from the sides, and ensure additional comfort when working. (FB1000)	<b>Option</b>	<b>2436568</b>	<b>USD</b>	<b>8,564.00</b>
Operator's platform with weather canopy and lateral weather protection elements. The weather canopy can be adjusted in height hydraulically. The transparent weather protection elements on the side on the roof and the right of the operator's platform protect the operator against the effects of weather driving in from the sides, and ensure additional comfort when working. (FB1200)	<b>Option</b>	<b>2523456</b>	<b>USD</b>	<b>8,564.00</b>
<b>Milling depth regulation</b>				
LEVEL PRO PLUS leveling system. The measurement is made using cylinder sensors on the side plate right and left. The milling depth is displayed and set intuitively on the LEVEL PRO PLUS control display. The milling depth is regulated automatically. Incl. pre-fitting for additional sensors (e.g. Rapid Slope).	<b>Standard</b>	<b>2365933</b>	<b>USD</b>	<b>0.00</b>

<b>Hydraulic connection</b>				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	<b>Standard</b>	<b>2370564</b>	<b>USD</b>	<b>0.00</b>
Machine with hydraulic pre-fitting for a discharge conveyor with quick-change coupling. For quick change of the discharge conveyor. Each contains the coupling element on the machine side and the discharge conveyor side.	<b>Option</b>	<b>2370565</b>	<b>USD</b>	<b>1,086.00</b>
<b>Material transport</b>				
Discharge conveyor 7,350 mm / 24 ft 1 in long with conveyor belt width 500 mm / 1 ft 8 in and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields. Including an LED working light for illuminating the ejection area. Discharge conveyor including mechanical installation and removal assistance.	<b>Standard</b>	<b>2370568</b>	<b>USD</b>	<b>0.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2459686</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2459688</b>	<b>USD</b>	<b>1,561.00</b>
Two-color special painting. Cream color is replaced by two special colors (each RAL acc. to customer request). The complete lower part of the machine is painted in slate gray RAL 7015.	<b>Option</b>	<b>2459690</b>	<b>USD</b>	<b>10,029.00</b>
Multi-color special painting. Cream color is replaced by a maximum of two special colors (RAL acc. to customer request). In addition, the lower part of the machine is painted in one special color (RAL acc. to customer request).	<b>Option</b>	<b>2459691</b>	<b>USD</b>	<b>15,756.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>

<b>Machine lighting</b>				
Lighting system consisting of 1 LED strip, 3 halogen and 8 LED working lights. The headlights illuminate the area in front of the machine, the left machine side, the area in front of the milling drum unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 16,700 lumen in total.	<b>Standard</b>	<b>2487612</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 2 LED strips, 1 halogen and 12 LED working lights. The headlights illuminate the area in front of the machine, the rear of the machine, the left machine side from the front and rear, the area in front of the milling drum unit, the wheel arch, the weather canopy, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 23,300 lumen in total. LED working lights are extremely bright, shock-resistant and durable.	<b>Option</b>	<b>2487613</b>	<b>USD</b>	<b>923.00</b>
<b>Crawler units</b>				
The machine is equipped with a front axle for using a milling unit with a width of 1.000 mm / 1.200 mm.	<b>Standard</b>	<b>2589208</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment Options</b>				
<b>Additional weight</b>				
Additional weight 400 kg / 881 lb for four-wheel machine. 100 kg / 220 lb additional weight can be mounted in each rim. The additional weight can improve working under extreme conditions, although does increase the transport weight of the machine.	<b>Option</b>	<b>2462950</b>	<b>USD</b>	<b>5,374.00</b>
<b>Advance drive</b>				
Machine (FB1000 / FB1200) equipped for increased transfer speed with more powerful hydraulic components (up to 7,5 km/h / 4,5 mph). Construction site operations are significantly faster due to the increased transfer speed of the machine.	<b>Standard</b>	<b>2370563</b>	<b>USD</b>	<b>0.00</b>
Machine equipped with precision steering (FB1000/1200). Proportional push-buttons on the multi-function armrest enable the machine to be steered more precisely.	<b>Standard</b>	<b>2478483</b>	<b>USD</b>	<b>0.00</b>
<b>Milling drum assembly options</b>				
Overload sensor on the scraper FB1000/1200 for automatic lifting function in case of obstacles. Effectively prevents the scraper from sinking into the loose sub-base, as well as getting stuck on obstacles.	<b>Option</b>	<b>2478481</b>	<b>USD</b>	<b>1,751.00</b>
Active floating position on the side plate right and left by continuous comparison between the milling depth and position of the side plate. If required, the side plate is lifted briefly to prevent tilting or sinking into a soft sub-base. (Only possible in conjunction with LEVEL PRO PLUS.)	<b>Option</b>	<b>2478486</b>	<b>USD</b>	<b>1,656.00</b>
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB1300 (4 ft 3 in), for straightforward milling drum change	<b>Option</b>	<b>105240</b>	<b>USD</b>	<b>2,633.00</b>
Assembly aid for the fast milling drum change	<b>Option</b>	<b>101056</b>	<b>USD</b>	<b>1,276.00</b>

<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	<b>Option</b>	<b>2468568</b>	<b>USD</b>	<b>394.00</b>
<b>Options for belt conveyor</b>				
Hydraulic coupler on conveyor side for mounting on an additional discharge conveyor. For use on a machine pre-equipped with screw coupling.	<b>Option</b>	<b>2370616</b>	<b>USD</b>	<b>163.00</b>
<b>Lateral slope control</b>				
Expansion of the LEVEL PRO PLUS leveling system by a RAPID SLOPE sensor. Ideal, for example for aligning the machine in a defined lateral tilt on a one-sided reference.	<b>Option</b>	<b>2370620</b>	<b>USD</b>	<b>4,004.00</b>
Expansion of the LEVEL PRO PLUS leveling system by a leveling boom that can be moved out on the left side. The boom can be moved out hydraulically if required by up to 43 in / 1,080 mm and mechanically by a further 40 in / 1,020 mm. Including sensor and cable as well as LED position lights for indicating the moved-out boom.	<b>Option</b>	<b>2417339</b>	<b>USD</b>	<b>5,496.00</b>
<b>Water system / spraying agent system</b>				
Hydraulically driven water filler pump. For rapid filling of the water tank. The filler pump is located in an easily accessible position and is protected in the storage compartment at the ladder/footstep to the operator's platform.	<b>Option</b>	<b>2511836</b>	<b>USD</b>	<b>2,701.00</b>
<b>Pick changing aids</b>				
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	<b>Option</b>	<b>2370621</b>	<b>USD</b>	<b>3,461.00</b>
<b>Wirtgen information and diagnostic system</b>				
Equipment of the machine with job data acquisition. The information is shown in the control display.	<b>Standard</b>	<b>2410294</b>	<b>USD</b>	<b>0.00</b>
<b>Camera system</b>				
Monitor system as maneuvering aid with two cameras and screen. A camera is mounted on the discharge conveyor and displays the loading of the truck. The 2nd camera shows the area in front of the milling drum housing. The camera images are displayed on the screen.	<b>Option</b>	<b>2487627</b>	<b>USD</b>	<b>4,967.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2655778</b>	<b>USD</b>	<b>434.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>
Date: 3/6/2019				

## Price list

### W 130 Cfi - FCS

#### Scope of supply – basic machine

- Engine: 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSL9 C-300
- Rated engine power 2100 r.p.m.: 248 kW / 333 HP / 337 PS
- Maximum power at 1900 r.p.m.: 257 kW / 345 HP / 350 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 4 ft 3 in / 1300 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

#### STANDARD EQUIPMENT

- Basic machine with engine
- Mechanically opening engine cowling with noise insulation
- Radiator with temperature-dependent fan speed
- Highly effective noise insulation throughout the engine compartment
- Automatic engine speed control depending on driving situation
- Elastically mounted engine station with low vibration and low noise

#### MILLING DRUM HOUSING

- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Hydraulically operated scraper with mechanical locking

#### LOADING OF MILLED MATERIAL

- Discharge conveyor slewing angle left 60 degrees – right 60 degrees
- Two slewing speeds on the hydraulically foldable discharge conveyor with an adjustable conveying speed for precise loading

#### MACHINE CONTROL AND LEVELLING SYSTEM

- Digital milling depth indicator in the machine control display
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- Precise machine height adjustment in 1 or 5 mm steps on the main control panel of the machine
- Digital load control, manual engageable, hydraulic differential lock (by flow distributor)

#### OPERATOR'S PLATFORM

- Hydraulically extending operator's platform for optimum visibility of the working area
- Steering console with adjustable rake and reach for ideal adaptation of the operator's platform to the operator
- Slender machine design permits unobstructed view of the milled edge as well as the working area in front of the milling drum on the right

- Conveniently accessible ladder/footstep to the operator's platform with night-time lighting and especially low bottom edge of the latter/footstep
- Robust anti-vandalism protection for the controls
- Mirror package comprising rear-view mirrors at front left and right as well as a forward-pointing mirror at the left of the operator's platform
- Reversing horn with clear audible signal
- Illuminated control panel / nighttime design
- Scraper height is shown on the display

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Hydraulic height adjustment of the front and rear track units at two speeds

#### **MISCELLANEOUS**

- Large tool package
- Device for towing away
- Generously sized water and diesel tanks
- Extensive safety package with several EMERGENCY STOP switches
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD**

**607,281.00**

<b>Mandatory Options</b>				
<b>Exhaust Gas After Treatment</b>				
Exhaust after-treatment by diesel oxidation catalytic converter DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Without diesel particulate filter.	<b>Standard</b>	<b>2490140</b>	<b>USD</b>	<b>0.00</b>
Exhaust after-treatment by diesel oxidation catalyst DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Additionally equipped with diesel particulate filter (DPF) - for operation e.g. in halls or in environmental zones with limited fine dust emission.	<b>Option</b>	<b>2490141</b>	<b>USD</b>	<b>13,504.00</b>
<b>Crawler units</b>				
Configuration with 4 driven track units. The two front track units are steered. The crawler unit at the rear right is hydraulically slewing and also steers. Traveling speed max. 3.6 mph / 5.8 km/h.	<b>Standard</b>	<b>2490142</b>	<b>USD</b>	<b>0.00</b>
<b>Milling drum housing</b>				
Wear-resistant milling drum housing FB1300 (4 ft 3 in) FCS with pre-fitting enabling a quick and easy change of the milling drums with varying spacings and milling widths, without milling drum.	<b>Standard</b>	<b>2336170</b>	<b>USD</b>	<b>0.00</b>
<b>Milling drums / milling units</b>				
FCS milling drum with milling width 1300 / 4 ft / 3 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 121 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	<b>Standard</b>	<b>2308218</b>	<b>USD</b>	<b>0.00</b>
<b>Operator's platform</b>				
Standard operator's seat with shock absorption and lengthways adjustment	<b>Standard</b>	<b>2412488</b>	<b>USD</b>	<b>0.00</b>
<b>Hydraulic connection</b>				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	<b>Standard</b>	<b>2412477</b>	<b>USD</b>	<b>0.00</b>
<b>Material transport</b>				
Discharge conveyor 26 ft 9 in / 8,150 mm long with conveyor belt width 2 ft / 600 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields.	<b>Standard</b>	<b>2336175</b>	<b>USD</b>	<b>0.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2336323</b>	<b>USD</b>	<b>0.00</b>

Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2336324</b>	<b>USD</b>	<b>1,561.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Lighting system consisting of 4 halogen and 8 LED working lights. The headlights illuminate the area in front of the machine, both machine sides, the area in front of the milling drum unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 19,500 lumen in total.	<b>Standard</b>	<b>2487614</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 1 halogen and 14 LED working lights. The headlights illuminate the area in front of and behind the machine, both machine sides, the area in front of the milling drum unit, the loading area, the weather canopy, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 26,300 lumen in total. LED working lights are extremely bright, shock-resistant and durable.	<b>Option</b>	<b>2487615</b>	<b>USD</b>	<b>936.00</b>
<b>Equipment Options</b>				
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.		<b>2336913</b>	<b>USD</b>	<b>8,251.00</b>
<b>Advance drive</b>				
Equipment of the machine with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine.	<b>Standard</b>	<b>2478488</b>	<b>USD</b>	<b>0.00</b>

<b>Equipment operator's platform</b>				
Operator's platform with weather canopy. The weather canopy is hydraulically adjustable in height and provides additional comfort during on-site operation. Including LED working light for illuminating the footstep. (Only in conjunction with electrohydraulic unit.)	<b>Option</b>	<b>2336173</b>	<b>USD</b>	<b>8,156.00</b>
<b>Milling drum assembly options</b>				
Active floating position on the side plate right and left by continuous comparison between the milling depth and position of the side plate. If required, the side plate is lifted briefly to prevent tilting or sinking into a soft sub-base. (Only possible in conjunction with LEVEL PRO PLUS.)	<b>Standard</b>	<b>2478486</b>	<b>USD</b>	<b>0.00</b>
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB1300 (4 ft 3 in), for straightforward milling drum change	<b>Option</b>	<b>105240</b>	<b>USD</b>	<b>2,633.00</b>
<b>Additional milling units</b>				
FCS tandem scraper FB1300 (4 ft 3 in) with necessary hydraulic and electrical systems. For the use of milling drums smaller than FB1300 (4 ft 3 in). The min. milling width for material loading onto the loading belt is FB750	<b>Standard</b>	<b>2351477</b>	<b>USD</b>	<b>0.00</b>
FCS milling unit FB300 (12") LA15, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 61 RS picks, including scraper bottom part FB300 (12")	<b>Option</b>	<b>2308611</b>	<b>USD</b>	<b>14,983.00</b>
FCS milling unit FB600 (24") LA12, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 80 picks, including scraper bottom part FB600 (24")	<b>Option</b>	<b>2308615</b>	<b>USD</b>	<b>24,225.00</b>
FCS milling unit FB900 (2 ft 11 in) LA15, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 102 RS picks, including scraper bottom part FB900 (2 ft 11 in)	<b>Option</b>	<b>2308621</b>	<b>USD</b>	<b>37,864.00</b>
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	<b>Option</b>	<b>2377357</b>	<b>USD</b>	<b>746.00</b>
<b>Options for belt conveyor</b>				
Signal lights on the loading conveyor for a visual truck stop-and-go control without using the horn. The signal lights can be folded in hydraulically from the operator's platform.	<b>Option</b>	<b>2409818</b>	<b>USD</b>	<b>6,392.00</b>
<b>Leveling</b>				
Expansion of the LEVEL PRO PLUS leveling system by a SONIC SKI sensor. Ideal for contact-free wire and soil scanning. Including connection cable and holder.	<b>Option</b>	<b>2352878</b>	<b>USD</b>	<b>5,727.00</b>

<b>Leveling</b>				
Expansion of the leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, and connection cable. (FB1000/1200)	<b>Option</b>	<b>2544246</b>	<b>USD</b>	<b>3,651.00</b>
Expansion of the leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors and connection cable. (FB1000/1200)	<b>Option</b>	<b>2544249</b>	<b>USD</b>	<b>7,288.00</b>
<b>Attachments</b>				
Battery-operated electro-hydraulic unit for operation of the machine hydraulics with the diesel engine switched off. (e.g. height adjustment of weather canopy, milling drum rotation device and hydraulic pick extractor drift)	<b>Standard</b>	<b>2412494</b>	<b>USD</b>	<b>0.00</b>
<b>Water system</b>				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min at 150 bar pressure. Ideal for daily cleaning of the machine.	<b>Option</b>	<b>2336231</b>	<b>USD</b>	<b>3,909.00</b>
<b>Pick changing aids</b>				
Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement.	<b>Standard</b>	<b>2352893</b>	<b>USD</b>	<b>0.00</b>
<b>Wirtgen information and diagnostic system</b>				
Equipment of the machine with job data acquisition. The information is shown in the control display.	<b>Standard</b>	<b>2410294</b>	<b>USD</b>	<b>0.00</b>
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras and screen. A camera is mounted on the discharge conveyor and displays the loading of the truck. The 2nd camera shows the area in front of the milling drum housing. The camera images are displayed on the screen.	<b>Option</b>	<b>2487637</b>	<b>USD</b>	<b>5,496.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2659037</b>	<b>USD</b>	<b>434.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list

# W 130 Cfi - Non FCS

### Scope of supply – basic machine

- Engine: 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSL9 C-300
- Rated engine power 2100 r.p.m.: 248 kW / 333 HP / 337 PS
- Maximum power at 1900 r.p.m.: 257 kW / 345 HP / 350 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 4 ft 3 in / 1300 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Mechanically opening engine cowling with noise insulation
- Radiator with temperature-dependent fan speed
- Highly effective noise insulation throughout the engine compartment
- Automatic engine speed control depending on driving situation
- Elastically mounted engine station with low vibration and low noise

### MILLING DRUM HOUSING

- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Hydraulically operated scraper with mechanical locking

### LOADING OF MILLED MATERIAL

- Discharge conveyor slewing angle left 60 degrees – right 60 degrees
- Two slewing speeds on the hydraulically foldable discharge conveyor with an adjustable conveying speed for precise loading

### MACHINE CONTROL AND LEVELLING SYSTEM

- Digital milling depth indicator in the machine control display
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- Precise machine height adjustment in 1 or 5 mm steps on the main control panel of the machine
- Digital load control, manual engageable, hydraulic differential lock (by flow distributor)

### OPERATOR'S PLATFORM

- Hydraulically extending operator's platform for optimum visibility of the working area
- Steering console with adjustable rake and reach for ideal adaptation of the operator's platform to the operator
- Slender machine design permits unobstructed view of the milled edge as well as the working area in front of the milling drum on the right
- Conveniently accessible ladder/footstep to the operator's platform with night-time lighting and especially low bottom edge of the latter/footstep
- Robust anti-vandalism protection for the controls
- Mirror package comprising rear-view mirrors at front left and right as well as a forward-pointing mirror at the left of the operator's platform
- Reversing horn with clear audible signal

- Illuminated control panel / nighttime design
- Scraper height is shown on the display

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Hydraulic height adjustment of the front and rear track units at two speeds

#### **MISCELLANEOUS**

- Large tool package
- Device for towing away
- Generously sized water and diesel tanks
- Extensive safety package with several EMERGENCY STOP switches
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 586,720.00**

Mandatory Options				
Exhaust Gas After Treatment				
Exhaust after-treatment by diesel oxidation catalytic converter DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Without diesel particulate filter.	Standard	2490140	USD	0.00
Exhaust after-treatment by diesel oxidation catalyst DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Additionally equipped with diesel particulate filter (DPF) - for operation e.g. in halls or in environmental zones with limited fine dust emission.	Option	2490141	USD	13,504.00
Crawler units				
Configuration with 4 driven track units. The two front track units are steered. The crawler unit at the rear right is hydraulically slewing and also steers. Traveling speed max. 3.6 mph / 5.8 km/h.	Standard	2490142	USD	0.00
Milling drum housing				
Wear-resistant milling drum housing FB1300 (4 ft 3 in) without milling drum	Standard	2336169	USD	0.00
Milling drums / milling units				
Milling drum with milling width 1300 / 4 ft / 3 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 121 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2308581	USD	0.00
Operator's platform				
Standard operator's seat with shock absorption and lengthways adjustment	Standard	2412488	USD	0.00
Hydraulic connection				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	Standard	2412477	USD	0.00
Material transport				
Discharge conveyor 26 ft 9 in / 8,150 mm long with conveyor belt width 2 ft / 600 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields.	Standard	2336175	USD	0.00
Paint				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2336323	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2336324	USD	1,561.00
Technical documentation				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00

<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Lighting system consisting of 4 halogen and 8 LED working lights. The headlights illuminate the area in front of the machine, both machine sides, the area in front of the milling drum unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 19,500 lumen in total.	<b>Standard</b>	<b>2487614</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 1 halogen and 14 LED working lights. The headlights illuminate the area in front of and behind the machine, both machine sides, the area in front of the milling drum unit, the loading area, the weather canopy, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 26,300 lumen in total. LED working lights are extremely bright, shock-resistant and durable.	<b>Option</b>	<b>2487615</b>	<b>USD</b>	<b>936.00</b>
<b>Equipment Options</b>				
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.		<b>2336913</b>	<b>USD</b>	<b>8,251.00</b>
<b>Advance drive</b>				
Equipment of the machine with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine.	<b>Standard</b>	<b>2478488</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				
Operator's platform with weather canopy. The weather canopy is hydraulically adjustable in height and provides additional comfort during on-site operation. Including LED working light for illuminating the footstep. (Only in conjunction with electrohydraulic unit.)	<b>Option</b>	<b>2336173</b>	<b>USD</b>	<b>8,156.00</b>
<b>Milling drum assembly options</b>				
Active floating position on the side plate right and left by continuous comparison between the milling depth and position of the side plate. If required, the side plate is lifted briefly to prevent tilting or sinking into a soft sub-base. (Only possible in conjunction with LEVEL PRO PLUS.)	<b>Standard</b>	<b>2478486</b>	<b>USD</b>	<b>0.00</b>
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB1300 (4 ft 3 in), for straightforward milling drum change	<b>Option</b>	<b>105240</b>	<b>USD</b>	<b>2,633.00</b>

<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	<b>Option</b>	<b>2377357</b>	<b>USD</b>	<b>746.00</b>
<b>Options for belt conveyor</b>				
Signal lights on the loading conveyor for a visual truck stop-and-go control without using the horn. The signal lights can be folded in hydraulically from the operator's platform.	<b>Option</b>	<b>2409818</b>	<b>USD</b>	<b>6,392.00</b>
<b>Leveling</b>				
Expansion of the LEVEL PRO PLUS leveling system by a SONIC SKI sensor. Ideal for contact-free wire and soil scanning. Including connection cable and holder.	<b>Option</b>	<b>2352878</b>	<b>USD</b>	<b>5,727.00</b>
<b>Leveling</b>				
Expansion of the leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, and connection cable. (FB1000/1200)	<b>Option</b>	<b>2544246</b>	<b>USD</b>	<b>3,651.00</b>
Expansion of the leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors and connection cable. (FB1000/1200)	<b>Option</b>	<b>2544249</b>	<b>USD</b>	<b>7,288.00</b>
<b>Attachments</b>				
Battery-operated electro-hydraulic unit for operation of the machine hydraulics with the diesel engine switched off. (e.g. height adjustment of weather canopy, milling drum rotation device and hydraulic pick extractor drift)	<b>Standard</b>	<b>2412494</b>	<b>USD</b>	<b>0.00</b>
<b>Water system</b>				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min at 150 bar pressure. Ideal for daily cleaning of the machine.	<b>Option</b>	<b>2336231</b>	<b>USD</b>	<b>3,909.00</b>
<b>Pick changing aids</b>				
Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement.	<b>Standard</b>	<b>2352893</b>	<b>USD</b>	<b>0.00</b>
<b>Wirtgen information and diagnostic system</b>				
Equipment of the machine with job data acquisition. The information is shown in the control display.	<b>Standard</b>	<b>2410294</b>	<b>USD</b>	<b>0.00</b>
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras and screen. A camera is mounted on the discharge conveyor and displays the loading of the truck. The 2nd camera shows the area in front of the milling drum housing. The camera images are displayed on the screen.	<b>Option</b>	<b>2487637</b>	<b>USD</b>	<b>5,496.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2659037</b>	<b>USD</b>	<b>434.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list

### W 150 Cfi - 1200 mm

#### Scope of supply – basic machine

- Engine: 6-CYLINDER DIESEL ENGINE: CUMMINS QSL 9 C-380 AG4f
- Rated engine power 2100 r.p.m.: 283 kW / 380 HP / 385 PS
- Maximum power at 1900 r.p.m.: 298 kW / 400 HP / 405 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 4ft 11 in / 1,500 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

#### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with wasp waist on the right side (zero edge)
- Electrohydraulically opening engine cowling
- Radiator with temperature-dependent fan speed
- Additional control switch for scraper blade, bottom right
- Elastically mounted engine station with low vibration and low noise
- Three milling drum rotation speeds with electric on/off function 106 r.p.m. - 96 r.p.m. - 86 r.p.m.
- Air compressor system

#### MILLING DRUM HOUSING

- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Hydraulic material depressor with conveyor lifting function
- Hydraulically opening scraper plate with convenience locking
- Exchangeable wearing segments on the side plate

#### LOADING OF MILLED MATERIAL

- Discharge conveyor slewing angle left 60 degrees - right 60 degrees
- Two slewing speeds on the hydraulically foldable discharge conveyor with an adjustable conveying speed for precise loading

#### MACHINE CONTROL AND LEVELLING SYSTEM

- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- Jog mode for height adjustment
- Load-dependent advance control
- 4-track drive with manually activated, electronic anti-slip control
- 4 selectable steering modes

- Automatic water management
- Automatic engine speed control

#### **OPERATOR'S PLATFORM**

- Convenient control panel with practical switches
- Multi-function armrest including color operating display for one-handed operation of most machine functions.
- Digital multi-function display for all important operating conditions
- Scraper height is shown on the display
- Operating panel nighttime lighting
- Robust anti-vandalism protection for the controls
- Adjustable steering wheel position
- Optimally positionable operator's seat
- Footstep right and left with conveniently folding ladder
- Two mirrors front, one mirror middle and one mirror in rear area of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Fourfold full-floating axle for high machine stability
- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Reversing with the milling drum rotating. Simple and fast maneuvering
- Equipped with extremely wear-resistant 2-piece polyurethane track pads

#### **MISCELLANEOUS**

- Large tool package
- Generously sized water and diesel tanks
- Total of 3 EMERGENCY STOP switches at sensible positions on the machine
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD**

**627,407.00**

Mandatory Options				
Exhaust Gas After Treatment				
Exhaust after-treatment by diesel oxidation catalytic converter DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Without diesel particulate filter.	Standard	2400773	USD	0.00
Exhaust after-treatment by diesel oxidation catalyst DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Additionally equipped with diesel particulate filter (DPF) - for operation e.g. in halls or in environmental zones with limited fine dust emission.	Option	2400774	USD	14,549.00
Milling drum housing				
Wear-resistant milling drum housing FB1500 (4 ft 11 in), with pre-fitting enabling a quick and easy change of the milling drums with varying spacings and milling widths, without milling drum.	Standard	2400857	USD	0.00
Milling drums / milling units				
FCS milling unit FB1200 (3 ft 11 in) LA15, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 115 picks, including scraper bottom part FB1200 (3 ft 11 in)	Standard	2409827	USD	0.00
Operator's platform				
Standard operator's seat with shock absorption and lengthways adjustment	Standard	2412488	USD	0.00
Hydraulic connection				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	Standard	2412477	USD	0.00
Material transport				
Discharge conveyor 26 ft 9 in / 8,150 mm long with conveyor belt width 2 ft / 600 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields.	Standard	2336175	USD	0.00
Paint				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2400780	USD	0.00
Single-color special paint. Cream color is replaced by a special color (RAL acc. to customer request). The complete lower part of the machine is painted in slate gray RAL 7015.	Option	2400782	USD	1,547.00
Technical documentation				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
Service documentation				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
Warranty				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00

