----------	-------------	------------

**DrillLok™ Remote/Base**

DrillLok™ is a remote disable feature that incorporates a "report" feature from the HDD unit back to a Handheld device. The report provides an indication to the tracking crew that the rig is disabled there by locking out any inadvertent motion of the drillstring.

102-1552	DrillLok™ Paired, US, Basic Unit approved countries are: USA, China, Columbia, India, Japan, Malaysia, Mexico, Thailand, Venezuela	\$2,150.00 C

**TK Guidance System**

The TK system is a guidance system for tracking horizontal directional bores. The system is comprised of a tracker, drill rig display, and beacon. The TK system offers the choice of (3) TK trackers (a single frequency, a dual frequency, and a quad frequency tracker), (2) TD displays (one display mounted in the console and one display mounted on the console), and (4) TX beacons (two single frequency, one quad, and one quad grade beacon).

**Trackers** detect one, two, or four of the following beacon frequencies depending on the model: 1.5 kHz, 12 kHz, 20 kHz, and 29 kHz frequency.

**Displays** communicate with trackers by Bluetooth® or UHF radios. UHF radios are country specific in order to adhere to specific country regulations.

**Beacons** generate one or four of the following frequencies depending on the model: 1.5 kHz, 12 kHz, 20 kHz, and 29 kHz.

**TK Tracker**

The tracker detects a single 29 kHz beacon frequency and utilizes a UHF radio to communicate to the rig display, the UHF radio frequency is country specific. See corresponding part numbers below. Each Tracker comes with TSR reporting software, stand, alkaline batteries, and operator manual. Separately, select a country specific TD or TDR display. Ships with the choice between 222-5446 Hard Case and 220-2383 carry bag.

102-1522	TK SS, Base Unit, USA Radio approved countries are: USA, China, Columbia, India, Japan, Malaysia, Mexico, Thailand, Venezuela	\$9,200.00 H

<b>TKQ Tracker</b>		
The tracker detects a 1.5 kHz, 12 kHz, 20 kHz and 29 kHz beacon frequency and utilizes a UHF radio to communicate to the rig display; the UHF radio frequency is country specific (a tracker is available without a radio). See corresponding part numbers below. Each Tracker comes with the TSR reporting software, stand, alkaline batteries, and operator manual. Select the country specific TD or TDR display below for communication between the tracker and the rig display. Ships with the choice between 222-5446 Hard Case and 220-2383 carry bag.		
102-1535	TKQ SS, BASE UNIT, USA RADIO approved countries are: USA, China, Columbia, India, Japan, Malaysia, Mexico, Thailand, Venezuela	\$12,900.00 H

PART NO.	DESCRIPTION	MSRP (USD)
<b>TX Dual Frequency Universal Beacon Transmitter</b>		
TX two frequency beacon transmitter works with the TK tracker series. Prior to drilling, a 12 kHz or 29 kHz frequency can be selected, the frequency can also be switched downhole. The beacon comes in high power and is a universal length @ 15 in (381 mm) and an 1.25 in (31.7 mm) diameter, which fits into housings that are designed for a DCI transmitter. An optional 220-2356 hard case with batteries and isolators are available in the selectable parts section.		
102-1518	TXU Beacon, 15 Inch Base Unit	\$3,800.00 H
<b>15T Beacon Transmitter</b>		
15T series beacons are available in a single 29 kHz frequency (15T1) or a three frequencies 12/20/29 kHz (15T3). They work with the TK or TK RECON tracker series. Prior to a bore, the 15T3 beacon can be configured with two of three frequencies 12 kHz, 20 kHz, and 29 kHz and can be configured with standard, high or extreme power. The 15T1 is 29 kHz and standard power level. The 15T series beacons are Grade pitch. The beacons are a universal length @ 15 in (381 mm) and an 1.25 in (31.7 mm) diameter, which fits into housings that are designed for a DCI transmitter. An optional 220-2356 hard case with batteries and isolators are available in the selectable parts section.		
102-1632	15T1 Beacon, single 29 kHz frequency, standard power level	\$2,700.00 H
102-1588	15T3 Beacon, configurable 12, 20 or 29 kHz frequency; standard, high or extreme power levels	\$3,300.00 H
<b>17T Beacon Transmitter</b>		
17T series beacon transmitters are available in multiple frequency and power options. They work with the TK or TK RECON tracker series. Prior to a bore, the 17T4 and 17T4G beacons can be configured with two of four frequencies 1.5 kHz, 12 kHz, 20 kHz, and 29 kHz. It can also be configured with standard, high or extreme power. The 17T1 is 29 kHz and standard power. The 17T1H is 29 kHz and high power. "G" designates Grade pitch, everything else is Standard Pitch. The beacon comes standard with flat-top/half-moon isolators for side-load housings. An optional 220-1090 hard case, batteries and other isolators are available in the selectable parts section. Length is 17.8 in (452 mm). Diameter is 1.5 in (38 mm)		
102-1623	17T1 BEACON, BASE UNIT, 29 kHz frequency, standard power level	\$2,400.00 H
102-1624	17T1H BEACON, BASE UNIT, 29 kHz frequency, high power level	\$3,050.00 H
102-1625	17T4 CONFIGURABLE BEACON, 1.5, 12, 20 and 29 kHz frequencies; standard, high or extreme power levels, standard pitch	\$3,600.00 H
102-1626	17T4G CONFIGURABLE GRADE BEACON, 1.5, 12, 20 and 29 kHz frequencies; standard, high or extreme power levels, grade pitch	\$4,200.00 H
<b>19T Beacon Transmitter</b>		
19T beacon is available in a three frequencies 12/20/29 kHz (19T3). It works with the TK or TK RECON tracker series. Prior to a bore, the 19T3 beacon can be configured with two of three frequencies 12 kHz, 20 kHz, or 29 kHz and can be configured with standard, high or extreme power. The 19Ts beacon is Grade pitch. The beacons are a universal length @ 19 in (482 mm) and an 1.25 in (31.7 mm) diameter, which fits into housings that are designed for a DCI transmitter. An optional 220-2565 hard case with batteries and isolators are available in the selectable parts section.		
102-1631	19T3, configurable 12, 20 and 29 kHz frequencies; standard, high or extreme power levels	\$4,900.00 H

**TK RECON Guidance System**

The TK RECON system is a guidance system for tracking horizontal directional bores. The system is comprised of a tracker, drill rig display and beacon. The TK RECON system provides many new and enhanced features and offers the choice of (3) trackers (a single frequency, a two frequency and a four frequency tracker), (2) displays (one display is mounted in-the-console and one display mounted remotely), and multiple beacon options including the 86, 15T, 17T, 19T and 88B series. The RECON ISM Telemetry Radio provides increased communication distance and speed, but The TK RECON system will not be backwards compatible with the existing TK series, so the current TK Series trackers and displays will continue to be offered, for those customers who have that need or preference.

**Trackers** detect one, two or four of the following beacon frequencies depending on the model: 1.5 kHz, 12 kHz, 20 kHz and 29 kHz frequency.

**Displays** communicate with trackers by telemetry radios. Telemetry radios are country specific in order to adhere to specific country regulations.

**Beacons** generate one of four frequencies depending on the model, frequencies include 1.5 kHz, 12 kHz, 20 kHz and 29 kHz. Beacons with more than one frequency communicates with the Tracker by Bluetooth® in order to configure frequency and power level.

**TK RECON1**

The tracker detects a single 29 kHz beacon frequency and may utilize an ISM telemetry radio to communicate to the rig display, the ISM radio frequency is country specific. See corresponding part numbers below. Each Tracker comes standard with an alkaline battery tray, alkaline batteries and operator manual. Selectable options include, the choice between Hard Case, carry bag or nothing, between large, small or no stand or add the option to include the Li-Ion battery, tray and charging system. Separately, select a corresponding, country specific TD RECON or TDR RECON display.

102-1593	TK RECON1, No Radio	\$7,800.00 H

**UtiliGuard®+ Advanced System**

The following features are included:

Receiver/Transmitter Communications, which allows the user to control the transmitter with the receiver. Access to 70 standard frequencies, Radio Mode, Total Field Beacon Antenna Mode, Passive Power Modes, Ambient Interference Measurement (AIM) and Offset Depth measurement capability. Two transmitter options, the T5+ (5 Watt) and the T12+ (12 Watt). The T12+ includes an additional feature called Dual Output. This feature allows the user to connect to two different target utilities, locate the first one away from the transmitter, then switch to the second utility and locate it coming back to the transmitter.

**RECEIVERS**

102-1558	RX UTG ADV UNIT, V02	\$3,368.22	H
102-1562	RX UTG ADV, HP, UNIT, V02 (W/HP=With Headphone Jack)	\$3,441.77	H

PART NO.	DESCRIPTION	MSRP (USD)
<b>830 Series High Frequency Locator System</b>		
The 830 system is used to locate pipes and cables with simple operation and high performance. The advantage of this product is that it traces poor conductors, locates short lengths better, and it can be directly or inductively connected. The 830R receiver is used to detect a controlled signal applied to metallic pipes and cables with the 830T. Each unit will include operator manual, "D" cell batteries, direct connect leads and ground pin.

(F.O.B. PERRY, OKLAHOMA)****Effective August 1, 2017**

PART NO.	DESCRIPTION	MSRP (USD)
----------	-------------	------------

**LIVE POWER ADAPTOR**

The LPA is an accessory to the 950T, 970T, 980T and 300T transmitter. The LPA's primary function is to place signals on live target lines. The LPA has the ability to connect the transmitters, without damaging the transmitter, to live lines up to 480 volts. The ability to hook to live lines is needed because power interruption is not always possible.

**LPA**

220-566	LIVE POWER ADAPTER	\$633.51 C
---------	--------------------	------------

**UPGRADE SERVICE (per each service)**

Upgrade service allows the user to later add a locator option (950R) at the current option price, plus the listed service fee.

218-901	UPGRADE SERVICE	\$123.30 H
---------	-----------------	------------

**Depth Calibration Check**

This service will verify that a 950R receiver with depth capability is within factory test field tolerances. The unit will be recalibrated if required. If unit repair is necessary to achieve calibration, the repair costs are not included in this service charge.

219-092	DEPTH CALIBRATION CHECK	\$186.00 H
---------	-------------------------	------------

**2550GR**

The 2550GR ground penetrating radar utilizes a unique dual-frequency antenna design (250MHz, 700MHz) that enables the user to simultaneously scan for non-metallic and metallic pipes in both shallow and deeper locations. The system provides a superior resolution and soil penetration to a depth up to 19 feet depending on soil conditions. There are two configurations of the 2550GR.

The base unit includes: antenna, battery, battery charger, software, and manual.

The base unit w/PC includes: Panasonic Toughbook PC, antenna, battery, battery charger, software and manual.

102-1638	2550GR BASE UNIT	\$21,525.00 B
----------	------------------	---------------

102-1640	2550GR W/ PC BASE UNIT	\$25,462.50 B

## EXTENDED WARRANTIES

**Warranty:** Generally, Ditch Witch® receivers, remote displays, locators, and transmitters have a twelve (12) month warranty. Ditch Witch® beacons have a six (6) month warranty. Refer to individual product manuals for specific warranty information.

**Coverage:** Policy covers defects in material or workmanship using original warranty guidelines. Owner is responsible for inbound freight, and Ditch Witch® will pay outbound freight. Countries that require duties, import fees, etc. are not covered under extended warranty. There are no provisions under extended warranty for software enhancements or batteries.

**Registration:** Extended warranty purchased after the sale, contact Technical Service Department within the first 12 months of ownership. Extended warranty purchased at the time of sale, please note on the front of the registration card that the customer is purchasing extended warranty. Ditch Witch® will bill the dealership and load information into the data bank.

## ROADPATCHER STANDARD EQUIPMENT

Pump, Variable displacement load sense piston	Boom, front of cab mounted
Hydraulic Tank, 40 gallon, w/ shut-off valve	97 Degree swing x 74" travel
Tank & Cab mounted level and temperature indicator	Tilting nozzle optional
Hydraulic system pressure, 3200 psi	Remote on/off emulsion valve and emulsion flow control valve
5 Micro Tank Breather Filter	
10 micron cartridge return filter	
100 Mesh Suction Strainer	30 Gallon with sight level gauge
850 BTU/hr/degree F, oil to air 12v fan oil cooler	Tank mounted pressure gauge and shut-off valves
	Remote operated from cab, 3-way emulsion / flush valve
One coat sealer / urethane primer	
Two coats of Imron Elite polyurethane, white standard	
	Isuzu 4LE1 Turbo charged diesel
	Displacement, 2.2L (134.24 cu. In.)
Construction, A36 Carbon Steel, 10 Gauge	48.1 HP @2600 RPM / Max. Torque 103 LB-FT @ 1800 RPM
Capacity, 6.5 Cu.Yd.	Donaldson two element dry type air cleaner with restriction indicator
Fill Opening, 9' 10" x 6' 10"	Full flow spin-on oil filter
Aggregate feed, Rubber belt conveyor with rotary air lock	Three point automatic safety shut down
Heavy Duty retractable vinyl cover	
Conveyor bottom	Patcher controls & gauges on in-cab console:
	Keyed Ignition switch & Electronic Throttle
Positive displacement lobe type air pump	Voltmeter, tach, oil pressure, water temp and hour meter
Direct Drive from hydraulic motor	Back lit sealed rocker switches with icon and text markings
435 CFM Output	7" TFT LCD "Heads-up" color display, 800 x 480 pixels
	Full function proportional joy stick. Boom/Blower/Rock /Emulsion
300 Gallon (Optional 400 gallon)	
Heating, Auxiliary engine or 115 volts (230 volt optional)	
12" fill / service hatch	4 way LED flashing lights
70 PSI system pressure	Rear view camera system
	Slow moving vehicle emblem, backup alarm,
Hose, 2-1/2" Rubber lined spiral reinforced	5-lb fire extinguisher, and a warning triangle kit.
Nozzle, Heated eight hole spray ring	
Quick disconnect couplings for serviceability	
12 Months 1200 Hours

## Spray Patcher Street Max STANDARD EQUIPMENT

Pump, 12 volt power unit	Boom, rear mounted, spring suspension three segment
Hydraulic system pressure, 2000 psi	Balanced with leveling controls
	177" patch radius (4.5m)
	Manual nozzle tilt
One coat sealer / urethane primer	
Two coats of Imron Elite polyurethane, Yellow standard color	
	29 Gallon with sight level gauge
	Tank mounted pressure gauge and shut-off valves
Construction, A36 Carbon Steel, 10 Gauge	Remote operated from cab, 3-way emulsion / flush valve
Capacity, 2.0 Cu.FT.	
Fill Opening, 30" x 14"	
Forward trailer tongue mounted	Isuzu 4LE1 Turbo charged diesel
Aggregate feed, Gravity from dump truck to trailer venturi	Displacement, 2.2L (134.24 cu. In.)
	48.1 HP @ 2600 RPM / Max. Torque 103 LB-FT @ 1800 RPM
	Donaldson two element dry type air cleaner with restriction indicator
	Full flow spin-on oil filter
	Three point automatic safety shut down
670 CFM Output	Patcher controls & gauges on boom mounted console:
Positive displacement lobe type air pump	Keyed Ignition switch & Electronic Throttle
Direct Drive from engine	Horn for operator to driver alert
	Voltmeter, tach, oil pressure, water temp and hour meter
	Back lit sealed rocker switches with icon and text markings
70 PSI system pressure	Operator on/off emulsion valve and emulsion flow control valve
300 Gallon, R value 20 2-1/2" polyurethane foam installation	
Heating, Auxiliary engine or 115 volts (230 volt optional)	12 Volt 550 CCA
12" fill / service hatch	Axle Rating 14,400 LB
	Air Compressor 8.5 CFM @ 150 PSI
Hose, 3-1/2" Rubber lined spiral reinforced	
Nozzle, Heated eight hole spray ring	Wireless rear view camera system
	Amber LED Strobe

## SW195 TRAINING COMMITMENT

VAN KEPPEL will perform all training as needed by customer on all models purchased. This is normally a one day on site training session spent with crew using machine. This can be extended to a 3 day on site visit with the more complex units. All training will be conducted by a Van Keppel Asphalt Product Specialist or a Factory Trainer from the manufacturer of the equipment.

Van Keppel also will give yearly refresher training as requested from the owners of equipment at no charge.

Van Keppel will specifically hold training each year in either Tulsa or OKC on the Etnyre products including distributors and Chip Spreaders conducted by the factory trainer. This will be both power point class room and hands on with equipment

[jandrequipment.com](http://jandrequipment.com)

Response to Technical requirements.

1. We offer discounts all year long. If manufactures have additional discount opportunities we often pass along additional discount to the customer.
2. We have been in business for 12 years, from time to time there has been a bulletin sent to us by different manufactures to inspect or replace certain parts. The cost has been very little and we have not tracked it to the penny. Typically this is a very rare occasion and we might go to the customer's facility and inspect to see if anything needs to be corrected. If so the customer pays nothing for the service. Never a machine, typically just a part or visual inspection is required.
3. No
4. 45-120 days after chassis arrives at factory.
5. 12 years
6. Yes we offer discounts on extended warranty and typically the longest term is up to 5 years . Different manufactures offer various terms from 2-5 years parts and labor and workmanship.
7. No on green hydraulic fluids. We use what the manufactures recommend as they approve green hydraulic fluids it will be available to the end customer.
8. We can assist in helping the customer find an approved chassis for our equipment. This can be added to our bid or they can purchase it directly from the state contract for chassis. Either way we will send it to the respective manufactures to sign off and approve it will work for the equipment they are wanting, ensuring a compatible excellent combination of chassis and equipment. The chassis can be new or used but will have to meet certain manufacture requirements and approvals. We have manufactures in Illinois, Florida, and California. Typically if a new chassis is ordered freight is included by the selling chassis dealer to the factory.
9. We do accept parts return. Most cases if it is a stocking part there is a 0-15% restocking fee , case by case basis. Special order parts are 25% plus freight return fee.
10. We market the contract thru local trade shows, in person sales calls, phone calls and email. Advertising is done thru on hold phone messages, printed signs ect. Most cities in Oklahoma are aware of the contracts and will ask if they are interested in purchasing equipment if they can buy it thru the state contract.

To whom it may concern:

Any piece of equipment purchased from J&R Equipment llc/ J&R Environmental truck sales includes unlimited training for operators and technicians included with the purchase of a unit. We have after the sale support on service and parts in Oklahoma City or we can do field service work at your location for an hourly rate of \$115.00.

We also offer several different equipment options in CNG/ alternative fuel. Please call if you are interested and we can talk to you about our different offerings.

We also sell, rent or lease equipment with buy back opportunities. We can structure the purchase to meet the customer's needs.

We offer extended warranties and equipment purchases at a discount off of list price.

Thanks for the opportunity

Rodney Womack

405-760-8111

General information/ Website ect.

Please got to our website [www.jandrequipment.com](http://www.jandrequipment.com) to view all of the product available on state contract.

CNG can be used on many of the units we offer, call to let us talk to you about how to go green. In addition we offer other ecofriendly options on our equipment.

We also offer rentals , lease purchase , new , used and guaranteed buy back options.

Units can be mounted on customer supplied chassis, new or used pending the chassis specs being approved by the respective manufacture.

We will assist in helping find the correct chassis for your application and can add it to our state contract quote or get you in contact with the selling dealer for the chassis of your choice.

Thanks

Rodney Womack

## DON'T WASTE YOUR WATER!

Try the tankers that apply water where you want it, at the exact pressures and quantity you desire!

OMCO H400-XHD TANKERS are designed and built to the most rigid specifications in the industry, and yet they are the simplest equipment to operate. Here's Why!

- 1) The 3 point rough service suspension allows the tank to remain stable during twisting of truck the frame with absolutely NO stress on tank. OMCO tanks are an elliptical design with a 5" dish on heads and 3 baffles, keeping moving water in a curvature motion making a much safer operation.
- 2) Danfoss series 90 closed loop hydrostatic live power to water pump. Quadrant throttle from 0 to 150 P.S.I. water pressure for full performance at 1,000 engine R.P.M!
- 3) High performance Gorman Rupp 4"x 4" self priming, self loading 850 G.P.M. water pump is standard.
- 4) Front and rear spray heads, gravity bar, side head with remote 90° vertical adjustment, self loading rubber draft hose (4" x 20') with cam locks & strainer basket, city legal hydrant fill group.
- 5) Mud flusher adapter for front heads.

End View of XHD 3-PT  
Rocker Assembly

## WHY BURN THE BITS ON YOUR GRADER KEEPING UNWANTED MUD AND DEBRIS OFF YOUR PAVED ROADS?

OMCO H400 Tankers are available with simple to use mud flusher nozzles that interchange with the front spray heads. This design allows you to attack mud and other debris from a higher point than traditional street flusher nozzles. A sharper attack angle of the high pressure (100 P.S.I. and more) water can keep your project areas clean.

Side mounted deluge water heads are designed with a narrower pattern, allowing water to be directionally applied to areas up to 100 ft. away, and will perform at 400 G.P.M. with pressures to 100 P.S.I. An exclusive OMCO

## AVAILABLE SIZES AND SHELL STEEL

XHD series tanks are available in 3,500 gal., 3,800 gal., 4,000 gal., and 4,500 gal., capacity. All tanks are available with optional T-304

Hydrostatic driven 2,200 gallon stainless steel flusher with OMCO deicer with raven controls, monitor, gravity bar, rear spray heads, hose reel and quick change suction hose. It also has a sidewalk boom / snow plow.

Hydrostatic powered OMCO 2,500 gallon stainless steel tank flusher / deicer with Robo Flush™, OMCO deicer system with Force America control system

Hydrostatic powered OMCO 4,000 gallon stainless steel tank flusher / deicer, 750 gpm @ 100 psi water pump, stainless steel plumbing, top of tank monitor, deluge heads, front hose reel, right side hose reel, gravity bar, fire discharge, self-loading capabilities, hydrant fill with 6" air gap, lower and y-strainer.

### STEP UP TO OMCO TECHNOLOGY AND DEMAND A REAL TOOL!

#### Unequaled Controllability in Flushing Direction and Water Pressures.

Mild Steel or T-304 Stainless Steel.  
Elliptical tank design with 5" domed heads and baffles. These features insure curvature movement of water with less than full loads, making your tanker much safer while traveling. Truck tanks range from 2,000 gal. to 3,800 gal. Trailers are 6,000 gal.

#### Danfoss Series 90

Closed loop hydrostatic transmission powered 850 G.P.M. centrifugal water pump with full performance attainable at no more than 900 engine R.P.M.

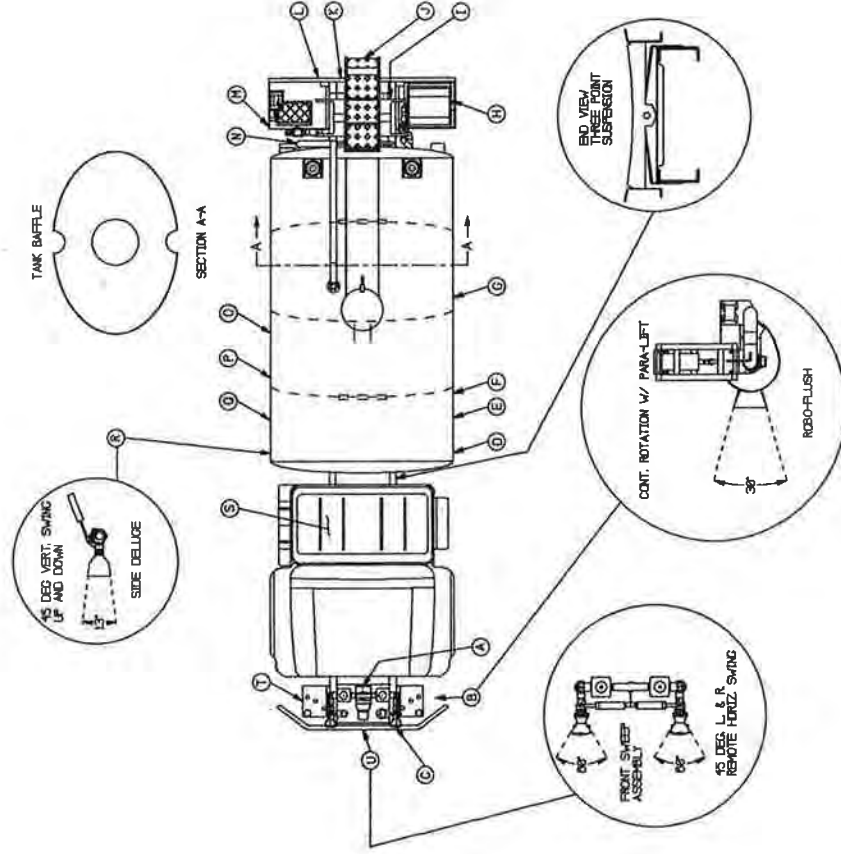

#### Choice of Computer or Pressure

##### Override (P.O.R) control.

Electronic controlled system allows a pre-selection of flusher pressures using the hydrostatic quadrant throttle. Water pressure will remain stable at 900 engine R.P.M. and above with any combination of heads turned on or off, regardless of road speed.

Hydraulic P.O.R. over speed control allowing stable "full performance" pressure from 900 engine R.P.M. though governed engine speed

**Water pump performance up to 600 G.P.M. @ 100 P.S.I.**

#### Front Flusher Nozzles

Can be equipped with individual horizontal swing feature controls. The operator can move either nozzle 45° left or right from straight ahead position.

#### OMCO's Exclusive ROBO-FLUSH™ with PARA-LIFT™

Front corner mounted, narrow pattern, high pressure nozzle can be rotated remotely on a continuous horizontal plane. It can also be adjusted in height from 7" to 17" above ground level. This feature allows flushing of bridge curbs with different heights, cul-de-sacs, under parked vehicles, etc. The majority of your flushing requirements can be achieved with the ROBO-FLUSH™ alone, performing more lane mile work with less water usage. **TRY IT YOU WILL LIKE IT!**

#### OMCO's Side Mounted Deluge Water Heads

Equipped with narrow pattern nozzles and when combined with the high pressure performance standard on our systems, you will find it is easy to remove winter sanding debris, etc. from your bridge decks, under guard rails, and all roadside areas. These heads are designed with a vertical remote movement of 45° below horizon to 45° above horizon and will hold in any position between.

XHD three point suspension option will extend your tank warranty to 5 years.

The HT-400 series spec. sheet is a serious spec. insuring excellent performance and controllability. Ask for your copy today.

Hydrostatic drive 2,200 gallon stainless steel flusher with sidewalk flusher, OMC0 deicer with raven controls, monitor, gravity bar, rear spray heads, hose reel and quick change suction hose

Hydrostatic powered OMC0 2,500 gallon stainless steel tank flusher / deicer with Robo Flush™ OMC0 deicer system with Force America control system

Hydrostatic powered OMC0 6,000 gallon stainless steel tank, 40' semi trailer. Self priming water pump, flusher, deluge, spray heads, hose reel, gravity bar, fire discharge and deicer capabilities. Just to name a few.