<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Lighting system consisting of 8 halogen and 6 LED working lights. The headlights illuminate the area in front of and behind the machine, both machine sides, the area in front of the milling drum unit and on the chassis unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 21,100 lumens in total.	<b>Standard</b>	<b>2450350</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 1 halogen and 17 LED working lights. The headlights illuminate the area in front of and behind the machine, both machine sides, the area in front of the milling drum unit and on the chassis unit, the area of the wasp waist, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 29,900 lumens in total. LED working lights are extremely bright, shock-resistant and durable.	<b>Option</b>	<b>2450351</b>	<b>USD</b>	<b>2,104.00</b>
<b>Additional devices</b>				
Battery-operated electro-hydraulic unit. Weather canopy and engine cowling can be lifted with the hydraulic unit.	<b>Standard</b>	<b>2400778</b>	<b>USD</b>	<b>0.00</b>
Battery-operated electro-hydraulic unit for milling drum rotation device and hydraulic pick extractor drift. Weather canopy and engine cowling can be lifted with the hydraulic unit. Moreover, emergency functions such as lifting the chassis units, releasing the parking brake and other cylinder functions can also be operated when the engine is switched off.	<b>Option</b>	<b>2400779</b>	<b>USD</b>	<b>1,737.00</b>
<b>Equipment Options</b>				
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	<b>Option</b>	<b>2441379</b>	<b>USD</b>	<b>8,251.00</b>
<b>Advance drive</b>				
Equipment of the machine with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine.	<b>Standard</b>	<b>2400798</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				

Operator's platform equipped with weather canopy as well as windscreen and rear window. The side parts of the roof shell can be pulled out and the windows are movable. The complete roof can be folded in electro-hydraulically using a battery operated hydraulic pump for simplified machine transport. In addition, operation with a hand pump is possible. The operator's seat is surrounded by impact and abrasion-resistant Plexiglas panels.	<b>Option</b>	<b>2400795</b>	<b>USD</b>	<b>13,178.00</b>
Additional control unit for ground operation of the machine. Enables the ground crew to control important machine functions on the left side of the machine additionally.	<b>Standard</b>	<b>2400803</b>	<b>USD</b>	<b>0.00</b>
Heating with fan and air outlet openings in the footwell of the operator's platform.	<b>Option</b>	<b>2400791</b>	<b>USD</b>	<b>1,031.00</b>
<b>Milling drum assembly options</b>				
Overload sensor on the scraper for automatic lifting function in case of obstacles. Effectively prevents the scraper from sinking into the loose sub-base, as well as getting stuck on obstacles.	<b>Standard</b>	<b>2483584</b>	<b>USD</b>	<b>0.00</b>
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB1500 (4 ft 11 in), for straightforward milling drum change	<b>Option</b>	<b>2125929</b>	<b>USD</b>	<b>5,049.00</b>
<b>Additional milling units</b>				
FCS milling unit FB600 (24") LA12, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 80 picks, including scraper bottom part FB600 (24")	<b>Option</b>	<b>2417852</b>	<b>USD</b>	<b>26,424.00</b>
FCS milling unit FB900 (2 ft 11 in) LA15, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 102 RS picks, including scraper bottom part FB900 (2 ft 11 in)	<b>Option</b>	<b>2417854</b>	<b>USD</b>	<b>31,269.00</b>
FCS milling unit FB1200 (3 ft 11 in) LA15, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 115 picks, including scraper bottom part FB1200 (3 ft 11 in)	<b>Option</b>	<b>2409827</b>	<b>USD</b>	<b>36,249.00</b>
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	<b>Option</b>	<b>2400772</b>	<b>USD</b>	<b>746.00</b>
<b>Options for belt conveyor</b>				
Signal lights on the loading conveyor for a visual truck stop-and-go control without using the horn. The signal lights can be folded in hydraulically from the operator's platform.	<b>Option</b>	<b>2458620</b>	<b>USD</b>	<b>6,392.00</b>

<b>Leveling</b>				
Expansion of leveling system by one Sonic-Ski sensor for scanning in front of the milling drum right or left. Including connection cable and holder.	<b>Option</b>	<b>2410276</b>	<b>USD</b>	<b>5,659.00</b>
<b>Leveling</b>				
Expansion of the leveling system for scanning the surface in front of the milling drum unit. A ski in a mobile mounting scans the height using a position measuring system. The surface shortly ahead of the milling drum unit can thus be taken as a reference if scanning using the side plate is not possible. The scanning can be hydraulically activated from the operator's seat.	<b>Standard</b>	<b>2400801</b>	<b>USD</b>	<b>0.00</b>
<b>Additional control unit LEVEL PRO</b>				
Expansion LEVEL PRO PLUS with an additional operating display, including required connection cable and holder.	<b>Option</b>	<b>2400802</b>	<b>USD</b>	<b>2,769.00</b>

<b>Leveling</b>				
Multiplex pre-fitting comprising 4 sensor sockets and holder for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	Option	2459795	USD	1,371.00
Expansion of the leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, and connection cable.	Option	2410282	USD	3,651.00
Expansion of the leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors and connection cable.	Option	2410283	USD	7,288.00
<b>Water system</b>				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min / 3 gall 8 pt/min at 150 bar / 2175 psi pressure. Ideal for daily cleaning of the machine, including high pressure lance and 15 m / 50 ft hose.	Option	2438190	USD	2,443.00
<b>Pick changing aids</b>				
Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement.	Option	2410287	USD	2,931.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5 m / 16 ft 5 in hose and holder.	Standard	2400775	USD	0.00
Additional folding seat on the rear right chassis unit for additional comfort during the pick change. The entire milling drum can easily be reached from a sitting position.	Option	2411373	USD	936.00
<b>Wirtgen information and diagnostic system</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO PLUS display.	Option	2410291	USD	1,018.00
Equipment of the machine with job data acquisition. The information is shown in the control display.	Option	2410294	USD	1,113.00
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras and screen. Each of these shows the area behind the machine as well as the area at the discharge conveyor.	Standard	2410296	USD	0.00

Monitor system as maneuvering aid with 5 cameras and 2 displays. The cameras show the area behind the machine, the area in front of the loading conveyor, the side plate, the crawler unit at the front left, the left milled edge, the left side of the machine and the milled surface behind the milling drum unit. 2 additional LED lamps illuminate the camera area and are included in the scope of supply.	Option	2410297	USD	11,685.00
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	Option	2659026	USD	434.00
<b>Other devices</b>				
Large sized storage compartment for 10 pick containers on the rear of the machine instead of the standard storage compartment.	Option	2409814	USD	1,045.00
<b>Additional milling drums</b>				
FCS milling drum with milling width 1500 mm / 4 ft / 11 in, milling depth max. 100 mm / 3 15/16 in, tool spacing 8 mm / 5/16 in, equipped with quick-change toolholder system HT22 and 210 picks. For applications with a high requirement on macro and micro-profile of the road surface, e.g fine milling with increased evenness or correction milling work.	Option	2314979	USD	54,625.00
FCS milling drum, with milling width 1500 mm / 4 ft / 11 in, milling depth max. 30 mm / 1 in, tool spacing 6x2 mm / 15/64 x / 5/64 in, equipped with welded holder system HT5 and 512 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	Option	2090950	USD	67,192.00
FCS milling drum with milling width 1500 mm / 4 ft / 11 in, milling depth max. 330 mm / 1 ft 1 in, tool spacing 20 mm / 25/32 in, equipped with quick-change toolholder system HT22 with increased tool life and 102 picks. For applications with high requirements for milling volume, e.g. complete removal of road surfaces or concrete milling work.	Option	2314995	USD	27,089.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00
<sup>1</sup> Option must be ordered from headquarters.				
Date: 3/6/2019				

**Price list****W 150 Cfi - 1500 mm****Scope of supply – basic machine**

- Engine: 6-CYLINDER DIESEL ENGINE: CUMMINS QSL 9 C-380 AG4f
- Rated engine power 2100 r.p.m.: 283 kW / 380 HP / 385 PS
- Maximum power at 1900 r.p.m.: 298 kW / 400 HP / 405 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 4ft 11 in / 1,500 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

**STANDARD EQUIPMENT**

- Basic machine with engine
- Machine chassis with wasp waist on the right side (zero edge)
- Electrohydraulically opening engine cowling
- Radiator with temperature-dependent fan speed
- Additional control switch for scraper blade, bottom right
- Elastically mounted engine station with low vibration and low noise
- Three milling drum rotation speeds with electric on/off function 106 r.p.m. - 96 r.p.m. - 86 r.p.m.
- Air compressor system

**MILLING DRUM HOUSING**

- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Hydraulic material depressor with conveyor lifting function
- Hydraulically opening scraper plate with convenience locking
- Exchangeable wearing segments on the side plate

**LOADING OF MILLED MATERIAL**

- Discharge conveyor slewing angle left 60 degrees - right 60 degrees
- Two slewing speeds on the hydraulically foldable discharge conveyor with an adjustable conveying speed for precise loading

**MACHINE CONTROL AND LEVELLING SYSTEM**

- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system
- Jog mode for height adjustment
- Load-dependent advance control
- 4-track drive with manually activated, electronic anti-slip control
- 4 selectable steering modes

- Automatic water management
- Automatic engine speed control

#### **OPERATOR'S PLATFORM**

- Convenient control panel with practical switches
- Multi-function armrest including color operating display for one-handed operation of most machine functions.
- Digital multi-function display for all important operating conditions
- Scraper height is shown on the display
- Operating panel nighttime lighting
- Robust anti-vandalism protection for the controls
- Adjustable steering wheel position
- Optimally positionable operator's seat
- Footstep right and left with conveniently folding ladder
- Two mirrors front, one mirror middle and one mirror in rear area of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Fourfold full-floating axle for high machine stability
- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Reversing with the milling drum rotating. Simple and fast maneuvering
- Equipped with extremely wear-resistant 2-piece polyurethane track pads

#### **MISCELLANEOUS**

- Large tool package
- Generously sized water and diesel tanks
- Total of 3 EMERGENCY STOP switches at sensible positions on the machine
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD**

**628,764.00**

Mandatory Options				
Exhaust Gas After Treatment				
Exhaust after-treatment by diesel oxidation catalytic converter DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Without diesel particulate filter.	Standard	2400773	USD	0.00
Exhaust after-treatment by diesel oxidation catalyst DOC in exhaust emissions category EU Stage 4 / US Tier 4f. Additionally equipped with diesel particulate filter (DPF) - for operation e.g. in halls or in environmental zones with limited fine dust emission.	Option	2400774	USD	14,549.00
Milling drum housing				
Wear-resistant milling drum housing FB1500 (4 ft 11 in), with pre-fitting enabling a quick and easy change of the milling drums with varying spacings and milling widths, without milling drum.	Standard	2400857	USD	0.00
Milling drums / milling units				
FCS milling drum with milling width 1500 mm / 4 ft / 11 in, milling depth max. 330 mm / 1 ft 1 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 136 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2309317	USD	0.00
Operator's platform				
Standard operator's seat with shock absorption and lengthways adjustment	Standard	2412488	USD	0.00
Hydraulic connection				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	Standard	2412477	USD	0.00
Material transport				
Discharge conveyor 26 ft 9 in / 8,150 mm long with conveyor belt width 2 ft / 600 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields.	Standard	2336175	USD	0.00
Paint				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2400780	USD	0.00
Single-color special paint. Cream color is replaced by a special color (RAL acc. to customer request). The complete lower part of the machine is painted in slate gray RAL 7015.	Option	2400782	USD	1,547.00
Technical documentation				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
Service documentation				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
Warranty				
Standard warranty 12 months or 1000 engine operational hours	Standard	100772	USD	0.00

<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Lighting system consisting of 8 halogen and 6 LED working lights. The headlights illuminate the area in front of and behind the machine, both machine sides, the area in front of the milling drum unit and on the chassis unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 21,100 lumens in total.	<b>Standard</b>	<b>2450350</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 1 halogen and 17 LED working lights. The headlights illuminate the area in front of and behind the machine, both machine sides, the area in front of the milling drum unit and on the chassis unit, the area of the wasp waist, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 29,900 lumens in total. LED working lights are extremely bright, shock-resistant and durable.	<b>Option</b>	<b>2450351</b>	<b>USD</b>	<b>2,104.00</b>
<b>Additional devices</b>				
Battery-operated electro-hydraulic unit. Weather canopy and engine cowling can be lifted with the hydraulic unit.	<b>Standard</b>	<b>2400778</b>	<b>USD</b>	<b>0.00</b>
Battery-operated electro-hydraulic unit for milling drum rotation device and hydraulic pick extractor drift. Weather canopy and engine cowling can be lifted with the hydraulic unit. Moreover, emergency functions such as lifting the chassis units, releasing the parking brake and other cylinder functions can also be operated when the engine is switched off.	<b>Option</b>	<b>2400779</b>	<b>USD</b>	<b>1,737.00</b>
<b>Equipment Options</b>				
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	<b>Option</b>	<b>2441379</b>	<b>USD</b>	<b>8,251.00</b>
<b>Advance drive</b>				
Equipment of the machine with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine.	<b>Standard</b>	<b>2400798</b>	<b>USD</b>	<b>0.00</b>

<b>Equipment operator's platform</b>				
Operator's platform equipped with weather canopy as well as windscreen and rear window. The side parts of the roof shell can be pulled out and the windows are movable. The complete roof can be folded in electro-hydraulically using a battery operated hydraulic pump for simplified machine transport. In addition, operation with a hand pump is possible. The operator's seat is surrounded by impact and abrasion-resistant Plexiglas panels.	<b>Option</b>	<b>2400795</b>	<b>USD</b>	<b>13,178.00</b>
Additional control unit for ground operation of the machine. Enables the ground crew to control important machine functions on the left side of the machine additionally.	<b>Standard</b>	<b>2400803</b>	<b>USD</b>	<b>0.00</b>
Heating with fan and air outlet openings in the footwell of the operator's platform.	<b>Option</b>	<b>2400791</b>	<b>USD</b>	<b>1,031.00</b>
<b>Milling drum assembly options</b>				
Overload sensor on the scraper for automatic lifting function in case of obstacles. Effectively prevents the scraper from sinking into the loose sub-base, as well as getting stuck on obstacles.	<b>Standard</b>	<b>2483584</b>	<b>USD</b>	<b>0.00</b>
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB1500 (4 ft 11 in), for straightforward milling drum change	<b>Option</b>	<b>2125929</b>	<b>USD</b>	<b>5,049.00</b>
<b>Additional milling units</b>				
FCS milling unit FB600 (24") LA12, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 80 picks, including scraper bottom part FB600 (24")	<b>Option</b>	<b>2417852</b>	<b>USD</b>	<b>26,424.00</b>
FCS milling unit FB900 (2 ft 11 in) LA15, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 102 RS picks, including scraper bottom part FB900 (2 ft 11 in)	<b>Option</b>	<b>2417854</b>	<b>USD</b>	<b>31,269.00</b>
FCS milling unit FB1200 (3 ft 11 in) LA15, with quick-change toolholder system HT22, milling depth max. 11 in / 280 mm, equipped with 115 picks, including scraper bottom part FB1200 (3 ft 11 in)	<b>Option</b>	<b>2409827</b>	<b>USD</b>	<b>36,249.00</b>
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0	<b>Option</b>	<b>2400772</b>	<b>USD</b>	<b>746.00</b>
<b>Options for belt conveyor</b>				
Signal lights on the loading conveyor for a visual truck stop-and-go control without using the horn. The signal lights can be folded in hydraulically from the operator's platform.	<b>Option</b>	<b>2458620</b>	<b>USD</b>	<b>6,392.00</b>

<b>Leveling</b>				
Expansion of leveling system by one Sonic-Ski sensor for scanning in front of the milling drum right or left. Including connection cable and holder.	<b>Option</b>	<b>2410276</b>	<b>USD</b>	<b>5,659.00</b>
<b>Leveling</b>				
Expansion of the leveling system for scanning the surface in front of the milling drum unit. A ski in a mobile mounting scans the height using a position measuring system. The surface shortly ahead of the milling drum unit can thus be taken as a reference if scanning using the side plate is not possible. The scanning can be hydraulically activated from the operator's seat.	<b>Standard</b>	<b>2400801</b>	<b>USD</b>	<b>0.00</b>
<b>Additional control unit LEVEL PRO</b>				
Expansion LEVEL PRO PLUS with an additional operating display, including required connection cable and holder.	<b>Option</b>	<b>2400802</b>	<b>USD</b>	<b>2,769.00</b>
<b>Leveling</b>				
Multiplex pre-fitting comprising 4 sensor sockets and holder for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	<b>Option</b>	<b>2459795</b>	<b>USD</b>	<b>1,371.00</b>
Expansion of the leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, and connection cable.	<b>Option</b>	<b>2410282</b>	<b>USD</b>	<b>3,651.00</b>
Expansion of the leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors and connection cable.	<b>Option</b>	<b>2410283</b>	<b>USD</b>	<b>7,288.00</b>
<b>Water system</b>				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min / 3 gall 8 pt/min at 150 bar / 2175 psi pressure. Ideal for daily cleaning of the machine, including high pressure lance and 15 m / 50 ft hose.	<b>Option</b>	<b>2438190</b>	<b>USD</b>	<b>2,443.00</b>
<b>Pick changing aids</b>				
Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement.	<b>Option</b>	<b>2410287</b>	<b>USD</b>	<b>2,931.00</b>
Pneumatic hammer with two pick extractor and inserter tools each as well as 5 m / 16 ft 5 in hose and holder.	<b>Standard</b>	<b>2400775</b>	<b>USD</b>	<b>0.00</b>
Additional folding seat on the rear right chassis unit for additional comfort during the pick change. The entire milling drum can easily be reached from a sitting position.	<b>Option</b>	<b>2411373</b>	<b>USD</b>	<b>936.00</b>
<b>Wirtgen information and diagnostic system</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO PLUS display.	<b>Option</b>	<b>2410291</b>	<b>USD</b>	<b>1,018.00</b>
Equipment of the machine with job data acquisition. The information is shown in the control display.	<b>Option</b>	<b>2410294</b>	<b>USD</b>	<b>1,113.00</b>

<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras and screen. Each of these shows the area behind the machine as well as the area at the discharge conveyor.	<b>Standard</b>	<b>2410296</b>	<b>USD</b>	<b>0.00</b>
Monitor system as maneuvering aid with 5 cameras and 2 displays. The cameras show the area behind the machine, the area in front of the loading conveyor, the side plate, the crawler unit at the front left, the left milled edge, the left side of the machine and the milled surface behind the milling drum unit. 2 additional LED lamps illuminate the camera area and are included in the scope of supply.	<b>Option</b>	<b>2410297</b>	<b>USD</b>	<b>11,685.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2659026</b>	<b>USD</b>	<b>434.00</b>
<b>Other devices</b>				
Large sized storage compartment for 10 pick containers on the rear of the machine instead of the standard storage compartment.	<b>Option</b>	<b>2409814</b>	<b>USD</b>	<b>1,045.00</b>
<b>Additional milling drums</b>				
FCS milling drum with milling width 1500 mm / 4 ft / 11 in, milling depth max. 100 mm / 3 15/16 in, tool spacing 8 mm / 5/16 in, equipped with quick-change toolholder system HT22 and 210 picks. For applications with a high requirement on macro and micro-profile of the road surface, e.g fine milling with increased evenness or correction milling work.	<b>Option</b>	<b>2314979</b>	<b>USD</b>	<b>54,625.00</b>
FCS milling drum, with milling width 1500 mm / 4 ft / 11 in, milling depth max. 30 mm / 1 in, tool spacing 6x2 mm / 15/64 x / 5/64 in, equipped with welded holder system HT5 and 512 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	<b>Option</b>	<b>2090950</b>	<b>USD</b>	<b>67,192.00</b>
FCS milling drum with milling width 1500 mm / 4 ft / 11 in, milling depth max. 330 mm / 1 ft 1 in, tool spacing 20 mm / 25/32 in, equipped with quick-change toolholder system HT22 with increased tool life and 102 picks. For applications with high requirements for milling volume, e.g. complete removal of road surfaces or concrete milling work.	<b>Option</b>	<b>2314995</b>	<b>USD</b>	<b>27,089.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>
<sup>1</sup> Option must be ordered from headquarters. Date: 3/6/2019				

## Price list

# W 200 Hi

### Scope of supply – basic machine

- Engine: 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSX 15
- Maximum power at 1900 r.p.m.: 455 kW / 610 HP / 619 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 6 ft 10 in / 2100 mm
- Theoretical milling depth: 1 ft / 300 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with double-sided wasp waist
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Cooling system with temperature-controlled fan speed
- Storage compartments for pick containers

### MILLING DRUM HOUSING

- Milling drum housing with infinitely variable lateral shift function permits milling up to the edge on the right or left side of the machine. The total adjustment range is 2 ft 7 in / 800 mm. (1 ft 4 in left / 1 ft 4 in right / 400 mm left / 400 mm right)
- Hydrostatic drive of the milling drum
- Three electrically selectable milling drum speeds
- Hydraulic material depressor with conveyor lifting function
- Hydraulically movable and positionable scraper plate
- Hydraulically lifting side plate, 1 ft 5 in / 420 mm clearance right and left
- Triple-divided water sprinkling strip in the milling drum unit, segments individually switchable

### LOADING OF MILLED MATERIAL

- Conveyor system with manually or automatically adjustable conveying speed
- Water spray system in the primary conveyor
- Slewing angle discharge conveyor  $\pm 60^\circ$

### MACHINE CONTROL AND LEVELLING SYSTEM

- Multi-function control display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Milling power control with automatic on/off function
- Two exterior panels for operating functions by ground crew

- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system

#### **OPERATOR'S PLATFORM**

- Fully anti-vibration mounted operator's platform
- Convenient, individually adjustable control panel
- Convenient access to the operator's platform, right and left
- Lockable control panel covers
- Two mirrors at the front, one mirror at the rear of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- Freely selectable steering functions for the four-track steering
- Extremely wear-resistant, two-piece EPS polyurethane track pads

#### **MISCELLANEOUS**

- Lighting system including 5 halogen floodlights and 4 LED lights in the area of the milling unit
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Pre-fitting for installing the WITOS FleetView control unit "WIRTGEN Road Technologies Telematics and on-site Solutions" (WITOS) is the intelligent telematics system of the WIRTGEN Road Technologies for efficient fleet and service management worldwide
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 819,185.00**

<b>Mandatory Options</b>				
<b>Milling drum housing</b>				
Wear-resistant milling drum housing FB2100 (6 ft 11 in) without milling drum	<b>Standard</b>	<b>2193939</b>	<b>USD</b>	<b>0.00</b>
<b>Milling drums / milling units</b>				
Milling drum with milling width 2100 mm / 6 ft / 11 in, milling depth max. 300 mm / 0 ft 11 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 190 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	<b>Standard</b>	<b>2314413</b>	<b>USD</b>	<b>0.00</b>
<b>Operator's platform</b>				
Flexibly mounted operator's platform with clearly laid-out control panel and control display as well as a large storage compartment (approx. 250 l / 66 gal) on the operator's platform and single standing seats on the right and left. The storage compartment has a variable, removable false floor and a lockable lid which can also be used as a seat. It is used for storing tools, pick elements, a toolbox, etc.	<b>Standard</b>	<b>2488411</b>	<b>USD</b>	<b>0.00</b>
Flexibly mounted operator's platform with clear control panels and control display as well as comfortable adjustable operator's seats right and left.	<b>Option</b>	<b>2446210</b>	<b>USD</b>	<b>4,397.00</b>
<b>Operator's platform</b>				
Complete mirror set: 2 mirrors front and one mirror on rear of the machine	<b>Standard</b>	<b>2276347</b>	<b>USD</b>	<b>0.00</b>
Complete mirror set, partial from operator's platform electrically folding as well as additionally heated and with truck stop and go indication	<b>Option</b>	<b>2276348</b>	<b>USD</b>	<b>5,293.00</b>
<b>Material transport</b>				
Robust 25 ft 11 in / 7,900 mm long discharge conveyor with conveyor belt system 2 ft 9 in / 850 mm and hydraulic folding device for shortening the transport length	<b>Standard</b>	<b>2446319</b>	<b>USD</b>	<b>0.00</b>
<b>Water tank filling</b>				
Additional water tank filling from the rear of the machine using a stopcock.	<b>Standard</b>	<b>2193960</b>	<b>USD</b>	<b>0.00</b>
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filling pump.	<b>Option</b>	<b>2448383</b>	<b>USD</b>	<b>3,447.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2446558</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2446559</b>	<b>USD</b>	<b>2,334.00</b>

<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 6 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 3 rotary beacons.	<b>Standard</b>	<b>2346607</b>	<b>USD</b>	<b>0.00</b>
Powerful LED lighting system 24 V. Consisting of 6 additional LED working lights for optimum illumination of the working area. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 3 LED rotary beacons.	<b>Option</b>	<b>2346608</b>	<b>USD</b>	<b>4,085.00</b>
<b>Equipment Options</b>				
<b>Additional weight</b>				
Additional weight 2,425 lbs / 1,100 kg	<b>Standard</b>	<b>2346424</b>	<b>USD</b>	<b>0.00</b>
Large sized storage compartment for 29 pick containers mounted on the rear of the machine instead of the standard storage compartment.	<b>Option</b>	<b>2221603</b>	<b>USD</b>	<b>3,257.00</b>
<b>Exhaust air filter</b>				
VCS extraction system on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit. For version with long discharge conveyor.	<b>Standard</b>	<b>2566917</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				
Operator's platform equipped with weather canopy including windscreen and rear window. The canopy is equipped with extensions on both sides and protects the entire operator's platform from rain and sunlight. The canopy itself is made of highly durable GFRP and the windscreen and rear window are scratch-resistant laminated protective glass. The canopy can be folded up electrohydraulically to facilitate machine transport.	<b>Option</b>	<b>2492942</b>	<b>USD</b>	<b>14,304.00</b>

Hot air heating in the footwell area of the operator's platform	Option	2174234	USD	1,696.00
<b>Device for milling drum change</b>				
Milling drum mounting and transport carriage FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	Option	2312515	USD	6,284.00
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	Option	2344691	USD	1,330.00
<b>Leveling</b>				
Expansion of leveling system by one ultrasonic sensor for scanning in front of the milling drum right or left. Including connection cable and holder.	Standard	2286567	USD	0.00
Expansion of leveling system by two ultrasonic sensors for scanning in front of the milling drum right and left. Including connection cable and holder.	Option	2283608	USD	2,606.00
<b>Additional control unit LEVEL PRO</b>				
Expansion LEVEL PRO with an additional operating display, including required connection cable	Standard	2137348	USD	0.00
<b>Leveling</b>				
Pre-fitting for multiplex system comprising 4 sensors sockets for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	Standard	2436230	USD	0.00
Expansion leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, connection cable and holder	Option	2436231	USD	3,026.00
Expansion of leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors, connection cable and holder	Option	2436232	USD	6,392.00
<b>Water system</b>				
Powerful, hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min (4 gpm) at 150 bar (2175 psi) pressure.	Option	2193973	USD	2,443.00

<b>Pick changing aids</b>				
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	<b>Option</b>	<b>2178052</b>	<b>USD</b>	<b>3,461.00</b>
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	<b>Standard</b>	<b>2137372</b>	<b>USD</b>	<b>0.00</b>
Fold-open seats on the rear track units for the pick change, with integrated storage compartment for pick change tools and 4 pick containers	<b>Standard</b>	<b>2283946</b>	<b>USD</b>	<b>0.00</b>
<b>Diesel tank filling systems</b>				
Electrically operated diesel suction and pressure pump for the diesel tank filling with 5.00 m suction hose.	<b>Option</b>	<b>2125976</b>	<b>USD</b>	<b>896.00</b>
<b>Wirtgen information and diagnostic system</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO display.	<b>Standard</b>	<b>2219502</b>	<b>USD</b>	<b>0.00</b>
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras. Each of these shows the area behind the machine as well as the area in front of the loading conveyor. The camera images are displayed on the machine control display.	<b>Option</b>	<b>2526011</b>	<b>USD</b>	<b>2,687.00</b>
Monitor system as maneuvering aid with 2 cameras. Camera 1 is installed on the rear of the machine pointing to the rear and camera 2 is installed between the front track units pointing to the front. The camera images are displayed on the machine control display	<b>Standard</b>	<b>2286626</b>	<b>USD</b>	<b>0.00</b>
Extensive monitor system consisting of a total of 6 cameras and an additional monitor. Cameras 1 and 2 show the areas behind the machine as well as ahead of the load belt, and thus facilitate maneuvering and loading. Cameras 3-6 show the area in front of the milling drum unit, the milled area behind the milling unit as well as the side plate and the front right and left chassis units, thereby facilitating the working process. Camera images 1-2 are displayed in the machine control display, camera images 3-6 are output on the additional monitor.	<b>Option</b>	<b>2530073</b>	<b>USD</b>	<b>9,364.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2658169</b>	<b>USD</b>	<b>434.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list W 200i

### Scope of supply – basic machine

- Engine: 6-CYLINDER DIESEL ENGINE TYPE CUMMINS QSX 15
- Maximum power at 1900 r.p.m.: 455 kW / 610 HP / 619 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 6 ft 7 in / 2000 mm
- Theoretical milling depth: 1 ft 1 in / 330 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with double-sided wasp waist
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Cooling system with temperature-controlled fan speed
- Large storage compartments for pick containers

### MILLING DRUM HOUSING

- Three milling drum rotation speeds with electric on/off function 127 r.p.m. - 109 r.p.m. - 97 r.p.m.
- Hydraulic material depressor with conveyor lifting function
- Hydraulically movable and positionable scraper plate with automatic locking
- Hydraulically lifting side plates, clearance right 450 mm (1 ft 6 in), clearance left 330 mm (1 ft 1 in)
- Water sprinkling strip in the milling drum unit

### LOADING OF MILLED MATERIAL

- Conveyor system with manually or automatically adjustable conveying speed
- Water spray system in the primary conveyor
- Slewing angle discharge conveyor  $\pm 60^\circ$

### MACHINE CONTROL AND LEVELLING SYSTEM

- Multi-function control display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Milling power control with automatic on/off function
- Two exterior panels for operating functions by ground crew
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system

### OPERATOR'S PLATFORM

- Fully anti-vibration mounted operator's platform
- Convenient, individually adjustable control panel
- Convenient access to the operator's platform, right and left
- Lockable control panel covers
- Two mirrors front, one mirror middle and one mirror in rear area of the machine

### CHASSIS AND HEIGHT ADJUSTMENT

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- Freely selectable steering functions for the four-track steering
- Extremely wear-resistant, two-piece EPS polyurethane track pads

#### **MISCELLANEOUS**

- Lighting system including 3 halogen floodlights and 4 LED lights in the area of the milling unit
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 730,007.00**

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing FB2200 (7 ft 3 in) FCS-Light, with pre-fitting enabling a quick and easy change of milling drums with varying spacings and equal milling widths, without milling drum.	Standard	2436519	USD	0.00
Milling drums / milling units				
FCS milling drum with milling width 2200 mm / 7 ft / 3 in, milling depth max. 330 mm / 1 ft 1 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 181 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2375650	USD	0.00
Operator's platform				
Flexibly mounted operator's platform with clearly laid-out control panel and control display as well as a large storage compartment (approx. 250 l / 66 gal) on the operator's platform and single standing seats on the right and left. The storage compartment has a variable, removable false floor and a lockable lid which can also be used as a seat. It is used for storing tools, pick elements, a coolbox, etc.	Option	2488383	USD	3,026.00
Flexibly mounted operator's platform with clear control panels and control display as well as comfortable adjustable operator's seats right and left.	Standard	2430848	USD	0.00
Operator's platform in "Operator Comfort System" version, consisting of movable and fully air-conditioned comfort cab with air-sprung operator's seat, 6-way camera system, joystick machine control and radio. An integrated intercom provides good communication with the second machine operator.	Option	2433078	USD	87,074.00
Operator's platform				
Complete mirror set: two mirrors front, one mirror middle and one mirror on rear of the machine	Standard	2105659	USD	0.00
Complete mirror set, partial from operator's platform electrically folding as well as additionally heated and with truck stop and go indication	Option	2105660	USD	5,293.00
Material transport				
Robust 7,900 mm (25 ft 11 in) long discharge conveyor with conveyor belt system 850 mm (2 ft 9 in) and hydraulic folding device for shortening the transport length	Standard	2430852	USD	0.00
Water tank filling				
Additional water tank filling from the rear of the machine using a stopcock.	Standard	2120201	USD	0.00
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filling pump.	Option	2430853	USD	3,691.00
Paint				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	Standard	2433013	USD	0.00
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	Option	2433222	USD	2,334.00

<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 6 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 3 rotary beacons.	<b>Standard</b>	<b>2346607</b>	<b>USD</b>	<b>0.00</b>
Powerful LED lighting system 24 V. Consisting of 6 additional LED working lights for optimum illumination of the working area. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 3 LED rotary beacons.	<b>Option</b>	<b>2346608</b>	<b>USD</b>	<b>4,085.00</b>
<b>Equipment Options</b>				
<b>Additional weight</b>				
Additional weight 3,748 lbs / 1,700 kg	<b>Standard</b>	<b>2199810</b>	<b>USD</b>	<b>0.00</b>
Large sized storage compartment for 29 pick containers mounted on the rear of the machine instead of the standard storage compartment.	<b>Option</b>	<b>2221603</b>	<b>USD</b>	<b>3,257.00</b>
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	<b>Standard</b>	<b>2105684</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				
Operator's platform equipped with weather canopy including windscreen and rear window. The canopy is equipped with extensions on both sides and protects the entire operator's platform from rain and sunlight. The canopy itself is made of highly durable GFRP and the windscreen and rear window are scratch-resistant laminated protective glass. The canopy can be folded up electrohydraulically to facilitate machine transport.	<b>Option</b>	<b>2492942</b>	<b>USD</b>	<b>14,304.00</b>

Hot air heating in the footwell area of the operator's platform	<b>Option</b>	<b>2174234</b>	<b>USD</b>	<b>1,696.00</b>
<b>Device for milling drum change</b>				
Milling drum mounting and transport carriage FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	<b>Option</b>	<b>2312515</b>	<b>USD</b>	<b>6,284.00</b>
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	<b>Option</b>	<b>2344691</b>	<b>USD</b>	<b>1,330.00</b>
<b>Options for belt conveyor</b>				
Support device for putting the discharge conveyor on the low-loader.	<b>Standard</b>	<b>60603</b>	<b>USD</b>	<b>0.00</b>
<b>Leveling</b>				
Expansion leveling system for scanning ahead of the milling drum right, with hydraulic sensor, connection cable and holder. (Can also be mounted on left)	<b>Option</b>	<b>2112702</b>	<b>USD</b>	<b>2,999.00</b>
Expansion leveling system for scanning ahead of the milling drum right and left, with hydraulic sensor, connection cable and holder	<b>Standard</b>	<b>2112703</b>	<b>USD</b>	<b>0.00</b>
<b>Additional control unit LEVEL PRO</b>				
Expansion LEVEL PRO with an additional operating display, including required connection cable	<b>Standard</b>	<b>2137348</b>	<b>USD</b>	<b>0.00</b>
<b>Leveling</b>				
Pre-fitting for multiplex system comprising 4 sensors sockets for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	<b>Standard</b>	<b>2436230</b>	<b>USD</b>	<b>0.00</b>
Expansion leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, connection cable and holder	<b>Option</b>	<b>2436231</b>	<b>USD</b>	<b>3,026.00</b>
Expansion of leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors, connection cable and holder	<b>Option</b>	<b>2436232</b>	<b>USD</b>	<b>6,392.00</b>

<b>Water system</b>			
Powerful, hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min (4 gpm) at 150 bar (2175 psi) pressure.	<b>Option</b>	<b>2105701</b>	<b>USD 2,443.00</b>
<b>Pick changing aids</b>			
Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in this case.	<b>Standard</b>	<b>2105702</b>	<b>USD 0.00</b>
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	<b>Option</b>	<b>2178052</b>	<b>USD 3,461.00</b>
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	<b>Standard</b>	<b>2137372</b>	<b>USD 0.00</b>
Fold-open seats on the rear track units for the pick change, with integrated storage compartment for pick change tools and 4 pick containers	<b>Standard</b>	<b>2105678</b>	<b>USD 0.00</b>
<b>Diesel tank filling systems</b>			
Electrically operated diesel suction and pressure pump for the diesel tank filling with 5.00 m suction hose.	<b>Option</b>	<b>2125976</b>	<b>USD 896.00</b>
<b>Wirtgen information and diagnostic system</b>			
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO display.	<b>Standard</b>	<b>2219502</b>	<b>USD 0.00</b>
<b>Camera system</b>			
Monitor system as maneuvering aid with 2 cameras. Each of these shows the area behind the machine as well as the area in front of the loading conveyor. The camera images are displayed on the machine control display.	<b>Standard</b>	<b>2526011</b>	<b>USD 0.00</b>
Extensive monitor system consisting of a total of 6 cameras and an additional monitor. Cameras 1 and 2 show the areas behind the machine as well as ahead of the load belt, and thus facilitate maneuvering and loading. Cameras 3-6 show the area in front of the milling drum unit, the milled area behind the milling unit as well as the side plate and the front right and left chassis units, thereby facilitating the working process. Camera images 1-2 are displayed in the machine control display, camera images 3-6 are output on the additional monitor.	<b>Option</b>	<b>2530073</b>	<b>USD 9,364.00</b>
<b>Other devices</b>			
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2658169</b>	<b>USD 434.00</b>
<b>Documentation</b>			
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD 81.00</b>
<sup>1</sup> Option must be ordered from headquarters. Date: 3/6/2019			

## Price list W 210i

### Scope of supply – basic machine

- Engine: 2x 6-cylinder diesel engines type: Cummins QSL 9
- Maximum power at 1900 r.p.m.: 537 kW / 720 HP / 730 PS
- Exhaust standard: EU Stage 4 / US Tier 4f

Fold-open seats on the rear track units for the pick change, with integrated storage compartment for pick change tools and 4 pick containers	<b>Standard</b>	<b>2105678</b>	<b>USD</b>	<b>0.00</b>
<b>Diesel tank filling systems</b>				
Electrically operated diesel suction and pressure pump for the diesel tank filling with 5.00 m suction hose.	<b>Option</b>	<b>2125976</b>	<b>USD</b>	<b>896.00</b>
<b>Wirtgen information and diagnostic system</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO display.	<b>Standard</b>	<b>2219502</b>	<b>USD</b>	<b>0.00</b>
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras. Each of these shows the area behind the machine as well as the area in front of the loading conveyor. The camera images are displayed on the machine control display.	<b>Standard</b>	<b>2526011</b>	<b>USD</b>	<b>0.00</b>
Extensive monitor system consisting of a total of 6 cameras and an additional monitor. Cameras 1 and 2 show the areas behind the machine as well as ahead of the load belt, and thus facilitate maneuvering and loading. Cameras 3-6 show the area in front of the milling drum unit, the milled area behind the milling unit as well as the side plate and the front right and left chassis units, thereby facilitating the working process. Camera images 1-2 are displayed in the machine control display, camera images 3-6 are output on the additional monitor.	<b>Option</b>	<b>2530073</b>	<b>USD</b>	<b>9,364.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2658169</b>	<b>USD</b>	<b>434.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list

# W 220i

### Scope of supply – basic machine

- Engine: 6-cylinder diesel engine: CATERPILLAR C18 ATAAC
- Rated power at 1,950 r.p.m.: 597 KW / 801 HP / 812 PS
- Exhaust standard: US Tier 4f
- Standard milling width: 7 ft 3 in / 2,200 mm
- Maximum milling depth: 1 ft 2 in / 350 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with double-sided wasp waist
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Cooling system with temperature-controlled fan speed
- Large storage compartments for pick containers

### MILLING DRUM HOUSING

- Three milling drum rotation speeds with electric on/off function 105 r.p.m. - 94 r.p.m. - 84 r.p.m.
- Hydraulic material depressor with conveyor lifting function
- Hydraulically movable and positionable scraper plate with automatic locking
- Hydraulically lifting side plate, right clearance 1 ft 6 in / 450 mm and left clearance 1 ft 2 in / 350 mm
- Two water sprinkling strips in the milling drum unit with separate on/off function

### LOADING OF MILLED MATERIAL

- Conveyor system with manually or automatically adjustable conveying speed
- Water spray system in the primary conveyor
- Slewing angle discharge conveyor  $\pm 60^\circ$

### MACHINE CONTROL AND LEVELLING SYSTEM

- Multi-function control display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Milling power control with automatic on/off function
- Two exterior panels for operating functions by ground crew
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system

### OPERATOR'S PLATFORM

- Fully anti-vibration mounted operator's platform
- Convenient, individually adjustable control panel
- Convenient access to the operator's platform, right and left
- Lockable control panel covers
- Two mirrors front, one mirror middle and one mirror in rear area of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- Freely selectable steering functions for the four-track steering
- Extremely wear-resistant, two-piece EPS polyurethane track pads

#### **MISCELLANEOUS**

- Lighting system including 3 halogen floodlights and 4 LED lights in the area of the milling unit
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- Water high-pressure system with automatic on/off function
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 897,017.00**

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing FB2200 (7 ft 3 in) FCS-Light, with pre-fitting enabling a quick and easy change of milling drums with varying spacings and equal milling widths, without milling drum.	Standard	2205464	USD	0.00
Milling drums / milling units				
FCS milling drum with milling width 2200 mm / 7 ft / 3 in, milling depth max. 350 mm / 1 ft 2 in, tool spacing 15 mm / 19/32 in, equipped with quick-change toolholder system HT22 and 188 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2309352	USD	0.00
Operator's platform				
Flexibly mounted operator's platform with clearly laid-out control panel and control display as well as a large storage compartment (approx. 250 l / 66 gal) on the operator's platform and single standing seats on the right and left. The storage compartment has a variable, removable false floor and a lockable lid which can also be used as a seat. It is used for storing tools, pick elements, a coolbox, etc.	Option	2546282	USD	3,026.00
Flexibly mounted operator's platform with clear control panels and control display as well as comfortable adjustable operator's seats right and left.	Standard	2546283	USD	0.00
Operator's platform in "Operator Comfort System" version, consisting of movable and fully air-conditioned comfort cab with air-sprung operator's seat, 6-way camera system, joystick machine control and radio. An integrated intercom provides good communication with the second machine operator.	Option	2542246	USD	87,074.00
Operator's platform				
Complete mirror set: two mirrors front, one mirror middle and one mirror on rear of the machine	Standard	2105659	USD	0.00
Complete mirror set, partial from operator's platform electrically folding as well as additionally heated and with truck stop and go indication	Option	2105660	USD	5,293.00
Material transport				
Robust 26 ft 9 in / 8,150 mm long discharge conveyor with conveyor belt system 3 ft 3 in / 1,000 mm and hydraulic folding device for shortening the transport length	Standard	2542405	USD	0.00

<b>Water tank filling</b>				
Additional water tank filling from the rear of the machine using a stopcock.	<b>Standard</b>	<b>2466094</b>	<b>USD</b>	<b>0.00</b>
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filling pump.	<b>Option</b>	<b>2465765</b>	<b>USD</b>	<b>3,447.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2542404</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2542407</b>	<b>USD</b>	<b>2,348.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 6 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 3 rotary beacons.	<b>Standard</b>	<b>2346607</b>	<b>USD</b>	<b>0.00</b>
Powerful LED lighting system 24 V. Consisting of 6 additional LED working lights for optimum illumination of the working area. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 3 LED rotary beacons.	<b>Option</b>	<b>2346608</b>	<b>USD</b>	<b>4,085.00</b>
<b>Equipment Options</b>				
Large sized storage compartment for 34 pick containers mounted on the rear of the machine instead of the standard storage compartment.	<b>Option</b>	<b>2223465</b>	<b>USD</b>	<b>3,257.00</b>

<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	<b>Standard</b>	<b>2159104</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				
Operator's platform equipped with weather canopy including windscreen and rear window. The canopy is equipped with extensions on both sides and protects the entire operator's platform from rain and sunlight. The canopy itself is made of highly durable GFRP and the windscreen and rear window are scratch-resistant laminated protective glass. The canopy can be folded up electrohydraulically to facilitate machine transport.	<b>Option</b>	<b>2492943</b>	<b>USD</b>	<b>14,304.00</b>
Hot air heating in the footwell area of the operator's platform	<b>Option</b>	<b>2174234</b>	<b>USD</b>	<b>1,696.00</b>
<b>Device for milling drum change</b>				
Milling drum mounting and transport carriage FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	<b>Option</b>	<b>2312515</b>	<b>USD</b>	<b>6,284.00</b>
<b>Options for belt conveyor</b>				
Support device for putting the discharge conveyor on the low-loader.	<b>Standard</b>	<b>60603</b>	<b>USD</b>	<b>0.00</b>
<b>Leveling</b>				<b>0</b>
Expansion leveling system for scanning ahead of the milling drum right, with hydraulic sensor, connection cable and holder. (Can also be mounted on left)	<b>Standard</b>	<b>2125960</b>	<b>USD</b>	<b>0.00</b>
Expansion leveling system for scanning ahead of the milling drum right and left, with hydraulic sensor, connection cable and holder	<b>Option</b>	<b>2125961</b>	<b>USD</b>	<b>5,591.00</b>
<b>Additional control unit LEVEL PRO</b>				<b>0</b>
Expansion LEVEL PRO with an additional operating display, including required connection cable	<b>Standard</b>	<b>2137348</b>	<b>USD</b>	<b>0.00</b>
<b>Leveling</b>				
Pre-fitting for multiplex system comprising 4 sensors sockets for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	<b>Standard</b>	<b>2436230</b>	<b>USD</b>	<b>0.00</b>
Expansion leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, connection cable and holder	<b>Standard</b>	<b>2436231</b>	<b>USD</b>	<b>0.00</b>
<b>Water system</b>				
Powerful, hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min (4 gpm) at 150 bar (2175 psi) pressure.	<b>Option</b>	<b>2210128</b>	<b>USD</b>	<b>2,443.00</b>

<b>Pick changing aids</b>				
Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in this case.	Standard	2125977	USD	0.00
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	Option	2178052	USD	3,461.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	Standard	2137372	USD	0.00
Fold-open seats on the rear track units for the pick change, with integrated storage compartment for pick change tools and 4 pick containers	Option	2105678	USD	1,914.00
<b>Diesel tank filling systems</b>				0
Electrically operated diesel suction and pressure pump for the diesel tank filling with 5.00 m suction hose.	Option	2125976	USD	896.00
<b>Wirtgen information and diagnostic system</b>				0
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO display.	Standard	2219502	USD	0.00
<b>Camera system</b>				0
Monitor system as maneuvering aid with 2 cameras. Each of these shows the area behind the machine as well as the area in front of the loading conveyor. The camera images are displayed on the machine control display.	Standard	2526011	USD	0.00
Extensive monitor system consisting of a total of 6 cameras and an additional monitor. Cameras 1 and 2 show the areas behind the machine as well as ahead of the load belt, and thus facilitate maneuvering and loading. Cameras 3-6 show the area in front of the milling drum unit, the milled area behind the milling unit as well as the side plate and the front right and left chassis units, thereby facilitating the working process. Camera images 1-2 are displayed in the machine control display, camera images 3-6 are output on the additional monitor.	Option	2530073	USD	9,364.00
<b>Other devices</b>				0
License plate holder with LED lighting to comply with country-specific regulations.	Option	2658169	USD	434.00
<b>Documentation</b>				0
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

**Price list****W 250i - 2200 mm****Scope of supply – basic machine**

- Engine: 2x 6-cylinder diesel engines type Cummins QSX15 and QSL 9
- Rated engine power 2100 r.p.m.: 730 kW / 979 HP / 993 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 7 ft 3 in / 2,200 mm
- Theoretical milling depth: 1 ft 2 in / 350 mm

**STANDARD EQUIPMENT**

- Basic machine with engine
- Machine chassis with double-sided wasp waist
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Cooling system with temperature-controlled fan speed
- Large storage compartments for pick containers

**MILLING DRUM HOUSING**

- Three milling drum rotation speeds with electric on/off function 105 r.p.m. - 94 r.p.m. - 84 r.p.m.
- Hydraulic material depressor with conveyor lifting function
- Hydraulically movable and positionable scraper plate with automatic locking
- Hydraulically lifting side plate, right clearance 1 ft 6 in / 450 mm and left clearance 1 ft 2 in / 350 mm
- Two water sprinkling strips in the milling drum unit with separate on/off function

**LOADING OF MILLED MATERIAL**

- Conveyor system with manually or automatically adjustable conveying speed
- Water spray system in the primary conveyor
- Slewing angle discharge conveyor  $\pm 60^\circ$

**MACHINE CONTROL AND LEVELLING SYSTEM**

- Multi-function control display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Milling power control with automatic on/off function
- Two exterior panels for operating functions by ground crew
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system

**OPERATOR'S PLATFORM**

- Fully anti-vibration mounted operator's platform
- Convenient, individually adjustable control panel
- Convenient access to the operator's platform, right and left
- Lockable control panel covers
- Two mirrors front, one mirror middle and one mirror in rear area of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- Freely selectable steering functions for the four-track steering
- Extremely wear-resistant, two-part EPS Plus polyurethane track pads

#### **MISCELLANEOUS**

- Lighting system including 3 halogen floodlights and 4 LED lights in the area of the milling unit
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

<b>Device for milling drum change</b>				
Transport carriage for milling drum units from FB2200 (7 ft 3 in) to FB4400 (14 ft 5 in), for simplified milling drum unit change and handling in the workshop or the field.	<b>Option</b>	<b>2282163</b>	<b>USD</b>	<b>16,964.00</b>
Milling drum mounting and transport carriage FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	<b>Option</b>	<b>2312515</b>	<b>USD</b>	<b>6,284.00</b>
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	<b>Option</b>	<b>2466044</b>	<b>USD</b>	<b>1,330.00</b>
<b>Options for belt conveyor</b>				
Support device for putting the discharge conveyor on the low-loader.	<b>Standard</b>	<b>60603</b>	<b>USD</b>	<b>0.00</b>
<b>Leveling</b>				
Expansion leveling system for scanning ahead of the milling drum right, with hydraulic sensor, connection cable and holder. (Can also be mounted on left)	<b>Standard</b>	<b>2125960</b>	<b>USD</b>	<b>0.00</b>
Expansion leveling system for scanning ahead of the milling drum right and left, with hydraulic sensor, connection cable and holder	<b>Option</b>	<b>2125961</b>	<b>USD</b>	<b>5,591.00</b>
<b>Additional control unit LEVEL PRO</b>				
Expansion LEVEL PRO with an additional operating display, including required connection cable	<b>Standard</b>	<b>2137348</b>	<b>USD</b>	<b>0.00</b>
<b>Leveling</b>				
Pre-fitting for multiplex system comprising 4 sensors sockets for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	<b>Standard</b>	<b>2436230</b>	<b>USD</b>	<b>0.00</b>
Expansion leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, connection cable and holder	<b>Option</b>	<b>2487117</b>	<b>USD</b>	<b>3,026.00</b>

Expansion of leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors, connection cable and holder	<b>Option</b>	<b>2487127</b>	<b>USD</b>	<b>6,392.00</b>
<b>Water system</b>				
Powerful, hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min (4 gpm) at 150 bar (2175 psi) pressure.	<b>Option</b>	<b>2125975</b>	<b>USD</b>	<b>2,443.00</b>
<b>Pick changing aids</b>				
Milling drum rotation device with electro-hydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in this case.	<b>Standard</b>	<b>2125977</b>	<b>USD</b>	<b>0.00</b>
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	<b>Option</b>	<b>2178052</b>	<b>USD</b>	<b>3,461.00</b>
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	<b>Standard</b>	<b>2137372</b>	<b>USD</b>	<b>0.00</b>
Fold-open seats on the rear track units for the pick change, with integrated storage compartment for pick change tools and 4 pick containers	<b>Standard</b>	<b>2105678</b>	<b>USD</b>	<b>0.00</b>
<b>Diesel tank filling systems</b>				
Electrically operated diesel suction and pressure pump for the diesel tank filling with 5.00 m suction hose.	<b>Option</b>	<b>2125976</b>	<b>USD</b>	<b>896.00</b>
<b>Wirtgen information and diagnostic system</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO display.	<b>Standard</b>	<b>2219502</b>	<b>USD</b>	<b>0.00</b>
<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras. Each of these shows the area behind the machine as well as the area in front of the loading conveyor. The camera images are displayed on the machine control display.	<b>Standard</b>	<b>2526011</b>	<b>USD</b>	<b>0.00</b>
Extensive monitor system consisting of a total of 6 cameras and an additional monitor. Cameras 1 and 2 show the areas behind the machine as well as ahead of the load belt, and thus facilitate maneuvering and loading. Cameras 3-6 show the area in front of the milling drum unit, the milled area behind the milling unit as well as the side plate and the front right and left chassis units, thereby facilitating the working process. Camera images 1-2 are displayed in the machine control display, camera images 3-6 are output on the additional monitor.	<b>Option</b>	<b>2530073</b>	<b>USD</b>	<b>9,364.00</b>

Other devices				
License plate holder with LED lighting to comply with country-specific regulations.	Option	2658169	USD	434.00
Documentation				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00
<sup>1</sup> Option must be ordered from headquarters. Date: 3/6/2019				

**Price list****W 250i - 3800 mm****Scope of supply – basic machine**

- Engine: 2x 6-cylinder diesel engines type Cummins QSX15 and QSL 9
- Rated engine power 2100 r.p.m.: 730 kW / 979 HP / 993 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 7 ft 3 in / 2,200 mm
- Theoretical milling depth: 1 ft 2 in / 350 mm

**STANDARD EQUIPMENT**

- Basic machine with engine
- Machine chassis with double-sided wasp waist
- Hydraulically opening, soundproof engine cowling
- Air compressor system
- Battery-operated hydraulic unit for auxiliary drive
- Cooling system with temperature-controlled fan speed
- Large storage compartments for pick containers

**MILLING DRUM HOUSING**

- Three milling drum rotation speeds with electric on/off function 105 r.p.m. - 94 r.p.m. - 84 r.p.m.
- Hydraulic material depressor with conveyor lifting function
- Hydraulically movable and positionable scraper plate with automatic locking
- Hydraulically lifting side plate, right clearance 1 ft 6 in / 450 mm and left clearance 1 ft 2 in / 350 mm
- Two water sprinkling strips in the milling drum unit with separate on/off function

**LOADING OF MILLED MATERIAL**

- Conveyor system with manually or automatically adjustable conveying speed
- Water spray system in the primary conveyor
- Slewing angle discharge conveyor  $\pm 60^\circ$

**MACHINE CONTROL AND LEVELLING SYSTEM**

- Multi-function control display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Milling power control with automatic on/off function
- Two exterior panels for operating functions by ground crew
- LEVEL PRO PLUS leveling system right and left
- RAPID SLOPE cross-slope sensor for LEVEL PRO ACTIVE leveling system

**OPERATOR'S PLATFORM**

- Fully anti-vibration mounted operator's platform

- Convenient, individually adjustable control panel
- Convenient access to the operator's platform, right and left
- Lockable control panel covers
- Two mirrors front, one mirror middle and one mirror in rear area of the machine

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- PTS – automatic alignment of the machine parallel to the pavement surface
- ISC – intelligent track speed control including hydraulic four-track drive
- Fourfold full-floating axle for high machine stability
- Freely selectable steering functions for the four-track steering
- Extremely wear-resistant, two-part EPS Plus polyurethane track pads