- S) ROTARY BEACON (OPTIONAL AT TRUCK REAR)
- G) REAR SPRAY MANIFOLD (OPTIONAL EQUIPMENT: 6" QUICK DUMP, 2-1/2" FIRE DISCHARGE PORT)
- H) STANDARD REAR LADDER
- I) HYDRANT FILL (OPTIONAL)
- J) STANDARD 6" GRAVITY BAR
- K) REAR BUMPER ASSEMBLY (OPTIONAL)
- L) STANDARD HOSE REEL (OPTIONAL PUMP LOCATION)
- M) OPTIONAL TOOL COMPARTMENT LOCATION
- A) PTO POWERED WATER PUMP
- B) FRONT BUMPER TURRET(OPTIONAL)
- C) FRONT SPRAY MANIFOLD (OPTIONAL FRONT MUD FLUSHER INTERCHANGE)
- D) LEFT SIDE DELUGE OPTIONS
- E) STANDARD WATER PUMP LOCATION (OPTIONAL LOCATION FOR HOSE REEL)
- F) SUCTION HOSE STORAGE

### DON'T WASTE YOUR WATER!

Try the tankers that apply water where you want it, at the exact pressures and quantity you desire!

OMCO P300 XHD TANKERS are designed and built to the most rigid specifications in the industry, and yet they are the simplest equipment to operate. Here's Why!

- 1) The 3 point rough service suspension allows the tank to remain stable during twisting of truck the frame with absolutely NO stress on tank. OMCO tanks are an elliptical design with a 5" dish on heads and 3 baffles, keeping moving water in a curvature motion making a much safer operation.
- 2) It will be powered by a Chelsea or Muncie air shift, clutch model transmission mounted P.T.O. and geared for compatible engine/pump speeds during pump and roll operations.
- 3) High performance Gorman Rupp 3"x 3" self priming, self loading 350 G.P.M. water pump is standard. The pump is capable of 100 P.S.I. water pressure.
- 4) Front and rear spray heads, gravity bar, side head with remote 90° vertical adjustment, self loading rubber draft hose (3" x 20') with cam locks & strainer basket, city legal hydrant fill group.
- 5) Mud flusher adapter for front heads.
- 6) Many other features both standard and optional. (spec sheets available on request)

### WHY BURN THE BITS ON YOUR GRADER KEEPING UNWANTED MUD AND DEBRIS OFF YOUR PAVED ROADS?

OMCO P300 Tankers are available with simple to use mud flusher nozzles that interchange with the front spray heads. This design allows you to attack mud and other debris from a higher point than traditional street flusher nozzles. A sharper attack angle of the high pressure (100 P.S.I. and more) water can keep your project areas clean.

Side mounted deluge water heads are designed with a narrower pattern, allowing water to be directionally applied to areas up to 100 ft. away, and will perform at 300 G.P.M. with pressures to 100 P.S.I. An exclusive OMCO feature is the cab controlled remote vertical movement of the side heads (45° above horizon to 45° below horizon).

### AVAILABLE SIZES AND SHELL STEEL

XHD series tanks are available in 3,500 gal., 3,800 gal., 4,000 gal., and 4,500 gal., capacity. All tanks are available with optional T-304 stainless steel shell material.

## **OMCO ANTI-ICER SYSTEM**

### **POWER METHOD FOR ANTI-ICER SYSTEM:**

This system is powered with the EHF or electronic controlled Danfoss series 90 pump/transmission. A second or "B" system power mode will power the Anti-icer motor which is equipped with Danfoss Plus 1 computer program and governed by a pressure transducer arrangement which will control constant pressure as set, and over speed control. Full performance will be achieved at 800 engine R.P.M.. The hydrostatic throttle on the console will be able to pre-select a performance setting, and that performance will remain stable from 800 engine R.P.M. through engine governed speed.

### **PUMP AND VALVING:**

A Hypro HM Series cast iron 2" X 1 1/2" centrifugal chemical pump will be used. A 2" stainless steel flow control valve and a RFM 100 flow meter shall be used to meter fluid at pre-selected rates from the cab console. Boom valving will be 12 volt poly plunger style valves, sized to achieve optimal performance in each individual system where remote control of system is required. The 1/4 turn ball valves required will be heavy duty poly style on suction side and stainless steel on pressure side. The remote operated valves will be positioned and controlled so as to allow recirculation of product when the recirculation air valve (controlled from inside the cab) and the stainless steel 1/4 turn ball valve are open. Discharge booms are to be in the "off" position to recirculate the product.

A 2 1/2" bottom load plumbing arrangement will be installed to prevent aeration or foaming of product while loading. A 2 1/2" 1/4 turn heavy duty ball valve will be installed at inlet with a removable cap.

### **SPRAY BOOMS, NOZZLES, AND RECIRCULATION BAR:**

The tank recirculation bar will be constructed from 1 1/4" schedule 40 stainless steel and inserted into rear tank head approximately 20" right of center line and 8" up from bottom. The bar pipe will extend forward to include the front section of baffled tank, and be equipped with drill holes at strategic locations on an 8:00 o'clock position.

### **The spray booms will be positioned as follows:**

The main boom will be constructed from 1 1/4" stainless steel pipe and positioned under rear deck. The left and right booms will be extensions of main boom arrangement and will be positioned at each end of rear deck. The 3 boom sections will receive and apply product independently, and each boom will be equipped with ten (10) each T-jet straight stream nozzles with 3 GPM orifices. The left and right boom nozzles shall be positioned to evenly cover 12 foot lanes.

### **SPEED CONTROL SYSTEM AND CAPACITIES:**

The controller will be a Ravens # DCS410 transmission speed sensor. Other controllers are available (Epoke, Force America, Dickey John, etc.). With correct nozzle size the system will be capable of 1 lane application at 60 gallons per lane mile going 35 M.P.H. or 3 lane application at 60 gallons per lane mile going 35 M.P.H.

## SPECIFICATIONS OMCO HF400 & EHF400 SERIES STREET FLUSHER SYSTEMS

### (OPTIONS) TANK SIZE AND SHAPE:

- HF422** 2,200 U.S. gallon capacity, elliptical shape, **Low Profile Design**, (54" minor axis x 85" major axis) x 144" long. Heads will be dished & flanged (5" minimum dish), 2 baffles will be dished (5" minimum dish).
- HF425** 2,500 gallon capacity (as above) x 168" long, 3 baffles.
- HF430** 3,000 gallon capacity (as above) x 192" long, 3 baffles.
- HF435** 3,500 U.S. gallon capacity, elliptical shape, **Standard Profile Design**, (64" minor axis x 95" major axis) x 168" long, Heads will be dished & flanged (5" minimum dish), 3 baffles will be dished (5" minimum dish).
- HF438** 3,800 gallon capacity (as above) x 180" long, 3 baffles.
- HF440** 4,000 gallon capacity (as above) x 192" long, 3 baffles.

### MATERIAL:

The bottom 1/3 of tank skin will be constructed from 3/16" mild steel, the top 2/3 of the tank skin will be constructed from 10 gauge mild steel. The heads will be 3/16" dished and flanged (5" min. dish). Baffles shall be constructed from 10 gauge mild steel and be dished (5" min. dish).

### (OPTION) MATERIAL STAINLESS STEEL T-304:

The bottom 1/3 of tank skin will be constructed from 3/16" T-304 stainless steel, the top 2/3 of the tank skin will be constructed from 10 gauge T-304 stainless steel. The heads will be 3/16" T-304 dished & flanged (5" minimum dish). Baffles shall be constructed from 10 gauge T-304 stainless steel & be dished (5" minimum dish.)

### TOP MANHOLE:

There shall be a 20" over center locking circular hatch cover. The manhole assembly will be welded into tank center top.

### (OPTION) TOP MANHOLE:

When the stainless steel tank option is used, a stainless steel 20" over center locking hatch cover will be used.

## **SPECIFICATIONS OMCO HF400 & EHF400 SERIES STREET FLUSHER SYSTEMS**

### **CONSTRUCTION PROCEDURE:**

The shell skin shall be unspliced sections for the entire length of tank, and be electrically welded longitudinally. The entire tank (heads, baffles, shell sections) will be 100% double welded. The baffles will be installed with 24" lined crawl holes, top and bottom 6" X 12" lined flow holes. Two (2) or three (3) baffles as required in tank size spec., will be installed. The tank will have a rear ladder and top cat walk with rails and grip strut rungs.

### **(OPTION) CONSTRUCTION PROCEDURE:**

When stainless tank option is used, there will be 10 gauge T-304 stainless steel strips welded between tank vessel and all mild steel weldments.

### **SUB-FRAME:**

The skid mount rails shall be constructed from 3/16" steel and installed with six (6) cross members supported to tank bottom and side rails. 1" x 2 3/4" Rubber sills shall be installed under skid mount rails in inverted channels.

### **(OPTION) SUB-FRAME-STAINLESS STEEL (T-304 2B TYPE):**

With the stainless steel tank option, the skid mount rails shall be constructed from 3/16" stainless steel T304 2B and installed with six (6) cross members supported to tank bottom and side rails. 1" x 2 3/4" Rubber sills shall be installed under skid mount rails in inverted channels.

### **TANK MOUNTS:**

Tank mounts shall be male-female with coil springs (two (2) per mount), three (3) mounts per side bolted to truck and tank frame. Coil springs to be constructed from 5/16" material using 5/8" bolts and self-locking nuts. Two (2) mounts per side on the HF422 size.

### **OMCO FIBERGLASS FENDERS:**

The OMCO fenders are to be constructed of common resin and fiberglass using rope mat (woven roving fiberglass mat) rather than cloth material for stronger construction. The fenders will be pre-painted black in the mold with gel coat. The finished fenders shall be 5/16" in thickness. The full formed fiberglass, rubber mounted fenders will cover the entire dual drive tire area and have mud flaps. The fenders shall be attached to three (3) each T-304 stainless steel fender mounting brackets. The T-304 stainless steel mounting brackets shall be attached to the tank frame. The fenders shall be painted jet black or color of customer choice using Sherwin Williams Genesis acrylic urethane with hardener.

## **SPECIFICATIONS OMCO HF400 & EHF400 SERIES STREET FLUSHER SYSTEMS**

### **(OPTION) SKIRTED SIDES AND FENDER WELLS (AVAILABLE ON LOW PROFILE DESIGN):**

The tank will be fully side skirted to axle center line and the wheel well cut outs will allow enough room to install tire chains if needed. A rear compartment will be incorporated for placement of miscellaneous tools. The wheel wells will be equipped with anti-spray flashing and legal mud flaps will be installed. A 6" walkway along both sides of tank at or near center line will be constructed on top of skirted side sections. The access ladder/steps to top center of tank will be incorporated into left side skirting. The skirting will be constructed from 12 gauge mild steel.

### **WATER PUMP POWER SYSTEM HF400 SERIES:**

The water pump to be driven by a piston-type closed loop, hydrostatic transmission with loop cooling filtration, and adjustable pressure control. The hydro-static system will be sized for continuous duty, long life and compatible with the torque values of the chassis engine and optimum performance speeds required of the water pump.

The Danfoss hydrostatic pump transmission will be servo controlled, variable displacement and driven by a drive shaft connected to the front of engine crankshaft. The pump/transmission displacement will be controlled from the cab console, using an electronic quadrant throttle. The hydro-static motor will be fixed displacement, bent axis design, and flange mounted directly to the water pump.

The motor sizing will be as necessary to provide correct R.P.M. performance of the individual water pump. The condition of the oil in the hydro-static loop will be maintained by a 30 G.P.M., 10 micron full flow spin type filter and a oil cooler rated at 27,000 B.T.U./HR. under acceptable operating conditions. The externally adjustable automatic pressure control (P.O.R.) over-rides the electronic control and maintains constant full performance water pressures when engine speeds are above 900 R.P.M. The purpose of this feature is to insure full operation performance at 900 R.P.M., and to protect against pressure surges and motor over speeding at engine speeds above 900 R.P.M. The oil reservoir will be vented in such a manner as to prevent ingestion of water spray. The high pressure hydraulic hoses will be 12 XT four (4) wire braid with heavy cover. All other hoses including the cooling circuit will be SAE rated medium pressure wire braid hose with heavy cover. All fittings will be crimp style.

## **SPECIFICATIONS OMCO HF400 & EHF400 SERIES STREET FLUSHER SYSTEMS**

### **OPTION: WATER PUMP POWER SYSTEM EHF400 SERIES:**

The water pump to be driven by a piston-type closed loop, hydrostatic transmission with loop cooling filtration, and adjustable pressure control. The hydro-static system will be sized for continuous duty, long life and compatible with the torque values of the chassis engine and optimum performance speeds required of the water pump. The hydrostatic pump transmission will be servo controlled, variable displacement Danfoss or equivalent, driven by a drive shaft connected to the front of engine crankshaft. The servo control will be electrically operated (E.D.C.) with water pressure transducer and electronic quadrant throttle. The water pressures will be set with the throttle to a predetermined pressure setting of 0 to 100 P.S.I., and will be maintained regardless of how many flusher heads are operating. Full performance of 600 G.P.M. will be attained at 900 engine R.P.M. and will remain through the governed engine speeds.

The electric automatic control system will have a disable switch, so that higher pressures can be obtained if desired. The hydro-static motor will be fixed displacement bent axis, & coupled directly to the water pump. The motor sizing will be as necessary to provide correct R.P.M. performance required of the water pump. The condition of the oil in the Hydro-static loop will be maintained by a 30 G.P.M., 10 micron full flow spin on type filter and an oil cooler rated at 27,000 B.T.U./HR. under acceptable operating conditions. The oil reservoir (10 gallon cap.) will be vented in such a manner as to prevent ingestion of water spray. The high pressure hydraulic hoses will be 12 X T four (4) wire braid with heavy cover. All other hoses including the cooling circuit will be SAE rated medium pressure wire braid hose with heavy cover. All fittings will be crimp style.

### **WATER PUMP:**

The pump will be a Berkeley 4" X 3" B3JRMBM centrifugal, cast iron pump. 5" tank suction plumbing to the suction orifice of the pump. The pump will have performance capability of 600 G.P.M. at 100 P.S.I..

### **OPTION FOR SELF LOADING CAPABILITY:**

Water Pump: Gorman Rupp #04A3-B 4" x 4" self-priming cast iron centrifugal, cast iron pump. 5" tank suction plumbing to the suction orifice of the pump. The pump will have performance capability of 600 G.P.M. at 100 P.S.I.. The water pump will be equipped with three (3) 4" hand operated butterfly valves. These valves will be located in a position which will allow self-loading of water tank. The "source" suction orifice will be 4" camlock connection. A section (4" x 20' long) of rubber suction hose will be furnished with strainer and camlock connection, as well as storage "J" hooks and lockable hasp.

**OPTIONAL:** Suction hose/s will be 3" diameter for easier handling.

## **SPECIFICATIONS OMCO HF400 & EHF400 SERIES STREET FLUSHER SYSTEMS**

### **FLUSHER SYSTEM:**

Flusher control valves will be 2" Cla-valve (model KH7100). All plumbing to flusher heads will be 3" on manifold and 2" to individual heads. The heads will be located below front bumper on both left and right side, in approximate alignment with the chassis frame rails. The mid ship heads will be located under or slightly behind cab, operated toward left and right sides. The flusher heads will be OMCO bronze three (3) piece fully adjustable with #82 slots (3/32"). #121 slots (1/8") are optional for more water flow. The valve control will be air/spring style and be operated (on-off) from cab console.

### **(OPTION):**

Front flusher heads to rotate independently in a horizontal arc 45 degrees either way from center, electric over air controlled from cab console.

### **(OPTION): FIRE DEPARTMENT TENDER VALVE:**

A 2 1/2" brass male N.S.T. discharge fitting will be installed for the purpose of transfer of water to another tanker (such as your local fire department pumper) at up to 850 G.P.M.

### **CONTROL CONSOLE:**

The control console shall be constructed and mounted between seats inside cab, and be painted with Rustoleum black hammerite paint. The console will have a water pressure gauge, and all necessary electric over air valve switches and hydro-static throttle controls.

### **(OPTION:) TANK FULL/TANK EMPTY**

High level ("Tank Full") float operated legend indicator light will be positioned at fill station. Low level ("Tank Empty") float operated legend indicator light will be positioned on cab console. Both floats will be Stainless Steel.

### **LIGHTING:**

All running lights will be L.E.D. style rubber mounted lamps. Wiring shall be enclosed in conduit. reflectors will be installed, and the system will comply with D.O.T. #108.

### **BEACON:**

One double flash LED beacon on top of tank, amber in color.

### **(OPTION) BEACON:**

A second LED beacon of the same type on top of tank, amber in color.

## SPECIFICATIONS OMCO HF400 & EHF400 SERIES STREET FLUSHER SYSTEMS

### **ENTRIES AND PLUMBING:**

All plumbing entries shall be constructed from schedule 40 weld fittings and will be fitted with welded collars to distribute the flex and prevent cracking. All plumbing and piping will be schedule 40 black pipe, using weld ells, tees, fittings, etc., rather than threaded pipe or fittings. The plumbing shall be assembled using rubber gasket couplers at necessary locations and in such a manner that the assembly may be removed as needed from the chassis.

### **PLUMBING (OPTIONS):**

All water plumbing will be constructed of T-304 stainless steel.

### **REAR INLET FOR HYDRANT FILLING:**

A hydrant fill station will be constructed at tank rear curbside. The plumbing will be equipped with visible 6" air gap at or near top tank center and fill hole will be arranged so that debris (tree leaves, etc.) cannot enter the tank. The entry station will be equipped with 2 1/2" "Y" strainer with clean out basket. Plumbing assembly will be bolted to tank exterior, and be removable.

### **HOSE REEL:**

A live hose reel with accommodations for 1" x 125' hard rubber hose, mounted right side mid-ship, or on rear of tank for hand flushing. Water flow to hose to be air-operated with on/off valve located on hose reel. Reel to be Reelcraft (or equivalent), with electric rewind and crank rewind (back-up). 2/3 HP motor required. A 200 P.S.I. hose and a fog nozzle will be installed. **NOTE: When the optional Gorman Rupp self-priming water pump is used, the 1 1/2" x 70' hose is used.**

### **(OPTION) SIDE MOUNTED WATER HEAD:**

One 2" side mounted water head assembly will be placed on the right side, mid-ship at frame height. The nozzle will be constructed so as to discharge water in an approximate 20 degree fan. The purpose of the narrow arc is to move heavy debris and material, that the ordinary flusher nozzles cannot move properly. The discharge will be up to 400 G.P.M. at 100 P.S.I. and will discharge at distances of up to 75 feet. The unit will be capable of vertical adjustment of 45 degree above horizon to 45 degree below horizon, remotely from cab console.

## **SPECIFICATIONS OMCO HF400 & EHF400 SERIES STREET FLUSHER SYSTEMS**

### **(OPTION) "ROBO-FLUSH" HEAD ASSEMBLY:**

The unit will be equipped with one (1) 2" continuous rotating flusher head mounted under left or right corner of front bumper. The nozzle will be constructed of steel and have a discharge arc of approximately 15 degrees. This system will be directly controlled by a joy stick arrangement located on the console inside cab, and be powered by the hydraulic pump. The rotator steering roller chain will be stainless steel and shall be size 50. The rotator assembly will be equipped with a parallelogram lift frame with stainless steel pins and bushings. The unit will be remotely adjusted for height from 7" above the street level to 17" high.

### **(OPTION) REAR MOUNTED GRAVITY BAR:**

A 4' x 96" gravity bar with clean-out removable ends and equipped with 3/4" threaded rear outlet couplers and 8" centers, and each with its own 90 degree deflector assembly. The control valve will be a 4" butterfly air operated valve and controlled from cab console.

### **(OPTION) REAR MOUNTED POWER BAR:**

A 2" x 96" Power bar pipe arrangement will be installed under rear bumper deck, and have clean out ends. A cab controlled 2" Cla-valve will be used, and 3/8" Fan spray nozzles (10 ea.) will be evenly spaced on bottom of Power Bar.

### **(OPTION) MONITOR CANNON SYSTEM:**

Tank mounted Elkhart Sidewinder electric 500 G.P.M. cab controlled monitor. Sealed circuit 12V DC electric powered. Vertical move from horizon -45° to 90°, horizontal move 180° or 330°. Monitor available with normal or high speed travel. Equipped with straight stream / fog adjustable nozzle. All operations are on console mounted Joy stick controller. This Remote Controlled Monitor is positioned so that is in view of driver (operator) through mirror at all times. This monitor may also be mounted on a fold down frame on front bumper.

### **(OPTION) REAR MOUNTED SPRAY-HEAD SYSTEM FOR DUST CONTROL:**

Two (2) rear mounted 2" spray-heads shall be installed on tank rear. They will be adjustable for quantity, as well as direction, and be controlled (on/off) from cab console.

## **SPECIFICATIONS OMCO HF400 & EHF400 SERIES STREET FLUSHER SYSTEMS**

### **(OPTION) OVERHEAD SPRAY BOOM:**

A 3" manifold will be installed at tank rear, and will be extended to top rear of tank. It will tee into a 2" manifold and go to left and right mounted flusher nozzles. These nozzles will be vertically installed 48" apart. Air operated ball bearing swivels will allow these nozzles to be remotely controlled from cab console and independently moved from straight up position to 90° right angle. The nozzles will be able to stop at any degree wanted within the 90° swing. The nozzles will be OMCO #82.

### **OPTION: TOOL COMPARTMENTS**

Single or double door style (depending on available room). Sweep out design with box pan door/s. Door design with café style or swing up style doors. 24" deep x 24" high x 24" to 60" long (Double doors on compartments longer than 36" long). Stainless steel piano hinge and twist lock S.S. latch with or without keys. Mild steel, aluminum, or stainless steel construction.

### **PAINT:**

Tank will be properly prepared prior to painting. A two (2) part modified polyamide epoxy primer will be applied inside (**NO INSIDE PAINT ON STAINLESS STEEL TANK OPTION**). Sherwin Williams Genesis acrylic urethane with hardener will be applied to outside of tank and components. Black enamel on all plumbing parts at and below frame height.

## SPECIFICATIONS P600 WATER TANKER

### **TANK SIZE AND SHAPE OPTIONS:**

<u>P622</u>	2,200 U.S. gallon capacity, elliptical shape, <b><u>Low Profile Design,</u></b> (54" minor axis x 85" major axis) x 144" long. Heads will be dished & flanged (5" min dish), 2 baffles will be dished (5" min. dish).
<u>P625</u>	2,500 gallon capacity (as above) x 168" long, 3 baffles.
<u>P630</u>	3,000 gallon capacity (as above) x 192" long, 3 baffles.
<u>P635</u>	3,500 gallon capacity elliptical shape, <b><u>Standard Profile Design,</u></b> (64" minor axis x 95" major axis) x 168" long. Heads will be dished & flanged (5" min dish), 3 baffles will be dished (5" min. dish).
<u>P638</u>	3,800 gallon capacity (as above) x 180" long, 3 baffles.
<u>P640</u>	4,000 gallon capacity (as above) x 192" long, 3 baffles.
<u>P645</u>	4,500 gallon capacity (as above) x 216" long, 3 baffles.

### **MATERIAL:**

The bottom 1/3 of tank skin will be constructed from 3/16" mild steel, the top 2/3 of the tank skin will be constructed from 10 gauge mild steel. The heads will be 3/16" dished and flanged (5" min. dish). Baffles shall be constructed from 10 ga. mild steel and be dished (5" min. dish).

### **(OPTION) MATERIAL STAINLESS STEEL T-304L:**

The bottom 1/3 of tank skin will be constructed from 3/16" T-304L stainless steel, the top 2/3 of the tank skin will be constructed from 10 gauge T-304L stainless steel. The heads will be 3/16" T-304L dished & flanged (5" minimum dish). Three (3) baffles shall be constructed from 10 gauge T-304L stainless steel & be dished (5" minimum dish.)

## **SPECIFICATIONS P600 WATER TANKER**

### **CONSTRUCTION PROCEDURE:**

The shell skin shall be unspliced sections for the entire length of tank, and be electrically welded longitudinally. The entire tank (heads, baffles, shell sections) will be 100% double welded. The baffles will be installed with 24" lined crawl holes, top and bottom 6" x 12" lined flow-holes. Two (2) or three (3) baffles as required in tank size spec., will be installed. Tank will have a rear ladder and top cat walk rails and grip strut rungs.

### **(OPTION) CONSTRUCTION PROCEDURE:**

When stainless tank option is used, there will be 10 gauge T-304L stainless steel strips welded between tank vessel and all mild steel weldments.

### **TOP MANHOLE:**

A recessed 30" open manhole will be installed for "Top Loading" purposes.

### **(OPTION) TOP MANHOLE:**

There shall be a 20" over center locking circular hatch cover. The manhole assembly will be welded into tank center top.

### **(OPTION) TOP MANHOLE:**

When the stainless steel tank option is used, a stainless steel 20" over center locking hatch cover will be used.

### **CONSTRUCTION PROCEDURE:**

The shell skin shall be unspliced sections for the entire length of tank, and be electrically welded longitudinally. The entire tank (heads, baffles, shell sections) will be 100% double welded. The baffles will be installed with 24" lined crawl holes, top and bottom 6" X 12" lined flow holes. Two (2) or three (3) baffles as required in tank size spec., will be installed.

### **(OPTION) CONSTRUCTION PROCEDURE:**

When stainless tank option is used, there will be 10 gauge T-304 stainless steel strips welded between tank vessel and all mild steel weldments.

## **SPECIFICATIONS P600 WATER TANKER**

### **SUB-FRAME:**

The skid mount rails shall be constructed from 3/16" steel and installed with five (5) cross members supported to tank bottom and side rails. 1" x 2 3/4" rubber sills shall be installed under skid mount rails in inverted channels.

### **(OPTION) SUB-FRAME-STAINLESS STEEL (T-304L 2B TYPE):**

With the stainless steel tank option, the skid mount rails shall be constructed from 3/16" stainless steel T304L 2B and installed with five (5) cross members supported to tank bottom and side rails. 1" x 2 3/4" rubber sills shall be installed under skid mount rails in inverted channels.

### **TANK MOUNTS:**

Tank mounts shall be male-female with coil springs (two (2) per mount), three (3) mounts per side bolted to truck and tank frame. Coil springs to be constructed from 5/16" material using 5/8" bolts and self locking nuts. Two (2) mounts per side on the 2,200 gallon size.

### **(OPTION) THREE POINT ROUGH SERVICE ON/OFF ROAD SUSPENSION:**

The sub frame will be constructed from 1/4" x 10" A-572 (Hi-Tensile) formed "C" channel for full length of tank. There will be five (5) cross members constructed into the sub frame assembly, as well as saddle supports constructed under each baffle. The sub frame width will be wider than the chassis frame and will be constructed so that the two (2) frame systems **DO NOT** touch during twisting or severe terrain operation.

### **FENDERS:**

Truck rear tires to be equipped with full formed fiberglass, rubber mounted fenders. Fenders to be pre-painted black.

### **WATER PUMP AND POWER SYSTEM:**

Water pump is a Gorman-Rupp model #06D1-G self priming 6" X 4" size. It will be powered by a Chelsea or Muncie air shift, clutch model transmission mounted P.T.O. and geared for compatible engine/pump speeds during pump and roll operations. The driveline will be a #1350 series Spicer assembly.

## **SPECIFICATIONS P600 WATER TANKER**

### **SPRAY HEADS AND CONTROLS:**

There will be two(2) ea. 2 1/2" front mounted spray head nozzles and two(2) ea. 2 1/2" rear mounted spray head nozzles. These will be adjusted both for quantity and direction of water spray spread.

Each spray head will be equipped with a 2 1/2" Cla-valve globe style air/spring operated valve, with "on"/"off" controls located on cab console.

Plumbing to spray heads will be 3" on manifolds and 2 1/2" to individual heads.

### **(OPTION) STREET FLUSHER NOZZLES IN LIEU OF ABOVE "SPRAYHEADS"**

#### **SPECIFICATIONS:**

Two (2) ea. OMCO # 82 - 3 piece bronze flusher nozzles will be installed under front bumper approx. in alignment with frame rails. 2 ea. OMCO # 82 flusher nozzles will be installed left and right mid ship area.

### **(OPTION) STREET FLUSHER NOZZLE:**

Front flusher heads to rotate independently in a horizontal arc 45 degrees either way from center, air controlled from cab console.

#### **SELF LOADING SYSTEM:**

The water pump will be equipped with two (2) 3" hand operated butterfly valves and one (1) 4" hand operated butterfly valve. these valves will be located in a position which will allow self-loading of water tank. The "source" suction orifice will be 3" camlock connection. A section (3" X 20' long) of rubber suction hose will be furnished with strainer and camlock connection, as well as storage "J" hooks and lockable hasp.

### **(OPTION): SELF LOAD**

Delete self-loading system.

### **(OPTION) SIDE MOUNTED WATER HEAD:**

One 2" side mounted water head assembly will be placed on the right or left side, mid-ship at frame height. The nozzle will be constructed so as to discharge water in an approximate 20 degree fan. The purpose of the narrow arc is to move heavy debris and material that the ordinary flusher nozzles cannot move properly. The discharge will be 300 G.P.M. maximum at 90 P.S.I. and will discharge at distances of up to 75 feet. The unit will be capable of manual vertical adjustment of 45 degree above horizon to 45 degree below horizon.

## **SPECIFICATIONS P600 WATER TANKER**

### **(OPTION) REMOTE CONTROLLED SIDE MOUNTED WATER HEAD:**

Remote controlled from cab vertical adjustment of 45 degree above horizon to 45 degree below horizon on **above** side mounted head assembly.

### **(OPTION) HOSE REEL ASSEMBLY:**

A live hose reel with accommodations for 1 1/2" X 50' hard rubber hose, mounted right side mid-shop for hand flushing. Water flow to hose to be air-operated with on/off valve located on hose reel. Reel to be Reelcraft with crank rewind.

### **(OPTION) MONITOR SYSTEM:**

Tank mounted Elkhart Sidewinder electric 500 G.P.M. cab controlled monitor. Sealed circuit 12V DC electric powered. Vertical move -45° to 90°, horizontal move 180° or 330°. Equipped with straight stream / fog adjustable nozzle. All operations are on console mounted Joy stick controller. This Remote Controlled Monitor is positioned so that is in view of driver (operator) thru mirror at all times.

### **CONTROL CONSOLE:**

Control console shall be constructed and mounted between seats inside cab.  
Console to have a water pressure gauge.  
Control console shall accommodate all necessary switches and P.T.O. shift controls.

### **STROBE BEACON:**

One double flash strobe beacon on top front center of tank, amber in color.

### **(OPTION) STROBE BEACON:**

A second beacon of the same type on top of tank at rear, amber in color.

### **(OPTION) STROBE BEACON:**

One or both warning lights will be LED double flash strobe beacon, amber in color.

## **SPECIFICATIONS P600 WATER TANKER**

### **PLUMBING:**

All plumbing entries to be constructed from schedule 40 weld fittings, and fitted with welded collars.

Schedule 40 black pipe shall be used, with welded ells, tees, fittings, etc., rather than threaded pipe or fittings. Plumbing to be assembled using couplers with rubber gaskets at various locations so that assembly may be removed from the chassis.

### **PLUMBING (OPTIONS):**

All water plumbing will be constructed of T-304 stainless steel.

### **REAR INLET FOR HYDRANT FILLING:**

A hydrant fill station will be constructed at tank rear curbside. The plumbing will be equipped with visible 6" air gap at or near top tank center and fill hole will be arranged so that debris (tree leaves, etc.) cannot enter the tank. The entry station will be equipped with 2 ½" "Y" strainer with clean out basket. Plumbing assembly will be bolted to tank exterior, and be removable.

### **GRAVITY BAR:**

4" X 96" gravity bar with clean-out removable ends and equipped with 3/4" threaded rear outlet couplers on 8" centers and each with it's own 90 degree deflector assembly. The control valve will be a 4" butterfly air operated and controlled from cab console.

### **(OPTION) GRAVITY BAR:**

6" X 96" gravity bar with 1" threaded outlets, 6" butterfly valve.

### **(OPTION) OVERFLOW PIPING FOR LEGAL HIGHWAY OPERATION:**

A 3" overflow pipe will be installed at approximate tank center line and extended downward through tank bottom. A remote controlled air operated butterfly valve will be installed at outlet and controlled from cab console. The overflow pipe entry will be set at a height to insure a **highway legal weight**, with bottom valve open.

## **SPECIFICATIONS P600 WATER TANKER**

### **PAINT:**

Tank will be acid bathed and properly prepared prior to painting. A two (2) part modified polyamide epoxy primer (Approved for potable water) will be applied inside **(NO INSIDE PAINT ON STAINLESS STEEL TANK OPTION)**. Sherwin Williams Genesis acrylic urethane with hardener will be applied to outside of tank and components. Black enamel on all plumbing parts at and below frame height.

## SPECIFICATIONS P-300 SERIES WATER TANKER

### TANK SIZE AND SHAPE OPTIONS:

<u>P322</u>	2,200 U.S. gallon capacity, elliptical shape, <b><u>Low Profile Design</u></b> , (54" minor axis x 85" major axis) x 144" long. Heads will be dished & flanged (5" min dish), 2 baffles will be dished (5" min. dish).
<u>P325</u>	2,500 gallon capacity (as above) x 168" long, 3 baffles.
<u>P330</u>	3,000 gallon capacity (as above) x 192" long, 3 baffles.
<u>P335</u>	3,500 gallon capacity elliptical shape, <b><u>Standard Profile Design</u></b> , (64" minor axis x 95" major axis) x 168" long. Heads will be dished & flanged (5" min dish), 3 baffles will be dished (5" min. dish).
<u>P338</u>	3,800 gallon capacity (as above) x 180" long, 3 baffles.
<u>P340</u>	4,000 gallon capacity (as above) x 192" long, 3 baffles.
<u>P345</u>	4,500 gallon capacity (as above) x 216" long, 3 baffles.

### MATERIAL:

The bottom 1/3 of tank skin will be constructed from 3/16" mild steel, the top 2/3 of the tank skin will be constructed from 10 gauge mild steel. The heads will be 3/16" dished and flanged (5" min. dish). Baffles shall be constructed from 10 gauge mild steel and be dished (5" min. dish).

### (OPTION) MATERIAL STAINLESS STEEL T-304L:

The bottom 1/3 of tank skin will be constructed from 3/16" T-304L stainless steel, the top 2/3 of the tank skin will be constructed from 10 gauge T-304L stainless steel. The heads will be 3/16" T-304L dished & flanged (5" minimum dish). Baffles shall be constructed from 10 gauge T-304L stainless steel & be dished (5" minimum dish.)

### CONSTRUCTION PROCEDURE:

The shell skin shall be unspliced sections for the entire length of tank, and be electrically welded longitudinally. The entire tank (heads, baffles, shell sections) will be 100% double welded. The baffles will be installed with 24" lined crawl holes, top and bottom 6" x 12" lined flow-holes. Two (2) or three (3) baffles as required in tank size specification will be installed. Tank will have a rear ladder and top cat walk rails and grip strut rungs.

## **SPECIFICATIONS P-300 SERIES WATER TANKER**

### **(OPTION) CONSTRUCTION PROCEDURE:**

When stainless tank option is used, there will be 10 gauge T-304L stainless steel strips welded between tank vessel and all mild steel weldments.

### **TOP MANHOLE:**

A recessed 30" open manhole will be installed for "Top Loading" purposes.

### **(OPTION) TOP MANHOLE:**

There shall be a 20" over center locking circular hatch cover. The manhole assembly will be welded into tank center top.

### **(OPTION) TOP MANHOLE:**

When the stainless steel tank option is used, a stainless steel 20" over center locking hatch cover will be used.

### **SUB-FRAME:**

The skid mount rails shall be constructed from 3/16" steel and installed with five (5) cross members supported to tank bottom and side rails. 1" x 2 3/4" rubber sills shall be installed under skid mount rails in inverted channels.

### **(OPTION) SUB-FRAME-STAINLESS STEEL (T-304L 2B TYPE):**

With the stainless steel tank option, the skid mount rails shall be constructed from 3/16" stainless steel T304L 2B and installed with six (6) cross members supported to tank bottom and side rails. 1" x 2 3/4" rubber sills shall be installed under skid mount rails in inverted channels.

### **TANK MOUNTS:**

Tank mounts shall be male-female with coil springs (two (2) per mount), three (3) mounts per side bolted to truck and tank frame. Coil springs to be constructed from 5/16" material using 5/8" bolts and self-locking nuts. Two (2) mounts per side on the 2,200 gallon size.

## **SPECIFICATIONS P-300 SERIES WATER TANKER**

### **(OPTION) TANK SUB-FRAME ASSEMBLY-THREE POINT ROUGH SERVICE SUSPENSION (ON / OFF ROAD OPERATION):**

The sub frame will be constructed from 1/4" x 10" A-572 (Hi-Tensile) fabricated "I" beam for full length of tank. There will be five (5) cross members constructed into the sub frame assembly, as well as saddle supports constructed under each baffle. The sub frame width will be wider than the chassis frame and will be constructed so that the two (2) frame systems DO NOT touch during twisting or severe terrain operation.

The tank will be mounted on truck chassis using a three (3) point mount procedure. The front single mount will be of oscillating design with heavy duty rocker frame constructed from A-572 (Hi-Tensile) steel and pinned with 1 1/2" # 4140 shafting (the load will not rest on pin, but will be resting on a cup and saucer assembly). The two (2) rear mounts will be located on both sides in trunnion suspension area and will be fastened by minimum 5/8" grade 8 cap screws (six (6) each), and equipped with coil springs

### **OMCO FIBERGLASS FENDERS:**

The OMCO fenders are to be constructed of common resin and fiberglass using rope mat (woven roving fiberglass mat) rather than cloth material for stronger construction. The fenders will be pre-painted black in the mold with gel coat. The finished fenders shall be 5/16" in thickness. The full formed fiberglass, rubber mounted fenders will cover the entire dual drive tire area and have mud flaps. The fenders shall be attached to three(3) each T-304L stainless steel fender mounting brackets. The T-304L stainless steel mounting brackets shall be attached to the tank frame. The fenders shall be painted jet black or color of customer choice using Sherwin Williams Genesis acrylic urethane with hardener.

### **WATER PUMP AND POWER SYSTEM:**

Water pump is a Gorman-Rupp model #03H1-GL self-priming 3" X 3" size. It will be powered by a Chelsea or Muncie air shift, clutch model transmission mounted P.T.O. and geared for compatible engine/pump speeds during pump and roll operations. The driveline will be a #1310 series Spicer assembly.

### **SPRAY HEADS AND CONTROLS:**

There will be 2 each 2" front mounted spray head nozzles and 2 each 2" rear mounted spray head nozzles. These will be adjusted both for quantity and direction of water spray spread. Each spray head will be equipped with a 2" Cla-valve globe style air/spring operated valve, with "on"/"off" controls located on cab console. Plumbing to spray heads will be 3" on manifolds and 2" to individual heads.

## **SPECIFICATIONS P-300 SERIES WATER TANKER**

### **(OPTION) STREET FLUSHER NOZZLES IN LIEU OF ABOVE "SPRAYHEADS"** **SPECIFICATIONS:**

Two (2) each OMCO # 82 three piece bronze flusher nozzles will be installed under front bumper approximately in alignment with frame rails. The valve control will be air/spring style and be operated (on-off) from cab console.

### **(OPTION) MIDSHIP STREET FLUSHER NOZZLES:**

Two (2) each OMCO # 82 three piece bronze flusher head nozzles, mid ships will be located under or slightly behind cab, operated toward left and right sides. The valve control will be air/spring style and be operated (on-off) from cab console.

### **(OPTION) REMOTE CONTROL STREET FLUSHER NOZZLE:**

Front flusher heads to rotate independently in a horizontal arc 45 degrees either way from center, electric/air controlled from cab console.

### **SELF LOADING SYSTEM:**

The water pump will be equipped with two (2) 3" hand operated butterfly valves and one (1) 4" hand operated butterfly valve. These valves will be located in a position which will allow self-loading of water tank. The "source" suction orifice will be 3" camlock connection. A section (3" X 20' long) of rubber suction hose will be furnished with strainer and camlock connection, as well as storage "J" hooks and lockable hasp.

### **OPTION:**

Delete self-loading system.

### **(OPTION) SIDE MOUNTED WATER HEAD:**

One 2" side mounted water head assembly will be placed on the right or left side, mid-ship at frame height. The nozzle will be constructed so as to discharge water in an approximate 20 degree fan. The purpose of the narrow arc is to move heavy debris and material that the ordinary flusher nozzles cannot move properly. The discharge will be 300 G.P.M. maximum at 90 P.S.I. and will discharge at distances of up to 75 feet. The unit will be capable of manual vertical adjustment of 45 degree above horizon to 45 degree below horizon.

### **(OPTION) REMOTE CONTROLLED SIDE MOUNTED WATER HEAD:**

Remote controlled from cab vertical adjustment of 45 degree above horizon to 45 degree below horizon on above side mounted head assembly.

## **SPECIFICATIONS P-300 SERIES WATER TANKER**

### **(OPTION) HOSE REEL ASSEMBLY:**

A live hose reel with accommodations for 1 1/2" X 50' hard rubber hose, mounted right side mid-shop for hand flushing. Water flow to hose to be air-operated with on/off valve located on hose reel. Reel to be Reelcraft with manual crank rewind.

### **(OPTION) ELECTRIC REWIND ON HOSE REEL:**

2/3 H.P. electric rewind with S.S. chain and circuit breaker.

### **CONTROL CONSOLE:**

Control console shall be constructed and mounted between seats inside cab.  
Console to have a water pressure gauge.  
Control console shall accommodate all necessary switches and P.T.O. shift controls.

### **LIGHTING:**

All running lights will be L.E.D. style rubber mounted lamps. Wiring shall be enclosed in rubber conduit. Reflectors will be installed, and the system will comply with D.O.T. #108.

### **STROBE BEACON:**

One beacon light will be LED double flash, amber in color on top of tank.

### **(OPTION) SECOND BEACON:**

A second beacon of the same type on top of tank, amber in color.

### **ENTRIES AND PLUMBING:**

All plumbing entries shall be constructed from schedule 40 weld fittings and will be fitted with welded collars to distribute the flex and prevent cracking. All plumbing and piping will be schedule 40 black pipe, using weld ells, tees, fittings, etc., rather than threaded pipe or fittings. The plumbing shall be assembled using rubber gasket couplers at necessary locations and in such a manner that the assembly may be removed as needed from the chassis.

### **PLUMBING (OPTIONS):**

All water plumbing will be constructed of T-304 stainless steel.

**SPECIFICATIONS**  
**P-300 SERIES WATER TANKER**

**(OPTION): REAR INLET FOR HYDRANT FILLING:**

A hydrant fill station will be constructed at tank rear curbside. The plumbing will be equipped with visible 6" air gap at or near top tank center and fill hole will be arranged so that debris (tree leaves, etc.) cannot enter the tank. The entry station will be equipped with 2 1/2" "Y" strainer with clean out basket. Plumbing assembly will be bolted to tank exterior, and be removable.

**GRAVITY BAR:**

4" X 96" gravity bar with clean-out removable ends and equipped with 3/4" threaded rear outlet couplers on 8" centers and each with it's own 90 degree deflector assembly. The control valve will be a 4" butterfly air operated and controlled from cab console.

**(OPTION) 6" GRAVITY BAR:**

6" X 96" gravity bar with 1" threaded outlets, 6" butterfly valve.

**(OPTION) OVERFLOW PIPING FOR LEGAL HIGHWAY OPERATION:**

A 3" overflow pipe will be installed at approximate tank center line and extended downward through tank bottom. A remote controlled air operated butterfly valve will be installed at outlet and controlled from cab console. The overflow pipe entry will be set at a height to insure a highway legal weight, with bottom valve open.

**PAINT:**

Tank will be properly prepared prior to painting. A two (2) part modified polyamide epoxy primer will be applied inside (NO INSIDE PAINT ON STAINLESS STEEL TANK OPTION) tank. Sherwin Williams Genesis acrylic urethane with hardener will be applied to outside of tank and components. The apparatus paint color shall match the chassis cab. Black enamel on all plumbing parts at and below frame height.

### **TANK SIZE AND SHAPE OPTIONS:**

<u>H422</u>	2,200 U.S. gallon capacity, elliptical shape, <b><u>Low Profile Design</u></b> , (54" minor axis x 85" major axis) x 144" long. Heads will be dished & flanged (5" min dish), 2 baffles will be dished (5" min. dish).
<u>H425</u>	2,500 gallon capacity (as above) x 168" long, 3 baffles.
<u>H430</u>	3,000 gallon capacity (as above) x 192" long, 3 baffles.
<u>H435</u>	3,500 gallon capacity elliptical shape, <b><u>Standard Profile Design</u></b> , (64" minor axis x 95" major axis) x 168" long. Heads will be dished & flanged (5" min dish), 3 baffles will be dished (5" min. dish).
<u>H438</u>	3,800 gallon capacity (as above) x 180" long, 3 baffles.
<u>H440</u>	4,000 gallon capacity (as above) x 192" long, 3 baffles.
<u>P345</u>	4,500 gallon capacity (as above) x 216" long, 3 baffles.

### **MATERIAL:**

The bottom 1/3 of tank skin will be constructed from 3/16" mild steel, the top 2/3 of the tank skin will be constructed from 10 gauge mild steel. The heads will be 3/16" dished and flanged (5" min. dish). Baffles shall be constructed from 10 gauge mild steel and be dished (5" min. dish).

### **(OPTION) MATERIAL STAINLESS STEEL T-304:**

The bottom 1/3 of tank skin will be constructed from 3/16" T-304 stainless steel, the top 2/3 of the tank skin will be constructed from 10 gauge T-304 stainless steel. The heads will be 3/16" T-304 dished & flanged (5" minimum dish). Three (3) baffles shall be constructed from 10 gauge T-304 stainless steel & be dished (5" minimum dish.)

### **CONSTRUCTION PROCEDURE:**

The shell skin shall be unspliced sections for the entire length of tank, and be electrically welded longitudinally. The entire tank (heads, baffles, shell sections) will be 100% double welded. The baffles will be installed with 24" lined crawl holes, top and bottom 6" x 12" lined flow-holes. Two (2) or three (3) baffles as required in tank size specification will be installed. Tank will have a rear ladder and top cat walk rails and grip strut rungs.

OCHOCO MANUFACTURING CORPORATION

MAILING ADDRESS • PO BOX 66 • PRINEVILLE, OR 97754  
WEBSITE [www.omco-mfg.com](http://www.omco-mfg.com)

### **(OPTION) CONSTRUCTION PROCEDURE:**

When stainless tank option is used, there will be 10 gauge T-304L stainless steel strips welded between tank vessel and all mild steel weldments.

### **SUB-FRAME: H400 (ON ROAD OPERATION):**

The skid mount rails shall be constructed from 3/16" steel and installed with five (5) cross members supported to tank bottom and side rails.

### **TANK MOUNTS: H400 (ON ROAD OPERATION)**

Tank mounts shall be male-female with coil springs (two (2) per mount), three (3) mounts per side bolted to truck and tank frame. Coil springs to be constructed from 5/16" material using 5/8" bolts and self-locking nuts. Two (2) mounts per side on the H422 size.

### **TANK SUB-FRAME ASSEMBLY-THREE POINT ROUGH SERVICE SUSPENSION:**

#### **H400-XHD (ON / OFF ROAD OPERATION):**

The sub frame will be constructed from 1/4" x 10" A-572 (Hi-Tensile) fabricated "I" beam for full length of tank. There will be six (6) cross members constructed into the sub frame assembly, as well as saddle supports constructed under each baffle. The sub frame width will be wider than the chassis frame and will be constructed so that the two (2) frame systems DO NOT touch during twisting or severe terrain operation.

#### **TANK MOUNTS: H400-XHD (ON/OFF ROAD OPERATION):**

The tank will be mounted on truck chassis using a three (3) point mount procedure. The front single mount will be of oscillating design with heavy duty rocker frame constructed from A-572 (Hi-Tensile) steel and pinned with 1 1/2" # 4140 shafting (the load will not rest on pin, but will be resting on a cup and saucer assembly). The two (2) rear mounts will be located on both sides in trunnion suspension area and will be fastened by minimum 5/8" grade 8 cap screws (six (6) each), and equipped with coil springs.

#### **TOP FILL HOLE / MAN WAY:**

A 30" open fill hole recessed 4" into tank to help prevent spillage of water. The purpose of this design is to allow easy filling by top load method.

### **(OPTION) TOP MAN WAY COVER:**

A 20" over center locking, hinged cover will be installed.

### **(OPTION) STAINLESS STEEL TOP MAN WAY COVER:**

A 20" T-304L stainless steel over center locking, hinged cover will be used with stainless steel tank option.

### **OMCO FIBERGLASS FENDERS:**

The OMCO fenders are to be constructed of common resin and fiberglass using rope mat (woven roving fiberglass mat) rather than cloth material for stronger construction. The fenders will be pre-painted black in the mold with gel coat. The finished fenders shall be 5/16" in thickness. The full formed fiberglass, rubber mounted fenders will cover the entire dual drive tire area and have mud flaps. The fenders shall be attached to three(3) each T-304L stainless steel fender mounting brackets. The T-304L stainless steel mounting brackets shall be attached to the tank frame. The fenders shall be painted jet black or color of customer choice using Sherwin Williams Genesis acrylic urethane with hardener.

### **WATER PUMP POWER SYSTEM:**

Water pump to be driven by a piston-type closed loop, hydro-static transmission - with loop cooling filtration and adjustable pressure control. Continuous duty required, compatible with the torque values of the chassis engine. Servo controlled, driven by a drive shaft connected to the front of the engine crankshaft. The pump shall be controlled from the cab console using a quadrant throttle. Oil condition (in hydrostatic loop) shall be maintained by a 30 G.P.M. 10 Micron full-flow spin-type filter, and an oil cooler rated at 27,000 BTU/hr. The externally adjustable automatic pressure control is to override the cable control, and to maintain constant full performance water pressures when engine speeds are above 850 R.P.M. Oil reservoir to be vented to prevent ingestion of water spray, so that no water will go into the oil system. The motor will be a bent axis style, and flange mounted directly to the Gorman Rupp # 04A3-B water pump.

### **FRONT & REAR SPRAY HEADS AND CONTROLS:**

Spray head control valves to be 2 1/2" Cla-valve with air shut-off. Plumbing to water heads to be 3" on manifold, and to individual heads. Two (2) front spray heads to be located in front of bumper on both left and right side; two (2) rear spray-heads to be located on left and right side of tank rear. All four (4) heads will be 2 1/2" size and adjustable for quantity as well as direction of spray. The control method for all heads shall be air-spring, and shall be operated from the cab console.

OCHOCO MANUFACTURING CORPORATION  
PHONE 541•447•5502 • FAX 541•447•6987  
E-MAIL [omco@crestviewcable.com](mailto:omco@crestviewcable.com)

MAILING ADDRESS • PO BOX 66 • PRINEVILLE, OR 97754  
WEBSITE [www.omco-mfg.com](http://www.omco-mfg.com)

### **(OPTION) MUD FLUSHERS**

Two (2) mud flusher duck foot nozzles with quick connects will be furnished to be interchanged with front spray head assemblies, and a storage basket will be positioned on front bumper area.

### **CONTROL CONSOLE:**

Control console shall be constructed and mounted between seats inside cab. Console to have a water pressure gauge, glycerin filled 0-200 P.S.I.. Control console shall accommodate all necessary electric over air switches and hydro-static throttle controls. Console to be painted with Rustoleum Hammerite.

### **BEACON:**

One LED double flash strobe beacon on top front center of tank, amber in color.

### **(OPTION) BEACON:**

A second LED beacon of the same type on top of tank at rear, amber in color.

### **PLUMBING:**

All plumbing entries to be constructed from Schedule 40 weld fittings, and fitted with welded collars. Schedule 40 black pipe shall be used, with welded ells, tees, fittings, etc., rather than threaded pipe or fittings. Threaded pipe will be used only as necessary on pump and valve connections. Plumbing to be assembled using rubber gasketed couplers at various locations so that assembly may be removed from the chassis.

### **(OPTION) STAINLESS STEEL PLUMBING**

All water plumbing will be constructed of T-304 stainless steel.

### **(OPTION): REAR INLET FOR HYDRANT FILLING:**

A hydrant fill station will be constructed at tank rear curbside. The plumbing will be equipped with visible 6" air gap at or near top tank center and fill hole will be arranged so that debris (tree leaves, etc.) cannot enter the tank. The plumbing shall be removable for maintenance.

**(OPTION): HYDRANT FILL SCREEN**

A 2 1/2" "Y" strainer with stainless steel basket will be installed on hydrant fill plumbing.

**(OPTION) FIRE DEPARTMENT TENDER VALVE:**

A 2 1/2" brass male N.S.T. discharge fitting will be installed for the purpose of transfer of water to another tanker, (such as your local fire department pumper), at up to 850 G.P.M.

**(OPTION) HOSE REEL (STANDARD EQUIPMENT ON XHD SERIES):**

A live hose reel with accommodations for 1 1/2" x 60' hard rubber hose, mounted right side mid-ship for hand flushing. Water flow to hose to be controlled with a ball valve located on hose reel. Reel to be Reelcraft (or equivalent), with crank rewind, 200 P.S.I. hose and brass fog nozzle will be installed.

**(OPTION) HOSE REEL:**

2/3 H.P. electric rewind with S.S. chain and circuit breaker.

**WATER PUMP:**

Gorman Rupp # 04A3-B 4" x 4" self-priming cast iron centrifugal pump with performance ability of 600 G.P.M. @ 100 P.S.I., and 750 G.P.M. @ 85 P.S.I.