#### **MISCELLANEOUS**

- Lighting system including 3 halogen floodlights and 4 LED lights in the area of the milling unit
- "Welcome" and "Go home" lights feature including LED lighting in the area of the operator's platform and access
- Comprehensive toolkit in lockable toolbox
- A total of six EMERGENCY STOP switches in appropriate positions on the machine
- High-pressure water system with automatic on/off function, 261 psi / 18 bar, 17 gal.min / 67 l/min
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 1,125,696.00**

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing FB3800 MCS EXTEND, without a milling drum, designed to be converted to other milling widths.	Standard	2473279	USD	0.00
Milling drums / milling units				
Multi-part FCS milling drum with milling width of 3,800 mm / 149 39/64 in, milling depth of max. 350 mm / 1 ft 2 in, tool spacing of 15 mm / 19/32 in, equipped with HT22 toolholder system and 314 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2309342	USD	0.00
Operator's platform				
Flexibly mounted operator's platform with clearly laid-out control panel and control display as well as a large storage compartment (approx. 250 l / 66 gal) on the operator's platform and single standing seats on the right and left. The storage compartment has a variable, removable false floor and a lockable lid which can also be used as a seat. It is used for storing tools, pick elements, a coolbox, etc.	Option	2488409	USD	3,026.00
Flexibly mounted operator's platform with clear control panels and control display as well as comfortable adjustable operator's seats right and left.	Standard	2465733	USD	0.00
Operator's platform in "Operator Comfort System" version, consisting of movable and fully air-conditioned comfort cab with air-sprung operator's seat, 6-way camera system, joystick machine control and radio. An integrated intercom provides good communication with the second machine operator.	Option	2465734	USD	87,074.00
Operator's platform				
Complete mirror set: two mirrors front, one mirror middle and one mirror on rear of the machine	Standard	2105659	USD	0.00
Complete mirror set, partial from operator's platform electrically folding as well as additionally heated and with truck stop and go indication	Option	2105660	USD	5,293.00
Material transport				
Robust 26 ft 9 in / 8,150 mm long discharge conveyor with conveyor belt system 3 ft 7 in / 1,100 mm and hydraulic folding device for shortening the transport length	Standard	2465982	USD	0.00
Water tank filling				
Additional water tank filling from the rear of the machine using a stopcock.	Standard	2466094	USD	0.00
Additional water tank filling from the rear of the machine with a powerful, hydraulically operated filling pump.	Option	2465765	USD	3,447.00

<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2465983</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2465985</b>	<b>USD</b>	<b>2,334.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 6 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 3 rotary beacons.	<b>Standard</b>	<b>2346607</b>	<b>USD</b>	<b>0.00</b>
Powerful LED lighting system 24 V. Consisting of 6 additional LED working lights for optimum illumination of the working area. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 3 LED rotary beacons.	<b>Option</b>	<b>2346608</b>	<b>USD</b>	<b>4,085.00</b>
<b>Equipment Options</b>				
<b>Additional weight</b>				
Large sized storage compartment for 34 pick containers mounted on the rear of the machine instead of the standard storage compartment.	<b>Option</b>	<b>2474988</b>	<b>USD</b>	<b>3,257.00</b>
<b>Exhaust air filter</b>				
VCS - Vacuum Cutting System on the discharge conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	<b>Standard</b>	<b>2125949</b>	<b>USD</b>	<b>0.00</b>
VCS extraction system on the discharge double conveyor, for extraction of fine material particles and water vapor from the sealed milling unit.	<b>Option</b>	<b>2488858</b>	<b>USD</b>	<b>8,251.00</b>

<b>Equipment operator's platform</b>				
Operator's platform equipped with weather canopy including windscreen and rear window. The canopy is equipped with extensions on both sides and protects the entire operator's platform from rain and sunlight. The canopy itself is made of highly durable GFRP and the windscreen and rear window are scratch-resistant laminated protective glass. The canopy can be folded up electrohydraulically to facilitate machine transport.	<b>Option</b>	<b>2492943</b>	<b>USD</b>	<b>14,304.00</b>
Hot air heating in the footwell area of the operator's platform	<b>Option</b>	<b>2174234</b>	<b>USD</b>	<b>1,696.00</b>
<b>Device for milling drum change</b>				
Transport carriage for milling drum units from FB2200 (7 ft 3 in) to FB4400 (14 ft 5 in), for simplified milling drum unit change and handling in the workshop or the field.	<b>Option</b>	<b>2282163</b>	<b>USD</b>	<b>16,964.00</b>
Milling drum mounting and transport carriage FB1500 (4 ft 11 in) to FB2500 (8 ft 2 in)	<b>Option</b>	<b>2312515</b>	<b>USD</b>	<b>6,284.00</b>
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	<b>Option</b>	<b>2466044</b>	<b>USD</b>	<b>1,330.00</b>
<b>Options for belt conveyor</b>				
Support device for putting the discharge conveyor on the low-loader.	<b>Standard</b>	<b>60603</b>	<b>USD</b>	<b>0.00</b>
<b>Leveling</b>				
Expansion leveling system for scanning ahead of the milling drum right, with hydraulic sensor, connection cable and holder. (Can also be mounted on left)	<b>Standard</b>	<b>2125960</b>	<b>USD</b>	<b>0.00</b>
Expansion leveling system for scanning ahead of the milling drum right and left, with hydraulic sensor, connection cable and holder	<b>Option</b>	<b>2125961</b>	<b>USD</b>	<b>5,591.00</b>
<b>Additional control unit LEVEL PRO</b>				
Expansion LEVEL PRO with an additional operating display, including required connection cable	<b>Standard</b>	<b>2137348</b>	<b>USD</b>	<b>0.00</b>

<b>Leveling</b>				
Pre-fitting for multiplex system comprising 4 sensors sockets for expanding the leveling system with one or two multiplex systems. Permits trouble-free connection of at most 2 multiplex sensors per machine side at a later point.	<b>Standard</b>	<b>2436230</b>	<b>USD</b>	<b>0.00</b>
Expansion leveling system for multiplex system package 3-way right, including 2 x ultrasonic sensors, connection cable and holder	<b>Option</b>	<b>2487117</b>	<b>USD</b>	<b>3,026.00</b>
Expansion of leveling system to make multiplex system package 3-way right and 3-way left, including 4 x ultrasonic sensors, connection cable and holder	<b>Option</b>	<b>2487127</b>	<b>USD</b>	<b>6,392.00</b>
<b>Water system</b>				
Powerful, hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min (4 gpm) at 150 bar (2175 psi) pressure.	<b>Option</b>	<b>2125975</b>	<b>USD</b>	<b>2,443.00</b>
<b>Pick changing aids</b>				
Milling drum rotation device for the XXL milling drum unit with electro-hydraulic milling drum drive for slowly turning the milling drum in the pick change. The diesel engine can be switched off in this case.	<b>Standard</b>	<b>2125978</b>	<b>USD</b>	<b>0.00</b>
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	<b>Option</b>	<b>2178052</b>	<b>USD</b>	<b>3,461.00</b>
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	<b>Standard</b>	<b>2137372</b>	<b>USD</b>	<b>0.00</b>
Fold-open seats on the rear track units for the pick change, with integrated storage compartment for pick change tools and 4 pick containers	<b>Standard</b>	<b>2105678</b>	<b>USD</b>	<b>0.00</b>
<b>Diesel tank filling systems</b>				
Electrically operated diesel suction and pressure pump for the diesel tank filling with 5.00 m suction hose.	<b>Option</b>	<b>2125976</b>	<b>USD</b>	<b>896.00</b>
<b>Wirtgen information and diagnostic system</b>				
The actual milling depth is measured by a differential method between sensors on the side plate and sensors on the scraper. The actual milling depth is displayed in the Info menu of the LEVEL PRO display.	<b>Standard</b>	<b>2219502</b>	<b>USD</b>	<b>0.00</b>

<b>Camera system</b>				
Monitor system as maneuvering aid with 2 cameras. Each of these shows the area behind the machine as well as the area in front of the loading conveyor. The camera images are displayed on the machine control display.	<b>Standard</b>	<b>2526011</b>	<b>USD</b>	<b>0.00</b>
Extensive monitor system consisting of a total of 6 cameras and an additional monitor. Cameras 1 and 2 show the areas behind the machine as well as ahead of the load belt, and thus facilitate maneuvering and loading. Cameras 3-6 show the area in front of the milling drum unit, the milled area behind the milling unit as well as the side plate and the front right and left chassis units, thereby facilitating the working process. Camera images 1-2 are displayed in the machine control display, camera images 3-6 are output on the additional monitor.	<b>Option</b>	<b>2530073</b>	<b>USD</b>	<b>9,364.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2658169</b>	<b>USD</b>	<b>434.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>
<sup>1</sup> Option must be ordered from headquarters.				
Date: 3/6/2019				

## Price list W 35 Ri

### Scope of supply – basic machine

- Engine: 4-cylinder diesel engine type DEUTZ TCD 2.9 L4
- Rated engine power at 2100 - 2300 rpm: 45 kW / 60 HP / 61 PS
- Emission standard: EU Stage 3b / US Tier 4f
- Standard milling width: 1 ft 2 in / 350 mm
- Theoretical milling depth: 4 in / 110 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Robust machine chassis
- Wide opening engine cowlings, with gas spring support and highly effective noise insulation
- Radiator with temperature-dependent fan speed
- Integrated 72 gal / 275 liter water tank
- Integrated 18 gal / 70 liter diesel tank
- Loading and tie-down points integrated in the chassis

### MILLING DRUM UNIT

- Water sprayingstrip with on/off function for pick cooling with water pump with load-dependent control
- Wide opening milling drum door with automatic electrical safety shut-down
- Right side plate in hinged configuration in conjunction with centering pin system on the milling drum holder for quick and easy change of milling drums
- The right-hand side plate can be easily lifted using the foot pedal on the operator's stand

### MACHINE CONTROL AND LEVELLING SYSTEM

- WIDRIVE machine controller to reduce operator workload and increase performance

### OPERATOR'S PLATFORM

- Flexibly mounted operator's platform on the top of the machine
- Multi-function armrest on right with up/down and front/back adjustment with joystick and various controls ergonomically arranged
- Display for important machine parameters on the left control panel
- Convenient operating console with practical switches
- Convenient footstep to the operator's platform
- Operator's platform with vibration damping
- Steering console with adjustable inclination
- Lockable control panel covers

### CHASSIS AND HEIGHT ADJUSTMENT

- Hydraulic 3-wheel all-wheel drive with hydraulic flow distributor
- Two manually engageable milling speeds as well as one traveling gear
- Hydraulic, easy front wheel steering
- Hydraulic spring-loaded multi-disc brake
- Hydraulic height adjustment with two speeds at the rear track units
- Manually folding-in rear right wheel

#### **MISCELLANEOUS**

- Lockable tool box with set of tools for maintenance and servicing
- Additional mount for a pick container
- Device for towing away for releasing the spring-loaded multi-disc brake
- Reversing horn
- Extensive safety package with EMERGENCY STOP switch
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 178,627.00**

<b>Mandatory Options</b>				
<b>Exhaust Gas After Treatment</b>				
Exhaust after-treatment by diesel oxidation catalytic converter DOC in exhaust emissions category EU Stage 3b / US Tier 4f. Without diesel particulate filter.	<b>Standard</b>	<b>2368620</b>	<b>USD</b>	<b>0.00</b>
Exhaust after-treatment by diesel oxidation catalyst DOC in exhaust emissions category EU Stage 3b / US Tier 4f. Additionally equipped with diesel particulate filter (DPF) - for operation e.g. in halls or in environmental zones with limited fine dust emission.	<b>Option</b>	<b>2378316</b>	<b>USD</b>	<b>4,736.00</b>
<b>Milling drum housing</b>				
Ancillary parts for milling drum housing for extending to FB350. For operation without discharge conveyor. With single closing cap. Without scraper and milling drum.	<b>Standard</b>	<b>2435407</b>	<b>USD</b>	<b>0.00</b>
Ancillary parts for milling drum housing for extending to FB350. For operation with discharge conveyor. Including scraper and scraper bottom part. Without milling drum.	<b>Option</b>	<b>2434106</b>	<b>USD</b>	<b>1,588.00</b>
Ancillary parts for milling drum housing for extending to FB500. For operation without discharge conveyor. With single closing cap. Without scraper and milling drum.	<b>Option</b>	<b>2430304</b>	<b>USD</b>	<b>2,470.00</b>
Ancillary parts for milling drum housing for extending to FB500. For operation with discharge conveyor. Including scraper and scraper bottom part. Without milling drum.	<b>Option</b>	<b>2430301</b>	<b>USD</b>	<b>4,397.00</b>
<b>Hydraulic connection</b>				
Hydraulic drive with quick-release connection and additional hydraulic pump for operation of discharge conveyor or hydraulic jack hammer.	<b>Standard</b>	<b>2433900</b>	<b>USD</b>	<b>0.00</b>
<b>Milling drums / milling units</b>				
Milling drum FB350 LA15, with welded pick holders HT08 with increased service life, milling depth max. 4 in / 110 mm, equipped with 31 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	<b>Standard</b>	<b>2430057</b>	<b>USD</b>	<b>0.00</b>
<b>Milling depth regulation</b>				
Mechanical milling depth indicator by a cable right and left connected to the side plate. Separate display on the left and right by a milling depth gage.	<b>Standard</b>	<b>2435408</b>	<b>USD</b>	<b>0.00</b>
LEVEL PRO PLUS leveling system. The measurement is made using wire-rope sensors on the side plate right and left. The milling depth is displayed and set intuitively on the LEVEL PRO PLUS operating display. The milling depth is regulated automatically. Incl. pre-fitting for additional sensors (e.g. Rapid Slope cross-slope sensor).	<b>Option</b>	<b>2376183</b>	<b>USD</b>	<b>7,817.00</b>

<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2376118</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2376119</b>	<b>USD</b>	<b>787.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Lighting system consisting of 2 halogen and 4 LED working lights. The headlights illuminate the area in front of the machine and the area in front of the milling drum unit. The light output of the working lights is approx. 9,700 lumens in total.	<b>Standard</b>	<b>2435593</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 1 halogen and 5 LED working lights. The headlights illuminate the area in front of the machine and the area in front of the milling drum unit. The light output of the working lights is approx. 10,300 lumens in total. LED working lights are extremely bright, shock-resistant and durable.	<b>Option</b>	<b>2435594</b>	<b>USD</b>	<b>244.00</b>
<b>Equipment Options</b>				
<b>Additional weight</b>				
Modular additional weight 3086 lbs / 1,400 kg for individual ballasting of the machine. The weight plates can be carried and easily mounted by one person.	<b>Standard</b>	<b>2450844</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				
Equipment of the operator's platform with a height adjustable standing seat for increasing operating comfort	<b>Standard</b>	<b>2460736</b>	<b>USD</b>	<b>0.00</b>

<b>Slot cutting ring</b>				
Ancillary parts and adapter with saw blade FB14 (5 in), milling depth max. 4 in / 100 mm, for the installation on zero edge right	<b>Option</b>	<b>2074431</b>	<b>USD</b>	<b>2,049.00</b>
Ancillary parts and adapter with saw blade FB19 (7 in), milling depth max. 4 in / 100 mm, for the installation on zero edge right	<b>Option</b>	<b>2120815</b>	<b>USD</b>	<b>2,036.00</b>
<b>Options for belt conveyor</b>				
Robust 6 ft 1 in / 1,870 mm long discharge conveyor with conveyor belt width 8 in / 250 mm. Includes comfortable rope winch height adjustment. Using a foldable roller unit, the discharge conveyor can be mounted and removed in just a few steps and is easy to transport on a construction site. When replacing the picks, the belt can simply be swung to the side without the hydraulic connections having to be disconnected.	<b>Option</b>	<b>2605148</b>	<b>USD</b>	<b>6,854.00</b>
<b>Lateral slope control</b>				
Expansion of the LEVEL PRO PLUS leveling system by a RAPID SLOPE cross-slope sensor. Ideal, for example for aligning the machine in a defined lateral tilt on a one-sided reference.	<b>Option</b>	<b>2368617</b>	<b>USD</b>	<b>4,004.00</b>
<b>Leveling</b>				
Pre-programmable height positions with automatic positioning. 3 freely selectable workings heights each on left and right can be predefined. E.g. for quickly moving to milling depths or lifting the machine out of the cut. The left and right positions can be moved to separately.	<b>Standard</b>	<b>2435844</b>	<b>USD</b>	<b>0.00</b>
<b>Attachments</b>				
Powerful hydraulic hammer including 32 ft 8 in / 10-m connecting hose for residual jobs	<b>Option</b>	<b>2435414</b>	<b>USD</b>	<b>5,171.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2656383</b>	<b>USD</b>	<b>434.00</b>
<b>Additional milling drums</b>				
Fine milling drum, with milling width 350 mm / 1 ft 2 in, milling depth max. 100 mm / 3 15/16 in, tool spacing 6 mm / 15/64 in, equipped with welded holder system HT5 and 57 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	<b>Option</b>	<b>187302</b>	<b>USD</b>	<b>5,605.00</b>
Microfine milling drum FB350 (14") LA3, with welded pick holders HT4, milling depth max. 1.2 in / 30 mm, equipped with 117 picks	<b>Option</b>	<b>187301</b>	<b>USD</b>	<b>8,319.00</b>

Microfine milling drum gutter profile, FB150 + lateral taper 2 x 1 in / 25 mm. With welded pick holders HT4, LA3, milling depth max. 1 in / 25 mm, equipped with 67 picks. Suitable for milling gutter shapes without edge and for removing road markings.	Option	193397	USD	5,700.00
Mark removing milling drum FB200+2x25 LA3, with welded pick holders HT4, milling depth max. 1.2 in / 30 mm, equipped with 83 picks.	Option	198782	USD	6,514.00
Mark removing milling drum FB250+2x25 LA3, with welded pick holders HT4, milling depth max. 1.2 in / 30 mm, equipped with 99 picks.	Option	198783	USD	7,396.00
Mark removing milling drum FB300+2x25 (12" + 2x 1") LA3, with welded pick holders HT4, milling depth max. 1.2 in / 30 mm, equipped with 117 picks.	Option	193339	USD	8,360.00
Milling drum FB80 (3") with welded pick holders HT02, milling depth max. 4 in / 110 mm, equipped with 12 picks, for the installation in the milling drum housing with zero edge right	Option	187307	USD	1,384.00
Milling drum FB500 LA15, with welded pick holders HT08 with increased service life, milling depth max. 4 in / 110 mm, equipped with 39 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Option	2430054	USD	3,800.00
Fine milling drum, with milling width 500 mm (1 ft 7 in), milling depth max. 100 mm, tool spacing 6 mm / 15/64 in, equipped with welded holder system HT05 and 82 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	Option	193398	USD	6,894.00
Mark removing milling drum FB450 +2x25 (18" + 2x 1") LA3, with welded pick holders HT4, milling depth max. 1.2 in / 30 mm, equipped with 166 picks.	Option	193396	USD	11,115.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00

<sup>1</sup>Option must be ordered from headquarters.

### Scope of supply – basic machine

- Engine: 4-CYLINDER DIESEL ENGINE TYPE DEUTZ TCD 4.1 L4
- Rated engine power 2300 r.p.m.: 105 kW / 141 HP / 143 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 1 ft 7 in / 500 mm
- Theoretical milling depth: 8 in / 210 mm

### STANDARD EQUIPMENT

- Engine cover with noise insulation and flexibly decoupled engine mounting for especially quiet running and low noise emissions

### MILLING DRUM UNIT

- Automatically activating, hydraulic drive belt tensioner for reliable power transmission to the milling drum
- Hydraulically lifting side plates with position measuring sensors in the hydraulic cylinders for measuring the milling depth.
- Round milling drum housing and straight left side plate for optimum material transport, making for low left-over amounts when lifting out the milling drum
- Prepared for using a scraper decoupled from the conveyor suspension for loading material using discharge conveyor
- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Optimized for quick change of the milling drum, including by using centering pins with the side door of the milling drum housing
- With automatic electrical safety shut-off for the milling drum

### LOADING OF MILLED MATERIAL

- Machine prepared for optional material loading by discharge conveyor
- Conveyor speed continuously variable
- Conveyor slewing angle right/left 30 degrees each for significantly improved loading procedures
- Slender conveyor suspension permits improved visibility to the rear

### OPERATOR'S PLATFORM

- Operator's platform with ergonomically arranged operator's seat, control panel arranged on the right and digital milling depth indicator in the control display
- Steering console with adjustable rake and reach for ideal adaptation of the operator's platform to the operator
- 2 rear-view mirrors left
- Machine design permits unobstructed view of the milled edge at the right and left as well as the working area in front of the milling drum on the right

- Conveniently accessible ladder/footstep to the operator's platform with night-time lighting and especially low, folding bottom edge of the latter/footstep
- Robust anti-vandalism protection for the controls

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Precise machine height adjustment in 0.04 or 0.2 in / 1 or 5 mm steps from the machine control panel
- Infinitely variable, hydraulic all-wheel drive with three speed ranges
- Digital load control, manual engageable, hydraulic differential lock (by flow distributor)
- Particularly wide solid rubber tires (1 ft / 300 mm) for the lowest ground pressures and optimum traction
- For milling along curb edges, the rear right support wheel can be swiveled hydraulically from the operator's platform in front of the milling drum. In addition, the machine does not have to be lowered.
- Hydraulic spring-loaded brake
- Proportional height adjustment at rear
- Additional machine controller for automatic milling of intermittent rumble strip sections. Only in combination with a rumble strip kit.

#### **MISCELLANEOUS**

- Optimized center of gravity position, irrespective of the filling levels of the water and fuel tanks
- Particularly low machine center of gravity for high stability of the machine
- Robust and easily maintained machine chassis with optimum ground clearance and short overhangs
- Device for towing away
- Reversing horn
- Large tool package with lockable tool box and additional storage space for two pick containers
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 287,538.00**

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing FB500 (20") with scraper system. For use with discharge conveyor.	Standard	2288339	USD	0.00
Milling drums / milling units				
Milling drum with milling width 500 mm / 1 ft 7 in, milling depth max. 210 mm / 8 in, tool spacing 15 mm / 19/32 in, equipped with welded pick holders HT08 with increased service life and 60 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2288343	USD	0.00
Material depressor / milling unit seal front				
Front milling drum unit seal FB500 (20") with hydraulic height and contact pressure adjustment. An overload sensor with control function lifts the seal briefly in case of a collision and thus prevents damage.	Standard	2288347	USD	0.00
Operator's platform				
Standard operator's seat with shock absorption and lengthways adjustment	Standard	2288348	USD	0.00
Comfort operator's seat incl. seat heating. The operator's seat has shock absorption, lengthways adjustment and can be swiveled through 20 degrees.	Option	2288349	USD	1,031.00
Milling depth regulation				
Digital milling depth indicator in the control display. The measurement is made using cylinder sensors in the lifting columns. Regulation is performed manually by the operator. With 3 freely assignable milling depth memory slots each for the left and right sides of the machine.	Standard	2288350	USD	0.00
LEVEL PRO PLUS leveling system. The measurement is made using cylinder sensors on the side plate right and left. The milling depth is displayed and set intuitively on the LEVEL PRO PLUS control display. The milling depth is regulated automatically. Incl. pre-fitting for additional sensors (e.g. Rapid Slope).	Option	2288352	USD	9,568.00
Hydraulic connection				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	Standard	2288355	USD	0.00
Machine with hydraulic pre-fitting for a discharge conveyor with quick-change coupling. For quick change of the discharge conveyor. Each contains the coupling element on the machine side and the discharge conveyor side.	Option	2329169	USD	3,501.00
Material transport				
Transport lock for locking the ejection opening for machine with loading conveyor removed	Option	2368733	USD	258.00
Shortened discharge conveyor 3 ft 7 in / 1,100 mm long with conveyor belt system 1 ft 2 in / 350 mm. Including hydraulic conveyor cylinder and installation material. Ideal for loading wheel loader buckets and wheelbarrows or for depositing the milled material at the side.	Option	2288358	USD	12,038.00

Discharge conveyor 18 ft 4 in / 5,600 mm long with conveyor belt width 1 ft 2 in / 350 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields. Including mechanical installation and removal assistance.	<b>Standard</b>	<b>2288359</b>	<b>USD</b>	<b>0.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2288360</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2288361</b>	<b>USD</b>	<b>1,262.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Lighting system consisting of 1 LED strip, 3 halogen and 8 LED working lights. The headlights illuminate the area in front of the machine, the left machine side, the area in front of the milling drum unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 16,700 lumen in total.	<b>Standard</b>	<b>2487449</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 2 LED strips, 1 halogen and 12 LED working lights. The headlights illuminate the area in front of the machine, the rear of the machine, the left machine side from the front and rear, the area in front of the milling drum unit, the wheel arch, the weather canopy, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 23,300 lumen in total. LED working lights are extremely bright, shock-resistant and durable.	<b>Option</b>	<b>2487450</b>	<b>USD</b>	<b>923.00</b>
<b>Crawler units</b>				
Chassis with 4 driven wheeled track units for a quick and maneuverable change of field with optimum traction and better distribution of ground pressure. The front wheels are arranged slightly offset and so permit larger steering angles as well as greater comfort and safety when crossing lateral steps.	<b>Standard</b>	<b>2286790</b>	<b>USD</b>	<b>0.00</b>

Equipment Options				
<b>Additional weight</b>				
Machine equipment with an additional weight 838 lbs / 380 kg behind the front axle. The additional weight increases the machine traction.	<b>Option</b>	<b>2288394</b>	<b>USD</b>	<b>2,076.00</b>
<b>Advance drive</b>				
Equipment of the machine with 4-wheel chassis with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine. The right rear wheel also steers, thereby enabling the smallest turning circles within a compact space.	<b>Standard</b>	<b>2478478</b>	<b>USD</b>	<b>0.00</b>
Equipment of the machine for increased transport speed by using more powerful hydraulic components, (3-wheel up to 8 km/h / 5 mph, 4-wheel up to 12 km/h / 7.5 mph). Working in the field is significantly accelerated by an increased transport speed of the machine. Option only possible in conjunction with precision steering.	<b>Standard</b>	<b>2478476</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				
Operator's platform with weather canopy and lateral weather protection elements. The weather canopy can be adjusted in height hydraulically. The transparent weather protection elements on the side on the roof and the right of the operator's platform protect the operator against the effects of weather driving in from the sides, and ensure additional comfort when working.	<b>Option</b>	<b>2309414</b>	<b>USD</b>	<b>8,862.00</b>
<b>Milling drum assembly options</b>				
Overload sensor on the scraper FB500/600 for automatic lifting function in case of obstacles. Effectively prevents the scraper from sinking into the loose sub-base, as well as getting stuck on obstacles.	<b>Option</b>	<b>2478474</b>	<b>USD</b>	<b>909.00</b>
Active floating position on the side plate right and left by continuous comparison between the milling depth and position of the side plate. If required, the side plate is lifted briefly to prevent tilting or sinking into a soft sub-base. (Only possible in conjunction with LEVEL PRO PLUS.)	<b>Option</b>	<b>2478486</b>	<b>USD</b>	<b>1,656.00</b>
<b>Side milling ring</b>				
Side milling ring with protective cover and ancillary parts FB80 (3") cpl., with welded pick holders HT02, milling depth max. 0 ft 11 in / 300 mm, equipped with 30 picks	<b>Option</b>	<b>2288386</b>	<b>USD</b>	<b>9,446.00</b>
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB600 (24"), for straightforward milling drum change.	<b>Option</b>	<b>177240</b>	<b>USD</b>	<b>665.00</b>
<b>Additional milling units</b>				
FCS milling unit FB400 (15,75") LA15, with welded pick holders HT08, milling depth max. 8 in / 210 mm, equipped with 54 picks. Including corresponding scraper bottom parts.	<b>Option</b>	<b>2288388</b>	<b>USD</b>	<b>6,949.00</b>
FCS milling unit FB300 (12") LA15, with welded pick holders HT08, milling depth max. 8 in / 210 mm, equipped with 47 picks. Including corresponding scraper bottom parts.	<b>Option</b>	<b>2288389</b>	<b>USD</b>	<b>5,985.00</b>