**(OPTION) LEFT SIDE MOUNTED WATER HEAD:**

One 2 1/2" side mounted water head assembly will be placed on the left side, mid-ship at frame height. The nozzle will be constructed so as to discharge water in an approximate 20 degree fan. The purpose of the narrow arc is to move heavy debris and material, that the ordinary water nozzle cannot move properly, and to provide correct placement of water in areas adjacent to, but not accessible to travel by the tanker. The discharge will be 400 G.P.M. maximum at 90 P.S.I. and will discharge at distances of up to 75 feet. Side heads will be capable of vertical adjustment remotely from cab console, of 45 degree above the horizon to 45 degree below horizon.

**(OPTION) RIGHT SIDE MOUNTED WATER HEAD:**

A 2 1/2" water head assembly located on right side frame height mid-ship. Manually or remotely controlled.

### **GRAVITY BAR:**

A 6" x 96" gravity bar with clean-out removable ends and equipped with 1" threaded rear outlet couplers on 8" center and each with its own 90 degree deflector assembly. The control valve will be a 6" butterfly air operated and controlled from cab console.

### **SELF LOADING SYSTEM, VALVES:**

The water pump will be equipped with three (3) 4" hand operated butterfly valves. These valves will be located in a position which will allow self-loading of water tank. The "source" suction orifice will be 4" camlock connection. A section (4" x 20' long) of rubber suction hose will be furnished with strainer and camlock connection, as well as storage "J" hooks and lockable hasp

### **(OPTION) MONITOR SYSTEM:**

Tank mounted Elkhart Sidewinder electric 500 G.P.M. cab controlled monitor. Sealed circuit 12V DC electric powered. Vertical move -45° to 90°, horizontal move 180° or 330°. Equipped with straight stream / fog adjustable nozzle. All operations are on console mounted Joy stick controller. This Remote Controlled Monitor is positioned so that is in view of driver (operator) through mirror at all times.

### **(OPTION) REAR OPERATORS CAGE & MONITOR SYSTEM:**

A mild steel rear operators platform (cage) shall be constructed on tank rear left side. A 3" manual controlled monitor shall be installed inside the cage and shall be adjustable for storage and operating heights. The monitor shall have a 500 G.P.M. fog/stream manually adjustable nozzle. The monitor will be equipped with a 2 1/2" on/off air valve. There shall be a control console located in the operators platform. The air valve and hydraulic pump throttle controls will be located on this control console.

The cage will have raised expanded metal flooring for free drainage, be equipped with entry way and framed with square tube as approved by OSHA. The entry way will be accessed from the rear ladder and be equipped with a safety chain arrangement. A mild steel rear deck/bumper will be installed at tank rear, and extend beyond cage to protect it from damage.

### **(OPTION) STAINLESS STEEL REAR OPERATORS CAGE:**

The rear operators platform (cage) shall be constructed from T304L stainless steel.

#### **(OPTION) STAINLESS STEEL REAR DECK/BUMPER:**

The rear deck/bumper shall be constructed from T304L stainless steel.

#### **(OPTION) TOOL COMPARTMENTS:**

Single or double door style (depending on available room).

Sweep out design with box pan door/(s).

Door design with café style or swing up style doors.

24" deep x 24" high x 24" to 60" long. (Double doors on compartments longer than 36" long).

Stainless steel piano hinge and twist lock S.S. latch with or without keys. Mild steel, aluminum, or stainless steel construction.

#### **(OPTION) OVERFLOW PIPING FOR LEGAL HIGHWAY OPERATION:**

A 3" overflow pipe will be installed at approximate tank center line and extended downward through tank bottom. A remote controlled air operated butterfly valve will be installed at outlet and controlled from cab console. The overflow pipe entry will be set at a height to insure a **highway legal weight**, with bottom valve open.

#### **(OPTION) REAR PUSH BAR:**

A heavy duty rear push bar will be installed using extended truck chassis frame rails, and a contoured push block.

#### **PAINT:**

Tank will be acid bathed and properly prepared prior to painting. A two (2) part modified polyamide epoxy primer will be applied inside **(NO INSIDE PAINT ON STAINLESS STEEL TANK OPTION)** tank. Sherwin Williams Genesis acrylic urethane with hardener will be applied to outside of tank and components. The apparatus paint color shall match the chassis cab. Black enamel on all plumbing parts at and below frame height.

## P-400 SPECIFICATIONS

### **TANK SIZE AND SHAPE OPTIONS:**

**P422** 2,200 U.S. gallon capacity, elliptical shape, **Low Profile Design**, (54" minor axis x 85" major axis) x 144" long. Heads will be dished & flanged (5" min dish), 2 baffles will be dished (5" min. dish).

**P425** 2,500 gallon capacity (as above) x 168" long, 3 baffles.

**P430** 3,000 gallon capacity (as above) x 192" long, 3 baffles.

**P435** 3,500 gallon capacity elliptical shape, **Standard Profile Design**, (64" minor axis x 95" major axis) x 168" long. Heads will be dished & flanged (5" min dish), 3 baffles will be dished (5" min. dish).

**P438** 3,800 gallon capacity (as above) x 180" long, 3 baffles.

**P440** 4,000 gallon capacity (as above) x 192" long, 3 baffles.

**P445** 4,500 gallon capacity (as above) x 216" long, 3 baffles.

### **MATERIAL:**

The bottom 1/3 of tank skin will be constructed from 3/16" mild steel, the top 2/3 of the tank skin will be constructed from 10 gauge mild steel. The heads will be 3/16" dished and flanged (5" min. dish). Baffles shall be constructed from 10 ga. mild steel and be dished (5" min. dish).

### **(OPTION) MATERIAL STAINLESS STEEL T-304L:**

The bottom 1/3 of tank skin will be constructed from 3/16" T-304L stainless steel, the top 2/3 of the tank skin will be constructed from 10 gauge T-304L stainless steel. The heads will be 3/16" T-304L dished & flanged (5" minimum dish). Three (3) baffles shall be constructed from 10 gauge T-304L stainless steel & be dished (5" minimum dish.)

### **CONSTRUCTION PROCEDURE:**

The shell skin shall be unspliced sections for the entire length of tank, and be electrically welded longitudinally. The entire tank (heads, baffles, shell sections) will be 100% double welded. The baffles will be installed with 24" lined crawl holes, top and bottom 6" x 12" lined flow-holes. Two (2) or three (3) baffles as required in tank size spec., will be installed. Tank will have a rear ladder and top cat walk rails and grip strut rungs.

## P-400 SPECIFICATIONS

### **(OPTION) CONSTRUCTION PROCEDURE:**

When stainless tank option is used, there will be 10 gauge T-304L stainless steel strips welded between tank vessel and all mild steel weldments.

### **TOP MANHOLE:**

A recessed 30" open manhole will be installed for "Top Loading" purposes.

### **(OPTION) TOP MANHOLE:**

There shall be a 20" over center locking circular hatch cover. The manhole assembly will be welded into tank center top.

### **(OPTION) TOP MANHOLE:**

When the stainless steel tank option is used, a stainless steel 20" over center locking hatch cover will be used.

### **CONSTRUCTION PROCEDURE:**

The shell skin shall be unspliced sections for the entire length of tank, and be electrically welded longitudinally. The entire tank (heads, baffles, shell sections) will be 100% double welded. The baffles will be installed with 24" lined crawl holes, top and bottom 6" X 12" lined flow holes. Two (2) or three (3) baffles as required in tank size spec., will be installed.

### **(OPTION) CONSTRUCTION PROCEDURE:**

When stainless tank option is used, there will be 10 gauge T-304 stainless steel strips welded between tank vessel and all mild steel weldments.

### **SUB-FRAME:**

The skid mount rails shall be constructed from 3/16" steel and installed with five (5) cross members supported to tank bottom and side rails. 1" x 2 3/4" rubber sills shall be installed under skid mount rails in inverted channels.

## P-400 SPECIFICATIONS

### **(OPTION) SUB-FRAME-STAINLESS STEEL (T-304L 2B TYPE):**

With the stainless steel tank option, the skid mount rails shall be constructed from 3/16" stainless steel T304L 2B and installed with five (5) cross members supported to tank bottom and side rails. 1" x 2 3/4" rubber sills shall be installed under skid mount rails in inverted channels.

### **TANK MOUNTS:**

Tank mounts shall be male-female with coil springs (two (2) per mount), three (3) mounts per side bolted to truck and tank frame. Coil springs to be constructed from 5/16" material using 5/8" bolts and self-locking nuts. Two (2) mounts per side on the 2,200 gallon size.

### **(OPTION) THREE POINT ROUGH SERVICE ON/OFF ROAD SUSPENSION:**

The sub frame will be constructed from 1/4" x 10" A-572 (Hi-Tensile) formed "C" channel for full length of tank. There will be five (5) cross members constructed into the sub frame assembly, as well as saddle supports constructed under each baffle. The sub frame width will be wider than the chassis frame and will be constructed so that the two (2) frame systems **DO NOT** touch during twisting or severe terrain operation.

### **FENDERS:**

Truck rear tires to be equipped with full formed fiberglass, rubber mounted fenders. Fenders to be pre-painted black.

### **WATER PUMP AND POWER SYSTEM:**

Water pump is a Gorman-Rupp model #04E1-GA self priming 4" X 4" size. It will be powered by a Chelsea or Muncie air shift, clutch model transmission mounted P.T.O. and geared for compatible engine/pump speeds during pump and roll operations. The driveline will be a #1350 series Spicer assembly.

### **SPRAY HEADS AND CONTROLS:**

There will be two(2) ea. 2 1/2" front mounted spray head nozzles and two(2) ea. 2 1/2" rear mounted spray head nozzles. These will be adjusted both for quantity and direction of water spray spread. Each spray head will be equipped with a 2 1/2" Cla-valve globe style air/spring operated valve, with "on"/"off" controls located on cab console. Plumbing to spray heads will be 3" on manifolds and 2 1/2" to individual heads.

## P-400 SPECIFICATIONS

### **(OPTION) STREET FLUSHER NOZZLES IN LIEU OF ABOVE "SPRAYHEADS"** **SPECIFICATIONS:**

Two (2) ea. OMCO # 82 - 3 piece bronze flusher nozzles will be installed under front bumper approx. in alignment with frame rails. 2 ea. OMCO # 82 flusher nozzles will be installed left and right mid ship area.

### **(OPTION) STREET FLUSHER NOZZLE:**

Front flusher heads to rotate independently in a horizontal arc 45 degrees either way from center, air controlled from cab console.

### **SELF LOADING SYSTEM:**

The water pump will be equipped with two (2) 3" hand operated butterfly valves and one (1) 4" hand operated butterfly valve. these valves will be located in a position which will allow self-loading of water tank. The "source" suction orifice will be 3" camlock connection. A section (3" X 20' long) of rubber suction hose will be furnished with strainer and camlock connection, as well as storage "J" hooks and lockable hasp.

### **OPTION:**

Delete self-loading system.

### **(OPTION) HOSE REEL ASSEMBLY:**

A live hose reel with accommodations for 1 1/2" X 50' hard rubber hose, mounted right side mid-shop for hand flushing. Water flow to hose to be air-operated with on/off valve located on hose reel. Reel to be Reelcraft with crank rewind.

### **(OPTION) ELECTRIC REWIND ON HOSE REEL:**

2/3 H.P. electric rewind with S.S. chain and circuit breaker.

### **(OPTION) SIDE MOUNTED WATER HEAD:**

One 2" side mounted water head assembly will be placed on the right or left side, mid-ship at frame height. The nozzle will be constructed so as to discharge water in an approximate 20 degree fan. The purpose of the narrow arc is to move heavy debris and material that the ordinary flusher nozzles cannot move properly. The discharge will be 300 G.P.M. maximum at 90 P.S.I. and will discharge at distances of up to 75 feet. The unit will be capable of manual vertical adjustment of 45 degree above horizon to 45 degree below horizon.

## P-400 SPECIFICATIONS

### **(OPTION) REMOTE CONTROLLED SIDE MOUNTED WATER HEAD:**

Remote controlled from cab vertical adjustment of 45 degree above horizon to 45 degree below horizon on **above** side mounted head assembly.

### **(OPTION) MONITOR SYSTEM:**

Tank mounted Elkhart Sidewinder electric 500 G.P.M. cab controlled monitor. Sealed circuit 12V DC electric powered. Vertical move -45° to 90°, horizontal move 180° or 330°. Equipped with straight stream / fog adjustable nozzle. All operations are on console mounted Joy stick controller. This Remote Controlled Monitor is positioned so that is in view of driver (operator) thru mirror at all times.

### **CONTROL CONSOLE:**

Control console shall be constructed and mounted between seats inside cab.  
Console to have a water pressure gauge.  
Control console shall accommodate all necessary switches and P.T.O. shift controls.

### **STROBE BEACON:**

One double flash strobe beacon on top front center of tank, amber in color.

### **(OPTION) STROBE BEACON:**

A second beacon of the same type on top of tank at rear, amber in color.

### **(OPTION) STROBE BEACON:**

One or both warning lights will be LED double flash strobe beacon, amber in color

### **PLUMBING:**

All plumbing entries to be constructed from schedule 40 weld fittings, and fitted with welded collars. Schedule 40 black pipe shall be used, with welded ells, tees, fittings, etc., rather than threaded pipe or fittings. Plumbing to be assembled using couplers with rubber gaskets at various locations so that assembly may be removed from the chassis.

### **PLUMBING (OPTIONS):**

All water plumbing will be constructed of T-304 stainless steel.

## P-400 SPECIFICATIONS

### **REAR INLET FOR HYDRANT FILLING:**

A hydrant fill station will be constructed at tank rear curbside. The plumbing will be equipped with visible 6" air gap at or near top tank center and fill hole will be arranged so that debris (tree leaves, etc.) cannot enter the tank. The entry station will be equipped with 2 ½" "Y" strainer with clean out basket. Plumbing assembly will be bolted to tank exterior, and be removable.

### **GRAVITY BAR:**

4" X 96" gravity bar with clean-out removable ends and equipped with ¾" threaded rear outlet couplers on 8" centers and each with its own 90 degree deflector assembly. The control valve will be a 4" butterfly air operated and controlled from cab console.

### **(OPTION) GRAVITY BAR:**

6" X 96" gravity bar with 1" threaded outlets, 6" butterfly valve.

### **(OPTION) OVERFLOW PIPING FOR LEGAL HIGHWAY OPERATION:**

A 3" overflow pipe will be installed at approximate tank center line and extended downward through tank bottom. A remote controlled air operated butterfly valve will be installed at outlet and controlled from cab console. The overflow pipe entry will be set at a height to insure a **highway legal weight**, with bottom valve open.

### **PAINT:**

Tank will be properly prepared prior to painting. Rustoleum two (2) part epoxy primer will be applied inside (**NO INSIDE PAINT ON STAINLESS STEEL TANK OPTION**). Sherwin Williams Genesis acrylic urethane with hardener will be applied to outside of tank and components. Black enamel on all plumbing parts at and below frame height.

**BC** PATCHERS

**WORLD CLASS PATCHERS SINCE 1957**

## FULLY INSULATED CONTAINERS AND DOORS

### Any Capacity To Meet Your Requirements

Available in 1.5 to 10 cubic yard capacity. Fully insulated with 2" of industrial fiberglass insulation. Custom sizes also available; please contact us for details.

### Fully Insulated Top Loading Doors

Hydraulically operated and fully insulated with 2" of industrial fiberglass insulation. Keeps asphalt hot all day and night, even during winter. Heats cold mix.

## WORLD CLASS EMULSION SYSTEMS

### S Model Emulsion Spray System

Compressed air type sprayer. Sizes available: 35, 60, 130 and 200 gallon. Optional solvent tank and overnight heat system.

### BH Model Emulsion Spray System

Pump type sprayer includes everything you need for tack coating. Holds 132 gallons of emulsion and 21 gallons of solvent. Includes spray system and built-in 110 VAC electric heater to keep emulsion hot overnight.

### PB can customize a patcher to meet your exact needs.

PB Patchers simplify asphalt patching with a full range of operator features that improve productivity and lower patching costs. Each PB Patcher is also available with a variety of special options to meet your particular patching requirements. Contact us today and PB will customize a patcher to meet your needs.

## FULLY EQUIPPED PATCHERS FOR YEAR-ROUND OPERATION

### ADJUSTABLE RADIANT HEATING SYSTEMS

#### Adjustable Temperature Keeps Asphalt Hot

The Radiant Heat System on PB Patchers keeps asphalt hot for a full shift. Welded heat tubes spread the heat throughout the asphalt container. Temperature range is adjustable from 100° to 300°.

#### Convenient Heat Sources To Meet Your Needs

LPG available in 25, 35 or 50 gallon capacity; upright or horizontal styles. LPG Tanks are easily accessible for refilling and storage. (CNG, Diesel and Electric are also available only with on-board generator and electric overnight plug-in).

### CONVEYOR CHOICES FOR SMOOTH OPERATION

#### Heavy Duty Kevlar Conveyor Belt

An extremely durable, long-lasting Kevlar belt moves asphalt out of the container for continuous operation.

#### Heavy Duty Steel Chain Conveyor

Equipped with strong steel chain that's heat-treated and engineered specifically to smoothly move asphalt from the container box. Superior strength ensures extended wear life.

800-350-8521

# PB Model DA Dual Auger

## Unique Features

- Each auger is 10 feet in length.
- Flights are constructed of ¼" AR400 steel.
- Shafts constructed of Schedule 80 pipe.
- Supported at each end with sealed bearings.
- Dedicated drive motors for each auger.
- Forward and reverse controls.
- Eliminates the anti-bridging agitator.
- Variable speed hydraulic motors.
- Flanged bearings on each end of shaft, driven by hydraulic motors.

## Benefits of the Dual Auger Over Single Auger Systems

There are several advantages to the dual auger system over the single auger. With side-by-side dual augers rotating into each other, it **eliminates** the bridging effect that is seen with single auger systems. This makes the anti-bridging device (or agitator) unnecessary; reducing the hassle to operator and making the unit much safer to enter if the asphalt box needs any maintenance.

Other benefits include much greater discharge capacity, allowing the unit to be emptied twice as fast for filling very large patches versus a single auger system. Since each auger has its own drive motor, the system has twice the torque and power to break up and deliver stiff loads. Each motor, drive shaft and auger experiences less stress because the work load is divided between the two; the components have a much longer life span.

## Available On These Models

- Truck-Mounted Patchers: DA-3, DA-4, DA-5, DA-6
- Trailer Patcher: DA-3TM, DA-4TM
- Slip-In Patcher: DA-3SM, DA-4SM
- Hook Lift Patcher: DA-3HL, DA-4HL, DA-5HL, DA-6HL

## OPTIONS

- Side-discharge Auger
- Secondary Auger Motor
- Rear and Side Hopper Spoils Bin
- Heat Systems: LPG Radiant Air, Diesel Radiant Air, Electric Only with On-board 12 KW Generator

5778 W. Barstow, Fresno CA 93722

sales@pbloader.com | 800-350-8521

## VARIETY OF **MODELS** TO MAKE YOUR CHOICE EASY

### Truck Mounted Patcher

Our top of the line, fully equipped asphalt patcher. Permanently mounted on any chassis. One machine for all of your year-round patching needs. Available with a variety of options and container capacities to meet your exact specifications.

### Hook Lift Patchers

Turn your hook lifting equipment into an asphalt patcher. PB Hook Lift models are completely equipped and allow for simple one-person, in-cab operation. Easy to load on and easy to load off. PB Hook Lift patchers can fit any existing hook lift system on the market. Available with all the options and features of a truck-mounted patcher.

### Dump Body Slip-in

Converts an existing dump body into a patcher! Completely self-contained. Slides into a dump body within minutes. The perfect solution for cities and towns that do not regularly perform patching operations.

### Trailer Models

PB Trailer Patchers provide another convenient way to handle patching operations. Hook up the trailer to a dump truck or pick-up truck. Equipped with all the standard features you need.

# PB Model BC-1.8 Asphalt Patcher

- Low Impact Fleet Model
- Higher Efficiency
- Lower Labor Expenditure

This innovative truck pothole patcher was designed with the budget-conscious municipality or contractor in mind. One of the most compact units currently available on the market, the BC-1.8 is designed for a lean 19,500lb (GVW) chassis. It still has a potential asphalt payload of up to three tons, and boasts many of the same features of much larger models.

## PB Patchers Offer These Proven Features

- All Hydraulic Operation
- Fully Insulation Container
- Radiant Heat System
- Adjustable Thermostat and Automatic Ignition
- Convenient Controls
- Available with Kevlar or Steel Chain Conveyor

## Many Optional Accessories to Choose From

- Pump or Air Compress Emulsion Spray Systems
- Spoils Bins
- Compactor Lift Platform
- Tool Baskets and Boxes
- Hose Reels
- Solvent Spray Wand
- Cab Controls
- And many more - contact us for details

# PB Truck Mounted Emulsion Systems Specifications

## BH-153-21 PUMP EMULSION SYSTEMS

**CAPACITY:** 132 gallons emulsion; 21 gallons solvent

**HEATING:** Truck cooling system, 110 VAC overnight heater

**FILTRATION:** Y strainer, inlet basket strainer

**PUMP:** rotary, 20 GPM @ 50 PSI; driven by truck hydraulic system

**WAND:** Five feet with atomizing nozzle

**HOSE:** 25 feet

### OPTIONS

Model 205-28: 177 gallons emulsion, 28 gallons solvent

Model 45-10: 35 gallons emulsion, 10 gallons solvent

Model 60-6: 24 gallons emulsion, 6 gallons solvent

**Other capacities available**

- 10" x 14" Clean out port
- LPG thermostatic heating
- distributor spray bars
- insulated tank
- hose reels
- recirculation system

## 65-CS PRESSURE EMULSION SYSTEMS

**CAPACITY:** 50 gallons emulsion

**HEATING:** Truck cooling system

**FILTRATION:** Y strainer, inlet basket strainer

**PUMP:** Truck air compressor system with 15 gallon auxiliary reservoir

**WAND:** Five feet with atomizing nozzle

**HOSE:** 25 feet

### OPTIONS

Model 144-CS: 133 gallons emulsion

Model 220-CS: 200 gallons emulsion

Model 45-CS: 30 gallons emulsion

- 15 gallon solvent tank
- 110 VAC overnight heating
- distributor spray bars
- insulated tank
- hose reels
- dual spray wand (emulsion and air)

## Responding Bidder Information

"Certification for Competitive Bid and Contract" **MUST** be submitted along with the response to the Solicitation.

1. RE: Solicitation # SW195

2. Bidder General Information:

FEI / SSN : 73-1119892 Supplier ID: \_\_\_\_\_

Company Name: Kirby-Smith Machinery, Inc.

3. Bidder Contact Information:

Address: 6715 W. Reno Ave

City: Oklahoma City State: OK Zip Code: 73127

Contact Name: Bill Gustafson

Contact Title: Sales Manager

Phone #: 405-495-7820 Fax #: 405-787-5973

Email: bgustafson@kirby-smith.com Website: www.kirby-smith.com

4. Oklahoma Sales Tax Permit<sup>1</sup>:

☒ YES – Permit #: 1585954816

☐ NO – Exempt pursuant to Oklahoma Laws or Rules – Attach an explanation of exemption

5. Registration with the Oklahoma Secretary of State:

☒ YES - Filing Number: 1900367033

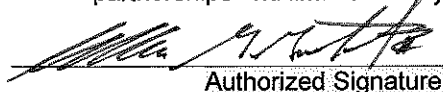

☐ NO - Prior to the contract award, the successful bidder will be required to register with the Secretary of State or must attach a signed statement that provides specific details supporting the exemption the supplier is claiming ([www.sos.ok.gov](http://www.sos.ok.gov) or 405-521-3911).

6. Workers' Compensation Insurance Coverage:

Bidder is required to provide with the bid a certificate of insurance showing proof of compliance with the Oklahoma Workers' Compensation Act.

☒ YES – Include a certificate of insurance with the bid

☐ NO - Attach a signed statement that provides specific details supporting the exemption you are claiming from the Workers' Compensation Act (Note: Pursuant to Attorney General Opinion #07-8, the exemption from 85 O.S. 2011, § 311 applies only to employers who are natural persons, such as sole proprietors, and does not apply to employers who are entities created by law, including but not limited to corporations, partnerships and limited liability companies.)<sup>2</sup>

# RW-100B Road Widener

## Performance Features:

Engineered with features that keeps the professional in mind, the RW-100B is a self-propelled, wheel-mounted, mid-size shoulder paving machine capable of placing either aggregate or bituminous materials. With a high temperature service belt, this road widener is able to discharge material from the left or right side all controllable from the operator's console. Front wheel drive allows for better tractive effort while four wheel steering provides better mobility.

- 110 hp (82.02 kW) Cummins Diesel Engine
- Width of Spread: up to 10' (3.05 m)
- Contoured Skid-Off
- 21" (533 mm) Wide Heat-Resistant Conveyor Belt
- 2 Ton (1,814 kg) Hopper Capacity
- Power Adjustable Front Hopper Lip
- Dual Control Stations, Right and Left Sides
- Hydraulic Drive and Traction Control System
- Oscillating Push Rollers
- Unobstructed View from the Operator's Station

Y___ N___	b. Tier 4 Final – 49hp (37kw) @ 2,600 RPM
	<b>3. Capacities:</b>
Y___ N___	a. Fuel: 13.5 gallons (51 l)
Y___ N___	b. Hydraulic: 45 gallons (170 l)
	<b>4. Hopper:</b>
Y___ N___	a. Gravity fed, hydraulically raised hopper
Y___ N___	b. Side wings fold in or out
Y___ N___	c. Hopper size: 5.5 ton (4,900 kg)
Y___ N___	d. Hopper height: 22" (.559 m)
	<b>5. Paving Widths:</b>
Y___ N___	a. Variable up to 13' (3.92 m)
	<b>6. Paving Depths:</b>
Y___ N___	a. Depth: 0" to 6" (.152 m)
	<b>7. Screed:</b>
Y___ N___	a. Legend full free floating 19" (.483 m) screed, consisting of a 13" (.330 m) main screed
Y___ N___	b. Constructed of .375" (.010 m) AR 400 bolt-on wear plates for easy replacement
	<b>8. Screed End Gates:</b>
Y___ N___	a. Equipped with vertical height adjustment and tilt

Y__ N__	<b>9. Screed Extensions:</b>
Y__ N__	a. Two 44" (1.118 m) screed extensions hydraulically actuated to a width of 13' (3.96 m)
Y__ N__	b. To eliminate seams, the heated extensions are mounted flush with the main screed and are adjustable with the angle of attack
	c. Includes replacement .25" (.006m) AR 400 bottom wear plates
Y__ N__	<b>10. Screed Heat:</b>
Y__ N__	a. Two 54,000 BTU propane burners on main screed
Y__ N__	b. Each extension has one 36,000 BTU propane burner
	c. One 36,000 BTU burner ignitor
Y__ N__	<b>11. Screed Vibration:</b>
	a. Equipped with a hydraulic vibrator capable of producing 2,000 vibrations per minute
Y__ N__	<b>12. Screed Crown/Invert:</b>
Y__ N__	a. Equipped with a crown/invert adjustment allowing at least 2" (.051m) of crown and 1.5" (.038 m) of valley
	b. Includes a leveling indicator for the operator to know when the screed is level
Y__ N__	<b>13. Material Flow Gates:</b>
	a. Two independent hydraulically operated 4' (1.219 m) wide gates located under the augers and constructed of at least .25" (.006 m) A-36 plate steel
Y__ N__	<b>14. Material Augers:</b>
Y__ N__	a. Two independently operated hydraulic casted augers constructed with .625" (.016 m) segmented A 36 steel
	b. Augers are 9" (.229 m) diameter
Y__ N__	<b>15. Operator's Platform:</b>
	a. Full machine width platform with left hand seat
Y__ N__	<b>16. Operator's Controls:</b>
Y__ N__	a. All control levers are on the left side
	b. Right side levers include left and right drive control, right auger, right screed extension and hopper
Y__ N__	<b>17. Steering:</b>
	a. Independent hydrostatic steering from the left or right side of machine
Y__ N__	<b>18. Washdown System:</b>
	a. Electric pump with one 22' x .375" (6.706 x .009 m) and one 15' x .375" (4.572 x .009m) diameter hoses and spray nozzles

# 1000G Asphalt Paver

# LeeBoy

## Performance Features:

Small footprint, large results. The gravity-feed tilt hopper featured on the 1000G can be raised to a steeper level than any other paver in its class allowing for optimum material flow. This paver boasts of a sleek design in which the hopper wings can be retracted. This dynamic feature allows continuous material flow while reducing the machine's overall width. As on all LeeBoy pavers, this smaller track paver features our superior Legend Screed system that is proven to supply one of the best mats in the industry.