<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	<b>Option</b>	<b>2411669</b>	<b>USD</b>	<b>394.00</b>
<b>Options for belt conveyor</b>				
Additional shortened discharge conveyor 3 ft 7 in / 1,100 mm long with conveyor belt system 1 ft 2 in / 350 mm. Including hydraulic conveyor cylinder and installation material. Ideal for loading wheel loader buckets and wheelbarrows or for depositing the milled material at the side.	<b>Option</b>	<b>2288390</b>	<b>USD</b>	<b>11,251.00</b>
<b>Lateral slope control</b>				
Expansion of the LEVEL PRO PLUS leveling system by a RAPID SLOPE sensor. Ideal, for example for aligning the machine in a defined lateral tilt on a one-sided reference.	<b>Option</b>	<b>2547902</b>	<b>USD</b>	<b>4,004.00</b>
Expansion of the LEVEL PRO PLUS leveling system by a leveling boom that can be moved out on the left side. The boom can be moved out hydraulically if required by up to 43 in / 1,080 mm and mechanically by a further 40 in / 1,020 mm. Including sensor and cable as well as LED position lights for indicating the moved-out boom.	<b>Option</b>	<b>2288393</b>	<b>USD</b>	<b>5,496.00</b>
<b>Attachments</b>				
Hydraulic control valves and hydraulic connection on machine rear for the use of a hydraulic hammer or further hydraulically driven additional devices.	<b>Option</b>	<b>2363218</b>	<b>USD</b>	<b>936.00</b>
<b>Attachments</b>				
Powerful hydraulic hammer with 33 ft / 10 m connection hose. Ideal for removing left-over areas.	<b>Option</b>	<b>2288398</b>	<b>USD</b>	<b>4,058.00</b>
<b>Water system / spraying agent system</b>				
Hydraulically driven water filler pump. For rapid filling of the water tank. The filler pump is located in an easily accessible position and is protected in the storage compartment at the ladder/footstep to the operator's platform.	<b>Option</b>	<b>2288387</b>	<b>USD</b>	<b>2,755.00</b>
<b>Pick changing aids</b>				
Hydraulically driven pick extractor drift, complete with holder and corresponding electrical and hydraulic connectors. Ideal for convenient and quiet pick change.	<b>Option</b>	<b>2288399</b>	<b>USD</b>	<b>5,904.00</b>
<b>Wirtgen information and diagnostic system</b>				
Equipment of the machine with job data acquisition. The information is shown in the control display.	<b>Option</b>	<b>2410294</b>	<b>USD</b>	<b>1,113.00</b>

<b>Camera system</b>				
Monitor system with 2 cameras and an additional screen. A camera is mounted on the discharge conveyor and displays the ejection area. The 2nd camera can be freely positioned on the machine using a magnetic base and spiral cable, and thus offers complete flexibility in use.	<b>Option</b>	<b>2487626</b>	<b>USD</b>	<b>4,967.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.		<b>2655776</b>	<b>USD</b>	<b>434.00</b>
<b>Additional milling drums</b>				
Milling drum FB80 (3") with welded pick holders HT02, milling depth max. 8 in / 210 mm, equipped with 24 RS picks, for the installation in the milling drum housing with zero edge right	<b>Option</b>	<b>2078806</b>	<b>USD</b>	<b>3,257.00</b>
Milling drum with milling width 300 mm / 0 ft 11 in, milling depth max. 210 mm / 8 in, tool spacing 15 mm / 19/32 in, equipped with welded pick holders HT08 with increased service life and 47 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	<b>Option</b>	<b>2334037</b>	<b>USD</b>	<b>5,089.00</b>
Milling drum with milling width 400 mm / 15 3/4 in, milling depth max. 210 mm / 8 in, tool spacing 15 mm / 19/32 in, equipped with welded pick holders HT08 with increased service life and 54 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	<b>Option</b>	<b>2334038</b>	<b>USD</b>	<b>5,768.00</b>
Microfine milling drum FB500 (20") LA3, with welded pick holders HT4, milling depth max. 0.8 in / 20 mm, equipped with 166 mini-picks.	<b>Option</b>	<b>178460</b>	<b>USD</b>	<b>11,617.00</b>
Fine milling drum, with milling width 500 mm / 1 ft 8 in, milling depth max. 50 mm / 2 in, tool spacing 6 mm / 15/64 in, equipped with welded holder system HT5 and 84 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	<b>Option</b>	<b>177181</b>	<b>USD</b>	<b>8,767.00</b>
FCS milling drum with milling width 500 mm / 1 ft 7 in, milling depth max. 210 mm / 8 in, tool spacing 20 mm / 25/32 in, equipped with welded pick holders HT08 and 54 picks. For applications with high requirements for milling volume, e.g. complete removal of road surfaces or concrete milling work.	<b>Option</b>	<b>2389515</b>	<b>USD</b>	<b>5,863.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>
<sup>1</sup> Option must be ordered from headquarters. Date: 3/6/2019				

## Price list

### W 60 Ri

#### Scope of supply – basic machine

- Engine: 4-CYLINDER DIESEL ENGINE TYPE DEUTZ TCD 4.1 L4
- Rated engine power 2300 r.p.m.: 105 kW / 141 HP / 143 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 1 ft 7 in / 500 mm
- Theoretical milling depth: 8 in / 210 mm

#### STANDARD EQUIPMENT

- Engine cover with noise insulation and flexibly decoupled engine mounting for especially quiet running and low noise emissions

#### MILLING DRUM UNIT

- Automatically activating, hydraulic drive belt tensioner for reliable power transmission to the milling drum
- Hydraulically lifting side plates with position measuring sensors in the hydraulic cylinders for measuring the milling depth.
- Round milling drum housing and straight left side plate for optimum material transport, making for low left-over amounts when lifting out the milling drum
- Prepared for using a scraper decoupled from the conveyor suspension for loading material using discharge conveyor
- The right side of the milling drum housing can easily be folded down for maintenance or milling drum change
- Optimized for quick change of the milling drum, including by using centering pins with the side door of the milling drum housing
- With automatic electrical safety shut-off for the milling drum

#### LOADING OF MILLED MATERIAL

- Machine prepared for optional material loading by discharge conveyor
- Conveyor speed continuously variable
- Conveyor slewing angle right/left 30 degrees each for significantly improved loading procedures
- Slender conveyor suspension permits improved visibility to the rear

#### OPERATOR'S PLATFORM

- Operator's platform with ergonomically arranged operator's seat, control panel arranged on the right and digital milling depth indicator in the control display
- Steering console with adjustable rake and reach for ideal adaptation of the operator's platform to the operator
- 2 rear-view mirrors left
- Machine design permits unobstructed view of the milled edge at the right and left as well as the working area in front of the milling drum on the right
- Conveniently accessible ladder/footstep to the operator's platform with night-time lighting and especially low, folding bottom edge of the latter/footstep
- Robust anti-vandalism protection for the controls

#### CHASSIS AND HEIGHT ADJUSTMENT

- Precise machine height adjustment in 0.04 or 0.2 in /1 or 5 mm steps from the machine control panel
- Infinitely variable, hydraulic all-wheel drive with three speed ranges
- Digital load control, manual engageable, hydraulic differential lock (by flow distributor)
- Particularly wide solid rubber tires (1 ft / 300 mm) for the lowest ground pressures and optimum traction
- For milling along curb edges, the rear right support wheel can be swiveled hydraulically from the operator's platform in front of the milling drum. In addition, the machine does not have to be lowered.
- Hydraulic spring-loaded brake
- Proportional height adjustment at rear
- Additional machine controller for automatic milling of intermittent rumble strip sections. Only in combination with a rumble strip kit.

#### **MISCELLANEOUS**

- Optimized center of gravity position, irrespective of the filling levels of the water and fuel tanks
- Particularly low machine center of gravity for high stability of the machine
- Robust and easily maintained machine chassis with optimum ground clearance and short overhangs
- Device for towing away
- Reversing horn
- Machine equipment with an additional weight 838 lbs / 380 kg behind the front axle. The additional weight increases the machine traction.
- Large tool package with lockable tool box and additional storage space for two pick containers
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 292,966.00**

Mandatory Options				
Milling drum housing				
Wear-resistant milling drum housing FB600 (24") with scraper system. For use with discharge conveyor.	Standard	2381026	USD	0.00
Milling drums / milling units				
Milling drum with milling width 600 mm / 23 5/8 in, milling depth max. 210 mm / 8 in, tool spacing 15 mm / 19/32 in, equipped with welded pick holders HT08 with increased service life and 70 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	Standard	2288345	USD	0.00
Material depressor / milling unit seal front				
Front milling drum unit seal FB600 (24") with hydraulic height and contact pressure adjustment. An overload sensor with lifting function lifts the seal briefly in case of a collision and thus prevents damage.	Standard	2297529	USD	0.00
Operator's platform				
Standard operator's seat with shock absorption and lengthways adjustment	Standard	2288348	USD	0.00
Comfort operator's seat incl. seat heating. The operator's seat has shock absorption, lengthways adjustment and can be swiveled through 20 degrees.	Option	2288349	USD	1,031.00
Milling depth regulation				
Digital milling depth indicator in the control display. The measurement is made using cylinder sensors in the lifting columns. Regulation is performed manually by the operator. With 3 freely assignable milling depth memory slots each for the left and right sides of the machine.	Standard	2288350	USD	0.00
LEVEL PRO PLUS leveling system. The measurement is made using cylinder sensors on the side plate right and left. The milling depth is displayed and set intuitively on the LEVEL PRO PLUS control display. The milling depth is regulated automatically. Incl. pre-fitting for additional sensors (e.g. Rapid Slope).	Option	2288352	USD	9,568.00
Hydraulic connection				
Machine with hydraulic pre-fitting for a discharge conveyor with screw coupling. Each contains the coupling element on the machine side and the discharge conveyor side.	Standard	2288355	USD	0.00
Machine with hydraulic pre-fitting for a discharge conveyor with quick-change coupling. For quick change of the discharge conveyor. Each contains the coupling element on the machine side and the discharge conveyor side.	Option	2329169	USD	3,501.00
Material transport				
Transport lock for locking the ejection opening for machine with loading conveyor removed	Option	2368733	USD	258.00
Shortened discharge conveyor 3 ft 7 in / 1,100 mm long with conveyor belt system 1 ft 2 in / 350 mm. Including hydraulic conveyor cylinder and installation material. Ideal for loading wheel loader buckets and wheelbarrows or for depositing the milled material at the side.	Option	2288358	USD	12,038.00

Discharge conveyor 18 ft 4 in / 5,600 mm long with conveyor belt width 1 ft 2 in / 350 mm and hydraulic folding device for shortening the transport length or simplified maneuvering in narrow fields. Including mechanical installation and removal assistance.	<b>Standard</b>	<b>2288359</b>	<b>USD</b>	<b>0.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2380455</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2380457</b>	<b>USD</b>	<b>1,262.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Lighting system consisting of 1 LED strip, 3 halogen and 8 LED working lights. The headlights illuminate the area in front of the machine, the left machine side, the area in front of the milling drum unit, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 16,700 lumen in total.	<b>Standard</b>	<b>2487449</b>	<b>USD</b>	<b>0.00</b>
High-performance lighting system consisting of 2 LED strips, 1 halogen and 12 LED working lights. The headlights illuminate the area in front of the machine, the rear of the machine, the left machine side from the front and rear, the area in front of the milling drum unit, the wheel arch, the weather canopy, the loading area, the ladder/footstep and the operator's platform. The light output of the working lights is approx. 23,300 lumen in total. LED working lights are extremely bright, shock-resistant and durable.	<b>Option</b>	<b>2487450</b>	<b>USD</b>	<b>923.00</b>
<b>Crawler units</b>				
Chassis with 4 driven wheeled track units for a quick and maneuverable change of field with optimum traction and better distribution of ground pressure. The front wheels are arranged slightly offset and so permit larger steering angles as well as greater comfort and safety when crossing lateral steps.	<b>Standard</b>	<b>2286790</b>	<b>USD</b>	<b>0.00</b>

Equipment Options				
<b>Additional weight</b>				
Equipment of the machine with an additional weight 620 kg / 1367 lbs on the underbody. For the W 50 Ri, only in conjunction with the additional weight 380 kg / 838 lbs. The additional weight increases the machine traction.	<b>Option</b>	<b>2288395</b>	<b>USD</b>	<b>2,836.00</b>
<b>Advance drive</b>				
Equipment of the machine with 4-wheel chassis with precision steering. Pushbuttons on the multi-function armrests with a proportional response permit more precise steering of the machine. The right rear wheel also steers, thereby enabling the smallest turning circles within a compact space.	<b>Standard</b>	<b>2481423</b>	<b>USD</b>	<b>0.00</b>
Equipment of the machine for increased transport speed by using more powerful hydraulic components, (3-wheel up to 8 km/h / 5 mph, 4-wheel up to 12 km/h / 7.5 mph). Working in the field is significantly accelerated by an increased transport speed of the machine. Option only possible in conjunction with precision steering.	<b>Standard</b>	<b>2478476</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment operator's platform</b>				
Operator's platform with weather canopy and lateral weather protection elements. The weather canopy can be adjusted in height hydraulically. The transparent weather protection elements on the side on the roof and the right of the operator's platform protect the operator against the effects of weather driving in from the sides, and ensure additional comfort when working.	<b>Option</b>	<b>2309414</b>	<b>USD</b>	<b>8,862.00</b>
<b>Milling drum assembly options</b>				
Overload sensor on the scraper FB500/600 for automatic lifting function in case of obstacles. Effectively prevents the scraper from sinking into the loose sub-base, as well as getting stuck on obstacles.	<b>Option</b>	<b>2478474</b>	<b>USD</b>	<b>909.00</b>
<b>Device for milling drum change</b>				
Milling drum assembly trolley for milling drums up to FB600 (24"), for straightforward milling drum change.	<b>Option</b>	<b>177240</b>	<b>USD</b>	<b>665.00</b>
<b>Additional milling units</b>				
FCS milling unit FB500 (1 ft 6 in) LA15, with welded pick holders HT08, milling depth max. 8 in / 210 mm, equipped with 60 picks. Including corresponding scraper bottom parts.	<b>Option</b>	<b>2542455</b>	<b>USD</b>	<b>9,052.00</b>
FCS milling unit FB400 (15,75") LA15, with welded pick holders HT08, milling depth max. 8 in / 210 mm, equipped with 54 picks. Including corresponding scraper bottom parts.	<b>Option</b>	<b>2542456</b>	<b>USD</b>	<b>8,645.00</b>
<b>Cold-start device</b>				
Electric preheating of the fuel filter for maintaining free-flow properties of the fuel at low outside temperatures. Used for ensuring operating capability at temperatures below 32 degrees Fahrenheit / 0 degrees Celsius.	<b>Option</b>	<b>2411669</b>	<b>USD</b>	<b>394.00</b>

<b>Options for belt conveyor</b>				
Additional shortened discharge conveyor 3 ft 7 in / 1,100 mm long with conveyor belt system 1 ft 2 in / 350 mm. Including hydraulic conveyor cylinder and installation material. Ideal for loading wheel loader buckets and wheelbarrows or for depositing the milled material at the side.	<b>Option</b>	<b>2288390</b>	<b>USD</b>	<b>11,251.00</b>
<b>Attachments</b>				
Hydraulic control valves and hydraulic connection on machine rear for the use of a hydraulic hammer or further hydraulically driven additional devices.	<b>Option</b>	<b>2363218</b>	<b>USD</b>	<b>936.00</b>
<b>Attachments</b>				
Powerful hydraulic hammer with 33 ft / 10 m connection hose. Ideal for removing left-over areas.	<b>Option</b>	<b>2288398</b>	<b>USD</b>	<b>4,058.00</b>
<b>Water system / spraying agent system</b>				
Hydraulically driven water filler pump. For rapid filling of the water tank. The filler pump is located in an easily accessible position and is protected in the storage compartment at the ladder/footstep to the operator's platform.	<b>Option</b>	<b>2288387</b>	<b>USD</b>	<b>2,755.00</b>
<b>Pick changing aids</b>				
Hydraulically driven pick extractor drift, complete with holder and corresponding electrical and hydraulic connectors. Ideal for convenient and quiet pick change.	<b>Option</b>	<b>2288399</b>	<b>USD</b>	<b>5,904.00</b>
<b>Wirtgen information and diagnostic system</b>				
Equipment of the machine with job data acquisition. The information is shown in the control display.	<b>Option</b>	<b>2410294</b>	<b>USD</b>	<b>1,113.00</b>
<b>Camera system</b>				
Monitor system with 2 cameras and an additional screen. A camera is mounted on the discharge conveyor and displays the ejection area. The 2nd camera can be freely positioned on the machine using a magnetic base and spiral cable, and thus offers complete flexibility in use.	<b>Option</b>	<b>2487626</b>	<b>USD</b>	<b>4,967.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2655776</b>	<b>USD</b>	<b>434.00</b>

<b>Additional milling drums</b>				
Milling drum FB80 (3") with welded pick holders HT02, milling depth max. 8 in / 210 mm, equipped with 24 picks	<b>Option</b>	<b>2389524</b>	<b>USD</b>	<b>3,176.00</b>
Fine milling drum, with milling width 600 mm, milling depth max. 100 mm, tool spacing 6 mm / 15/64 in, equipped with welded holder system HT5 and 101 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	<b>Option</b>	<b>2389522</b>	<b>USD</b>	<b>10,084.00</b>
Milling drum Eco-Cutter FB600 (24") LA20 with welded pick holders HT08 with increased service life. Milling depth max. 8 in / 210 mm, equipped with 58 picks.	<b>Option</b>	<b>2389521</b>	<b>USD</b>	<b>6,216.00</b>
Microfine milling drum FB500 (20") LA3, with welded pick holders HT4, milling depth max. 0.8 in / 20 mm, equipped with 166 mini-picks.	<b>Option</b>	<b>178460</b>	<b>USD</b>	<b>11,617.00</b>
Fine milling drum, with milling width 500 mm / 1 ft 8 in, milling depth max. 50 mm / 2 in, tool spacing 6 mm / 15/64 in, equipped with welded holder system HT5 and 84 picks. For applications with the maximum requirement on macro and micro-profile of the road surface, e.g. increase in grip by roughening, preparatory milling for thin-layer coverings or removal of markings on the road surface.	<b>Option</b>	<b>177181</b>	<b>USD</b>	<b>8,767.00</b>
FCS milling drum with milling width 500 mm / 1 ft 7 in, milling depth max. 210 mm / 8 in, tool spacing 20 mm / 25/32 in, equipped with welded pick holders HT08 and 54 picks. For applications with high requirements for milling volume, e.g. complete removal of road surfaces or concrete milling work.	<b>Option</b>	<b>2389515</b>	<b>USD</b>	<b>5,863.00</b>
Milling drum with milling width 400 mm / 15 3/4 in, milling depth max. 210 mm / 8 in, tool spacing 15 mm / 19/32 in, equipped with welded pick holders HT08 with increased service life and 54 picks. For a wide range of applications, e.g. removal of surface and binder layer, complete removal of road surfaces or concrete milling work.	<b>Option</b>	<b>2334038</b>	<b>USD</b>	<b>5,768.00</b>
Adapter for installing a milling drum with FB500 in an FB600 milling drum housing The milling drum remains right-aligned in the milling drum housing, thus maintaining the zero-clearance side on the right during the milling process.	<b>Option</b>	<b>2542993</b>	<b>USD</b>	<b>1,425.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>
<sup>1</sup> Option must be ordered from headquarters. Date: 3/6/2019				

## Price list

### WR 200 XLi

#### Scope of supply – basic machine

- Engine: 6-cylinder diesel engine: Mercedes-Benz OM 470 LA
- Power at 1,900 r.p.m.: 308 kW / 412 HP / 418 PS
- Maximum power at 1,700 r.p.m.: 320 kW / 429 HP / 435 PS
- Exhaust standard: EU Stage 4 / US Tier 4f
- Standard milling width: 7 ft 10 in / 2400 mm
- Theoretical milling depth: 1 ft 8 in / 500 mm

#### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with integrated water tank and free visibility onto the right milled edge
- The right wheels are for working right up to the edges within the milling width
- Diesel engine power controller for optimum milling and mixing results
- Engine cooling system with temperature-controlled fan speed
- Air system with compressor max. 116 psi / 8 bar (not suitable for filling the S-Pack!)
- Lockable, engine cowling with integrated sound insulation package
- Mechanical milling drum drive via a drive belt with automatic belt tensioner
- Variable cutting speed by combination of 3 selectable engine speeds and 3 adjustable drive belt pulley arrangements to achieve optimum working results
- Depending on the working direction possible synchronous rotation or counterrotating mode
- Hydraulic adjustable rotor plate front
- Hydraulically adjustable scraper plates behind the drum
- Infinitely variable working depth setting by lowering or raising of the complete milling drum
- Automatic mixing space adaptation to the particular working depth (larger mixing space with lower working depth)
- Power-controlled lowering speed of the milling drum in starting mode

#### MACHINE CONTROL AND LEVELLING SYSTEM

- Multi-function control color display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Programmable automatic system for initiating and completing the milling process at the particular working depth
- Automated features relieving the operator of a part of his workload

#### OPERATOR'S PLATFORM

- Comfortable, high-quality cabin with flexible mountings, with roof hatch and individually adjustable heating

- Ergonomic, air-cushioned operator's seat
- Roll-over protection system (ROPS and FOPS) integrated in the cab frame
- Large windows with optimum visibility of the particular working area and integrated window wipers
- Recirculating and fresh air filters can be changed without tools
- Various shelves and storage compartments as well as 12 V and 24 V sockets
- In order to provide an ideal view over the zero edge, the operator's cabin can be shifted over the right-hand side of the machine.
- Rotation of the operator's platform through 90° offers optimum adaptation to the particular working situation
- Individually adjustable control panel with color display
- Reversing camera with graphical reversing assistant
- Mirrors on right and left in the the front area of the machine
- Working lights integrated in the cab roof

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Infinitely adjustable, hydraulic all-wheel drive
- Four-way penduluming of the lifting columns to compensate for unevennesses in the ground
- Electrohydraulic, light all-wheel steering, with the "crab", "cornering" or "straight ahead" steering types

#### **MISCELLANEOUS**

- "Welcome-and-go-home light" function with LED lighting in the ladder area
- Extensive safety package with 3 EMERGENCY STOP switches
- Comprehensive toolkit in lockable toolbox
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD**

**463,899.00**

<b>Mandatory Options</b>				
<b>Milling drums / milling units</b>				
Milling and mixing rotor with working width 2400 mm / 7 ft / 10 in, working depth max. 500 mm / 1 ft 7 in, tool spacing 20 mm / 25/32 in, equipped with welded holder system HT5 and 170 picks with shank diameter D20 with exchangeable edge ring segments. For a wide range of applications in soil stabilization and cold recycling.	<b>Standard</b>	<b>2417611</b>	<b>USD</b>	<b>0.00</b>
DURAFORCE milling and mixing rotor with working width 2400 mm (7 ft 10 in), working depth max. 510 mm, tool spacing 20 mm, equipped with quick-change toolholder system HT22 and 170 RS picks with shank diameter D20 with exchangeable edge ring segments. For a wide range of applications in soil stabilization and cold recycling.	<b>Option</b>	<b>2314431</b>	<b>USD</b>	<b>18,864.00</b>
<b>Spraying unit</b>				
Machine without spraying system. The existing drum housing openings are locked by cover strips.	<b>Standard</b>	<b>2418106</b>	<b>USD</b>	<b>0.00</b>
A spraying system for adding water or bitumen emulsion, with eccentric auger pump (max. 211 gal/min / 800 l/min), flow-through meter and a spray bar with 16 nozzles. The spray bar has a special, automatically operating nozzle cleaning function. The spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck.	<b>Option</b>	<b>2494989</b>	<b>USD</b>	<b>32,639.00</b>
System only suitable for the addition of large quantities of water in the soil stabilization process. A spraying system for the addition of water (max. 475 gal/min / 1800 l/min) with centrifugal pump, hydraulically operated shut-off device, flow meter and spraying beam with 16 nozzles. The spraying width can be set individually. The quantities added are controlled by a microprocessor. The effective control range is between 400 and 1800 l/ min. Straightforward operation on a color display. Including a push bar for pushing a tanker vehicle. (FB2400)	<b>Option</b>	<b>2494986</b>	<b>USD</b>	<b>30,346.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2418129</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2418132</b>	<b>USD</b>	<b>1,900.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>

<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 8 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 2 rotary beacons.	<b>Standard</b>	<b>2184631</b>	<b>USD</b>	<b>0.00</b>
Powerful LED / halogen lighting system 24 V. Consisting of 6 additional LED working lights and 2 additional halogen working lights with magnetic flux for optimum illumination of the working area. Also, the 6 standard halogen working lights on the cabin roof are replaced by 6 LED working lights. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 2 LED patrol lights.	<b>Option</b>	<b>2184632</b>	<b>USD</b>	<b>3,339.00</b>
<b>Equipment Options</b>				
<b>Equipment in cabin</b>				
Air-conditioner integrated in the cabin roof with automatic air conditioning, infinitely variable fan and recirculating air filters that can be changed without tools.	<b>Standard</b>	<b>2297350</b>	<b>USD</b>	<b>0.00</b>
Radio system with two speakers and antenna - radio with CD/MP3/USB/Bluetooth	<b>Standard</b>	<b>2184420</b>	<b>USD</b>	<b>0.00</b>
<b>Lateral slope control</b>				
Expansion of leveling system with electronic cross-slope sensor. Ideal, for example for aligning the machine in a defined lateral tilt on a one-sided reference.	<b>Standard</b>	<b>2417051</b>	<b>USD</b>	<b>0.00</b>
<b>Water system</b>				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min at 150 bar pressure. Ideal for daily cleaning of the machine.	<b>Option</b>	<b>2223766</b>	<b>USD</b>	<b>3,515.00</b>
<b>Other devices</b>				
Battery-operated hydraulic unit for milling drum rotation device and hydraulic pick extractor drift as well as for auxiliary drive.	<b>Option</b>	<b>2302704</b>	<b>USD</b>	<b>2,443.00</b>

<b>Pick changing aids</b>				
Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in conjunction with the "electric hydraulic unit" option.	Option	2326246	USD	2,660.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	Option	60604	USD	394.00
Additional, lockable storage compartment for 8 pick containers, mounted on the left side of the machine.	Option	2658350	USD	1,316.00
<b>Camera system</b>				
Monitor system with 3 cameras and 7" color display, in addition to the reversing camera of the standard equipment. The 2nd camera is directed towards the area in front of the milling drum housing and the 3rd towards the rear rotor plate. The 4th camera permits good visibility of the left side of the machine. The camera images are displayed on the monitor in the operator's platform. For model without spraying system.	Option	2320392	USD	5,904.00
Monitor system with 3 cameras and 7" color display, in addition to the reversing camera of the standard equipment. The 2nd camera is directed towards the area in front of the milling drum housing and the 3rd towards the rear rotor plate. The 4th camera permits good visibility of the left side of the machine. The camera images are displayed on the monitor in the operator's platform. For model with spraying system.	Option	2505868	USD	5,904.00
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	Option	2657943	USD	380.00
<b>Miscellaneous</b>				
Additional push bar 9 ft 11 in / 3.00 m - for a second tank truck. Drawbar/ push-bar eye 1x inner diameter 1x inner diameter = 1.57 in / 40 mm and 1x inner diameter = 1.97 in / 50 mm.	Option	2269834	USD	611.00
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	Option		USD	68.00

<sup>1</sup>Option must be ordered from headquarters.

**List price ex subsidiary Wirtgen America**

**USD 725,909.00**

Mandatory Options				
Milling drums / milling units				
DURAFORCE milling and mixing rotor with working width 2400 mm (7 ft 10 in), working depth max. 510 mm, tool spacing 20 mm, equipped with quick-change toolholder system HT22 and 170 RS picks with shank diameter D20 with exchangeable edge ring segments. For a wide range of applications in soil stabilization and cold recycling.	Standard	2314431	USD	0.00
Spraying unit				
Machine without spraying system. The existing drum housing openings are locked by cover strips.	Standard	2182574	USD	0.00
A spraying system for adding water or bitumen emulsion, with eccentric auger pump (max. 211 gal/min / 800 l/min), flow-through meter and a spray bar with 12 nozzles. The spray bar has a special, automatically operating nozzle cleaning function. The spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck. (FB2400)	Option	2494991	USD	37,959.00
Two spraying systems for separate addition of water and bitumen emulsion, with eccentric auger pumps (each max. 211 gal/min / 800 l/min), flow-through meters and spray bars with 12 nozzles each. The spray bars have a special, automatically operating nozzle cleaning function. Furthermore, the spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck. (FB2400)	Option	2494992	USD	73,218.00
System suitable for the precise addition of water, emulsion and foamed bitumen. Two spraying systems for separate addition of water and foamed bitumen, with an eccentric auger pump for adding water (max. 211 gal/min / 800 l/min), flow-through meter and a spray bar with 12 nozzles as well as electrically heated bitumen spraying system consisting of geared pump (max. 1102 lb/min / 500 kg/min), bitumen filter, flow-through meter, process water pump for foamed bitumen manufacture and a spray bar with 12 nozzles. Both spray bars have a special, automatically operating nozzle cleaning function. Furthermore, the spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck. (FB2400)	Option	2494993	USD	185,128.00

System only suitable for the addition of large quantities of water in the soil stabilisation process. A spraying system for the addition of water (max. 475 gal/min / 1800 l/min) with centrifugal pump, hydraulically operated shut-off device, flow meter and spraying beam with 12 nozzles. The spraying width can be set individually. The quantities added are controlled by a microprocessor. The effective control range is between 400 and 1800 l/ min. Straightforward operation on a color display. Including a push bar for pushing a tanker vehicle. (FB2400)	<b>Option</b>	<b>2494987</b>	<b>USD</b>	<b>35,299.00</b>
<b>Binder spreader</b>				
Model without binder spreader device	<b>Standard</b>	<b>2406146</b>	<b>USD</b>	<b>0.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2441058</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2441059</b>	<b>USD</b>	<b>2,199.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 8 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 2 rotary beacons.	<b>Standard</b>	<b>2184631</b>	<b>USD</b>	<b>0.00</b>
<b>Exhaust air filter</b>				
Model without waste air filtering. Only for machines without integrated binder spreader (S-Pack).	<b>Standard</b>	<b>2418221</b>	<b>USD</b>	<b>0.00</b>

Equipment Options				
Equipment in cabin				
Air-conditioner integrated in the cabin roof with automatic air conditioning, infinitely variable fan and recirculating air filters that can be changed without tools.	Standard	2184409	USD	0.00
Radio system with two speakers and antenna - radio with CD/MP3/USB/Bluetooth	Standard	2184420	USD	0.00
Control for binder addition				
Equipment of the machine with an external dosing control unit. The additional operating display can be attached at the bottom left or right on the machine. For specific setting of important dosing parameters of the spraying strips and/or the S-pack.	Option	2418222	USD	3,827.00
Lateral slope control				
Expansion of leveling system with electronic cross-slope sensor. Ideal, for example for aligning the machine in a defined lateral tilt on a one-sided reference.	Standard	2417051	USD	0.00
Water system				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min at 150 bar pressure. Ideal for daily cleaning of the machine.	Option	2184414	USD	4,099.00
Other devices				
Battery-operated hydraulic unit for milling drum rotation device and hydraulic pick extractor drift as well as for auxiliary drive.	Option	2201333	USD	2,850.00
Pick changing aids				
Milling drum rotation device with electrohydraulic milling drum drive for slowly turning the milling drum during pick replacement. The diesel engine can be switched off in conjunction with the "electric hydraulic unit" option.	Standard	2184416	USD	0.00
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	Option	60604	USD	461.00
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	Option	2210777	USD	3,461.00
Additional, lockable storage compartment for 8 pick containers, mounted on the left side of the machine.	Option	2658085	USD	1,859.00
Camera system				

Monitor system with 3 cameras and 7" color display, in addition to the reversing camera of the standard equipment. The 2nd camera is directed towards the area in front of the milling drum housing and the 3rd towards the rear rotor plate. The 4th camera permits good visibility of the left side of the machine. The camera images are displayed on the monitor in the operator's platform. For model without spraying system.	<b>Standard</b>	<b>2184412</b>	<b>USD</b>	<b>0.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2657943</b>	<b>USD</b>	<b>434.00</b>
<b>Miscellaneous</b>				
Additional push bar 9 ft 11 in / 3.00 m - for a second tank truck. Drawbar/ push-bar eye 1x inner diameter 1x inner diameter = 1.57 in / 40 mm and 1x inner diameter = 1.97 in / 50 mm.	<b>Option</b>	<b>2269834</b>	<b>USD</b>	<b>611.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list WR 250i

### Scope of supply – basic machine

- Engine: 6-cylinder diesel engine: CATERPILLAR C18 ATAAC
- Rated power at 1,900 r.p.m.: 563 kW / 755 HP / 766 PS
- Exhaust standard: EU not regulated / US Tier 4
- Standard milling width: 7 ft 10 in / 2400 mm
- Theoretical milling depth: 1 ft 10 in / 560 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Machine chassis with integrated water tank and free visibility onto the right milled edge
- The right wheels are for working right up to the edges within the milling width
- Diesel engine power controller for optimum milling and mixing results
- Engine cooling system with temperature-controlled fan speed
- Air system with compressor max. 116 psi / 8 bar (not suitable for filling the S-Pack!)
- Lockable, engine cowling with integrated sound insulation package
- Mechanical milling drum drive via a drive belt with automatic belt tensioner
- Variable cutting speed by a combination of 3 selectable motor speeds, 2 variable drive belt pulley arrangements and one milling drum gearbox with 2-gear stages for achieving optimum working results
- Depending on the working direction possible synchronous rotation or counterrotating mode
- Hydraulic adjustable rotor plate front
- Hydraulically adjustable scraper plates behind the drum
- Infinitely variable working depth setting by lowering or raising of the complete milling drum
- Automatic mixing space adaptation to the particular working depth (larger mixing space with lower working depth)
- Milling drum rotation device with hydraulic milling drum drive for slowly turning the milling drum in the pick change
- Power-controlled lowering speed of the milling drum in starting mode

### MACHINE CONTROL AND LEVELLING SYSTEM

- Multi-function control color display showing important machine operating conditions
- Comprehensive machine diagnostics on the machine's control screen
- Programmable automatic system for initiating and completing the milling process at the particular working depth
- Automated features relieving the operator of a part of his workload

### OPERATOR'S PLATFORM

- Comfortable, high-quality cabin with flexible mountings, with roof hatch and individually adjustable heating
- Ergonomic, air-cushioned operator's seat
- Roll-over protection system (ROPS and FOPS) integrated in the cab frame
- Large windows with optimum visibility of the particular working area and integrated window wipers
- Recirculating and fresh air filters can be changed without tools
- Various shelves and storage compartments as well as 12 V and 24 V sockets
- In order to provide an ideal view over the zero edge, the operator's cabin can be shifted over the right-hand side of the machine.
- Rotation of the operator's platform through 90° offers optimum adaptation to the particular working situation
- Individually adjustable control panel with color display

- Reversing camera with graphical reversing assistant
- Mirrors on right and left in the the front area of the machine
- Working lights integrated in the cab roof
- Folding ladder/footstep to the operator's platform

#### **CHASSIS AND HEIGHT ADJUSTMENT**

- Infinitely adjustable, hydraulic all-wheel drive
- Four-way penduluming of the lifting columns to compensate for unevennesses in the ground
- Electrohydraulic, light all-wheel steering, with the "crab", "cornering" or "straight ahead" steering types

#### **MISCELLANEOUS**

- "Welcome-and-go-home light" function with LED lighting in the ladder area
- Extensive safety package with 3 EMERGENCY STOP switches
- Comprehensive toolkit in lockable toolbox
- Pre-fitting for installing the WITOS FleetView control unit
- European design type certification, EuroTest mark and CE conformity

**List price ex subsidiary Wirtgen America**

**USD 890,829.00**

Mandatory Options				
Milling drum housing				
Extremely wear-resistant FB2400 (7 ft 10 in) milling drum housing without milling drum. For pulverisation of asphalt pavement and abrasive material.	Standard	2540058	USD	0.00
Milling drums / milling units				
DURAFORCE milling and mixing rotor with working width 2400 mm (7ft 10 in), working depth max. 560 mm (1ft 10 in), tool spacing 30 mm x 2, equipped with quick-change toolholder system HT22 and 208 picks with shank diameter D20 with exchangeable edge ring segments. For a wide range of applications in soil stabilization and cold recycling.	Standard	2314515	USD	0.00
Spraying unit				
Machine without spraying system. The existing drum housing openings are locked by cover strips.	Standard	2182574	USD	0.00
A spraying system for adding water or bitumen emulsion, with eccentric auger pump (max. 211 gal/min / 800 l/min), flow-through meter and a spray bar with 12 nozzles. The spray bar has a special, automatically operating nozzle cleaning function. The spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck. (FB2400)	Option	2494991	USD	37,959.00
Two spraying systems for separate addition of water and bitumen emulsion, with eccentric auger pumps (each max. 211 gal/min / 800 l/min), flow-through meters and spray bars with 12 nozzles each. The spray bars have a special, automatically operating nozzle cleaning function. Furthermore, the spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck. (FB2400)	Option	2494992	USD	73,218.00
System suitable for the precise addition of water, emulsion and foamed bitumen. Two spraying systems for separate addition of water and foamed bitumen, with an eccentric auger pump for adding water (max. 211 gal/min / 800 l/min), flow-through meter and a spray bar with 12 nozzles as well as electrically heated bitumen spraying system consisting of geared pump (max. 1102 lb/min / 500 kg/min), bitumen filter, flow-through meter, process water pump for foamed bitumen manufacture and a spray bar with 12 nozzles. Both spray bars have a special, automatically operating nozzle cleaning function. Furthermore, the spraying width can be set individually. The quantities added are controlled by a microprocessor. Straightforward operation on a color display. Including a push bar for pushing the tank truck. (FB2400)	Option	2494993	USD	185,128.00
System only suitable for the addition of large quantities of water in the soil stabilisation process. A spraying system for the addition of water (max. 475 gal/min / 1800 l/min) with centrifugal pump, hydraulically operated shut-off device, flow meter and spraying beam with 12 nozzles. The spraying width can be set individually. The quantities added are controlled by a microprocessor. The effective control range is between 400 and 1800 l/ min. Straightforward operation on a color display. Including a push bar for pushing a tanker vehicle. (FB2400)	Option	2494987	USD	35,299.00

<b>Binder spreader</b>				
Model without binder spreader device	<b>Standard</b>	<b>2184406</b>	<b>USD</b>	<b>0.00</b>
Integrated spreading device S-Pack for dust-free discharge of binder in front of the milling and mixing rotor. Container volume 194 ft3 / 5.5 m3 (effectively fillable to 159 ft3 / 4.5 m3). Advance-dependent dosing of the spreading quantity from 0,3 lb/ft² to 8,2 lb/ft² / 1.5 to 40 kg/m². The spreading width can be divided into three segments. Operation is perfectly integrated into the machine control display.	<b>Option</b>	<b>2375512</b>	<b>USD</b>	<b>143,464.00</b>
<b>Paint</b>				
Painting in cream RAL 9001 with orange stripes. The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Standard</b>	<b>2470007</b>	<b>USD</b>	<b>0.00</b>
Monocolor special painting. Cream white color is replaced by a special color (RAL according to customer). The complete lower part of the machine is painted in slate grey RAL 7015.	<b>Option</b>	<b>2470008</b>	<b>USD</b>	<b>2,199.00</b>
<b>Technical documentation</b>				
Technical documentation - North America country version (US)	<b>Standard</b>	<b>2456347</b>	<b>USD</b>	<b>0.00</b>
<b>Service documentation</b>				
Spare part and application documentation English (EN)	<b>Standard</b>	<b>2456404</b>	<b>USD</b>	<b>0.00</b>
<b>Warranty</b>				
Standard warranty 12 months or 1000 engine operational hours	<b>Standard</b>	<b>100772</b>	<b>USD</b>	<b>0.00</b>
<b>Telematics</b>				
WITOS FleetView includes a control unit (TCU) with a GPS receiver and the usage rights for the web application WITOS FleetView. The web access function offers a compact overview of the machine status including consumption data, working times, position data, error messages and service intervals. (The actual amount of data available depends on the machine type). The availability of WITOS FleetView is guaranteed for 3 years from the date of delivery.	<b>Standard</b>	<b>2483436</b>	<b>USD</b>	<b>0.00</b>
<b>Machine lighting</b>				
Halogen lighting system 24 V. Consisting of 8 additional halogen working lights for illuminating the working area. The light output is approx. 1,750 lumens per headlight. Including 2 rotary beacons.	<b>Standard</b>	<b>2184631</b>	<b>USD</b>	<b>0.00</b>
Powerful LED / halogen lighting system 24 V. Consisting of 6 additional LED working lights and 2 additional halogen working lights with magnetic flux for optimum illumination of the working area. Also, the 6 standard halogen working lights on the cabin roof are replaced by 6 LED working lights. LED working lights are extremely bright, shock-resistant and durable. The light output is approx. 3,000 lumens per headlight (halogen approx. 1,750 lumens). Including 2 LED patrol lights.	<b>Option</b>	<b>2184632</b>	<b>USD</b>	<b>3,895.00</b>
<b>Exhaust air filter</b>				
Model without waste air filtering. Only for machines without integrated binder spreader (S-Pack).	<b>Standard</b>	<b>2418221</b>	<b>USD</b>	<b>0.00</b>
<b>Equipment Options</b>				
<b>Equipment in cabin</b>				
Air-conditioner integrated in the cabin roof with automatic air conditioning, infinitely variable fan and recirculating air filters that can be changed without tools.	<b>Standard</b>	<b>2184409</b>	<b>USD</b>	<b>0.00</b>
Radio system with two speakers and antenna - radio with CD/MP3/USB/Bluetooth	<b>Standard</b>	<b>2184420</b>	<b>USD</b>	<b>0.00</b>

<b>Lateral slope control</b>				
Expansion of leveling system with electronic cross-slope sensor. Ideal, for example for aligning the machine in a defined lateral tilt on a one-sided reference.	<b>Standard</b>	<b>2417051</b>	<b>USD</b>	<b>0.00</b>
<b>Water system</b>				
Hydraulically operated high-pressure water cleaner with a maximum performance of 15 l/min at 150 bar pressure. Ideal for daily cleaning of the machine.	<b>Option</b>	<b>2184414</b>	<b>USD</b>	<b>4,099.00</b>
<b>Water system</b>				
Additional water tank with a capacity of 250 gals / 950 liters, for holding large quantities of water for foamed bitumen manufacture.	<b>Option</b>	<b>2185820</b>	<b>USD</b>	<b>8,509.00</b>
<b>Other devices</b>				
Battery-operated hydraulic unit for milling drum rotation device and hydraulic pick extractor drift as well as for auxiliary drive.	<b>Option</b>	<b>2201333</b>	<b>USD</b>	<b>2,850.00</b>
<b>Pick changing aids</b>				
Pneumatic hammer with two pick extractor and inserter tools each as well as 5.00 m / 16 ft 5 in hose.	<b>Standard</b>	<b>60604</b>	<b>USD</b>	<b>0.00</b>
Hydraulically driven pick extractor with holder and corresponding electrical and hydraulic connectors. Ideal for a convenient, fast and quiet cutting tool replacement.	<b>Option</b>	<b>2210777</b>	<b>USD</b>	<b>3,461.00</b>
Additional, lockable storage compartment for 8 pick containers, mounted on the left side of the machine.	<b>Option</b>	<b>2658290</b>	<b>USD</b>	<b>1,534.00</b>
<b>Camera system</b>				
Monitor system with 3 cameras and 7" color display, in addition to the reversing camera of the standard equipment. The 2nd camera is directed towards the area in front of the milling drum housing and the 3rd towards the rear rotor plate. The 4th camera permits good visibility of the left side of the machine. The camera images are displayed on the monitor in the operator's platform. For model without spraying system.	<b>Standard</b>	<b>2184412</b>	<b>USD</b>	<b>0.00</b>
<b>Other devices</b>				
License plate holder with LED lighting to comply with country-specific regulations.	<b>Option</b>	<b>2657943</b>	<b>USD</b>	<b>434.00</b>
<b>Miscellaneous</b>				
Connection pipe for the through-line of the suspension to the spray bar. In conjunction with the suction hose option, this means working with the WM1000 is possible. Option only possible in conjunction with: ESL 1-way, dual ESL or ESL foamed bitumen.	<b>Option</b>	<b>2223550</b>	<b>USD</b>	<b>3,067.00</b>
<b>Documentation</b>				
Additional set of technical documentation - North America country version (US)	<b>Option</b>		<b>USD</b>	<b>81.00</b>

<sup>1</sup>Option must be ordered from headquarters.

Date: 3/6/2019

## Price list

# WS 150

### Scope of supply – basic machine

- Standard working width: 4 ft 9 in / 1500 mm
- Theoretical working depth: 1 ft 8 in / 500 mm

### STANDARD EQUIPMENT

- Basic machine with engine
- Stabilizer for mounting on tractors with rear three-point linkage, ISO 730-1 category 3 (cat. III) and category 4 (cat. IV)
- The working depth is set using the tractor's rear power lift
- The rear rotor plate is adjusted hydraulically from the tractor
- The rotor plate is additionally fitted with a levelling blade with spring preload adjustment
- The stone guard is adjusted hydraulically from the tractor

### DRIVE

- Mechanical drive via the tractor's driveshaft (driveshaft speed 1,000 rpm), bevel gearbox, two four-rib high-power V-belts with automatic belt tensioners and two spur gearboxes

### MISCELLANEOUS

- CE Declaration of Conformity

**List price ex subsidiary Wirtgen America****USD 117,067.00**

Mandatory Options				
Milling drum housing				
Movable side plates on the drum housing that cover the milling and mixing rotor. During operation, the milling unit is kept at the pre-set milling depth by the side plates. In the process, the tractor's three-point connection is in a floating position and the machine moves on the skids. The skids are roughly 7 in / 170 mm wide which means they comply with the corresponding permissible transport widths. The milling depth is limited to the desired level with the help of mechanical stops.	Standard	2218261	USD	0.00
Milling drums / milling units				
Milling and mixing rotor with working width 1500 mm / 4 ft / 9 in, working depth max. 500 mm / 1 ft 7 in, tool spacing 40 mm / 1 37/64 in, equipped with quick-change toolholder system HT22 and 82 picks with shank diameter D20. For a wide range of applications in soil stabilization and cold recycling.	Standard	2659046	USD	0.00
Paint				
Painting in cream RAL 9001 with orange stripes.	Standard	2391102	USD	0.00
Single-color special paint. Cream color is replaced by a special color (RAL acc. to customer request).	Option	2539872	USD	746.00
Technical documentation				
Technical documentation - North America country version (US)	Standard	2456347	USD	0.00
Service documentation				
Spare part and application documentation English (EN)	Standard	2456404	USD	0.00
Warranty				
Standard warranty 12 months	Standard	2112212	USD	0.00
Drive adaptations				
Splined shaft on bevel gearbox with 20 external toothing, 20 teeth, for connection of the drive shaft on the WS220/WS250. Required for coupling the stabiliser to the John Deere tractor 8320R.	Standard	2047307	USD	0.00
Trailer drawbar				
Lifting tackle for mounting the stabilizer on John-Deere series 8000 tractor vehicles with rear three-point mounting ISO 730-1 category 4 (CAT IV), including ball sleeves and spacer washers CAT IV for equipment pin 37, including hydraulic top link in reinforced version, with arrester hook CAT IV, yoke D45 and integrated load-holding valve. The length and pulling force of the top link are optimized for the attachment of the add-on stabilizer.	Standard	2136304	USD	0.00

Equipment Options				
Additional spraying strip				
Water spraying system FB1500 (4 ft 9 in), with 6 spray nozzles to spray water into the milling and mixing process. Distributor pipe for connecting the external water supply with shut-off valves to the individual nozzles	Option	2539866	USD	2,253.00
Leveling				
Digital milling depth display with an ultrasonic sensor, right or left mountable, the milling depth display is shown by one additional display in the cab.	Option	2123664	USD	4,031.00
Digital milling depth display, with two ultrasonic sensors right and left mounted, the milling depth display is shown by an additional display in the operator's cabin, changeover for the right or left side.	Option	2123665	USD	5,659.00
Other devices				
Drive shaft P600 1¾" for connecting the tractor-towed stabilizer to the tractor. Wirtgen recommends using this drive shaft as it offers great freedom of movement. Both ends of the propshaft with 20-way internal gearing. CAUTION: The drive shaft must be shortened to the length of the corresponding tractor vehicle/stabiliser combination before first use. Authorised when using a stabiliser on tractor vehicles up to a maximum of 280 kW/376 HP/381 PS.	Standard	2539795	USD	0.00
Drive shaft P700 1¾" for connecting the tractor-towed stabilizer to the tractor. This drive shaft is equipped with larger spherical bearings but offers less freedom of movement and should only be supplied after prior consultation. Both ends of the propshaft with 20-way internal gearing. CAUTION: The drive shaft must be shortened to the length of the corresponding tractor vehicle/stabiliser combination before first use. Authorised when using a stabiliser on tractor vehicles up to a maximum of 280 kW/376 HP/381 PS.	Option	2539797	USD	3,393.00
Pick changing aids				
Pneumatic hammer with two pick extractor and inserter tools each as well as 7.00 m hose.	Option	2123666	USD	448.00
Documentation				
Additional set of technical documentation - North America country version (US)	Option		USD	81.00
Date: 3/6/2019

## ROADPATCHER STANDARD EQUIPMENT

Pump, Variable displacement load sense piston	Boom, front of cab mounted
Hydraulic Tank, 40 gallon, w/ shut-off valve	97 Degree swing x 74" travel
Tank & Cab mounted level and temperature indicator	Tilting nozzle optional
Hydraulic system pressure, 3200 psi	Remote on/off emulsion valve and emulsion flow control valve
5 Micro Tank Breather Filter	
10 micron cartridge return filter	
100 Mesh Suction Strainer	30 Gallon with sight level gauge
850 BTU/hr/degree F, oil to air 12v fan oil cooler	Tank mounted pressure gauge and shut-off valves
	Remote operated from cab, 3-way emulsion / flush valve
One coat sealer / urethane primer	
Two coats of Imron Elite polyurethane, white standard	
	Perkins 404F.E22T Turbo Charged Diesel
	Tier 4 Final / Displacement, 2.2L (134.24 cu. In.)
Construction, A36 Carbon Steel, 10 Gauge	49 HP @2800 RPM / Max. Torque 121.8 LB-FT @ 2200 RPM
Capacity, 6.5 Cu.Yd.	Donaldson 2 element dry type air cleaner w/ restriction indicator
Fill Opening, 9' 10" x 6' 10"	Full flow spin-on oil filter
Aggregate feed, Rubber belt conveyor with rotary air lock	Three point automatic safety shut down
Heavy Duty retractable reinforced vinyl cover	
Conveyor bottom	Patcher controls & gauges on in-cab console:
	Keyed Ignition switch & Electronic Throttle
Positive displacement lobe type air pump	Voltmeter, tach, oil pressure, water temp and hour meter
Direct Drive from hydraulic motor	Back lit sealed rocker switches with icon and text markings
435 CFM Output	7" TFT LCD "Heads-up" color display, 800 x 480 pixels
	Full function proportional joystick. Boom/Blower/Rock /Emulsion
300 Gallon (Optional 400 gallon)	
Heating, Auxiliary engine or 115 volts (230 volt optional)	
12" fill / service hatch	4 way LED flashing lights
70 PSI system pressure	Rear view camera system
	Slow moving vehicle emblem, backup alarm,
Hose, 2-1/2" Rubber lined spiral reinforced	5-lb fire extinguisher, and a warning triangle kit.
Nozzle, Heated eight hole spray ring	
Quick disconnect couplings for serviceability	
12 Months 1200 Hours

## Spray Patcher Street Max STANDARD EQUIPMENT

Pump, 12 volt power unit	Boom, rear mounted, spring suspension three segment
Hydraulic system pressure, 2000 psi	Balanced with leveling controls
	177" patch radius (4.5m)
	Manual nozzle tilt
One coat sealer / urethane primer	
Two coats of Imron Elite polyurethane, Yellow standard color	
	29 Gallon with sight level gauge
	Tank mounted pressure gauge and shut-off valves
Construction, A36 Carbon Steel, 10 Gauge	Remote operated from cab, 3-way emulsion / flush valve
Capacity, 2.0 Cu.FT.	
Fill Opening, 30" x 14"	
Forward trailer tongue mounted	Perkins Tier 4 Final Turbo Charged Diesel
Aggregate feed, Gravity from dump truck to trailer venturi	Displacement, 2.2L (135.0 cu. In.)
	48.8 HP @ 2800 RPM / Max. Torque 121.7 LB-FT @ 2800 RPM
	Donaldson 2 element dry type air cleaner with restriction indicator
	Full flow spin-on oil filter
	Three point automatic safety shut down
670 CFM Output	Patcher controls & gauges on boom mounted console:
Positive displacement lobe type air pump	Keyed Ignition switch & Electronic Throttle
Direct Drive from engine	Horn for operator to driver alert
	Voltmeter, tach, oil pressure, water temp and hour meter
	Back lit sealed rocker switches with icon and text markings
70 PSI system pressure	Operator on/off emulsion valve and emulsion flow control valve
300 Gallon, R value 20 2-1/2" polyurethane foam installation	
Heating, Auxiliary engine or 115 volts (230 volt optional)	12 Volt 550 CCA
12" fill / service hatch	Axle Rating 14,400 LB
	Air Compressor 8.5 CFM @ 150 PSI
Hose, 3-1/2" Rubber lined spiral reinforced	
Nozzle, Heated eight hole spray ring	Wireless rear view camera system
	Amber LED Strobe
12 Months 1200 Hours

## Notice of Statewide Contract Award

---

*Official signed contract documents are on file with OMES-Central Purchasing.*

**Contract Title:** Road Maintenance Equipment

**Statewide Contract #:** SW 195

**Contract Issuance Date:** 11/01/2017

**Total Number of Suppliers:** Several (For details see: Supplier Information Sheet)

**Contract Period:** 11/01/2017 through 10/31/2018

**Agreement Period:** 11/01/2017 through 10/31/2022

**Authorized Users:** This Contract shall be made available to all State Departments, Boards, Commissions, Agencies and Institutions. The Oklahoma Statutes also allow Counties, School Districts and Municipalities to use this contract as well as State entities other than the State of Oklahoma if statutes allow for it.