- 49 hp (37 kW) Kubota Tier 4 Final Diesel Engine
- Paving Widths Variable Up To 13' (3.9 m)
- Low Back Configuration
- Built-In-Cams Tilt Hopper Angle
- Single Lever Hopper and Wing Control
- Ultra-efficient Material Management System
- Under Auger Material Cut-Off Gates
- 5.5 Ton (4,500 kg) Capacity Material Hopper
- Steel Track for Superior Traction
- Proven Legend Screed System
- Heated and Vibrating Screed System

### Product Specifications

## LeeBoy 5300 Paver

The following specifications are based on the 5300 Paver manufactured by LeeBoy Group. Because of continuous equipment research and development, we reserve the right to change these specifications. For more information, questions or assistance preparing specifications, please contact your local LeeBoy sales representative.

Comply	1. <b>Dimensions:</b>
Y___ N___	a. Length: 15' 5" (4.69 m)
Y___ N___	b. Width: 4' 5" (1.346 m) transport 9' 7" (2.92 m) hopper wings down
Y___ N___	c. Height: 7' 8" (2.337 m)
Y___ N___	d. Total Weight (with screed): 12,700 lbs. (5,760 kg)
Y___ N___	2. <b>Engine:</b>
Y___ N___	a. Kubota turbocharged diesel, V2607-CR-TE4B
	b. Tier 4 Final – 64.4 hp (48 kw) @ 2,400 rpm
Y___ N___	3. <b>Capacities:</b>
Y___ N___	a. Fuel: 25 gallons (95 l)
Y___ N___	b. Hydraulic reservoir: 33 gallons (124.9 l)
Y___ N___	4. <b>Hopper:</b>
Y___ N___	a. Single 13.44" (.34 m) feeding conveyor
Y___ N___	b. Conveyor is controlled by automatic sensors
Y___ N___	c. Hopper size: 7 ton (6,350 kg)
Y___ N___	d. Hopper height: 22" (.559 m)
Y___ N___	5. <b>Paving Widths:</b>
	a. Variable up to 9' (2.7 m)
Y___ N___	6. <b>Paving Depths:</b>
Y___ N___	a. Manual flight screws positioned on the screed to control material thickness
Y___ N___	b. Depth: 0" to 6" (.152 m)
Y___ N___	c. <i>OPTIONAL: Hydraulically operated tow cylinders control material thickness with toggle switches for each side</i>
Y___ N___	7. <b>Screed:</b>
Y___ N___	a. HD mini full free floating 46" (1.16 m) screed, consisting of a 15.375" (.390 m) by 3' 10" (1.168 m) main screed
Y___ N___	b. Constructed of .375" (9.52 mm) AR 400 bolt-on wear plate for easy replacement
	8. <b>Screed Extensions:</b>

Y__ N__	a. Two 21.19" (.538 m) screed extensions hydraulically operated
Y__ N__	b. To eliminate seams, the heated extensions are adjustable and mounted flush with the main screed
Y__ N__	c. Includes replaceable .25" (.006m) AR 400 bottom wear plates
Y__ N__	<b>9. Screed Heat:</b>
Y__ N__	a. Two 54,000 BTU propane burners on main screed
Y__ N__	b. Each extension has one 36,000 BTU propane burner
Y__ N__	c. Two 36,000 BTU burner ignitors
Y__ N__	d. <i>OPTIONAL - Electric: Two 1000 watt and one 250 watt element on main screed</i>
	i. <i>Each extension has one 1000 watt element</i>
	ii. <i>7.5 kw generator mounted on tractor</i>
Y__ N__	<b>10. Screed Vibration:</b>
	a. Equipped with two hydraulic vibrators capable of producing 4,200 vibrations per minute
Y__ N__	<b>11. Screed Crown/Valley:</b>
Y__ N__	a. Equipped with a crown/invert adjustment allowing at least 1.5" (.038 m) in either direction
Y__ N__	b. Includes a leveling indicator for the operator to know when the screed is level
Y__ N__	<b>12. Under Auger Material Cutoff:</b>
	a. One hydraulically operated 3' 8" (1.11 m) wide cutoff located under the augers and constructed of .375" (9.52 mm) A-36 steel plate
Y__ N__	<b>13. Material Augers:</b>
Y__ N__	a. Two independent hydraulically operated cast augers constructed with .625" (.016 m) AR 4140 HT (heat treated) steel with replaceable flights
Y__ N__	b. Augers are 12" (.305 m) diameter
Y__ N__	<b>14. Operator's Platform:</b>
	a. Full machine width platform
Y__ N__	<b>15. Operator's Controls:</b>
	a. All control switches are in a single control box which can be moved from right side to left side
Y__ N__	<b>16. Steering:</b>
Y__ N__	a. One electric steering box can be moved from left to right operating station
Y__ N__	b. Electronically controlled pumps operated by the forward/reverse joysticks
Y__ N__	<b>17. Washdown System:</b>
	a. Electric pump with one 15' x .3125" (4.572 x .008 m) diameter hose

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

#### 18. Hydraulic System:

- a. Variable volume hydraulic pumps for each drive
- b. Load sense pump controls augers, conveyor and all other hydraulic functions
- c. A hydraulic gear pump powers the hydraulically driven fan and provides charge pressure to the variable volume pump
- d. Hydraulic reservoir: 33 gallons (124 l)
- e. Hydraulic oil: all weather, all temperature

Y\_\_ N\_\_

#### 19. Push Rollers:

- a. Two 2.88" (.073 m) diameter rollers with sealed bearings mounted to allow pivoting on frame

Y\_\_ N\_\_

#### 20. Track Drive System:

- a. Hydrostatically powered, self-cleaning crawler type tracks consisting of drive sprocket, six rollers (two of which oscillate) and hydraulically adjustable front idler
- b. Drive mechanism has two torque hubs
- c. Fail safe brakes with anti-creep function
- d. Track size: 7" wide x 5' 1" long (.177 x 1.54 m) steel (wheel base)
- e. Paving speed: 0 to 151' per minute (1.7 mph)
- f. Travel speed: 0 to 239' per minute (2.7 mph)

# 5300 Asphalt Paver

**LeeBoy**

## Performance Features:

One of the industry's most versatile and quietest compact pavers, the 5300 asphalt paver handles the material load of a standard paver while allowing for the ability to fit into tight spaces. By maintaining a large capacity material hopper and ultra-efficient material management system, the paver provides the operator with precise control of the head of material at the main screed and hydraulic extensions. This unique design is ideal for the smallest of paving jobs to include cart paths, sidewalks, trenches, mill, patch and repair work.

- 64 hp (45 kw) Kubota Tier 4 Final Diesel Engine
- Paving Widths Variable Up To 9' (2.7 m)
- Low Deck Configuration
- Traditional Single Control Functionality
- Sliding Operator Control Station
- Ultra-efficient Material Management System
- Hydraulic Pressure Sensors for System Monitoring
- 7 Ton (16,350 kg) Capacity Material Hopper
- Proven Legend Screed System
- Propane or Electric Screed Heat
- Heavy-duty Undercarriage and Track System

Comply	<b>1. Dimensions:</b>
Y___ N___	a. Length: 16' 6" (5.03 m)
Y___ N___	b. Width: 8' 6" (2.59 m) transport 10' 7" (3.21 m) hopper wings down
Y___ N___	c. Height: 7' 8" (2.34 m)
Y___ N___	d. Total Weight (with LP screed): 17,550 lbs. (7,960 kg)
Y___ N___	<b>2. Engine:</b>
Y___ N___	a. Kubota turbocharged diesel
	b. Tier 4 Final – 74hp (55 kw) @ 2,200 RPM
Y___ N___	<b>3. Capacities:</b>
Y___ N___	a. Fuel: 36 gallons (140 l)
	b. Hydraulic: 36 gallons (140 l)
Y___ N___	<b>4. Hopper:</b>
Y___ N___	a. Conveyor fed
Y___ N___	b. Side wings hydraulically fold in or out
Y___ N___	c. Hopper size: 7 ton (6,350 kg)
Y___ N___	d. Hopper height: 22" (.559 m)
Y___ N___	<b>5. Paving Widths:</b>
	a. Machine has variable paving widths up to 15' (4.6 m)
Y___ N___	<b>6. Paving Depths:</b>
	a. Depth: 0" to 6" (.152 m)
Y___ N___	<b>7. Screed:</b>
Y___ N___	a. Legend propane screed
Y___ N___	b. 8' (2.43 m) main screed
Y___ N___	c. Constructed of .375" (9.5 mm) AR 400 bolt-on wear plates for easy replacement
Y___ N___	<b>8. Screed Extensions:</b>
Y___ N___	a. Two 44" (1.18 m) screed extensions hydraulically actuated to a width of 15' (4.57 m)
	b. The heated extensions are mounted flush with the main screed and are adjustable with the angle of attack

Y___ N___	c. Includes replacement .25" (6.35 mm) AR 400 bottom wear plates
Y___ N___	<b>9. Screed Heat (Propane):</b>
Y___ N___	a. Two 54,000 BTU propane burners on main screed
Y___ N___	b. Each extension has one 36,000 BTU propane burner
Y___ N___	c. One 36,000 BTU burner ignitor
Y___ N___	<b>10. Screed Vibration:</b>
Y___ N___	a. Equipped with two hydraulic vibrators capable of producing 2,000 vibrations per minute
Y___ N___	<b>11. Screed Crown/Invert:</b>
Y___ N___	a. Equipped with a crown/invert adjustment allowing at least 2" (76.2 mm) of crown and .75" (19.05 mm) of valley
Y___ N___	b. Includes a leveling indicator for the operator to know when the screed is level
Y___ N___	<b>12. Screed End Gates:</b>
Y___ N___	a. Equipped with vertical height adjustment and tilt
Y___ N___	<b>13. Under Auger Material Cutoff:</b>
Y___ N___	a. Two independent hydraulically operated 4' (0.051 m) wide gates located under the augers and constructed of at least .375" (.009 m) A-36 plate steel
Y___ N___	<b>14. Material Augers:</b>
Y___ N___	a. Two 12" (.305 m) replaceable segmented augers constructed of casted .625" (.016 m) thick Ni-hard steel
Y___ N___	b. Augers can be controlled automatically by sonic sensors (non-contacting)
Y___ N___	<b>15. Operator's Platform:</b>
Y___ N___	a. Full machine width platform with dual seats
Y___ N___	<b>16. Operator's Controls:</b>
Y___ N___	a. High deck/low deck configuration
Y___ N___	b. Dash panel is movable from left to right and contains all machine controls
Y___ N___	c. Pivot steer and posi-trac
Y___ N___	d. Equipped with auger and conveyor bypass
Y___ N___	e. E-stop
Y___ N___	<b>17. Steering:</b>
Y___ N___	a. Dual electronic steering wheels with joystick for forward, reverse operation
Y___ N___	b. Allows driver control from right or left side of paver
Y___ N___	<b>18. Washdown System:</b>
Y___ N___	a. Heavy-duty electric pump with two 25' x .375" (7.62 x .009 m) diameter hose reels and spray nozzles

Y___ N___	b. Washdown Tank: 7 gallons (26.4 l)
Y___ N___	<b>19. Hydraulic System:</b>
Y___ N___	a. Variable volume hydraulic pumps for each drive
Y___ N___	b. Fixed volume gear pump for augers and general functions
Y___ N___	c. Fixed volume gear pump for conveyors
Y___ N___	d. Fixed volume gear pump for generator and steering
Y___ N___	e. Hydraulic reservoir: 36 gallons (140 l)
Y___ N___	<b>20. Push Rollers:</b>
Y___ N___	a. Two 3" (0.076 m) diameter rollers with sealed bearings mounted on a swivel frame
Y___ N___	b. Vertically adjustable push rollers, 7" (.178 m) of height adjustment
Y___ N___	<b>21. Wheeled Drive System:</b>
Y___ N___	a. Hydrostatic drive with 2-speed hydrostatic motors
Y___ N___	b. Rear: 385/65 R22.5 heavy-duty hydroinflated truck tires
Y___ N___	c. Front: steerable wheels, 12" x 22" (.304 x .558 m) diameter solid rubber tires
Y___ N___	d. Paving speed: 0 to 228' per minute (2.6 mph)
Y___ N___	e. Travel speed: 0 to 660' per minute (7.5 mph)
Y___ N___	<b>22. Additional Standard Equipment:</b>
Y___ N___	a. Back-up alarm
Y___ N___	b. Lockable fuel and hydraulic caps
Y___ N___	c. Rotating LED safety beacon
Y___ N___	d. LED work lights
Y___ N___	e. Electronic gauge package (oil pressure, hour meter, fuel gauge, volt meter, water temp, tachometer, hydraulic oil temp, hydraulic level warning, engine diagnostics)
Y___ N___	<b>23. Optional Equipment:</b>
Y___ N___	a. Legend electric heated screed, variable up to 15' (4.572 m), 10 kw generator
Y___ N___	b. Heavy-duty Legend electric heated screed, variable up to 15' (4.572 m), 10kw generator
Y___ N___	c. S-curve elements (Legend HD screed only)
Y___ N___	d. Heated end gates (Legend HD screed only)
Y___ N___	e. 3:1 flight screw adjusters (Legend HD screed only)
Y___ N___	f. 12" x 4.5" (.304 x .11 m) berm extension, left and right (Legend HD screed only)
Y___ N___	g. Sloping screed extensions
Y___ N___	h. Truck hitch
Y___ N___	i. Umbrella: 1 or 2
Y___ N___	j. Power crown
Y___ N___	k. Wiring only, grade controls, includes A/M module Sonic grade control both sides
Y___ N___	l. Dual sonic grade (Topcon System P-32)
Y___ N___	m. Dual sonic grade and slope (Topcon System P-32)
Y___ N___	n. 20-foot ski (6.096 m)
Y___ N___	o. 30-foot (9.144 m) to 40-foot ski (12.192 m)
Y___ N___	p. 12" (0.304 m) auger extensions (right and left)

Y__ N__	q. 24" (0.610 m) auger extensions and shields (right and left)
Y__ N__	<b>24. Training, Support and Company</b>
Y__ N__	a. Training and support manuals
Y__ N__	b. Optional on-site operator training by Dealer
Y__ N__	c. One-year, unlimited hours warranty against any manufacturer defects
Y__ N__	d. Extended warranty available
Y__ N__	e. 50+ years manufacturing experience
Y__ N__	f. ISO 9001 Certified
Y__ N__	g. Manufactured in the USA

# 6150 Asphalt Paver

# LeeBoy

## Performance Features:

The LeeBoy 6150 wheeled asphalt paver was truly designed with the paving professional in mind. With a quicker travel speed, this paver delivers a quality mat while easily maneuvering from point to point. Given traditional LeeBoy style and operation, the operator has a choice of working in a high-deck or low-deck configuration which can greatly benefit visibility depending on the application. Improved easy-to-reach service compartments allows quick access for regular maintenance requirements.

- 74 hp (55 kw) Kubota Tier 4 Final Diesel Engine
- Paving Widths Variable Up To 15' (4.6 m)
- Paving Speeds: 0 to 228' per minute (2.6 mph)
- Travel Speed: 0 to 660' per minute (7.5 mph)
- Operator's Choice: High or Low Deck Configuration
- Dual Electronic Steering Wheels
- Sliding Operator Control Station
- 4 Ton (8,350 kg) Capacity Material Hopper
- Propane or Electric (optional) Spread Heat
- Vertically Adjustable Oscillating Push Rollers
- Under Auger Material Cutoff

Product Specifications  
**LeeBoy 7000C Asphalt Paver**  
**Low Deck**

The following specifications are based on the 7000C Asphalt Paver manufactured by LeeBoy Group. Because of continuous equipment research and development, we reserve the right to change these specifications. For more information, questions or assistance preparing specifications, please contact your local LeeBoy sales representative.

Comply	<b>1. Dimensions:</b>
Y___ N___	a. Length: 12'6" (3.76 m)
Y___ N___	b. Width: 8'6" (2.59 m) transport 10' (3.05 m) hopper wings down
Y___ N___	c. Height: 7' (2.13 m), adjustable to 6'4" (1.93 m)
Y___ N___	d. Total Weight (with screed): 13,000 lbs. (5,897 kg)
Y___ N___	<b>2. Engine:</b>
Y___ N___	a. Kubota water cooled, turbocharged
	b. Tier 4 Final – 65 hp (48kw) @ 2,400 rpm
Y___ N___	<b>3. Capacities:</b>
Y___ N___	a. Fuel: 13 gallons (49 l)
Y___ N___	b. Hydraulic: 40 gallons (151 l)
Y___ N___	c. Washdown tank: 7.5 Gallons (28.4 l)
Y___ N___	<b>4. Hopper:</b>
Y___ N___	a. Dual 36" (.914 m) feeding conveyors
Y___ N___	b. Each conveyor is independent with automatic cut-offs
Y___ N___	c. Hopper is hydraulically raiseable to allow for cleaning and service
Y___ N___	d. Hopper size: 6 ton (5,443 kg)
Y___ N___	e. Hopper height: 22" (.559 m)
Y___ N___	<b>5. Paving Widths:</b>
	a. Variable up to 13' (3.92 m)
Y___ N___	<b>6. Paving Depths:</b>
Y___ N___	a. Includes manual flights screws positioned on the screed
Y___ N___	b. Depth: 0" to 6" (.152 m)
Y___ N___	c. <i>OPTIONAL: Electrically operated thickness screws with toggle switches connected to a heavy-duty coil cord to allow operation from either side of the paver</i>
Y___ N___	<b>7. Screed:</b>
Y___ N___	a. (Legend) full free floating 19" (.483 m) screed, consisting of a 13" (.330 m) by 8' (2.438 m) wide main screed
Y___ N___	

	b. Constructed of .375" (.010 m) AR 400 bolt-on wear plates for easy replacement
Y___ N___	<b>8. Screed End Gates:</b>
	a. Equipped with vertical height adjustment and tilt
Y___ N___	<b>9. Screed Extensions:</b>
Y___ N___	a. Two 44" (1.118 m) screed extensions hydraulically actuated to a width of 13' (3.96 m)
Y___ N___	b. To eliminate seams, the heated extensions are mounted flush with the main screed and are adjustable with the angle of attack
	c. Includes replacement .25" (.006m) AR 400 bottom wear plates
Y___ N___	<b>10. Screed Heat:</b>
Y___ N___	a. Two 54,000 BTU propane burners on main screed
Y___ N___	b. Each extension has one 36,000 BTU propane burner
	c. One 36,000 BTU burner ignitor
Y___ N___	<b>11. Screed Vibration:</b>
	a. Equipped with a hydraulic vibrator capable of producing 1,800 vibrations per minute
Y___ N___	<b>12. Screed Crown/Invert:</b>
Y___ N___	a. Equipped with a crown/invert adjustment allowing at least 2" (.051m) of crown and 1.5" (.038 m) of valley
	b. Includes a leveling indicator for the operator to know when the screed is level
Y___ N___	<b>13. Material Flow Gates:</b>
	a. Two independent hydraulically operated 4' (1.219 m) wide gates located under the augers and constructed of at least .25" (.006 m) A-36 plate steel
Y___ N___	<b>14. Material Augers:</b>
	a. Two independently automatically or manually operated hydraulic casted segmented augers constructed with .625" (.016 m) AR 4140 HT (heat treated) steel with replaceable flights
Y___ N___	b. Augers are 9" (.229 m) diameter
Y___ N___	c. Unit is wired for sonic auger controls
Y___ N___	<b>15. Operator's Platform:</b>
	a. Full machine width platform with left hand seat
Y___ N___	<b>16. Operator's Controls:</b>
Y___ N___	a. All control levers are on the left side
Y___ N___	b. Right side levers include left and right drive control, right auger, right screed extensions
Y___ N___	c. Includes a horn and back-up alarm

Y\_\_\_ N\_\_\_

**17. Steering:**

- a. Independent hydrostatic steering from the left to right side of machine

Y\_\_\_ N\_\_\_

**18. Washdown System:**

- a. Electric pump with one 22' x .375" (6.706 x .009 m) and one 15' x .375" (4.572 x .009m) diameter hose

Y\_\_\_ N\_\_\_

**19. Hydraulic System:**

- a. Variable volume hydraulic pumps for each drive  
b. A constant volume pump for conveyors and a constant volume pump for all other hydraulic functions  
c. Equipped with hydraulic oil cooler  
d. Hydraulic reservoir: 40 gallons (151 l)

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**20. Push Rollers:**

- a. Two 3" (.076 m) diameter rollers with sealed bearings mounted on swivel frame

Y\_\_\_ N\_\_\_

**21. Track Drive System:**

- a. Hydrostatically powered, self-cleaning friction drive tracks consisting of two drive tires, one roller and hydraulically adjustable front idler  
b. Drive mechanism consists of two torque hubs for variable speeds  
c. Track size: 14" wide x 5' long (.356 x 1.524 m) steel  
d. Paving speed: 0 to 210' per minute (2.4 mph)  
e. Travel speed: 0 to 210' per minute (2.4 mph)

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**22. Additional Standard Equipment:**

- a. Back-up alarm  
b. Rotating safety beacon  
c. Gauge package (electronic Murphy PU480 display containing oil pressure, voltmeter, fuel)  
d. Glow plugs

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**23. Optional Equipment:**

- a. Sonic auger  
b. Truck hitch  
c. 12" (.305 m) auger extensions  
d. Sonic grade control one side  
e. Sonic grade control both sides  
f. Grade control wiring (Topcon or Spectra-Physics)  
g. Failsafe brake with non-creeping feature  
h. Dual sonic grade and slope  
i. Umbrella  
j. Right hand seat  
k. Electric tow point control with hand held remotes

#### 24. Training, Support and Company

- a. Training and support manuals
- b. Optional on-site operator training by Dealer
- c. One-year, unlimited hours warranty against any manufacturer defects
- d. Extended warranty available
- e. 50+ years manufacturing experience
- f. ISO 9001 Certified
- g. Manufactured in the USA

# 7000C Asphalt Paver

# LeeBoy

## Performance Features:

Using our proven Legend Screed technology, the 7000C delivers a quality end result while maintaining extreme versatility. This large capacity paver is a classic entry-level conveyor paver able to maneuver flawlessly around obstacles in smaller operational areas such as parking lots and driveways. Highlighting the industry's widest conveyor system within its class, the 7000C quickly preforms the job it has set to accomplish - laying a consistent presentable mat each time.

- 65 hp (48 kw) Kubota Tier 4 Final Diesel Engine
- Paving Widths Variable Up To 13' (3.9 m)
- Low Deck Configuration
- Hydraulic Controls
- Operator Control Functions on Both Sides of Unit
- Two 3' (0.91 m) wide automatic conveyors
- Gauge Package for System Monitoring
- 6 Ton (5,443 kg) Capacity Material Hopper
- Proven Legend Screed System
- Heated and Vibrating Screed System
- Heavy-duty Undercarriage and Track System

	a. Variable up to 15' (4.57 m)
Y___ N___	<b>6. Paving Depths:</b>
	a. Manually operated tow point screws with optional toggle switches connected to a 6" (152 mm) electric screw to control depth to allow operation from either side of paver
Y___ N___	b. Includes manual flight screws positioned on the screed
Y___ N___	c. Depth: 0" to 6" (.152 m)
Y___ N___	<b>7. Screed:</b>
	a. (Legend) full floating 22" (.559 m) screed, consisting of a 15" (.381 m) by 8' (2.438 m) main screed
Y___ N___	b. Constructed of .375" (.010 m) HARDOX 400 bolt-on wear plates for easy replacement

Y___ N___	c. Wear plate has integral bullnose on front
Y___ N___	<b>8. Screed End Gates:</b> a. Equipped with vertical height adjustment and tilt
Y___ N___	<b>9. Screed Extensions:</b> a. Two 44" (1.11 m) screed extensions hydraulically operated b. To eliminate seams, the heated extensions have adjustable angle of attack and mounted flush with the main screed c. Includes replacement .25" (.006m) AR 400 bottom wear plates
Y___ N___	<b>10. LP Screed Heat Standard:</b> a. Two 54,000 BTU propane burners on main screed b. Each extension has one 36,000 BTU propane burner c. One 36,000 BTU burner ignitor d. Performance specs: Basic: 8' (2.44 m) Maximum: 15' (4.57 m) e. Main screed: .375" (.01 m) AR400 steel, 15" (.38 m) f. Extensions: .25" (.006 m) AR400 steel, 7" (.178 m) g. Extensions length: 3' 6" (1.070 m) h. Walkway width: 12" (.305 m)
Y___ N___	<b>OR</b>
Y___ N___	<i>Electric Screed Heat Optional:</i> 1. Heating system: Electric 2. Performance specs: Basic: 8' (2.44 m) Maximum: 15' (4.57 m) 3. Main screed: .375" (.01 m) AR400 steel, 15" (.38 m) 4. Extensions: .25" (.006 m) AR400 steel, 7" (.178 m) 5. Extensions length: 3' 6" (1.070 m) 6. Walkway width: 12" (.305 m) 7. Self-contained, hydraulically driven generator heating system 8. Environmentally sealed blade heaters on main screen and extensions 9. Control system: Electric heating controls 10. Power source: Hydraulically driven generator 11. Heating element: Four blade elements – one in each extension and one in each side of main screed
Y___ N___	<b>11. Screed Vibration:</b> a. Equipped with a hydraulic vibrator capable of producing 2,400 vibrations per minute
Y___ N___	<b>12. Screed Crown/Invert:</b> a. Equipped with a crown/invert adjustment allowing at least 2" (.051m) of crown and 1.5" (.038 m) of valley b. Includes a leveling indicator for the operator to know when the screed is level
Y___ N___	<b>13. Under Auger Material Cutoff:</b>

Y\_\_\_ N\_\_\_

- a. Two independent hydraulically operated 4' (1.219 m) wide gates located under the augers and constructed of at least .25" (.006 m) A-36 plate steel

**14. Material Augers:**

Y\_\_\_ N\_\_\_

- a. Two independent automatic or manual operated hydraulic cast segmented augers constructed with .625" (.016 m) AR 4140 HT (heat treated) steel with replaceable flights  
b. Augers are 9" (.229 m) diameter  
c. Controlled automatically with sonic units (non-contacting) - optional

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**15. Operator's Platform (Optional Low Deck):**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- a. Seat mounted on the screed  
b. Can be moved from left or right or removed for standing

**16. Operator's Platform (Optional High Deck):**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- a. Full machine width platform with both right and left hand seats  
b. 4' 6" (1.371 m) above ground  
c. Includes a lockable cover for the instrument panel

**17. Operator's Controls:**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- a. All control levers are on the left side  
b. Right side levers include left and right drive control, right auger, right screed extensions, hopper and cut-offs  
c. Dash slides from left to right

**18. Steering:**

Y\_\_\_ N\_\_\_

- a. Independent hydrostatic steering from the left or right side of machine

**19. Washdown System:**

Y\_\_\_ N\_\_\_

- a. Electric pump with one 15' x .3125" (4.572 x .008 m) diameter hose and hose wrap

**20. Hydraulic System:**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- a. Variable volume hydraulic pumps for each drive  
b. A constant volume pump for conveyors and a constant volume pump for all other hydraulic functions  
c. Hydraulic reservoir: 40 gallons (151 l)  
d. Hydraulic oil: all weather, all temperature

**21. Push Rollers:**

Y\_\_\_ N\_\_\_

- a. Two 3" (.076 m) diameter rollers with sealed bearings mounted on swivel frame

**22. Track Drive System:**

Y___ N___	a. Hydrostatically powered, self-cleaning crawler type tracks consisting of drive sprocket, four rollers and hydraulically adjustable front idler
Y___ N___	b. Drive mechanism is torque hub driven which consist of two speeds and obtained by means of a toggle switch
Y___ N___	c. Fail safe brakes with anti-creep function
Y___ N___	d. Track size: 12" wide x 77" long (.305 x 1.956 m) steel OR Optional: 14" wide x 77" long (.356 x 1.956 m) poly
Y___ N___	e. Paving speed: 0 to 140' per minute (1.6 mph)
Y___ N___	f. Travel speed: 0 to 240' per minute (2.7 mph)
<b>23. Additional Standard Equipment:</b>	
Y___ N___	a. Back-up alarm
Y___ N___	b. Rotating safety beacon
Y___ N___	c. Gauge package (oil pressure, hour meter, voltmeter, electric fuel gauge, water temp, tachometer)
Y___ N___	d. Glow plugs
Y___ N___	e. Vandalism protection covers
Y___ N___	f. Horn
Y___ N___	g. Spray down system with 2 hose wraps
<b>24. Optional Equipment:</b>	
Y___ N___	a. Legend electrically heated screed 8' to 15' (2.438 m x 4.572 m)
Y___ N___	b. 14" (.356 m) polyurethane pad track
Y___ N___	c. High-deck configuration
Y___ N___	d. Truck hitch
Y___ N___	e. Umbrella (1 or 2)
Y___ N___	f. Operating light package (4 night operating lights)
Y___ N___	g. Sonic auger, sensors and cords
Y___ N___	h. Electric screws for tow point activation
Y___ N___	i. Dual sonic grade and slope (Topcon System P-32)
Y___ N___	j. Hose reel, 15' x .3125" (4.572 x .008 m) diameter hose
Y___ N___	k. Wiring only, grade controls (includes Topcon A/M modules)
Y___ N___	l. Dual sonic grade control, both sides (Topcon System P-32)
Y___ N___	m. Second seat is option on low deck, standard on high deck
Y___ N___	n. 24" (.610 m) auger extension and troughs
Y___ N___	o. 12" (.305 m) auger extensions (right and left)
Y___ N___	p. 12" or 24" (.305 or .610 m) roll up curb attachment – right (propane only)
Y___ N___	q. 12" or 24" (.305 or .610 m) roll up curb attachment – left (propane only)
<b>25. Training, Support and Company</b>	
Y___ N___	a. Training and support manuals
Y___ N___	b. Optional on-site operator training by Dealer
Y___ N___	c. One-year, unlimited hours warranty against any manufacturer defects
Y___ N___	d. Extended warranty available
Y___ N___	e. 50+ years manufacturing experience
Y___ N___	f. ISO 9001 Certified
Y___ N___	g. Manufactured in the USA

# 8500D Asphalt Paver

# LeeBoy

## Performance Features:

Boasting of a small footprint yet retaining a 15 foot-wide screed, the 8500D allows for wider and longer pulls than competitive pavers. This important detail, along with less hand work, means the end user minimizes the number of stops which increases productivity and profitability. The 8500D features traditional controls which lessens any learning curve and allows for immediate use. This paver is a true commercial class machine easily fitting onto a trailer with other complementary equipment in order to provide high revenue opportunities for its patrons.

- 55 hp (40 kw) Kubota Tier 4 Final Turbocharged Diesel Engine
- Paving Widths Variable Up To 15' (4.6 m)
- Choice of High Deck or Low Deck Configuration
- Left Side Control Levers, Sliding Operator Control Station
- Ultra-efficient Material Management System
- Gauge Package for System Monitoring
- 75 Ton (15,904 kg) Capacity Material Hopper
- Proven Legend Screed System
- Propane or Electric (option) Screed Heat
- Steel Track Drive with Automatic Adjustment

Product Specifications

# LeeBoy 8510D Asphalt Paver

## Dual Steering, High or Low Deck

The following specifications are based on the 8510D Asphalt Paver manufactured by LeeBoy Group. Because of continuous equipment research and development, we reserve the right to change these specifications. For more information, questions or assistance preparing specifications, please contact your local LeeBoy sales representative.

---	---

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- c. Constructed of .375" (.010 m) HARDOX 400 bolt-on wear plates for easy replacement
- d. Wear plate has bullnose on front

Y\_\_\_ N\_\_\_

**8. Screed End Gates:**

- a. Equipped with vertical height adjustment and tilt with replaceable wear shoes

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**9. Screed Extensions:**

- a. Two 44" (1.11 m) screed extensions hydraulically operated
- b. To eliminate seams, the heated extensions are adjustable and mounted flush with the main screed
- c. Includes replacement .25" (.006m) AR 400 bottom wear plates
- d. Extension length: 3' 6" (1.07 m)
- e. Walkway width: 12" (.305 m)

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**10. Screed Heat - Propane:**

- a. Two 54,000 BTU propane burners on main screed
- b. Each extension has one 36,000 BTU propane burner
- c. One 36,000 BTU burner ignitor

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**11. Electric Screed Heat Option:**

- a. *Self-contained, hydraulically driven generator heating system*
- b. *Environmentally sealed blade heaters on main screed and extensions*
- c. *Electric heat control system*
- d. *Hydraulically driven electric generator*
- e. *Two blade elements, one in each extension*

Y\_\_\_ N\_\_\_

**12. Screed Vibration:**

- a. Equipped with two hydraulic vibrators capable of producing up to 3,400 vibrations per minute each (preset at 2,400 VPM)

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**13. Screed Crown/Invert:**

- a. Equipped with a crown/invert adjustment allowing at least 2" (0.051 m) of crown and 1.5" (0.038 m) of valley
- b. Includes a leveling indicator for the operator to know when the screed is level
- c. *OPTION: Power Crown*

Y\_\_\_ N\_\_\_

**14. Under Auger Material Cut Off:**

- a. Two independent hydraulically operated 4' (1.219 m) wide gates located under the augers and constructed of at least .25" (.006 m) A-36 plate steel

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**15. Material Augers:**

- a. Two independent automatic or manual operated hydraulic casted segmented augers constructed with .625" (.016 m) AR 4140 HT (heat treated) steel with replaceable flights
- b. Augers are 12" (.305 m) diameter

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- c. Controlled automatically with sonic units (non-contacting)
- d. Replaceable auger back
- e. Heavy-duty auger motors

**16. Operator's Platform (Optional Low Deck):**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. One seats mounted on the screed
- b. Can be removed for standing

**17. Operator's Platform (Optional High Deck):**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Full machine width platform with both right and left hand seats mounted on tractor
- b. 4' 6" (1.371 m) above ground
- c. Includes a lockable cover for the instrument panel

**18. Operator's Controls:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Includes dual electronic steering
- b. All control levers are on the left side
- c. Right side levers include left and right drive control, right auger, right screed extension, hopper and cut offs

**19. Steering:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Dual electronic steering controls
- b. It can be controlled from a high deck position or lowered to control at the screed
- c. Electronically controlled pumps operate the forward/reverse motion from dual joysticks

**20. Washdown System:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Electrical pumps with two 15' x .3125" (4.572 x .008 m) diameter hose
- b. Two hose reels

**21. Hydraulic System:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Variable volume hydraulic pumps for each drive
- b. A constant volume pump for conveyors and a constant volume pump for all other hydraulic functions
- c. Hydraulic reservoir: 40 gallons (151 l)
- d. Hydraulic oil: all weather, all temperature

**22. Push Rollers:**

Y\_\_\_ N\_\_\_

- a. Two 3" (.076 m) diameter rollers with sealed bearings mounted on swivel frame

**23. Track Drive System:**

Y\_\_\_ N\_\_\_

- a. Hydrostatically powered, self-cleaning crawler type tracks consisting of drive sprocket, four rollers and hydraulically adjustable front idler

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- b. Drive mechanism is torque hub driven which consist of two speeds and obtained by means of a toggle switch
- c. Fail safe brakes
- d. Track size: 14" wide x 77" long (.356 x 1.956 m) poly 4 rollers  
OR  
Rubber Track Option: 15.75" wide x 77" long (.400 x 1.956 m) rubber 5 rollers
- e. Paving speed: 0 to 140' per minute (1.6 mph)
- f. Travel speed: 0 to 230' per minute (2.6 mph)

**24. Additional Standard Equipment:**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- a. Back-up alarm
- b. Rotating safety beacon
- c. Operating light package
- d. Glow plugs
- e. Vandalism protection covers and removable steering boxes
- f. Horn
- g. Spray down system with 2 hose reels
- h. Citrus tank
- i. 2 seats
- j. Poly track (standard track)

**25. Optional Equipment:**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- a. Legend electric heated screed 8' to 15' (2.438 m x 4.572 m)
- b. Heavy-duty Legend electric heated screed 8' to 15' (2.438 m x 4.572 m)
- c. Rubber track, continuous – in lieu of poly track
- d. Steel track – in lieu of poly track
- e. Steering wheel drive controls – in lieu of joysticks
- f. Manual LeeBoy drive steering controls
- g. High-deck configuration
- h. Truck hitch
- i. Umbrella (1 or 2)
- j. Dual sonic grade and slope (Topcon System P-32)
- k. Wiring only, grade controls (Topcon includes A/M modules)
- l. Sonic grade control, both sides (Topcon System P-32)
- m. 24" (.610 m) auger extension and troughs
- n. 12" (.305 m) auger extensions (right and left)
- o. 20' (6.096 m) ski
- p. 30' (9.144 m) to 40' (12.192 m) ski
- q. 12" or 24" (.305 or .610 m) roll up curb attachment – right (propane only)
- r. 12" or 24" (.305 or .610 m) roll up curb attachment – left (propane only)

- a. Training and support manuals
- b. Optional on-site operator training by Dealer
- c. One-year, unlimited hours warranty against any manufacturer defects
- d. Extended warranty available
- e. 50+ years manufacturing experience
- f. ISO 9001 Certified
- g. Manufactured in the USA

# 8510D Asphalt Paver

**LeeBoy**

## Performance Features:

Serving as a staple among commercial paving contractors, the 8510D delivers precise asphalt placement resulting in a flawless mat. Comprised of robust components for longer wear, this asphalt paving solution is perfect for contractors seeking a lower cost per ton. Embracing a large material receiving hopper and one of the widest conveyor system on the market, this paver is meant to deliver the utmost productivity between truckloads. If you desire an all-around commercial paving machine that delivers unmatched results, the 8510D is for you.

- 74 hp (55 kW) Kubota Tier 4 Final Turbocharged Diesel Engine
- Paving Widths Variable Up To 19' (4.8 m)
- Choice of High Deck or Low Deck Configuration
- Dual Lever Joystick Steering Controls (both sides)
- Ultra-efficient Material Management System
- Gauge Package for System Monitoring
- 20 Ton (6,000 kg) Capacity Material Hopper
- Proven Legend Screen System
- Propane or Electric (option) Screen Heat
- LED Operating Light Package

Comply	1. <b>Dimensions</b>
Y__ N__	a. Length: 13' 5" (4.089 m)
Y__ N__	b. Width: 8' 6" (2.59 m) transport 10' (3.05 m) hopper wings down
Y__ N__	c. Height: 8' (2.43 m)
Y__ N__	d. Total Weight (with screed): 17,600 lbs. (7,983 kg)
Y__ N__	2. <b>Engine:</b>
Y__ N__	a. Kubota diesel
Y__ N__	b. Tier 4 Final - 74 HP (55.4 kW) @ 2,200 rpm
Y__ N__	3. <b>Capacities:</b>
Y__ N__	a. Fuel: 19 gallons (71 l)
Y__ N__	b. Hydraulic: 67 gallons (254 l)
Y__ N__	c. Washdown tank: 7 gallons (26 l)
Y__ N__	4. <b>Hopper:</b>
Y__ N__	a. Dual 3' (0.914 m) feeding conveyors
Y__ N__	b. Each conveyor is independent with automatic cut-offs.
Y__ N__	c. Conveyor is hydraulically raiseable to allow cleaning and service
Y__ N__	d. Hopper size: 7.5 ton (6,804 kg)
Y__ N__	e. Hopper height: 23" (0.584 m)
Y__ N__	f. Hopper wings: Heavy-duty 3/8" (0.01 m) with large radius corners
Y__ N__	5. <b>Paving Widths:</b>
Y__ N__	a. Machine has variable paving widths up to 15' (4.6 m)
Y__ N__	6. <b>Paving Depths:</b>
Y__ N__	a. Electronically operated tow point screws with toggle switches allow operation of grade from the high deck position
Y__ N__	b. Includes manual flights screws positioned on the screed
Y__ N__	c. Depth: 0 to 6" (0.152m)
Y__ N__	7. <b>Screed:</b>
Y__ N__	a. Legend full free floating 96" (2.44 m) main screed
Y__ N__	b. Consist of a 15.4" (.391 m) deep main screed
Y__ N__	c. Constructed of 3/8" (.010 m) HARDOX 400 bolt-on wear plates for easy placement

Y___ N___	d. Wear plate has bullnose on front
Y___ N___	<b>8. Screed Extensions:</b>
Y___ N___	a. Two 44" (1.11 m) screed extensions hydraulically operated
Y___ N___	b. The heated extensions are adjustable and mounted flush with the main screed
Y___ N___	c. Includes replaceable .25" (.006 m) by 6.75" (0.171 m) AR 400 bottom wear plate
Y___ N___	d. Extensions Length: 3'6" (1.07 m)
Y___ N___	e. Walkway width: 12" (0.305 m)
Y___ N___	f. <i>OPTION:</i> Extension Slope-Hydraulic extensions 0 to 8 percent each side
Y___ N___	<b>9. Screed Heat (Electric)</b>
Y___ N___	a. Legend Plus Screed
Y___ N___	b. Self-contained, hydraulically driven generator heating system
Y___ N___	c. Environmentally sealed blade heaters on main screed and extensions
Y___ N___	d. Electric heat control system
Y___ N___	e. Hydraulically driven electric generator, 10kw
Y___ N___	f. Two blade elements, one in each extension
Y___ N___	g. 4 Blade heating elements in main
	* Heavy-duty Legend electric heated screed available
Y___ N___	<b>10. Screed Vibration:</b>
	a. Equipped with two hydraulic vibrators capable of producing up to 3,400 vibrations per minute each (preset at 2400 VPM)
Y___ N___	<b>11. Screed Crown/Invert:</b>
Y___ N___	a. Equipped with a crown/invert adjustment allowing at least 2" (0.051 m) of crown and 1.5" (0.038 m) of valley
Y___ N___	b. Includes a leveling indicator for the operator to know when the screed is level
Y___ N___	<b>12. Screed End Gates:</b>
	a. Equipped with vertical height adjustments and tilt with replaceable wear shoes
Y___ N___	<b>13. Under Auger Material Cutoff:</b>
	a. Two independent hydraulically operated 4' ( 1.219 m) wide gates located under the augers and constructed of at least .375" (.009 m) A-36 plate steel
Y___ N___	<b>14. Material Augers:</b>
Y___ N___	a. Two 12" (.305 m) replaceable segmented augers constructed of .625" (.016 m) AR 4140 HT (heat treated) steel
Y___ N___	b. Augers can be controlled automatically by sonic units (non-contacting)
Y___ N___	c. Replaceable auger back
Y___ N___	d. Heavy-duty auger motors
	<b>15. Operators Platform:</b>

Y___ N___	a. Includes both right and left hand seats with a lockable cover for the instrument panel
Y___ N___	b. Two-piece grip strut, anti-slip walk board platform
Y___ N___	<b>16. Operators Controls:</b>
Y___ N___	a. High deck/low deck configuration
Y___ N___	b. Includes dual electronic steer
Y___ N___	c. Dash panel is movable from left to right and includes augers, screed extension, cut-offs, screed, hopper wings, conveyors, grade controls, steering and lights
Y___ N___	<b>17. Steering:</b>
Y___ N___	a. Dual electronic steering controls
Y___ N___	b. Machine can be controlled from a high deck position or lowered to control at the screed
Y___ N___	c. Electronically controlled pumps operate the forward/reverse motion from dual joysticks
Y___ N___	<b>18. Washdown System:</b>
Y___ N___	a. Electrical pump with two 15' x .3125" (4.572 x .008 m) diameter hose reels
Y___ N___	b. Built in pressure sensor and shutoff
Y___ N___	<b>19. Hydraulic System:</b>
Y___ N___	a. Variable volume hydraulic pumps for each drive
Y___ N___	b. A constant volume pump for conveyors and cylinder functions and a constant volume pump for generator, 3 pump system
Y___ N___	c. Hydraulic oil: all weather, all temperature
Y___ N___	<b>20. Push Rollers:</b>
Y___ N___	a. Two 3" (0.076 m) diameter rollers with sealed bearings mounted on a swivel frame
Y___ N___	b. Vertically adjustable push rollers, 7" (.178 m) of height adjustment
Y___ N___	<b>21. Track Drive System:</b>
Y___ N___	a. Hydrostatically powered, self-cleaning crawler type tracks consisting of drive sprocket, four rollers and hydraulically adjustable front idler
Y___ N___	b. Drive mechanism is torque hub driven which consist of two speeds and obtained by means of a toggle switch
Y___ N___	c. Fail safe brakes
Y___ N___	d. Track size: 14" wide x 77" long (.360 x 1.956 m) poly 4 rollers OR Rubber Track Option: 15.75" wide x 77" long (.400 x 1.956 m) rubber 5 rollers Steel Track Option: 12" wide x 77" long (.304 x 1.956 m) steel 5 rollers
Y___ N___	e. Paving speed: 0 to 150' per minute (1.7 mph)
Y___ N___	f. Travel speed: 0 to 300' per minute (3.4 mph)
Y___ N___	<b>22. Additional Standard Equipment:</b>

Y__ N__	a. Electronic gauge package (oil pressure, hour meter, fuel gauge, volt meter, water temp, tachometer, hydraulic oil temp, hydraulic level warning, engine diagnostics)
Y__ N__	b. Back-up alarm
Y__ N__	c. Rotating safety beacon
Y__ N__	d. LED working lights
Y__ N__	e. Vandalism protection covers
Y__ N__	f. Horn
Y__ N__	g. Spray down system with 2 hose reels
Y__ N__	h. 2 seats
Y__ N__	i. Poly track (standard track)
<b>23. Optional Equipment:</b>	
Y__ N__	a. Heavy-duty Legend electric heated screed variable up to 15' (4.572 m), 10kw generator
Y__ N__	b. Rubber track, continuous - in lieu of Poly
Y__ N__	c. Steel track – in lieu of poly track
Y__ N__	d. Sloping screed extensions
Y__ N__	e. Heated end gates (Legend HD screed only)
Y__ N__	f. Truck hitch
Y__ N__	g. Umbrella: 1 or 2
Y__ N__	h. Power crown
Y__ N__	i. Steering wheel drive controls (in lieu of joysticks)
Y__ N__	j. Wiring only, grade controls, includes A/M module Sonic grade control both sides
Y__ N__	k. Dual sonic grade (Topcon System P-32)
Y__ N__	l. Dual sonic grade and slope (Topcon System P-32)
Y__ N__	m. 20-foot ski (6.096 m)
Y__ N__	n. 30-foot (9.144 m) to 40-foot ski (12.192 m)
Y__ N__	o. 12" x 4.5" (.304 x .11 m) berm extension, left and right (Legend HD screed only)
Y__ N__	p. 12" (0.305 m) auger extensions (right and left)
Y__ N__	q. 24" (0.610 m) auger extensions and shields (right and left)
Y__ N__	r. 12" or 24" (.305 or .610 m) roll up curb attachment – right (propane only)
Y__ N__	s. 12" or 24" (.305 or .610 m) roll up curb attachment – left (propane only)
<b>24. Training, Support and Company:</b>	
Y__ N__	a. Training and support manuals
Y__ N__	b. Optional on-site operator training by Dealer
Y__ N__	c. One-year, unlimited hours warranty against any manufacturer defects
Y__ N__	d. Extended warranty available
Y__ N__	e. 50+ years manufacturing experience
Y__ N__	f. ISO 9001 Certified
Y__ N__	g. Manufactured in USA

# 8515E Asphalt Paver

# LeeBoy

## Performance Features:

Sleek, modern and low-profile are three words that immediately come to mind when evaluating the LeeBoy 8515E Asphalt Paver. Featuring an engine hood height of 69 inches (1.75 m) and a sliding control station, the 8515E gives the operator an extremely clear and comfortable view of their surroundings. With a class-leading tunnel size and self cleaning conveyor bars, this machine is built to perform at the highest level. Easy-to-access, convenient maintenance areas are also a highlight of machine ownership.

- 74 hp (48 kw) Kubota Tier 4 Final Diesel Engine
- Paving Widths Variable Up To 35' (4.5 m)
- Low Profile Engine Hood For Better Visibility
- Choice of High Deck or Low Deck Configuration
- Sliding Operator Control Station
- Ultra-efficient Material Management System
- Pressure Ports for Diagnostics and Testing
- 15 Ton (5,800 kg) Capacity Material Hopper
- Proven Legend Screen System
- Electric Screen Heat, 10 kw Generator
- Heavy-duty Undercarriage and Track System

Conveyor is hydraulically raiseable to allow cleaning and service d. Hopper size: 9 ton (8,164 kg) e. Hopper height: 31.75" (0.806 m) f. Hopper wings: Heavy-duty .5" (12.7 mm) with large radius corners
Y___ N___	<b>5. Paving Widths:</b> a. Machine has variable paving widths up to 15' (4.6 m)
Y___ N___  Y___ N___ Y___ N___	<b>6. Paving Depths:</b> a. Electronically operated tow point actuators with toggle switches allow operation of grade from the high deck position b. Includes manual flights screws positioned on the screed c. Depth: 0 to 6" (0.152m)
Y___ N___ Y___ N___ Y___ N___	<b>7. Screed:</b> a. Heavy Duty Legend full free floating 96" (2.44 m) main screed b. Consist of a 16.75" (.425 m) deep main screed

Y___ N___	c. Constructed of .375" (9.52 mm) HARDOX 400 bolt-on wear plates for easy placement
	d. Wear plate has bullnose on front
Y___ N___	<b>8. Screed Extensions:</b>
Y___ N___	a. Two 44" (1.11 m) screed extensions hydraulically operated
	b. The heated extensions are adjustable and mounted flush with the main screed
Y___ N___	c. Includes replaceable .375" (.952 m) by 7.38" (0.171 m) AR 400 bottom wear plate
Y___ N___	d. Extensions Length: 3'6" (1.07 m)
Y___ N___	e. Walkway width: 12" (0.305 m)
Y___ N___	<b>9. Screed Heat (Electric)</b>
Y___ N___	a. Legend HD Electric Screed
Y___ N___	b. 12k generator
Y___ N___	c. Electric timer and automatic RPM control system
Y___ N___	d. Environmentally safe, sealed S-curve elements in main screed and sealed, blade-style elements in extensions
Y___ N___	<b>10. Screed Vibration:</b>
	a. Equipped with two hydraulic vibrators capable of producing up to 3,400 vibrations per minute each (preset at 2400 VPM)
Y___ N___	<b>11. Screed Crown/Invert:</b>
	a. Equipped with a crown/invert adjustment allowing at least 2.5" (0.063 m) of crown and 1.5" (0.038 m) of valley
Y___ N___	b. Includes a leveling indicator for the operator to know when the screed is level
Y___ N___	<b>12. Screed End Gates:</b>
	a. Equipped with vertical height adjustments and tilt with replaceable wear shoes
Y___ N___	<b>13. Under Auger Material Cutoff:</b>
	a. Two independent hydraulically operated 4' ( 1.219 m) wide gates located under the augers and constructed of at least .25" (0.006 m) A-36 plate steel
Y___ N___	<b>14. Material Augers:</b>
	a. Two independent, hydraulically driven, segmented augers. Operated automatically or manually
Y___ N___	b. Augers are 12" (.305 m) diameter and are cast from .625" (.016 m) SAE 4140 heat treated steel
Y___ N___	c. System has manual override function and automatic functions are controlled by sonic sensors (non-contracting)
	<b>15. Operators Platform:</b>

Y__ N__	a. Includes both right and left hand seats 4' 6" (1.371 m) above ground with a lockable cover for the instrument panel
Y__ N__	b. Two piece, grip strut, anti-slip walk board platform
Y__ N__	<b>16. Operators Controls:</b>
Y__ N__	a. High deck/low deck configuration
Y__ N__	b. Includes dual electronic steer
Y__ N__	c. All control switches are located in one box that can be slid to each side. Dash panel includes augers, screed extension, cut-offs, screed, hopper wings, conveyors, grade controls, steering and lights
Y__ N__	<b>17. Screed Controls:</b>
Y__ N__	a. Screed control boxes are on each side and contain extensions, cutoffs, auger and slope
Y__ N__	<b>18. Steering:</b>
Y__ N__	a. Dual electronic steering controls
Y__ N__	b. Machine can be controlled from a high deck position or lowered to control at the screed
Y__ N__	c. Electronically controlled pumps operate the forward/reverse motion from dual joysticks
Y__ N__	<b>19. Washdown System:</b>
Y__ N__	a. Electric pump with two hose reels with 15' X .3125" (4.572m x 8 mm) diameter hose
Y__ N__	<b>20. Hydraulic System:</b>
Y__ N__	a. Variable volume hydraulic pumps for each drive
Y__ N__	b. A constant volume pump for conveyors and a constant volume pump for all other hydraulic functions
Y__ N__	c. Hydraulic reservoir: 73 gallons (276 l)
Y__ N__	d. Hydraulic oil: all weather, all temperature
Y__ N__	<b>21. Push Rollers:</b>
Y__ N__	a. Two 3" (0.076 m) diameter rollers with sealed bearings mounted on a swivel frame
Y__ N__	b. Vertically adjustable push rollers, 7" (.178 m) of height adjustment
Y__ N__	<b>22. Track Drive System:</b>
Y__ N__	a. Hydrostatically powered, self-cleaning crawler type tracks consisting of drive sprocket, seven rollers and hydraulically adjustable front idler
Y__ N__	b. Drive mechanism is torque hub driven which consist of two speeds and obtained by means of a toggle switch
Y__ N__	c. Fail safe brakes
Y__ N__	d. Track size: 14" wide x 87" long (.360 x 2.2 m) poly 7 rollers OR Rubber Track Option: 15.75" wide x 87" long (.400 x 2.2 m) rubber 7 rollers

# 8520 Asphalt Paver

# LeeBoy

## Performance Features:

You talked, we listened! The LeeBoy 8520 is the perfect unit for the heavy-commercial paving market. This machine features a higher horsepower engine along with a larger hopper capacity guaranteed to deliver outstanding results. Featuring LeeBoy's ultra-efficient material management system, the wide slow-moving conveyor system moves material consistently from the truck to the screed which ensures a flawless mat. Truly designed with the paving professional in mind, the 8520 is a welcomed robust design to the LeeBoy elite family of asphalt pavers.

- 106 hp (79 kw) Kubota Tier 4 Final Diesel Engine
- Paving Widths Variable Up To 15' (4.5 m)
- Choice of High Deck or Low Deck Configuration
- Dual Electronic Steering
- Sliding Operator Control Station
- Ultra-efficient Material Management System
- Pressure Ports for Diagnostics and Testing
- 9 Ton 18164 kg Capacity Material Hopper
- Proven HD Legend Screed System
- Electric Screed Heat 12 kw Generator
- Heavy-duty Undercarriage and Track System

	<b>4. Hopper:</b>
Y___ N___	a. Dual 20.5" (0.52 m) heavy-duty slat feeding conveyors
Y___ N___	b. Each conveyor is independent with automatic cut-offs, variable speed and conveyor bypass
Y___ N___	c. Proportional speed controlled augers
Y___ N___	d. Hopper size: 9 ton (8,164 kg)
Y___ N___	e. Hopper height: 27.5" (0.699 m)
	<b>5. Hopper Wings:</b>
Y___ N___	a. Constructed of .5" (12.7 mm) thick material
Y___ N___	b. Two cylinders per side
Y___ N___	c. Wide radius corners allow for cleaner operation
	<b>6. Standard Variable Paving Widths:</b>
Y___ N___	a. Machine has variable paving widths up to 15' (4.6 m)
	<b>7. Paving Depths:</b>
Y___ N___	a. Hydraulically operated tow points with toggle switches to allow operation from seat or screed
Y___ N___	b. Includes manual flight screws positioned on the screed
Y___ N___	c. Depth: 0 to 6" (0.152 m)

Y__ N__	<b>8. Screed:</b>
Y__ N__	a. Heavy Duty Legend full free floating 96" (2.44 m) main screed with automatic screed lock
Y__ N__	b. Consist of a 16.75" (.042 m) deep main screed
	c. Constructed of .5" (12.7 mm) AR400 steel bolt-on wear plates for easy replacement
Y__ N__	<b>9. Screed Extensions:</b>
Y__ N__	a. Two 44" (1.12 m) screed extensions, hydraulically operated
Y__ N__	b. To eliminate seams, the heated extensions are adjustable and mounted flush with the main screed
Y__ N__	c. Includes replaceable .375" (.009 m) by 7.38" (0.111 m) AR 400 bottom wear plate
Y__ N__	d. Equipped with two vertical height adjustments and one angle of attack adjustment per extension
Y__ N__	<b>10. Screed Heat (Electric):</b>
Y__ N__	a. Legend HD Electric Screed
Y__ N__	b. 12 kw generator
Y__ N__	c. Electric timer and automatic RPM control system
Y__ N__	d. Environmentally safe, sealed S-curve elements in main screed and sealed, blade-style elements in extensions
Y__ N__	<b>11. Screed Vibration:</b>
	a. Equipped with two hydraulic vibrators capable of producing up to 2,900 vibrations per minute each (preset at 2,400 vpm)
Y__ N__	<b>12. Screed Crown/Invert:</b>
Y__ N__	a. Equipped with a crown/invert adjustment allowing at least 2.5" (0.635 m) of crown and 1.5" (0.038 m) of valley
Y__ N__	b. Includes a leveling indicator for the operator to know when the screed is level
Y__ N__	<b>13. Screed End Gates:</b>
	a. Equipped with vertical height adjustment with tilt control and replaceable wear shoes
Y__ N__	<b>14. Material Augers:</b>
Y__ N__	a. Two independent, hydraulically driven, segmented augers. Operated automatically or manually
Y__ N__	b. Augers are 12" (.305 m) diameter and are cast from .625" (.016 m) SAE 4140 heat treated steel
Y__ N__	c. System has manual override function and automatic functions are controlled by sonic sensors (non-contracting)
Y__ N__	<b>15. Operators Platform:</b>
	a. Forward/reverse speeds incorporated into the CAN Bus electrical system

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- b. DP 700 7" (17.78 cm), 800 x 400 pixel push button color display
- c. Control console with menu-driven diagnostics of electrical, hydraulic and engine functions, can be slid from side-to-side
- d. Modular design facilitates easy part replacement during maintenance
- e. Preset speed indicator to maintain consistent paver speed
- f. Emergency stop safety switch for shutdown of paver if necessary
- g. Two piece, grip strut, anti-slip walk board platform

**16. Operators Controls:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Includes dual joystick electronic steer
- b. All control switches are in a centralized control panel that can be slid to either side
- c. Dash includes augers, screed extension, cut-offs, screed lift, hopper wings, conveyors, throttle, grade controls, steering, lights, 2-speed, horn, vibrators, and e-stop

**17. Screed Controls:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Screed controls have extensions, pile height, slope extensions, auger override, auger speed controls and tow points
- b. Graphic instrument display

**18. Steering:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Dual electronic left and right steering controls
- b. Electronically controlled pumps are controlled by a dual joystick control station

**19. Washdown System:**

Y\_\_\_ N\_\_\_

- a. Electric pump with two hose reels with 15' X .3125" (4.572m x 8 mm) diameter hose

**20. Hydraulic System:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Variable volume hydraulic pumps for each drive
- b. Load sense pump for auger, generator and cylinder functions
- c. Engine mounted gear pump for conveyor functions
- d. Hydraulic reservoir: 43.5 gallons (164 l)
- e. Hydraulic oil: all weather, all temperature

**21. Push Rollers:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Two 3.5" (89 mm) diameter rollers with sealed bearings mounted on a swivel frame
- b. Vertically adjustable push rollers, 7" (.178 m) of height adjustment

**22. Track Drive System:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Hydrostatically powered, self-cleaning crawler type tracks consisting of drive sprocket, eight rollers (five oscillating) and hydraulically adjustable front idler
- b. Final drive consist of torque hubs with two speeds and obtained by means of a toggle switch
- c. Failsafe brake with anti-creep function

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- d. Track size: 14" (0.356 m) wide x 220" (5.60 m) poly  
OR
- e. Track size: 14" (0.356 m) wide x 220" (5.60 m) smooth ride poly (optional)
- f. Paving speed: 0 to 151' per minute (1.72 mph)
- g. Travel speed: 0 to 355' per minute (4.04 mph)

**23. Additional Standard Equipment:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Gauge package (oil pressure, hour meter, electric fuel gauge, volt meter)
- b. Back-up alarm
- c. Operating Light package (4 night operating lights)
- d. Vandalism protection covers
- e. Rotating safety beacon
- f. Horn
- g. Washdown tank
- h. Wired for Topcon System V grade controls
- i. Safety hand rails and steps
- j. Cold weather package
- k. Oil pressure, high temperature shutdown system

**24. Optional Equipment:**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Screed extension vibration (hydraulically activated vibration)
- b. Smooth ride HD poly pad track
- c. Sloping screed extensions
- d. Truck hitch
- e. Power crown
- f. 3:1 Flight screw adjusters
- g. Heated end gates
- h. Steering wheel drive control (in lieu of joysticks)
- i. 110 volt outlet (20 amp GFI outlet)
- j. Topcon P-32 system controls, dual grade
- k. Topcon P-32 system controls, dual grade and slope
- l. 20-foot ski (6.096 m)
- m. 30-foot (9.144 m) to 40-foot ski (12.192 m)
- n. Berm extension, 12" x 4.5" (.305 x .114 m), LH and RH
- o. 12" (.304 m) auger extensions, right and left
- p. 24" (.609 m) auger extension group with shields, right and left

**25. Training, Support and Company:**

- a. Training and support manuals
- b. Optional on-site operator training by Dealer
- c. One-year, unlimited hours warranty against any manufacturer defects
- d. Extended warranty available
- e. 50+ years manufacturing experience
- f. ISO 9001 Certified
- g. Manufactured in USA

# 8616C Asphalt Paver

**LeeBoy**

## Performance Features:

The renowned 8616C Asphalt Paver encompasses many features and benefits of a larger highway-class paver yet maintains a sleek footprint to better suit the commercial contractor looking for a heavier unit. Highly adaptable for heavy commercial jobs, the flexible spontaneous design gives the operator the ability to switch the unit from high deck to low deck in the matter of minutes. There's nothing left to desire as this unit provides greater serviceability with easy to locate components, consistent material flow and a heavier screed for higher production yields.

- 111 hp (82.7 kW) Kubota Tier 4 Final Diesel Engine
- Paving Widths Variable Up To 15' (4.5 m)
- Choice of High Deck or Low Deck Configuration
- Dual Joystick Electronic Steer
- Riding Operator Control Station
- Variable Speed Conveyors
- Hydraulic Pressure Sensors for System Monitoring
- 9 Ton (8,164 kg) Capacity Material Hopper
- Legend Electric Screed System, 12k Generator
- Heavy-duty Undercarriage and Track System with Oscillating Rollers

# 8616C Asphalt Paver Specifications

# LeeBoy

Dimensions	<ul style="list-style-type: none"> <li>- Length: 15' 4" (4.67 m)</li> <li>- Width: 8' 6" (2.59 m) transport 10' (3.05 m) hopper wings down</li> <li>- Height: 8' 8" (2.64 m)</li> <li>- Total Weight: 21,420 lbs. (9,715 kg)</li> </ul>	Operator's Platform	Full machine width platform
Engine	Kubota turbocharged diesel, Tier 4 Final – 111 hp (82.7 kw)	Operator's Controls	All control switches are in a single control box which can be moved from right side to left side
Capacities	<ul style="list-style-type: none"> <li>- Fuel: 34 gallons (128 l)</li> <li>- Hydraulic reservoir: 43.5 gallons (164 l)</li> <li>- Washdown tank: 7 gallons (26.5 l)</li> <li>- DEF tank: 5 gallons (18.9 l)</li> </ul>	Steering	<ul style="list-style-type: none"> <li>- Dual joystick electronic steering</li> <li>- Electronically controlled pumps operated by the forward/reverse joysticks</li> </ul>

Product Specifications  
**LeeBoy 8816B Paver**  
**Dual Steering**

The following specifications are based on the 8816B Asphalt Paver manufactured by LeeBoy Group. Because of continuous equipment research and development, we reserve the right to change these specifications. For more information, questions or assistance preparing specifications, please contact your local LeeBoy sales representative.

Comply	<b>1. Dimensions</b>
Y___ N___	a. Length: 17' 5" (5.310 m)
Y___ N___	b. Width: 8' 6" (2.591 m) transport 10' (3.048 m) hopper wings down
Y___ N___	c. Height: 9' (2.743 m)
Y___ N___	d. Total Weight (with screed): 25,000 lbs. (11,339 kg)
Y___ N___	<b>2. Engine:</b>
Y___ N___	a. Cummins diesel engine
Y___ N___	b. Tier 3 - 130 hp (97 kW) @ 2,200 rpm
Y___ N___	<b>3. Capacities:</b>
Y___ N___	a. Fuel: 30 gallons (114 l)
Y___ N___	b. Hydraulic: 50 gallons (227 l)
Y___ N___	c. Washdown tank: 9.76 gallons (37 l)
Y___ N___	<b>4. Hopper:</b>
Y___ N___	a. Dual 18" (0.457 m) heavy-duty slat feeding conveyors
Y___ N___	b. Each conveyor is independent with automatic cut-offs and conveyor bypass
Y___ N___	c. Conveyors and auger are reversible
Y___ N___	d. Proportional speed controlled augers and conveyors
Y___ N___	e. Hopper size: 10 ton (9,071 kg)
Y___ N___	f. Hopper height: 24" (0.610 m)
Y___ N___	<b>5. Standard Variable Paving Widths:</b>
Y___ N___	a. Variable up to 15' 6" (4.7 m)
Y___ N___	<b>6. Paving Depths:</b>
Y___ N___	a. Hydraulically operated tow point with CAN Bus keypads to allow operation of screed from seat
Y___ N___	b. Includes manual flights screws positioned on the screed
Y___ N___	c. Depth: 0 to 6" (0.152 m)
Y___ N___	<b>7. Screed:</b>
Y___ N___	a. Heavy Duty Legend Electric Screed
Y___ N___	b. Consist of a 96" (2.438 m) wide main screed and 45" (1.14 m) wide screed extensions

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- c. Main screed: constructed of .5" (912.7 mm) AR400 steel bolt-on wear plates for easy replacement
- d. Extensions: .375" (10 mm) AR400 steel, 3' 9" (1.14 m) extension length
- e. transport width: 8' 6" (2.59 m)
- f. Operating width: 8' (2.44m), Maximum 15' 6" (4.72 m)
- g. Six blade elements, one in each extension and two in each side of the main screed
- h. Electronic heating controls
- i. Walkway width: 12" (.305 m)
- j. Hydraulically driven electric generator
- k. Equipped with two hydraulic vibrators capable of producing 3,400 vibrations per minute each
- l. Adjustable crown/invert, at least 2" (51 mm) of crown and 1.5" (38 mm) of valley
- m. Hydraulic sloping extensions 0 to 10 percent each side
- n. Two large tool boxes

**8. Screed Extensions:**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- a. Two 45" (1.14 m) screed extensions hydraulically operated
- b. To eliminate seams, the heated extensions are adjustable and mounted flush with the main screed
- c. Includes replaceable .375" (.009 m) by 12" (0.305 m) AR 400 bottom wear plate
- d. Extensions Length: 3' 9" (1.14 m)
- e. Equipped with two vertical height adjustments and one angle of attack adjustments
- f. Extension slope: Hydraulic sloping extensions 0 to 10 percent each side

**9. Screed Heat (Electric):**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- a. Self-contained , hydraulically driven generator with electric blade heating system
- b. Environmentally safe sealed blade heaters on main screed and extensions
- c. Electric timer and automatic RPM control system

**10. Screed Vibration:**

Y\_\_\_ N\_\_\_

- a. Equipped with two hydraulic vibrators capable of producing up to 2,900 vibrations per minute each (preset at 2,400 VPM)

**11. Screen End Gates:**

Y\_\_\_ N\_\_\_

- a. Equipped with vertical height adjustment with tilt control and replaceable wear shoes

**12. Screed Crown/Invert:**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- a. Equipped with a crown/invert adjustment allowing at least 2.5" (0.365 m) of crown and 1.5" (0.038 m) of valley
- b. Includes a leveling indicator for the operator to know when the screed is level

**13. Hopper Wings:**

Y\_\_\_ N\_\_\_

- a. Constructed of .5" (.013 m) thick material

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- b. Two cylinders per side
- c. Wide radius corners allow for cleaner operation

**14. Material Augers:**

Y\_\_\_ N\_\_\_

- a. Two independent automatically or manually operated hydraulic casted segmented augers constructed with .625" (0.016 m) thick Nihard steel, are replaceable
- b. Augers are 14" (0.356 m) diameter and controlled automatically by sonic units (non-contacting)
- c. Equipped with auger bypass and are reversible
- d. Auger assembly raises hydraulically for easy loading

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**15. Operators Platform:**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- a. Plus 1 steering wheel and joystick control
- b. Forward/reverse speeds incorporated into the CAN Bus electrical system
- c. Push button color display
- d. Control right and left consoles with menu-driven diagnostics of electrical, hydraulic and engine functions
- e. Modular design facilitates easy part replacement during maintenance
- f. Preset speed indicator to maintain consistent paver speed
- g. Emergency stop safety switch for shutdown of paver if necessary
- h. All paver functions incorporated into touch pad

**16. Operators Controls:**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- a. Includes dual joystick electronic steer
- b. All control switches are on the left and right sides
- c. Dash includes augers, screed extension, cut-offs, screed, hopper wings, conveyors, throttle, grade controls, steering and lights
- d. Remote screed controls have extensions, conveyor bypass, pile height, sloping extensions, auger override and cut-off controls
- e. Graphic instrument display

**17. Screed Controls:**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- a. Remote CAN Bus push button keypads
- b. Screed controls have extensions, conveyor bypass, pile height, slope extensions, auger override and conveyor speed controls

**18. Steering:**

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

- a. Dual electronic left and right steering controls
- b. Electronically controlled pumps are controlled by a dual joystick control station

**19. Washdown System:**

Y\_\_\_ N\_\_\_

- a. Electric pump with two hose reels with 15' X 5/16" (4.572m x 8 mm) diameter hose

**20. Hydraulic System:**

Y\_\_\_ N\_\_\_

- a. Variable volume hydraulic pumps for each drive and conveyor/auger

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- b. Constant volume pump for fumes and vibrator
- c. Load sense pump for all other hydraulic functions
- d. Hydraulic reservoir: 50 gallons (189.2 l) with oil cooler
- e. Hydraulic oil: all weather, all temperature

**21. Push Rollers:**

Y\_\_\_ N\_\_\_

- a. Two 3.5" (89 mm) diameter rollers with sealed bearings mounted on a swivel frame

**22. Track Drive System:**

Y\_\_\_ N\_\_\_

- a. Hydrostatically powered, self-cleaning crawler type tracks consisting of drive sprocket, seven rollers (four oscillating) and hydraulically adjustable front idler
- b. Final drive consist of torque hubs with two speeds and obtained by means of a push button
- c. Failsafe brake with anti-creep function
- d. Track size: 14" (0.356 m) wide x 248" (6.29 m) poly
- e. Paving speed: 0 to 140' per minute (1.6 mph)
- f. Travel speed: 0 to 360' per minute (4.1 mph)

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**23. Additional Standard Equipment:**

Y\_\_\_ N\_\_\_

- a. Gauge package (oil pressure, hour meter, electric fuel gauge, volt meter)
- b. Back-up alarm
- c. Operating Light package (4 night operating lights)
- d. Vandalism protection covers
- e. Two umbrellas
- f. Rotating safety beacon
- g. Horn
- h. Citrus tank
- i. Variable fumes control
- j. Handheld depth gauge rod
- k. Wired for Topcon System V grade controls
- l. Safety hand rails and steps
- m. Cold weather package
- n. Telescoping walk boards
- o. Oil pressure, high temperature shutdown system

# 8816B Asphalt Paver

**LeeBoy**

## Performance Features:

The 8816B Asphalt Paver is the perfect paver for government agencies or contractors looking towards larger street, highway or commercial paving projects for a major source of revenue. Designed with the paving professional in mind, this model is equipped with all of the features you expect from a high-yield machine. There's nothing left to desire as the 8816B provides greater serviceability with easy to locate components, consistent material flow and a heavier electric screed for higher production yields.

- 130 hp (97 kw) Cummins Tier 3 Turbocharged Diesel Engine
- Paving Widths Variable Up To 16' 0" (4.7 m)
- High Deck Configuration
- Dual Side Out Operator's Stations
- Ultra-efficient Material Management System
- Graphic Instrument Display with Vandalism Protection
- 10 Ton (9,072 kg) Capacity Material Hopper
- Proven Legend Electric Screed System
- Easy-to-Locate Service Areas
- LED Operating Light Package

## Product Specifications

# LeeBoy 400B Vibratory Roller

## 3 – 5 Ton

The following specifications are based on the 400B Vibratory Roller (with or without trailer hitch) manufactured by LeeBoy Group. Because of continuous equipment research and development, we reserve the right to change these specifications. For more information, questions or assistance preparing specifications, please contact your local LeeBoy sales representative.

Comply	1. <b>Dimensions (400B) without trailer hitch option:</b>
Y___ N___	a. Length: 9' 6" (2.9 m)
Y___ N___	b. Width: 4' 2" (1.27 m)
Y___ N___	c. Height: 7' 6" (2.28 m) ROPS down 8' 5" (2.57 m) ROPS down, with strobe 9' 4" (2.85 m) ROPS up 9' 10" (3.00 m) ROPS up, with strobe
Y___ N___	d. Wheel base: 6' 6" (1.981 m)
Y___ N___	e. Turing radius: 13' 5" (4.089 m)
Y___ N___	2. <b>Weights (400B) without trailer hitch option:</b>
Y___ N___	a. Static weight total: 5,640 lbs. (2,558 kg)
Y___ N___	b. Front: 2,140 lbs. (971 kg)
Y___ N___	c. Rear: 3,500 lbs. (1,587 kg)
Y___ N___	d. Loaded weight: 7,000 lbs. (3,175 kg)
	OR
Y___ N___	3. <b>Dimensions (400BT) with trailer hitch option:</b>
Y___ N___	a. Length: 12' 8" (3.86 m) tongue down 11' 2" (3.40 m) tongue up
Y___ N___	b. Width: 6' 6" (1.98 m)
Y___ N___	c. Height: 7' 6" (2.28 m) ROPS down 8' 5" (2.57 m) ROPS down, with strobe 9' 4" (2.85 m) ROPS up 9' 10" (3.00 m) ROPS up, with strobe
Y___ N___	d. Wheel base: 6' 6" (1.981 m)
Y___ N___	e. Turning radius: 13' 5" (4.089 m)
Y___ N___	4. <b>Weights (400BT) with trailer hitch option:</b>
Y___ N___	a. Static weight total: 6,760 lbs. (3,066 kg)
Y___ N___	b. Front: 2,820 lbs. (1,279 kg)
Y___ N___	c. Rear: 3,960 lbs. (1,796 kg)
Y___ N___	d. Loaded weight: 8,120 lbs. (3,683 kg)
Y___ N___	5. <b>Vibration:</b>
Y___ N___	a. Provided to the rear drum only
Y___ N___	b. Internal shaft vibrating mechanism producing at least 2,600 VPM
Y___ N___	c. Vibrator centrifugal force: 2,800 lbs (1,270 kg)

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

**6. Engine:**

- a. Output (gross intermittent): 24.8 HP at 2,400 RPM (18.5 kw)
- b. Tier 4 Final, 4 cylinder Kubota naturally aspirated diesel water-cooled

# 400B Vibratory Roller

# LeeBoy

## Performance Features:

Optimal for asphalt compaction projects on streets, parking lots, driveways and sidewalks, the 400B vibratory roller is available in standard and towable configurations to meet the contractors' exact working needs. In order to assure optimum performance, the split-front drum design eliminates pushing or tearing of the mat by delivering smooth turns during operation. The high capacity water tank allows for long stints between refills decreasing roller downtime.

- 23.8 hp (18.5 kW) Kubota Tier 4 Final Diesel Engine
- Servo-Controlled Hydrostatic Transmission
- 40" (1.01 m) Split-Front Drum, 44" (1.118 m) Rear Drum
- Split Drums, 40 Gallons Each, 80 Gallons (303 l) Total
- 5,540 lbs (2,558 kg) static weight
- 2,500 Vibrations Per Minute Internal Vibratory System
- Hinged Operator's Platform for Easy Access
- Cushioned Full Width Bench Seat
- Pressurized Water System
- Hydrostatic Braking and Parking Brake
- Towing Configuration Available with Trailer Hitch

## 420B Pneumatic Roller

# LeeBoy

### Performance Features:

Cover a larger area and experience dramatic time savings with the nine-wheeled 420B Pneumatic Roller. Manufactured with the operator's ease-of-use in mind, this roller kneads the surface for a more acceptable finished end result that guarantees a high level of satisfaction. Whether completing a small to large parking lot, subdivision, driveway or patch work, the 420B roller's industry-leading design affords friendly operator controls and easy-to-maintain serviceability.

- 24.5 hp (18.0 kW) Kubota Tier 4 Final Diesel Engine
- 2.8 to 3.2 Ton Operating Weight
- 9-Wheel Design with 1" (25.4 mm) Tire Overlap
- Front Tire Pairs Each Oscillate +/- 7°
- Servo-Controlled Hydrostatic Transmission
- 80 Gallon (303 l) Water Tank
- 4,500 lbs (2,041 kg) static weight
- Hinged Operator's Platform for Easy Engine Access
- Cushioned, Full Width Bench Seat
- Pressurized Water Spray System
- Hydrostatic Braking and Parking Brake

# 150 Tack Tank

# LeeBoy

## Performance Features:

The 150 Tack Distributor ideally serves the paving contractor dedicated to smaller projects. With a conservative 150 gallon capacity tank, this solution still boast of many features and functions of the larger units. Inclusive of a powerful Honda engine, the user-friendly design can either be trailer or skid mounted. Multiple additional options including in-cab controls or overnight heating can further enhance the end user's experience.

- 150 Gallon (568 l) Capacity Tank
- 4.8 hp (3.6 kw) Honda Engine
- 6' (1.8 m) Wand with On/Off Valve
- 40' (12.19 m) Heavy Duty Reel Hose Reel
- 2,775 lbs (1,256 kg) Loaded Weight
- Rear Tank Sampling Valve
- Two 54,000 BTU Propane Burners
- Trailer or Skid Mount Configurations
- Optional Accessories Available

## 150 Tack Distributor Specifications

# LeeBoy

Tank Size	150 gallons (567.8 l)	Hose and Reel	- .5" x 40' (13 mm x 12.19 m) heavy-duty recoil hose reel
Dimensions (Trailer Configuration)	- Length: 11' (3.35 m) - Width: 6' 6" (1.98 m) - Height: 7' 2" (2.18 m) - Shipping Weight: 1,556 lbs (705.7 kg)	Wand	- 6' (1.829 m) wand with cold handles - On/off valve - Removable spray tip
Dimensions (Skid Mount Configuration)	- Length: 6' 4" (1.93 m) - Width: 4' (1.21 m) - Height: 6' 6" (1.98 m) - Shipping Weight: 900 lbs (408 kg)	Fill Spout	10" x 10" (254 x 254 mm) with splash plate
Engine	Honda – 4.8 hp (3.6 kw)	Clean Out	- 4" (102 mm)
Capacities	- Fuel: 1 gallon (3.79 l)	Access Valve	- 1" (25 mm)
Tank Dimensions	- Length: 42.25" (1.07 m) - Width: 34" (.86 m) - Height: 30" (.76 m)	Optional Equipment	- Electric start (available on Honda-Gas and Hatz-Diesel engine) - 5 hp Hatz diesel engine (pull start) - Insulated tank - Auto ignition burners (only available with electric start engine) - Auto ignition burners with outfire protection (only available with electric start engines) - 8' (2.4 m) spray bar - Spray bar lift (only available on skid-mounted unit) - In-truck controls (requires 8' spray bar option) - Overnight heater - Surge brakes (only available on trailer mounted unit) - Pintle eye
Asphalt Pump	- Specially designed 7 gallons per minute (26.5 lmp) pump		
Heat System	- Two 54,000 BTU propane burners - One start burner - 30 lbs (13.6 kg) propane fuel tank		
Temperature Gauge	- 50 - 300° F (10 - 149° C)		
Flush Tank	- 7 gallons (26.5 l) tank with suck back valve

# 250 Tack Tank

# LeeBoy

## Performance Features:

Perfect for the all-inclusive commercial paving contractor, the 250 Tack Distributor provides a perfectly sized tank for small to large projects including parking lots, patching, driveways or soil stabilization. Daily task can be completed with ease by relying on the trouble-free Honda powered engine and the proven reliable user-friendly design. Uniquely configurable, the customizable options give the contractor the ability to create a solution specific to their exact needs.

- 250 Gallon (946 l) Capacity Tank
- 4.8 hp (3.5 kw) Honda Engine
- 6' (1.8 m) Wand with On/Off Valve
- 40' (12.19 m) Heavy-Duty Ratchet Hose Reel
- 4,500 lbs (2,041 kg) Loaded Weight
- Rear Tank Sampling Valve
- Two 54,000 BTU Propane Burners
- Trailer or Side Mount Configurations
- Electric Brakes
- Emergency Brake Bypass System
- Optional Accessories Available

# 500 Tack Tank

**LeeBoy**

## Performance Features:

Contractors who want to embrace both small and large-scale projects demand the practicality of the 500 Tack Tank. Proven reliable and easy-to-use, operators are given trouble-free Honda power and safety-designed electric brakes at both axles with emergency brakes away reassurance. Trailer or skid-mounted configurations allow commercial pavers with an efficient yet adequate method for tack coating on job sites. To make this offering even more spectacular, it can be customized using numerous options to fit your exact needs.

- 500 Gallon (1,892 L) Capacity Tank
- 4.8 hp (3.5 kW) Honda Engine
- 6" (1.5 m) Wand with On/Off Valve
- 40' (12.2 m) Heavy-Duty Recoil Hose Reel
- 7,270 lbs (3,298 kg) Loaded Weight
- Rear Tank Ramping Valve
- Two 54,000 BTU Propane Burners
- Trailer or Skid Mount Configurations
- Electric Brakes
- Emergency Brake-Away System
- Optional Accessories Available

# Challenger 7 Self Propelled Broom

**Rosco**  
LeeBoy Group

## Performance Features:

The Challenger 7 front-mounted broom exhibits all of the high-end features you could expect from a self propelled broom. Serving as a pleasurable amenity, the quick-change core system allows the brush to be changed swiftly with no tools required. Ergonomic joystick controls provide simple-to-use travel and broom functions while also granting a 3 foot turning radius for the ultimate maneuverability. In addition to an extra-heavy duty frame, the Challenger 7 features a high-raise lift to ensure easy trailer loading and unloading.

- 74 hp (55 kw) Cummins Tier 4 Final Diesel Engine
- 7,500 lbs (3,401 kg) weight
- Choice of 7' 6" (2.28 m) or 8' (2.43 m) Heavy Duty Frame with Poly Steel Tube Brush
- 150 gallon (568 l) Rear Mounted Brush Watering System
- Joystick Control for Travel and Broom Functions
- Hydraulic Drive
- Rear Steering for 3' (.91 m) Turning Radius
- Variable Brush Down-Pressure and Brush Speed Control
- Single Door ROPS Climate-Controlled Cab

# RB50 Self Propelled Broom

**Rosco**  
LeeBoy Group

## Performance Features:

The RB50 provides best-in-class, aggressive sweeping in a rugged design. This self-propelled broom features well-thought-out control placement and heightened visibility that makes this machine extremely easy to operate for drivers of all experience levels. Perfect for general application sweeping to highway use, the RB50 incorporates the notable quick-change brush system which allows one person the ability to switch the brush core within minutes.

- 74 hp (55 kw) Hatz Tier 4 Final Diesel Engine \*
- 6,730 lbs (3,048 kg) weight with water
- 7' 6" (2.28 m) Diameter Heavy Duty Frame with PolyTube Brush
- Optional 150 gallon (568 l) Tank
- Joystick Control for Travel and Broom Functions
- Hydrostatic Drive
- 10' (3.05 m) Inside & 32' 5" (9.91 m) Outside Turning Radius
- Variable Brush Down Pressure Control
- Canopy or Climate-Controlled Cab Configurations

# SweepPro II Self Propelled Broom

**Rosco**  
LeeBoy Group

## Performance Features:

The broom for professionals, the SweepPro II offers many advantages linked to simple operation and superior sweeping action. The multifunctional joystick control lever combined with fingertip controls provide precision movement during operation. The standard configuration features wrap around windows that give the operator remarkable visibility while residing in the comfortable fully-enclosed cab. Requiring only one person, the quick-change core system permits the replacement of a bush in minutes limiting downtime.

- 74 hp (55 kw) Isuzu Tier 4 Final Diesel Engine
- 6,900 lbs (3,129 kg) weight with water
- 7' 6" (2.28 m) Diameter Heavy-Duty Frame with PolyTube Brush
- Joystick Control for Travel and Broom Functions
- Hydrostatic Drive
- Rear Steering for 6' 2" (1.87 m) Turning Radius
- Variable Brush Down Pressure Control
- Fully-enclosed ROPS Cab with Defroster Fan
- Ergonomic Controls

- a. 10' (3.04 m) to 15' (4.57 m) hopper
- b. Optional individual gate controls that are operated from the control station via electric over hydraulic
- c. Hopper has 2.375" (60.325 mm) agitator
- d. Spread roll diameter of 6.625" (168.275 mm), 0.25" (6.35 mm) thick wall
- e. Spread roll maximum speed 132 rpm's
- f. Full length rejection screen on the spread hopper, maximum opening of 1" (25.4 mm)

Y\_\_\_ N\_\_\_

**7. Rear Hopper:**

- a. Two independent manual flow control gates easily accessible from operator's station for the conveyors
- b. Skirting in the receiving hopper to minimize spillage
- c. Capacity: 4 cubic yards (3.05 cubic m) struck
- d. Receiving width: maximum 11' 10" (3.6 m), minimum 9' 6" (2.89 m)

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
  
Y\_\_\_ N\_\_\_

**8. Front Axle:**

- a. 25,000 lbs (11,339 kg) rated capacity, oscillating type
- b. 24.98:1 ratio, wet disc brakes, 5,400 lbs (2,449 kg) application
- c. Powered by 9.82 cubic in (160,921 cubic mm), rev two-speed hydraulic drive motor
- d. Automotive type, drive shaft axle connection between axle and hydraulic drive motor

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

**9. Rear Axle:**

- a. Two-wheel drive system
- b. Minimum 22,500 lbs (10,205 kg) rated capacity
- c. 16.5" (.419 m) diameter, 7" (177.8 mm) wide brakes, manual slack adjusters
- d. Drum type brakes, spring applied and hydraulic released
- e. Minimum 7" (177.8 mm) ground clearance

**10. OPTIONAL REAR AXLE:**

- a. Four-wheel drive system
- b. Minimum 32,000 lbs (14,514 kg) rated capacity
- c. 16,000 lbs (7,257 kg) torque hubs for traction assistance
- d. Electronically controlled rear torque hubs from operator's control station
- e. Spring applied and hydraulic released brakes
- f. Minimum 7" (177.8 mm) ground clearance

**11. Tires:**

- a. Tire tracking front: 6' 11" (2.1 m)
- b. Tire tracking rear: 7' 7" (2.31 m)
- c. Tires standard size: 385/65R 22.5
- d. Tires special: 255R/70 x 22.5, low profile
- e. Tires optional: 11:00 R x 22.5 radial
- f. Wheels: Budd-disc style

**12. Conveyor Belts:**

Y___ N___	a. Two independently operated, aggregate feed conveyors
Y___ N___	b. Adjustable tail pulleys with pillow block style bearings, grease zerks for each bearing
Y___ N___	c. Auto and manual system controlled from touch pad system integrated with Plus+1 system
Y___ N___	d. Belt width: 20" (.508 m)
Y___ N___	e. Speed: 0 to 550' per minute (167.64 m per minute)
<b>13. Truck Hitch:</b>	
Y___ N___	a. Electric over hydraulically adjustable
Y___ N___	b. Electronically controlled from the driver's station
Y___ N___	c. Electronic over hydraulic released locking mechanism
<b>14. Operator's Area:</b>	
Y___ N___	a. One control console easily moved from left to right sides
Y___ N___	b. Appropriate foot brake control
Y___ N___	c. Parking brake electronically controlled on main control console
Y___ N___	d. Operator's deck walkway on right, appropriate controls for second operator to monitor conveyors and spread hopper
Y___ N___	e. Toolbox and access to engine and hydraulic components accessible from operator's deck
Y___ N___	f. Cushioned and adjustable seat
<b>15. Steering:</b>	
Y___ N___	a. Fully hydraulic, orbital type
Y___ N___	b. Independent of drive system
<b>16. Brakes:</b>	
Y___ N___	a. Two wheel drive: Front axle hydraulic multiple wet disc type
Y___ N___	b. Rear axle hydraulic actuated brakes, spring applied and hydraulic released
	<i>OR</i>
Y___ N___	c. <i>OPTIONAL Four wheel drive: Front and rear axle hydraulic multiple wet disc type</i>
<b>17. Instrumentation:</b>	
Y___ N___	a. Monitored thru DP 610 LCD display
Y___ N___	b. Gate controls, working lights, turn signals, hazard lights and beacon to be separated from Plus+1 system
<b>18. Plus 1 Monitor:</b>	
Y___ N___	a. Plus+1 CAN Bus control and onboard diagnostic system
Y___ N___	b. DP 610, 6.5" (165.1 mm), 400 x 240 pixel color graphic display
Y___ N___	c. Gauges include engine water temperature, engine oil pressure, tachometer, fuel gauge, voltmeter, hydraulic temperature, hour meter and volt meter

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

#### 19. Control Functions:

- a. Hydrostatic control system
- b. Manual mode: Operator can vary forward/reverse speeds of unit with joystick
- c. Speed ranges: 0 to 19 mph (0 to 30.5 kph), high range  
0 to 10 mph (0 to 16 kph), low and reverse ranges
- d. Application rate control:
  - i. Computer monitors the actual speed of the spreader, varies gate opening to maintain the set application rate
  - ii. Plus+1 CAN Bus system with auto-rate control monitors actual speed of the spreader regardless of load conditions
  - iii. Programmable application rate in lbs per sq. yard
  - iv. Include rock size, type, chipping width, feet per minute and accumulative totals
  - v. Ability to access memory settings service screens, system faults, engine faults, machine settings, calibration settings and display units in English or metric
  - vi. Control switches for the working lights, turn/hazard signals and beacons

#### 21. Optional Equipment:

- a. 11', 12', 13', 13' 6", 14', 15' (3.35 m, 3.65 m, 3.96 m, 4.11 m, 4.26 m, 4.57 m) aggregate spread hopper
- b. 11', 12', 13', 13' 6", 14', 15' (3.35 m, 3.65 m, 3.96 m, 4.11 m, 4.26 m, 4.57 m) aggregate spread hopper with individual gate controls
- c. Front hopper walkway and railing (all widths)
- d. Amber strobe light, handrail mounted
- e. Umbrella for each operator's station

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

#### 22. Training, Support and Company

- a. Training and support manuals
- b. Optional on-site operator training by Dealer
- c. One-year, unlimited hours warranty against any manufacturer defects
- d. Extended warranty available
- e. 50+ years manufacturing experience
- f. ISO 9001 Certified
- g. Manufactured in the USA

# CSH Hydrostatic Chip Spreader

**Rosco**  
LeeBoy Group

## Performance Features:

With superior automation of the hydrostatic chip spreader, the CSH allows the end user to place materials precisely using a computer controlled system. To ensure coverage is consistently smooth, immediate adjustments can be made by the operator using the daylight readable ergonomic computer screen. With its paver-style folding hopper design and enhanced clean out operations, the CSH continues to serve as a dependable, low maintenance solution.

- Hydrostatic Drive
- 10' to 10' (3.05 to 4.57 m) Spread Hopper
- 202 hp (150.6 kw) CAT 13 Diesel Engine
- Automatic Conveyor Belt Controls
- Automatic Application Rate Control
- Swing-Over Control Console
- Contoured Folding Hopper Wings
- 4 Cubic Yards (3.05 Cubic Meter) Capacity Material Hopper
- Maintains a Consistent Ground Speed for Smooth Coverage
- Features That Allow For Excellent Clean Out Ability
- Low Maintenance Performance

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

**7. Auxiliary Pump System:**

- a. Capacity to operate the hydraulic gate cylinder, hopper extension , augers, conveyors and spread roll on aggregate hopper
- b. Auxiliary circuits have minimum 500 psi relief setting for the hydraulic gate cylinder
- c. 2,500 psi conveyor

Y\_\_ N\_\_

Y\_\_ N\_\_

**8. Fan Drive System:**

- a. 45 cc/rev pump to provide optimal flow to the fan drive and steering circuit
- b. 1,325 psi orbital steering

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

**9. Spread Hopper:**

- a. 0' to 16' (0 to 4.87 m) hopper
- b. Individual gate controls that are operated from the control station via electric over hydraulic
- c. 12" (.304 m) augers
- d. Spread roll diameter of 6.625" (168.275 mm), 0.25" (6.35 mm) thick wall
- e. Spread roll maximum speed approximately 150 rpms
- f. Full length rejection screen on the spread hopper, maximum opening of 1" (25.4 mm)
- g. Capacity: 1 cubic yards (.764 cubic m) per side

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

**10. Rear Hopper:**

- a. Two independent manual flow control gates easily accessible from operator's station for the conveyors
- b. Skirting in the receiving hopper to minimize spillage
- c. Capacity: 3.5 cubic yards (2.67 cubic m) struck
- d. Receiving width: maximum 11' 10" (3.6 m), minimum 9' 6" (2.89 m)

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

**11. Front Axle:**

- a. 52,900 lbs (23,995 kg) rated capacity, oscillating type
- b. 24.97:1 ratio, wet disc brakes, 5,400 lbs (2,449 kg) application
- c. Powered by 9.82 cubic in (160,921 cubic mm), rev two-speed hydraulic drive motor
- d. Automotive type, drive shaft axle connection between axle and hydraulic drive motor

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

**12. Rear Axle:**

- a. Two-wheel drive system
- b. Minimum 22,500 lbs (10,205 kg) rated capacity
- c. 16.5" (.419 m) diameter, 7" (177.8 mm) wide brakes, manual slack adjusters
- d. Drum type brakes, spring applied and hydraulic released
- e. Minimum 7" (177.8 mm) ground clearance

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

Y\_\_ N\_\_

**13. Tires:**

- a. Track width front: 6' 3" (1.9 m)
- b. Track width rear: 6' 9" (2.05 m)
- c. Tires standard size: 385/65R 22.5
- d. Wheels: budd-disc style

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

#### 14. Conveyor Belts:

- a. Two independently operated, aggregate feed conveyors
- b. Adjustable tail pulleys with pillow block style bearings, grease zerks for each bearing
- c. Auto and manual system controlled from touch pad system integrated with Plus+1 system
- d. Belt width: 20" (.508 m)
- e. Speed: 0 to 550' per minute (167.64 m per minute)

#### 15. Truck Hitch:

- a. Electric over hydraulically adjustable
- b. Electronically controlled from the driver's station
- c. Electronic over hydraulic released locking mechanism
- d. Spring loaded, hydraulically adjustable with hydraulic release

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

#### 16. Operator's Area:

- a. One full console on left side, 15" (38.1 cm) slide out platform for optional field of view
- b. Right hand remote operator control
- c. Appropriate foot brake control
- d. Parking brake electronically controlled on main control console
- e. Access to engine and hydraulic components accessible from operator's deck
- f. Cushioned and adjustable seat

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

#### 17. Steering:

- a. Fully hydraulic, orbital type
- b. Independent of drive system

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

#### 18. Brakes:

- a. Two wheel drive: Front axle hydraulic multiple wet disc type
- b. Rear axle hydraulic actuated brakes, spring applied and hydraulic released

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

#### 19. Instrumentation:

- a. Plus+1 CAN Bus control and onboard diagnostic system
- b. DP 710 color graphic display, 7" (177.8 mm), 800 x 480 pixel
- c. Gauges include engine water temperature, engine oil pressure, tachometer, fuel gauge, DEF fluid, voltmeter, hydraulic temperature, hour meter and volt meter

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

#### 20. Control Functions:

- a. Hydrostatic control system
- b. Manual mode: Operator can vary forward/reverse speeds of unit with joystick
- c. Speed ranges: 0 to 20 mph (0 to 32.1 kph), high range  
0 to 10 mph (0 to 16 kph), low and reverse ranges
- d. Application rate control:

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y__ N__	i. Computer monitors the actual speed of the spreader, varies gate opening to maintain the set application rate
Y__ N__	ii. Plus+1 CAN Bus system with auto-rate control monitors actual speed of the spreader regardless of load conditions
Y__ N__	iii. Programmable application rate in lbs per sq. yard
Y__ N__	iv. Include rock size, type, chipping width, feet per minute and accumulative totals
Y__ N__	v. Ability to access memory settings service screens, system faults, engine faults, machine settings, calibration settings and display units in English or metric
Y__ N__	vi. Control switches for the working lights, turn/hazard signals and beacon
Y__ N__	<b>21. Additional Standard Equipment:</b>
Y__ N__	a. Temperature monitored hydraulic oil cooler
Y__ N__	b. Two wheel drive, front wheel drive
Y__ N__	c. Horn
Y__ N__	d. Backup alarm
Y__ N__	e. LED turn signals, work lights and beacon
Y__ N__	f. Remote camera for hitch
Y__ N__	g. Pressure transducers
Y__ N__	<b>22. Optional Equipment:</b>
Y__ N__	a. All-wheel drive system
Y__ N__	b. Engine options – consult dealer/factory
Y__ N__	c. Dual operator consoles with slides
Y__ N__	d. Chip spreader telemetric system
Y__ N__	e. Hopper vibrators
Y__ N__	f. Tool and storage box
Y__ N__	g. Umbrella, quantity 2
Y__ N__	<b>23. Training, Support and Company</b>
Y__ N__	a. Training and support manuals
Y__ N__	b. Optional on-site operator training by Dealer
Y__ N__	c. One-year, unlimited hours warranty against any manufacturer defects
Y__ N__	d. Extended warranty available
Y__ N__	e. 50+ years manufacturing experience
Y__ N__	f. ISO 9001 Certified
Y__ N__	g. Manufactured in the USA

# CSV Variable Width Chip Spreader

**Rosco**  
LeeBoy Group

## Performance Features:

Serving as the most-advanced chip spreader in our product line, the CSV continues our company's commitment to the preservation industry. The variable width spread hopper and smaller overall footprint provide flexibility that enables chipping within confined areas such as urban routes. Special consideration has been given to the operator's comfort, safety and visibility making this equipment extremely enjoyable to operate. Given the raw power of this unit, the quality of the finished product remains the same even in areas with rough, steep terrain.

- Variable Width Spread Hopper, 1' to 16' (304 - 4.8 m)
- No Permit Load, 8' 6" (2.59 m) Maximum Transport Width
- 275 hp (205 kw) Cummins Tier 4 Final Diesel Engine
- Hydraulic Front Wheel Drive Propell System
- Reversible Cooling Fan for Cooling System Maintenance
- Application Rate Control, Even While Chipping
- 12' (3.04 m) Abrasion-Resistant Augers
- 3.5 Cubic Yards (2.6 Cubic Meter) Capacity Material Hopper
- Left Side Full Controls, Right Side Remote Control Station
- Features That Allow For Excellent Clean Out Ability
- Low Maintenance Performance

## Product Specifications

# Rosco Maximizer 2B Distributor

The following specifications are based on the Rosco Maximizer 2B Distributor manufactured by LeeBoy Group. Because of continuous equipment research and development, we reserve the right to change these specifications. For more information, questions or assistance preparing specifications, please contact your local LeeBoy sales representative.

Comply Y___ N___ Y___ N___ Y___ N___ Y___ N___	<b>1. Dimensions</b> a. Length: Depends on type of truck purchased and options selected b. Width: Depends on type of truck purchased and options selected c. Height: Depends on type of truck purchased and options selected d. Weight: Depends on type of truck purchased and options selected
Y___ N___	<b>2. Capacity:</b> a. 1,050 gallons (3,974 l) to 4,250 gallons (16,088 l)* *Gallons listed are maximum tank capacities. Recommended tank capacities may be limited by 1.) Thermal expansion of materials. 2.) Density of materials. 3.) Truck/axle load ratings. For more detail, please contact your local Rosco Sales Representative or Dealer.
Y___ N___ Y___ N___ Y___ N___ Y___ N___ Y___ N___	<b>3. Tank:</b> a. Meets all applicable Federal DOT tank regulations b. ASTM A569 grade mild steel with minimum 10 gauge (3.4 mm) shell and 7 gauge (4.5 mm) flat heads c. Flanged reinforced and welded to shell inside and outside of tank d. Seams are all electrically welded e. Thermometers: One 4" (102 mm) dial thermometer One internal pencil thermometer
Y___ N___ Y___ N___	<b>4. Insulation:</b> a. 2" (51 mm) rock wool with spacers to prevent compression b. Clips to secure position of insulation and protected by an aluminum jacket
Y___ N___ Y___ N___ Y___ N___ Y___ N___ Y___ N___ Y___ N___	<b>5. Manhole:</b> a. Weather tight and safety relieving cover with basket-type strainer b. Inside splash guards c. Steel measuring stick d. Tank vent and overflow e. Manhole opening: 22" (.559 m) in diameter f. Overflow: 3" (76 mm) in diameter
Y___ N___ Y___ N___ Y___ N___	<b>6. Sump:</b> a. At the rear of tank b. Cleanout plug and suction line from the pump includes tank cutoff valve c. Sump size: 4" (102 mm) in diameter
Y___ N___	<b>7. Heat System:</b> a. Two diesel fired burners with electric ignition and heat limit controls

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- b. Two, u-type, high temperature flue pipes running the length of the tank
- c. Single exhaust stack is constructed of stainless steel and includes a rain cover
- d. Heating flue size: 8" (203 mm) in diameter throughout
- e. Burners: 560,000 BTU per burner, per hour capacity

**8. Asphalt Pump:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Viking, positive displacement pump
- b. Rotary gear type with built-in relief valve for safety
- c. Asphalt pump driven by low speed high torque fixed displacement hydraulic motor and connected by a flexible coupling
- d. Pump: 400 gallons per minute (1,514 l per minute)

**9. Distributing Lines:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. High temperature, flexible metal hoses
- b. Steel pipe with ball and socket joint is not acceptable

**10. Clean Out:**

Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_  
Y\_\_\_ N\_\_\_

- a. Enviro-flush system allows solvent circulation through asphalt pump, valves, distributing lines and spraybar
- b. Cleanout material returned to enviro-flush tank for later use or disposal
- c. Flush tank: 25 gallons (95 l)
- d. Enviro-Flush tank: 25 gallons (95 l)

- i. Selectable readouts include FPM, GPM, total feet sprayed, total gallons sprayed, total square yards sprayed, flow and speed calibration, application rate, tank temperature, hour meter and spraybar width (English and metric units can be selected for the rate controls)
- j. Controller provides accurate applications regardless of changes in speed or spraybar width during operations
- k. Includes GPS ground speed sensor
- l. Convenient external controls mounted on rear fender

### 13. Transmission:

- a. Hydrostatic, front live power driven by engine crankshaft
- b. The hydrostatic pump is an infinitely variable, displacement axial piston pump
- c. Hydraulic reservoir: 20 gallons (76 l) with temperature and sight gauge and level indicator

### 14. Additional Standard Equipment:

- a. Hand spray wand with a 25' (7.6 m) rubber hose
- b. Front and rear dial contents gauge
- c. 4" (102 mm) dial and internal pencil thermometers
- d. ICC clearance lights and reflectors
- e. Sample valve
- f. Back-up alarm
- g. Mud flaps
- h. Ladder and platform assembly
- i. Grease gun

### 15. Optional Equipment:

- a. Installation for a customer supplied truck chassis
- b. PTO transmission (required if not using front live power)
- c. LPG burner in lieu of diesel burner [includes 52 gallon (197 l) LP tank]
- d. Diesel burners with electronic ignition, 100% outfire protection and heat control
- e. Heated asphalt pump
- f. Washdown system with pump and hose, self-winding hose reel
- g. Spraybar extensions, 1' (.305 m) lengths (max 4 each)
- h. Spraybar extensions, 2' (.610 m) lengths (max 2 each)
- i. Loading hose, 3" x 15' (76 mm x 4.572 m) flexible steel with quick couplers
- j. Loading hose, 3" x 15' (76 mm x 4.572 m) rubber with quick couplers
- k. Electric overnight heat
- l. Radar horn in lieu of GPS

### 16. Training, Support and Company

- a. Training and support manuals
- b. Optional on-site operator training by Dealer
- c. One-year, unlimited hours warranty against any manufacturer defects
- d. Extended warranty available
- e. 50+ years manufacturing experience
- f. ISO 9001 Certified
- g. Manufactured in the USA

# Maximizer 2B Asphalt Distributor

**Rosco**  
LeeBoy Group

## Performance Features:

Applying a tack coat requires a sophisticated piece of equipment like the Maximizer 2B to ensure a uniform spray. The folding spray bar allows application without extensions and easily adjust to provide even coverage of triple overlap fan spray pattern. Trusting in the proven reliability and solid performance that can only be found in a Viking asphalt pump coupled with our proprietary spraying algorithms, the Maximizer 2B yields long-lasting, top notch performance for all application types.

- 12' (3.7 m) Fully Circulating Folding Spraybar
- Application Without Extensions
- Automatic In-