**Contract Priority:** Mandatory

**Type of Contract:** Fixed Price

**OMES-CP Contact:** Joyce Leivas

Phone: 1 - 405 - 521 - 2479

**Title:** Contracting Officer

Fax: 1 - 405 - 521 - 4475

Email: [Joyce.Leivas@omes.ok.gov](mailto:Joyce.Leivas@omes.ok.gov)

## **B. SPECIAL PROVISIONS**

### **B.1. Type of Contract**

- B.1.1.** This will be a mandatory statewide contract that is available to all state agencies. Other government entities may avail themselves of this contract, including those in other states if their statutes allow for the use of other state's contracts, sometimes known as "piggybacking".
- B.1.2.** All state agencies must use the contract for the products specified herein unless the ordering agency has received a written exception from the contracting Officer. The State of Oklahoma reserves the right to conduct separate procurements to establish contracts for the same or similar products for any agency's specific needs.
- B.1.3.** The State of Oklahoma shall not guarantee any minimum or maximum amount under this contract, also known as an indefinite quantity contract.
- B.1.4.** This contract will be for the purchase of equipment, warranty work and parts.
- B.1.5.** This contract may be awarded to multiple vendors.

### **B.2. Contract Period**

This Contract is for Date of Award through one year with the option to renew for up to four (4) additional one year periods.

### **B.3. Extension of Contract**

The State may extend the term of this contract for up to 180 days if mutually agreed upon by both parties in writing.

### **B.4. Authorized Users**

This Contract shall be made available to all State Departments, Boards, Commissions, Agencies and Institutions. The Oklahoma Statutes also allow Counties, School Districts, Tribes and Municipalities to use this contract as well as State entities other than the State of Oklahoma if statutes allow for it.

### **B.5. Gratuities**

The right of the successful vendor to perform under this contract may be terminated by written notice if the Contracting Officer determines that the successful vendor, or its agent or another representative offered or gave a gratuity (e.g., an entertainment or gift) to an officer, official or employee of Central Purchasing.

### **B.6. Travel**

No reimbursable travel is contemplated under the terms of this contract.

### **B.7. Energy Conservation**

Oklahoma is an energy conservation State and we welcome any comments on your RFP that would indicate energy savings such as brochures, specifications, and descriptions of equipment that indicate environmentally friendly construction/usage..

### **B.8. Conflict of Interest**

The RFP is subject to the provisions of the Oklahoma Statutes. All Suppliers must disclose the name of any officer, director or agent who is also an employee of the State of Oklahoma or any of its agencies. Further all Suppliers must disclose the name of any State Employee who owns, either directly or indirectly, an interest of five percent (5%) or more in the supplier firm or any of its branches.

### **B.9. Patents and Royalties**

The Supplier without exception, shall indemnify and save harmless the State of Oklahoma and its employees from liability of any nature or kind, including cost and expenses for or on account of any copyrighted, patented or unpatented invention, process, or article manufactured or used in the performance of the contract including its use by the State of Oklahoma. If the Supplier uses any design, device or materials covered by letters, patent or copyright, it is mutually agreed and understood without exception that the RFP prices shall include all royalties or cost arising from the use of such design, device, or materials in any way involved in the work.

### **B.10. Property loss**

The Supplier shall reimburse the government entity for such property loss or damage caused by supplier, its employees or for anyone whose acts the supplier may be liable.

## **B.11. Contract Management Fee**

- B.11.1.** As provided by State Statute 85.33A, the Central Purchasing will assess a Contract Management Fee of 1% of total contract sales to all government entities. Awarded Supplier(s) shall remit payment of the fee on a quarterly basis in conjunction with the quarterly sales report. The fee amount is not to be invoiced to any contract users, either as an item on a sales invoice or by any other means. Delinquency in payment may be considered cause for contract termination.
- B.11.2.** Supplier shall make payment by company check to OMES (Office of Management and Enterprise Services) Central Purchasing Division within 45 days of the completion of the quarterly reporting period. To ensure the payment is credited properly, the Supplier must identify the check as "Contract Management Fee" and include the following information with payment: SW195 Road Maintenance Equipment. The Contract Management Fee shall be mailed to:

**Office of Management and Enterprise Services**  
**Attention: Accounts Receivable**  
**5005 N Lincoln Blvd Ste 300**  
**Oklahoma City OK 73105**

## **B.12. Contract Usage Reporting Requirements**

- B.12.1.** Reports shall provide the total dollar amounts sold to all political entities that include but are not limited to State Agencies, Counties, Cities, Schools, Hospitals, and Municipalities. Items sold should be itemized in order for the Contracting Officer to ascertain what type of equipment is being purchased.
- B.12.2.** Reports shall be submitted quarterly regardless of quantity. A standardized form has been developed for Supplier use.
- B.12.3.** If there are no sales reported by the vendor during the contract term, or if the vendor fails to report sales that have been discovered through state purchasing reports, the State reserves the right to terminate the contract.

**Usage reports shall be sent electronically, by email to: [strategic.sourcing@omes.ok.gov](mailto:strategic.sourcing@omes.ok.gov)**

<b>Reporting Quarter</b>	<b>Due Date</b>
<b>January 1 through March 31</b>	<b>May 15<sup>th</sup></b>
<b>April 1 through June 30</b>	<b>August 15<sup>th</sup></b>
<b>July 1 through September 30</b>	<b>November 15<sup>th</sup></b>
<b>October 1 through December 31</b>	<b>February 15<sup>th</sup></b>

## **C. SOLICITATION SPECIFICATIONS**

### **C.1. Scope**

- C.1.1.** The State of Oklahoma Central Purchasing Division is charged with developing statewide contracts for all government entities to use that have been competitively solicited for the best possible pricing or percentage discount off pricing based on high volume purchasing. Multi-unit discounts are encouraged. This contract's main customer base will be state agencies, cities and municipalities and counties.
- C.1.2.** The purpose of this competitive solicitation is to develop a "catalog discount" contract to provide for equipment to be made available for purchase on a statewide basis. Manufacturers as well as Dealers are encouraged to bid directly on the contract, as this will be a multiple award contract for both equipment and warranty work with replacement parts.
- C.1.3.** We have determined that the best pricing structure for this type of contract is a simple "percentage off" of the current dated manufacturer's government or commercial catalog or price list with a copy

of the catalog pricing page or price list to be made available to the purchaser for their accounting divisions at the time of order.

## **C.2. Authorized Representative**

- C.2.1.** Suppliers may offer any brand for which they are an authorized dealer, distributor or service representative. A current, dated, and signed letter of authorization from the manufacturer that states the Supplier is an authorized distributor, dealer, or service representative and is authorized to sell the manufacturer's products in the State of Oklahoma is to be submitted with the response.
- C.2.2.** If the Manufacturer is responding to this solicitation, please submit a list of authorized dealers, distributors or service representatives located in the State of Oklahoma and the product line you are the manufacturer of.

## **C.3. Licensing**

Sales of motor vehicles in the State of Oklahoma are subject to the Oklahoma Motor Vehicle Commission Statutes. (Oklahoma Statutes, Title 47 - Motor Vehicles, Chapter 62) Offeror certifies by submission of a response that all required Oklahoma Motor Vehicle Commission licenses are in place and current, and that copies of all such licenses have been submitted with the Response. It is the Vendor's responsibility to keep all required Oklahoma Motor Vehicle Commission licensing current during the term of the contract and to furnish copies at any time upon request by Central Purchasing. If the Vendor does not maintain current licensing, Central Purchasing may immediately terminate the contract upon discovery of the expiration of the license. Contracts for motor vehicles to be sold within the state of Oklahoma may be made only with properly licensed Oklahoma Motor Vehicle Dealers.

## **C.4. Warranty-Equipment/Options/Accessories/Attachments**

- C.4.1.** The Successful Supplier agrees the products furnished under this contract shall be covered by all commercial warranties the contractor provides for such products, and rights and remedies provided herein are in addition to and do not limit any rights afforded to the State of Oklahoma by any other clause of this contract.
- C.4.2.** The Supplier warrants that at the time of delivery, all equipment and purchased under this contract will be free from defects in material or workmanship and will conform to the specifications and all other requirements of this contract.
- C.4.3.** All warranty work performed and parts/materials supplied shall meet original equipment manufacturer (OEM) warranty requirements. Equivalent substitutions must be approved by the agency contact person prior to installation.
- C.4.4.** Warranty work performed not meeting specifications or found to be defective, shall not be accepted. The supplier shall be required to make repairs or corrections at no additional cost to the agency.
- C.4.5.** Supplier shall furnish a copy of their warranty applicable for the equipment.
- C.4.6.** All equipment warranties shall start on the date of delivery and shall be for the full term of said warranty.
- C.4.7.** Before actual warranty work begins, ownership of the equipment shall be established to ensure the equipment in need of repair belongs to the government entity requesting the service. The following information shall be provided in order to determine ownership of the equipment:
  - C.4.7.1.** Name of government entity and division, if applicable.
  - C.4.7.2.** Make, Model, and VIN of equipment
  - C.4.7.3.** Control number of government entity (Inventory number)
  - C.4.7.4.** Repairs made that are covered by a warranty shall not be paid for by the government entity.
  - C.4.7.5.** The Supplier shall furnish all necessary supervision, labor, equipment, tools, parts, materials, and supplies needed for the warranty repair work.
  - C.4.7.6.** All persons utilized in the performance of this contract shall be employees of the supplier and be fully qualified to perform the warranty work required. Warranty work shall be performed by certified or trained or authorized service technicians.

- C.4.8.** Equipment that will remain in the supplier's possession overnight and for extended periods shall be stored in a safe and secure location for protection from theft and environmental dangers. The supplier shall be responsible for the proper care and custody of any state owned equipment in the supplier's possession.

## **C.5. Insurance**

- C.5.1.** Prior to the commencement of this contract, the supplier shall obtain and keep in full force and effect until the termination of this contract, insurance coverage with an insurance company licensed and qualified under the laws of Oklahoma.
- C.5.2.** The supplier shall maintain insurance coverage in an amount not less than \$500,000 at all times during the entire term of this contract. The following types of risks shall be covered in the supplier's policy:
- Worker's Compensation Insurance and employer's liability insurance sufficient to cover supplier's employees as required by the State of Oklahoma.
  - Comprehensive General Liability Insurance to include Products/Completed Operations, Premises Operations, Personal Injury, Medical Expenses and Fire Damage.
  - Commercial Automobile Insurance, hired and non-owned.
  - Garage keepers Liability Insurance.
  - Commercial Property Coverage.

## **C.6. Quality of Parts**

- C.6.1.** Parts under these specifications should be name brand, nationally advertised merchandise. Equivalent substitutions must be approved by the agency contact person.
- C.6.2.** After Market Repair parts must be equal to, or exceed original equipment manufacturer's specifications.
- C.6.3.** Repair parts must be packaged and distributed under their respective nationally known name brands.
- C.6.4.** All rebuilt or remanufactured parts must meet the same requirements as listed above.
- C.6.5.** Some repair parts may be required to be original equipment manufactured repair parts. Suppliers must carry a complete line of OEM parts for all models of equipment they carry.
- C.6.6.** Preservation, packaging, and packing and marking will be in accordance with best commercial practice to provide adequate protection against shipping damage.

## **C.7. Warranty-Parts**

- C.7.1.** Suppliers are required to provide any buy-back, trade-in, or exchange policy concerning repair parts sold to government Entities.
- C.7.2.** Supplier shall correct ordering errors without further cost to the ordering entity.
- C.7.3.** A copy of the Warranty shall be included for replacement parts purchased.

## **C.8. Repair Facilities**

Repair facilities that will perform the warranty work of items on contract shall be identified on the Pricing Page.

## **C.9. Ordering**

- C.9.1.** No minimum orders will be considered under this contract.
- C.9.2.** Options/Accessories/Attachments on ordered equipment shall include all standard items normally furnished by the manufacturer/dealer for the basic equipment being purchased.
- C.9.3.** Suppliers shall identify any websites that can be of assistance in determining needs and calculating total cost of items purchased.
- C.9.4.** Any trade-in allowances determined by the dealer shall be deducted from the established current price after the discount is applied. The formula will be to deduct the discount from the established current price and then take off the trade-in allowance.
- Example: List price is \$17,199, and the discount is 23% and the trade-in is \$6,000.  $\$17,199 - 23\% = \$13,243.23$ .  $\$13,243 - \$6000 = \$7,243.23$ , final price.

- C.9.5.** The Customer is responsible for being familiar with all of the contract terms and conditions.
- C.9.6.** Supplier shall furnish any required Safety Data Sheets or a composite concentration list prior to contract award, with the product invoice, **or** at the request of Central Purchasing.
- C.9.7.** Suppliers shall provide catalogs and current price lists at no charge upon customer or Contracting Officer's request.
- C.9.8.** All equipment shall be delivered with one copy of the operator's manual, and an illustrated repair parts manual or list. If other manuals are required by the customer, they shall be offered at the discount offered in the Price Sheets.

## **C.10. Invoices**

To ensure prompt payment, the invoice shall include the following information:

- C.10.1.** Purchase order number if applicable.
- C.10.2.** Make, model, and VIN number of equipment.
- C.10.3.** Name of government entity.
- C.10.4.** Description of equipment purchased or warranty services performed and/or parts, material and supplies provided.
- C.10.5.** The Manufacturer's suggested retail price less any trade-in allowance if applicable, contract percentage discount off, freight cost, set-up fees, any allied or incidentals, and the final price for each item delivered.
- C.10.6.** The copy of the current, dated manufacturer's Price List showing the price of the equipment if requested by the ordering party for their accounting purposes.
- C.10.7.** Name of company who provided the products/services.
- C.10.8.** Payment remittance address.
- C.10.9.** Payment made by government agencies will be made by the procurement card that is issued by the State or Purchase Orders. Other entities may use Purchase Orders or Procurement cards.
- C.10.10.** Each Dealer/manufacturer who is awarded a contract as a result of this Solicitation shall be the only office authorized to receive orders, invoice and receive payment. If the Manufacturer or Dealer wishes to ship or provide a service from a point other than the address listed on the solicitation documents, they will furnish a list of these locations as part of their response.

## **C.11. Payment**

- C.11.1.** Payment method by State Agencies will be Purchase Orders.
- C.11.2.** Payment method by other government entities (Cities, Counties, Municipalities, Schools, and other State governments will be as in C.11.1 above or other purchasing methods, such as lease-purchase, as allowed by their purchasing guidelines, regulations or statutory mandates. For Lease purchases, the government entity is to follow the policies and procedures outlined by their purchasing authority or state regulations and statutes.
- C.11.3.** For County purchases by lease purchase, the Management Services Division of the State Auditor and Inspectors (SAI) Office has encouraged the use of an approved agreement form, Lease Purchase of Equipment Form 120B, as well as a Full Warranty Lease form, developed by their office. The State Auditor and Inspectors Office, through its Constitutional Authority, Article VI Section 19, establishes accounting procedures and forms and provides assistance to counties and other forms of local government. Link to the forms listed on the State Auditor website [https://www.sai.ok.gov/publications\\_forms/county\\_clerk.php?action=showform&formdiv=5](https://www.sai.ok.gov/publications_forms/county_clerk.php?action=showform&formdiv=5)
- C.11.4.** For those Government Entities subject to the Oklahoma Bond Oversight and Reform Act 62. O.S., Section 695.1 et seq., the Council of Bond Oversight reviews and must approve any request for financing by a State Government entity. (All state and local government entities). The State Bond Advisor's Office serves as staff to the Council of Bond Oversight. See Chapter 10, Administration of the Oklahoma Bond Oversight and Reform Act (Administrative Rules) Link to the Council of Bond Oversight website: [https://www.ok.gov/bondadvisor/Bond\\_Oversight/index.html](https://www.ok.gov/bondadvisor/Bond_Oversight/index.html)

**C.11.1. C.15.5.** Lease Purchase Rates may be adjusted during the contract period. All lease purchase agreements established by using prices obtained from Suppliers listed as a participant in this competitively bid statewide contract shall be included in the total sales reported by the vendors.

## **C.12. Delivery**

**C.12.1.** Delivery of equipment is to be made within 120 calendar days after receipt of order unless other arrangements are made between the ordering party and the Supplier. Earlier deliveries are encouraged however there shall be no change in contract price or discount terms because of the earlier delivery.

**C.12.2.** All equipment is to be delivered new, unused, assembled, serviced, oiled and ready for immediate use, unless otherwise requested by the customer. Liability for product delivery remains with the Supplier until delivered and accepted.

**C.12.2.1.** Delivery shall be made in accordance with instructions on purchase order from each agency. If there is a discrepancy between the purchase order and what is listed on the contract; it is the Supplier's obligation to seek clarification from the ordering party and, if applicable, from the Contracting Officer listed as the contact person in Central Purchasing.

**C.12.3.** Delivery on parts is to be made within 30 days.

**C.12.4.** One Operating Manual, an illustrated parts manual or List, and the Warranty, shall be furnished for each new item purchased, as well as any proprietary tools necessary to perform routine service or adjustments, all at no additional cost.

## **C.13. Training**

**C.13.1.** Vendor is to provide their training opportunities for the equipment they are bidding with their response to this solicitation

## **C.14. Price Adjustments**

**C.14.1.** Since the various manufacturers update their pricing throughout the year and at different times during the year, there will be no pre-determined price adjustment time period for this contract however the discounts provided by the Supplier can be increased during the contract period at any time.

**C.14.2.** The contract price shall be the Manufacturers dated Price List (MPL) in effect at the time the order is placed less the discount percentage offered. Manufacturer Price lists will be that price list published by the manufacturer.

**C.14.3.** Vendor is to notify the contracting officer at least 30 days before a price adjustment will occur, or as soon as possible upon notification from the manufacturer.

**C.14.4.** Vendors are to include information concerning their return policy.

**C.14.5.** See C.9.4 concerning trade-in allowances.

## **C.15. Allowable Charges**

**C.15.1.** Freight/Shipping/Set-up Fees.

**C.15.2.** Delivery is to be FOB Destination (of ordering entity) freight collect.

**C.15.3.** Any Freight, shipping and handling costs and set-up fees paid by the ordering entity are to be annotated on the quote/invoice as a separate line item.

**C.15.4.** Quotes shall show The Manufacturer's suggested retail price less any trade-in allowance if applicable, contract percentage discount off, freight cost, set-up fees, any allied or incidentals, and the final price for each item delivered

**C.15.5.** Allied and incidental items requested by customers to comply with their needs and with state or other government regulations. Allied equipment may only be sold in connection with the sale of a contract item. Items must be clearly labeled on the purchase order or quote as Allied.

**C.15.6.** Allied and incidental items are attachments, accessories, parts or bundles not manufactured by the contract vendor that are requested by the customer to complete the purchase of equipment awarded on contract.

**C.15.7.** Unpublished or non-contract options required to complete a product ordered.

#### **C.15.8. New Products**

**C.15.8.1.** New Products may be added to the contract as they are introduced by a manufacturer however the discount cannot be lowered throughout the contract period.

**C.15.8.2.** Dealers who become authorized dealers for other products during the contract period may add those products to their lists of equipment offered.

#### **C.15.9. Discontinued Products**

**C.15.9.1.** Vendors are to notify the Contracting Officer of any changes in their schedule of equipment such as discontinued products or replacement models.

### **D. EVALUATION**

#### **Evaluation Process**

In the initial phase of the evaluation process, all proposals timely received will be reviewed. Unacceptable proposals will be eliminated from further consideration. A pass/fail and weighted score methodology of selection with both objective and subjective criteria will be used.

Award of a contract resulting from this RFP may be made to multiple Suppliers in accordance with the method identified within this section. The state reserves the right to award on receipt of initial proposals without an opportunity for discussion or proposal revision, so Suppliers are encouraged to submit their most favorable proposal at the time established for receipt of proposals.

**D.1. Price 30%**

**D.2. Past performance 10%**

**D.3. Ability to meet requirements 60%**

The State reserves the right to negotiate with one or more Contractors. Central Purchasing may negotiate any and all content of the proposal.

### **E. INSTRUCTIONS TO SUPPLIER**

Please carefully read all the Sections of this solicitation as your response indicates your understanding of what is requested.

Section "A" is standard terms for all Central Purchasing Contracts

Section "B" contains terms specific to this contract. Section "B" may contain terms that take precedence over the terms in Section "A". See Section A.30.

Section "C" is the scope of work for this contract.

Section "H" Price and Cost. There are attachments for pricing. You will not have to fill out pricing on every attachment unless you sell all the equipment we are requesting. You only have to return the attachments for the equipment you sell. You DO have to fill out and return all of the rest of the documents. Attachments will be posted with the solicitation as well as the contact information for suppliers, all in Microsoft Word format.

You can submit pricing already figured with the discount if you wish.

If you will be providing leasing through your company finance office please list the present rates offered. You will be responsible for updating the information for the contract during the contract period.

If you have questions, you must submit them by the date and time noted on the first page of the solicitation documents.

You can but you do not have to submit electronic brochures for the equipment you are offering. These will be requested throughout the contract period by the customers and/or the contracting officer in charge of maintaining the contract. As much information as possible will be placed on Central Purchasing's website along with your contract documents.

### **F. CHECKLIST**

\_\_\_Your entire response submitted on a flash drive or cd. (We are mostly electronic so paper bids will be scanned to an electronic filing system if you were to submit them).

\_\_\_Copy of Workman's Comp Insurance Policy

\_\_\_Training plan offered with sales

\_\_\_A current, dated, and signed letter of authorization from the manufacturer

- ☐ If a manufacturer submitting a response, a list of certified dealers within the State of Oklahoma authorized to sell and service your products
- ☐ Specifications of equipment offered
- ☐ Copy of Oklahoma Motor Vehicle Commission license (if applicable to you)
- ☐ Copy of Certificate of Good Standing (If required to be registered with the Secretary of State of Oklahoma)
- ☐ Vendor Reference document
- ☐ All Technical Questions answered completely
- ☐ Any brochures or other literature requested (warranty information, re-stocking, marketing)

## G. OTHER

None

## H. PRICE AND COST

**The State of Oklahoma is requesting pricing for Road Maintenance equipment. The pricing matrix is a percentage off the Manufacturer's list price. Vendors can submit actual pricing schedules for their equipment though, with the percentage discount already figured. Attachments have been provided in Microsoft Word.**

The State of Oklahoma has been a leader in the push for State use of CNG-powered vehicles. If you have products that are fueled by means other than gas or diesel fuel, and that are considered environmentally friendly, please include them in your response.

Manufacturers responding please include a listing of Distributors/Dealers for the State of Oklahoma to include Name of business, Address, contact names, phone numbers, fax numbers, email addresses and websites.

Suppliers may submit specifications for all equipment bid, as well as options available. Please submit these specifications on a cd or dvd or flash drive. It is preferred that vendors have a website where customers can go and view the products. The Central Purchasing Statewide Contract website will be updated as necessary.

You will be expected to provide brochures and descriptive literature to those customers who request it and the contracting officer responsible for the maintenance of the contract. Although you will not be required to send actual pricing sheets as the prices are updated, you will be required to notify the contracting officer when there are price increases and a note will be made to the website where your contract will be located.

The Supplier will be expected to notify the Contracting Officer of any changes in the Company status, such as mergers, sell offs, discontinuation of equipment, addition of equipment lines and changes in the contact information for the contract. It is imperative that the Contracting Officer be able to contact someone at all times during business hours, especially when helping an entity make a decision on equipment they want to purchase.

With the age of technology, customers are more likely to use the internet to research the equipment they are interested in buying. We will put a link to your website on the contract website. Please provide a guide to the use of your website if you require a name and password to access current pricing, if listed, at no subscription cost to the State of Oklahoma. Also, please provide any additional enhancements such as any special ordering features available to users or a site with pricing specific to the Oklahoma contract even though we are not requiring you to offer a direct link to the Oklahoma-specific contract pricing or your current price lists.

Website: \_\_\_\_\_

Log-in required? ☐ Yes ☐ No

Government entities who will be buying from this contract will be expected to provide their accounting offices with a pricing sheet or pricing sheet reference date at the time they prepare their payment method. This pricing sheet will clearly state the Price Book/Catalog Number and Date. This sheet is to be attached to the quote provided by the Supplier. The quote will reference the Statewide contract number being used for the purchase. All set up charges, testing, and freight charges are to be included in the total price less discount offered.

Discounts offered will remain the same or can be increased throughout the contract period. Multiple Unit discounts are encouraged.

Central Purchasing  
Division**

**Participation Form**

Thank you for your interest in using this State of Oklahoma statewide contract. This document is provided for those Government Entities other than Oklahoma State Agencies (which includes Oklahoma schools, counties and cities) to fill out and email to the Contracting Officer in charge of managing this contract. If you are in another state and are using this contract, please fill this out and return also. This document is for informational purposes only and will be used to aid in the tracking of the usage of this contract since government entities other than state agencies don't typically report their usage to Central Purchasing. Please fill this out and either attach this to an email and send it to [Joyce.Leivas@omes.ok.gov](mailto:Joyce.Leivas@omes.ok.gov) or fax to Joyce Leivas 405-521-4475.

## **SECTION: EQUIPMENT/PARTS/ORDERING/SHIPPING**

### **Policy 2: Parts Ordering/Returns**

#### **2.1 Ordering**

We will try to fill all parts orders completely. However, on occasion an order may not be complete or perhaps cannot be filled at all. If the order can be partially filled, the parts that are available will be shipped. Parts orders are handled according to the following guidelines:

- Enter order electronically through EDT or Dealer Central.
- Parts orders will not be shipped on common carrier equipment loads.
- Custom and special product orders cannot be canceled.
- Shipment shortages must be reported to Parts Coordination within 7 days\* of receipt date. When reporting parts shortages, you must provide the factory invoice and sales order numbers.
- Damage in shipment must be reported to the factory immediately. Make a notation with the carrier at the time of delivery regarding the extent of damage. Most damage on shipments outside the U.S. is discovered when the shipment is still in Customs. Upon notification of damage by the Customs Broker, notify your insurance company, the factory, and freight carriers as soon as possible. Document the damage by taking photographs. Submit all documented information regarding the damage to Accounting after filling out a lost or damaged freight claim (this form can be found on Dealer Central at Parts/Resources/Damaged or Lost Shipments Form).
- Parts shipments are not automatically insured by the factory. This option must be requested by the consignee before the order is shipped.
- Visually obvious quality issues, such as rust, scratches, etc., must be reported within 7 days of receipt from the factory in order for the dealer to receive full credit upon return of the item.
- The factory will provide special boxing, skids, crating, etc., whenever necessary. For information on charges for this packaging, please contact Parts Coordination.
- Contact Parts Coordination within 14 days of receipt of parts ordered in error. Parts ordered in error will be handled on a case by case basis.
- Carrier selection is limited to the factory approved carriers.
- Customer pickup guidelines are as follows:
  - Dealer must notify Parts Coordination of the date and time the customer is expected to arrive at the factory.
  - The dealer must enter the parts order into the system at least 4 hours prior to the customer's arrival at the factory.
  - If the customer fails to show, the factory will call the dealer to determine how to ship the order.

**\*all references to days in this document should be interpreted as "business days."**

**The factory classifies parts orders into the following categories:**

- Stock Orders -
  - US/Canada - five day shipment – unlimited usage each week.
  - International – within five days or at Dealer's request.
- Order must be received through EDT or Dealer Central.
- Parts Stock Orders will not be shipped with common carrier equipment loads.
- Stock Orders will only be shipped to the dealership address.
  - The factory will pay freight on US/Canada orders only.
  - The Stock Order option must be selected from the order entry program to initiate this benefit.
  - Freight will not be paid for parts stock orders shipped on dealer-owned vehicles.
- Out of stock items will remain open on the order and will be shipped as they become available or with next order.
- ***Note: All Directional Drill Fluid System Tanks, Drill Pipe, Vac Tanks, Storage Tanks, Skids and Tanks, etc., as well as Baroid products, are excluded from Stock Orders. (You can find a complete listing of those items restricted from Stock Orders on Dealer Central). Those products must be ordered on a Standard Order, and dealer will pay freight.***
- Standard Orders - (Two day shipment – unlimited usage each week)
  - Order must be received through EDT or Dealer Central.
  - Standard Orders will not be shipped with common carrier equipment loads.
  - Shipped to dealer by the second day following order and after the parts become available.
  - Dealer pays freight.
  - Out of stock items will remain open on the order and will be shipped as they become available, or with next International order.
- Customer Down Orders  
**IMPORTANT:** Ditch Witch® shares your customer support goals and understands that there are emergency situations where a drop shipment of parts to the customer is necessary. It is not in our mutual best interest, however, when drop shipments are used to supplement inventory that should be stocked at the dealerships. Associated Equipment Distributors reports that parts availability is the highest expectation customers have of an equipment dealer after they purchase equipment. Our highest priority should always be parts availability at the local dealership.

We will continue to honor requests for emergency shipments to a dealer's regular customers. Due to the emergency nature, we anticipate these orders will be classified as Customer Down Order. If, in the judgment of the factory, the request is not an emergency, we will not ship to the customer and will notify the dealership for further instructions.

**Customer Down Orders should adhere to the following guidelines:**

- Customer Down Orders are non-cancellable.
- Parts Customer Down Orders will not be shipped with common carrier equipment loads.
- Monday through Friday orders must be received at the factory by 4:00 pm Central Time. We will strive to insure that all orders received by the appointed cut-off time are shipped; however, different carriers have different cut-off times which could affect your shipment.
- Out of stock line items on all Customer Down Orders will be shipped as soon as available.
- All Customer Down Orders will be assessed a \$10.00 per line item handling charge. (The per line item fee will be waived for all HDD tooling.)

- After Hours, Weekend and Holiday Orders
  - Used for critically needed parts to be shipped as soon as possible.
  - After Hours, Weekend and Holiday Orders are non-cancellable.
  - These orders will be assessed a \$25 per line item handling charge, minimum of \$100.00. The maximum handling fee per order will be \$300.
  - Order must be called in to 580-370-0567.
  - These packages may need to be picked up at an airport if delivery service is not available on the delivery date.

## **2.2 Parts Returns**

The factory allows dealers the opportunity to return certain excess or slow moving parts to the factory for credit. It is the shipper's responsibility to supply the correct forms for the purpose of customs. An appropriate processing fee will be assessed against returns that require customs clearance documents that are not supplied by the shipper. A complete list of the parts being returned must be included as a packing slip in the return package. The different types of parts returns along with guidelines for each are listed below.

### **2.2.1 New parts returns**

This process is used when a dealer has excess inventory of returnable new parts.

- Must be returned within 24 months of purchase.
- Minimum line item value = 20 USD (Line Item Value = Individual Part Cost x Quantity).
- Maximum restock fee per item on each line = 300 USD.
- Maximum of 150 line items for domestic dealer returns.
- List of parts to be returned must be submitted via Dealer Returns application in Dealer Central for pre-approval.
- Parts must arrive at the Returns Department (1959 West Fir Avenue) during the week scheduled for the return with only pre-approved items included in the shipment.
- Only returnable parts in new condition will be considered for return.
  - Refer to the most recent factory price list to determine whether a part is returnable.
  - Ensure packaging is in good shape, parts are in salable condition, and parts are correctly labeled.
  - If non-returnable or used parts are returned, the factory will dispose of them, and no credit will be issued.
- Shipping crates and skids are eligible to be returned with new parts if in reusable condition.
- The following restocking fees apply to all Dealer parts returns. The restocking fee is determined from Dealer Net Price. All restocking charges are subject to change upon inspection of the parts by factory personnel.
  - a. 15% Restocking Fee: Applies to pre-approved part returns that are in new, salable condition and ready to be returned to factory stock. The parts require no refurbishing or repackaging of any kind upon return to the factory. *Note: HDD Tooling restock fee will be waived with a like kind exchange order.*
  - b. 5% Restocking Fee: Applies to all drill pipe eligible for return. The drill pipe must require no refurbishing and include end caps.
  - c. Up to 50% Restocking Fee: The return of parts removed from machines or assemblies, or parts needing refurbished or repackaged is not standard practice. Any

such parts are acceptable for return only with prior written approval and may incur up to a 50% restocking fee.

- d. In returning certain types of parts (i.e., drill pipe), an additional percentage or a flat fee may be discussed with the dealer.

### **2.2.2 Defective new parts returns**

This process should be used when dealer has defective new parts to return. A defective new part is a repair/replacement part that appears defective but has not been put into use or installed on a machine. Please notify the factory Returns Department (580-572-2878) of defective parts as soon as you discover they are defective so we can audit our stock and eliminate the shipping of any additional defective parts.

- Send list of parts to be returned to the factory Returns Department along with detailed information explaining the defect.
- Affix the green 'defective new parts return' tag to the package and return the parts to arrive at the factory Returns Department (1959 West Fir Avenue) within 30 days of sending the list.
- No restock fees will be charged.
- Contact your Customer Service Representative (CSR) for defective parts returns. Please provide the date and name of the Returns Department employee to whom the defect was reported in the comment section of the claim.
- Claim approval will be made upon verification of the part's defect by the factory. Please provide as much information as possible in the warranty claim.

### **2.2.3 Product Support parts returns**

This process should be used when dealer has parts on a warranty claim that have been requested to be returned to the factory.

- Affix the orange 'warranty returns' tag to the package and return the parts to arrive at the factory Product Support Department (1955 West Fir Avenue) within 30 days of the date the Product Support Technician requested the part be returned.
- Claim approval will be made upon verification of the part's defect by the factory. Please provide as much information as possible in the warranty claim.

### **2.2.4 Shipping error parts returns**

This process should be used to return parts shipped in error.

- Send list of parts to be returned along with the applicable invoice number to the factory Parts Coordination Department.
- When the Parts Coordination Rep has verified the information, the dealer will be notified. The parts should be returned to the factory Returns Department (1959 West Fir Avenue) within 30 days following this notification.
- No restock fees will be charged.

### **2.2.5 Core returns**

This process should be used to return a core that was previously purchased from the factory as a rebuilt part. Only fully assembled cores are eligible for return.

- Affix the buff 'core return' tag to the package and return the core to the factory Returns Department (1959 West Fir Avenue). Credit will not be issued without the core return tag.

- No credit will be issued for obsolete cores, cores with broken housings or cores that are not assembled.
- When the Returns Rep. has verified the information, credit will be issued.
- No restock fees will be charged.

### **2.3 Non-stock parts - “NS”**

Parts that have been ordered less than 10 times in the last five years and are used on equipment that has been out of production for at least five years are designated as non-stock parts. The description for these parts will be preceded by “NS”. The factory will build or purchase an “NS” part specific to an order. Factory manufactured “NS” parts have a 30 to 45 days lead time; purchased part lead times will vary by supplier. Non-stock parts will be quoted at time of order and pricing is good for the quoted order only. The order cannot be canceled for any reason and “NS” parts are non-returnable. It is a good practice to check the ‘Dealer Inventory Look-up’ application to determine if this part is available in another dealer’s inventory prior to placing your order with the factory.

### **2.4 Obsolete Parts**

Parts used on equipment that has been out of production for at least fifteen years and have not been sold for five consecutive years are obsolete parts and will no longer be produced, purchased or sold. However, you may contact a factory Customer Service Representative to determine if certain obsolete parts may be sold through a Specials’ purchase.

## **SECTION: WARRANTY**

### **POLICY 12: EXTENDED WARRANTIES**

Extended warranties of one (1) or two (2) additional years' coverage are available for all primary Ditch Witch® products, except some products with air cooled engines. Some of these products may have only a one (1) year additional coverage policy available. These warranties provide cost effective coverage for major components beyond the standard warranty policy's time frame.

Characteristics of extended warranty policies:

- Policy can be purchased any time during the initial warranty period.
- Policy stays with the machine.
- Policy covers only parts/components stated by model on the "Specific Components Covered by Extended Limited Warranty" list on myOrange.
- Dealers receive full labor rate and hours for work covered by extended warranty policies.
- Dealers will be compensated for parts at dealer net + 20%.
- There is no travel compensation under extended warranties.

Effective August 1, 2017

PART NO.	DESCRIPTION	MSRP (USD)
----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® JT10 Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Deutz D2011L4i integrated oil cooled diesel engine (48.8 net hp) EPA Tier 4i, EU Stage IIIA compliant
- Electrical Strike System
- Integral pipe rack which holds 54 or 58 drill pipe
- Rack and Pinion drill frame and carriage
- 2 post cylinder assist stake system (anchors included)
- Rubber tracks
- 13 gpm 4 cylinder fluid pump with 40 gal. tank
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Complete quick wrench set

If you select a standard machine configuration, you must also order the “shipped with” items listed below.

PART NO.	DESCRIPTION	MSRP (USD)
----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® JT20 Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Deutz TD 2.9, turbocharged, liquid cooled diesel engine (74 gross hp) EPA Tier 4, EU Stage IIIB compliant
- OR
- Deutz TD 2.9, turbocharged, liquid cooled diesel engine (74 gross hp) EPA Tier 4i, EU Stage IIIA compliant
- Electrical Strike System (module and barriers)
- 2 post cylinder assist stake system
- Hydraulic drill pipe loader with automated controller
- Rack and Pinion drill frame and carriage
- 1 drill pipe box, 400 ft. capacity
- 2-speed gearbox
- Rubber tracks
- Hydraulic pipe lubricator
- Tethered ground drive control
- Fluid pump, 25 gpm @ 1000 psi
- Cold start kit
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Complete quick wrench set
  - Spray wand

**NOTICE – Umbrella is not included in standard unit. See accessories.**

**If you select a standard machine configuration, you must also order the “shipped with” items listed below.**

----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® JT25 Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Cummins QSB4.5 water cooled diesel engine (130 hp gross) EPA Tier 3, EU Stage IIIA compliant
- Electrical Strike System (module and barriers)
- 2 post cylinder assist stake system (without auger flighting)
- Hydraulic drill pipe loader with automated controller
- Rack and Pinion drill frame and carriage
- Rubber tracks
- Tethered ground drive control
- Antifreeze kit
- Operating lights
- Cold start kit
- Dual batteries
- Compatible with Ditch Witch® drill pipe or Single Piece Forged drill pipe
- Available with single joystick thrust and rotation or separate joysticks for thrust and rotation
- Independent rear stabilizers
- Dual pivot drill frame
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Complete quick wrench set
  - Spray wand

If you select a standard machine configuration, you must also order the “shipped with” items listed below.

----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® JT25 Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Cummins QSB4.5 water cooled diesel engine (130 hp gross) EPA Tier 4, EU Stage IV compliant
- Electrical Strike System (module and barriers)
- 2 post cylinder assist stake system (without auger flighting)
- Hydraulic drill pipe loader with automated controller
- Rack and Pinion drill frame and carriage
- Rubber tracks
- Tethered ground drive control
- Antifreeze kit
- Operating lights
- Cold start kit
- Dual batteries
- Compatible with Ditch Witch® drill pipe or Single Piece Forged drill pipe
- Available with single joystick thrust and rotation or separate joysticks for thrust and rotation
- Independent rear stabilizers
- Dual pivot drill frame
- Telematics
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Complete quick wrench set
  - Spray wand

If you select a standard machine configuration, you must also order the “shipped with” items listed below.

**JT25 STANDARD #1**

**STANDARD UNIT**

The **Ditch Witch® JT30 Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Cummins QSB4.5 water cooled diesel engine (160 hp gross) EPA Tier 4, EU Stage IV Compliant
- Electrical Strike System (module and barriers)
- 2 post cylinder assist stake system (without auger flighting)
- Hydraulic drill pipe loader with automated controller
- Rack and Pinion drill frame and carriage
- Rubber tracks
- Tethered ground drive control
- Cold start kit
- Dual batteries
- Telematics
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Complete quick wrench set
  - Spray wand

If you select a standard machine configuration, you must also order the “shipped with” items listed below.

**JT30 STANDARD #1**

**JT30A-1** Base Unit: Hi Reg, No Cab - Includes:

022-1138 JT30 BASIC - CORE GROUP  
350-4519 JT/ AT30 T4 POWER PACK  
270-6627 JT/AT30 T4 PRODUCTION DECAL KIT

**STANDARD UNIT**

The **Ditch Witch® JT30 All Terrain Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Cummins QSB4.5 water cooled diesel engine (160 hp gross) EPA Tier 4, EU Stage IV Compliant
- Electrical Strike System (module and barriers)
- 2 post cylinder assist stake system (without auger flighting)
- Hydraulic drill pipe loader with automated controller
- Rack and Pinion drill frame and carriage
- Rubber tracks
- Tethered ground drive control
- Cold start kit
- Dual batteries
- Antifreeze kit
- Telematics
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Complete quick wrench set
  - Spray wand

If you select a standard machine configuration, you must also order the “shipped with” items listed below.

----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® JT40 Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Cummins QSB4.5 water cooled diesel engine (148 hp gross) EPA Tier 3, EU Stage IIIA compliant
- Electrical Strike System (module and barriers)
- 2 modular cylinder assist anchor system
- Hydraulic drill pipe loader with automated controller
- Rack and Pinion drill frame and carriage
- Rubber tracks
- Wireless jobsite setup/ground drive control
- Drill fluid antifreeze kit
- Operating lights
- Cold start kit
- Dual 925 amp batteries
- Compatible with Ditch Witch® drill pipe or Single Piece Forged drill pipe
- Independent rear stabilizers
- Dual pivot drill frame
- 70 gpm fluid pump
- Telematics
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Complete quick wrench set
  - Spray wand

----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® JT40 Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Cummins QSB4.5 water cooled diesel engine (160 hp gross) EPA Tier 4, EU Stage IV compliant
- Electrical Strike System (module and barriers)
- 2 modular cylinder assist anchor system
- Hydraulic drill pipe loader with automated controller
- Rack and Pinion drill frame and carriage
- Rubber tracks
- Wireless jobsite setup/ground drive control
- Drill fluid antifreeze kit
- Operating lights
- Cold start kit
- Dual 925 amp batteries
- Compatible with Ditch Witch® drill pipe or Single Piece Forged drill pipe
- Independent rear stabilizers
- Dual pivot drill frame
- 70 gpm fluid pump
- Telematics
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Complete quick wrench set
  - Spray wand

**SPECIAL PAINT**

Special color charge is per each unit - specify color code. (If first time color order, please provide 2"x3" color chip.)

From the time of confirmation, any special paint order is non-cancelable and non-returnable.

Please allow 30 days from time of order to delivery.

Orders with less than 30 days from order to delivery are subject to applicable surcharge(s).

Prices do not include the application of special or branded paints; i.e.) DuPont, Sherwin-Williams, PPG, metallic or base coat / clear coat.

Charges do not include price of paint.

----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® JT60 Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Cummins QSB6.7 water cooled diesel engine (200 hp gross) EPA Tier 4, EU Stage IV compliant
- Electrical Strike System (module and barriers)
- 2 post cylinder assist stake system (without auger flighting)
- Hydraulic drill pipe loader with automated controller
- Rack and Pinion drill frame and carriage
- Rubber tracks
- 150 gpm fluid pump
- Dual batteries
- Antifreeze kit
- Cab w/ AC and Heater
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Spray wand

If you select a standard machine configuration, you must also order the “shipped with” items listed below.

**JT60 STANDARD #1**

**JT60A-1** Base Unit: Hi Reg, Lined or Unlined Pipe - Includes:

022-1141 JT60 T4F  
350-4253 JT60 TIER 4f ENGINE SKID ASSEMBLY  
350-1521 JT60 ENGINE COVERS

**STANDARD UNIT**

The *Ditch Witch® JT60 All Terrain Jet Trac®* drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Cummins QSB6.7 water cooled diesel engine (190 hp gross) EPA Tier 3, EU Stage IIIA compliant
- Electrical Strike System (module and barriers)
- 2 post cylinder assist stake system (without auger flighting)
- Hydraulic drill pipe loader with automated controller
- Rack and Pinion drill frame and carriage
- Rubber tracks
- 150 gpm fluid pump
- Dual batteries
- Antifreeze kit
- Cab w/ AC and Heater
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Spray wand

If you select a standard machine configuration, you must also order the "shipped with" items listed below.

**AT60 STANDARD #2**

**AT60A-2** Base Unit: Le Reg, Rock Pipe - Includes:

**STANDARD UNIT**

The **Ditch Witch® JT60 All Terrain Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Cummins QSB6.7 water cooled diesel engine (200 hp gross) EPA Tier 4, EU Stage IV compliant
- Electrical Strike System (module and barriers)
- 2 post cylinder assist stake system (without auger flighting)
- Hydraulic drill pipe loader with automated controller
- Rack and Pinion drill frame and carriage
- Rubber tracks
- 150 gpm fluid pump
- Dual batteries
- Antifreeze kit
- Cab w/ AC and Heater
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Spray wand

If you select a standard machine configuration, you must also order the “shipped with” items listed below.

**JT60 ALL TERRAIN STANDARD #1**

----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® JT100M1 Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Deutz model TCD2013L06-2V water cooled, turbocharged diesel engine (268 gross hp)  
EPA Tier 3, EU Stage IIIA compliant
- Rack and Pinion drill frame and carriage
- Electrical strike system (module and barriers)
- Fluid pump
- Rubber tracks
- Pipe loader
- Spindle brake
- Open vise breakout system
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Voltage stake
  - Downhole tool wrench set

The JT100 was designed to be a customer selected unit. Options include the following:

- Operator's station
- Anchor system
- Crane/Hoist
- Fluid mixing systems

If you select a standard machine configuration, you must also order the "shipped with" items listed below.

From time of confirmation any unit ordered less hoist, enclosed cab, or any combination thereof, will be non-cancelable and non-returnable.

PART NO.	DESCRIPTION	MSRP (USD)
----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® JT100M1 Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Deutz model TCD 7.8L6 water cooled, turbocharged diesel engine (268 gross hp)  
EPA Tier 4i, EU Stage IIIB compliant
- Rack and Pinion drill frame and carriage
- Electrical strike system (module and barriers)
- Fluid pump
- Rubber tracks
- Pipe loader
- Spindle brake
- Open vise breakout system
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Voltage stake
  - Downhole tool wrench set

The JT100 was designed to be a customer selected unit. Options include the following:

- Operator's station
- Anchor system
- Crane/Hoist
- Fluid mixing systems

If you select a standard machine configuration, you must also order the "shipped with" items listed below.

From time of confirmation any unit ordered less hoist, enclosed cab, or any combination thereof, will be non-cancelable and non-returnable.

Special color charge is per each unit - specify color code. (If first time color order, please provide 2"x3" color chip.)

From the time of confirmation, any special paint order is non-cancelable and non-returnable.

Please allow 30 days from time of order to delivery.

Orders with less than 30 days from order to delivery are subject to applicable surcharge(s).

Prices do not include the application of special or branded paints; i.e.) DuPont, Sherwin-Williams, PPG, metallic or base coat / clear coat.

Charges do not include price of paint.

**STANDARD UNIT**

The **Ditch Witch® JT100M1 Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Cummins QSB6.7 water cooled diesel engine (260 hp gross) EPA Tier 4, EU Stage IV compliant
- Rack and Pinion drill frame and carriage
- Electrical strike system (module and barriers)
- Fluid pump
- Rubber tracks
- Pipe loader
- Spindle brake
- Open vise breakout system
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Voltage stake
  - Downhole tool wrench set

The JT100 was designed to be a customer selected unit. Options include the following:

- Operator's station
- Anchor system
- Crane/Hoist
- Fluid mixing systems

If you select a standard machine configuration, you must also order the "shipped with" items listed below.

**JT100 MACH I STANDARD #1**

**JT100A-1** Base Unit:Hi Reg,Unlined Pipe,Anch, Drvr - Includes:

022-1140 JT100 TIER 4 FINAL  
270-6452 AT/JT100 PROD DECAL KIT T4F  
270-6241 PIPE BOX LOADER COMMON PROD DECAL T4F  
350-4354 ASSY, T4 CAB W/HT/AIR R&P JT100  
350-4353 ASSY, T4 ENGINE SUB W/HEAT & AIR  
324-754 LOADER/DRIVER  
350-4794 JT100 ANCHOR SYSTEM LAYOUT

----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® JT100 All Terrain Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Deutz model TCD2013L06-2V water cooled, turbocharged diesel engine (268 gross hp)  
EPA Tier 3, EU Stage IIIA compliant
- Rack and Pinion drill frame and carriage
- Electrical strike system (module and barriers)
- Fluid pump
- Rubber tracks
- Pipe loader
- Spindle brake
- Open vise breakout system
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Voltage stake
  - Downhole tool wrench set

The AT100 was designed to be a customer selected unit. Options include the following:

- Operator's station
- Anchor system
- Crane/Hoist
- Fluid mixing systems

If you select a standard machine configuration, you must also order the "shipped with" items listed below.

From time of confirmation any unit ordered less hoist, enclosed cab, or any combination thereof, will be non-cancelable and non-returnable.

PART NO.	DESCRIPTION	MSRP (USD)
----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® JT100 All Terrain Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Deutz model TCD 7.8L6 water cooled, turbocharged diesel engine (268 gross hp)  
EPA Tier 4i, EU Stage IIIB compliant
- Rack and Pinion drill frame and carriage
- Electrical strike system (module and barriers)
- Fluid pump
- Rubber tracks
- Pipe loader
- Spindle brake
- Open vise breakout system
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Voltage stake
  - Downhole tool wrench set

The AT100 was designed to be a customer selected unit. Options include the following:

- Operator's station
- Anchor system
- Crane/Hoist
- Fluid mixing systems

If you select a standard machine configuration, you must also order the "shipped with" items listed below.

From time of confirmation any unit ordered less hoist, enclosed cab, or any combination thereof, will be non-cancelable and non-returnable.

PART NO.	DESCRIPTION	MSRP (USD)
----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® JT100 All Terrain Jet Trac®** drilling system is a self-contained, surface launched, fluid assisted, mechanical drilling system. The basic unit includes the following:

- Cummins QSB6.7 water cooled diesel engine (260 hp gross) EPA Tier 4, EU Stage IV compliant
- Rack and Pinion drill frame and carriage
- Electrical strike system (module and barriers)
- Fluid pump
- Rubber tracks
- Pipe loader
- Spindle brake
- Open vise breakout system
- Ship Kit - Includes the following:
  - Drill pipe wiper seal
  - Copper thread compound with brush
  - Tip cleaner set
  - Voltage stake
  - Downhole tool wrench set

The AT100 was designed to be a customer selected unit. Options include the following:

- Operator's station
- Anchor system
- Crane/Hoist
- Fluid mixing systems

If you select a standard machine configuration, you must also order the "shipped with" items listed below.

**JT100 ALL TERRAIN STANDARD #1**

**AT100A-1** Base Unit: Enclosed Cab,Crane,Hoist Anch - Includes:

022-1135 AT100 TIER 4 FINAL  
270-6452 AT/JT100 PROD DECAL KIT T4F  
270-6241 PIPE BOX LOADER COMMON PROD DECAL T4F  
350-4356 ASSY, T4 CAB W/HT/AIR R&P AT100  
350-4379 AT100 T4 HIGH CAPACITY MUD PUMP  
350-4353 ASSY, T4 ENGINE SUB W/HEAT & AIR  
324-754 LOADER/DRIVER  
350-4794 JT100 ANCHOR SYSTEM LAYOUT  
350-1913 STABILIZER PADS  
350-2405 PIPE LOADER W/GREASE  
350-2054 FRONT WRENCH SUB ASSY W/GREASE

Total \$762,144.00 T

From time of confirmation any unit ordered less hoist, enclosed cab, or any combination thereof, will be non-cancelable and non-returnable.

PART NO.	DESCRIPTION	MSRP (USD)
----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® P80** package consists of two units: the power source and the hydraulic pusher. These units may be ordered separately.

The P80 is priced less T-bar, back brace, trench box, drive rod, expanders, couplers and other accessories. Select these from appropriate lists.

**NOTE: T-bar or back brace or trench box plus push rod and pilot head are required for push operation. Bell stop and pulling clevis are required for pull back operation.**

The P80 Rod Pusher delivers 81,360 pounds of force on the rod at 2,500 pounds per square inch hydraulic pressure. The recommended power source is the Power Pac listed below.

The **Ditch Witch® Power Pac 25** is powered by an Honda GX690 air-cooled gasoline engine (22.2 hp gross). The Power Pac 25 develops 12.4 gallons per minute hydraulic flow at 2,500 pounds per square inch pressure.

**ROD PUSHER**

**If you select a standard machine configuration, you must also order the "shipped with" items listed below.**

----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® FM25** is a 25 horsepower diesel powered drilling fluid mixing system. It includes an engine enclosure for noise reduction, 2 electrically controlled centrifugal mixing pumps and 2 plumbing manifolds. Plumbing kits are optional depending on plumbing needs. It utilizes the venturi wet hopper used on the FM13V and can use 1 or 2 hoppers depending on the setup needs of the system. This system is designed to be used with both 500 and 1,000 gallon mixing tanks.

**Ditch Witch® FM25 FLUID MANAGEMENT SYSTEM (Includes):**

- Kubota D1105-E liquid-cooled diesel engine (24.8 hp gross, 23.8 hp estimated net @ 3,000 rpm)  
EPA Tier 4 compliant
- 2 – centrifugal mixing pumps with electric clutches
- 2 – plumbing manifolds
- Noise reduction engine enclosure
- Ship kit

**STANDARD UNIT**

The **Ditch Witch® MV800** Vacuum Excavation System will handle various types of non-hazardous liquid spoils but is specifically designed to remove drilling fluid from HDD jobsites. It is targeted at price-conscious directional drill owners and provides exceptional value at a competitive price with the quality and reliability Ditch Witch® customers expect. With the optional water system, the MV800 is also capable of soft excavation tasks for exposing underground utilities.

The basic unit includes the following:

- Briggs and Stratton Vanguard (31 hp gross) air-cooled gasoline engine
- Open power pack design
- Curb-side controls for operator safety
- 800 gallon spoils tank
- Cylinder assist dumping system
- 25 feet (7.6 m) of 3-inch (76 mm) suction hose

**STANDARD UNIT**

The **Ditch Witch® FX50** Vacuum Excavation System is both a portable vacuum unit for a variety of utility clean up applications and a powerful "soft" excavating machine for digging precisely controlled excavations to expose buried utilities.

The basic unit includes the following:

- Deutz D2011L03I diesel engine (49 hp gross) EPA Tier 4i, EU Stage IIIA compliant
- Insulated engine enclosure
- Cylinder assist dumping system
- Hydraulic door
- Suction tool
- Water lance
- Antifreeze kit

If you select a standard machine configuration, you must also order the "shipped with" items listed below.

----------	-------------	------------

**STANDARD UNIT**

The **Ditch Witch® FX50** Vacuum Excavation System is both a portable vacuum unit for a variety of utility clean up applications and a powerful "soft" excavating machine for digging precisely controlled excavations to expose buried utilities.

The basic unit includes the following:

- Deutz D2.9 L4, water-cooled diesel engine (48.8 hp gross @ 2,600 rpm) EPA Tier 4, EU Stage IIIA compliant
- Insulated engine enclosure
- Cylinder assist dumping system
- Hydraulic door
- Suction tool
- Water lance
- Antifreeze kit

If you select a standard machine configuration, you must also order the "shipped with" items listed below.

**FX50 T4 STANDARD #1**

**FX50B-1** FX50: 800/200gal,RevFl,Cyc,NoBoom,T22S (must order T22 trailer below) - Includes:
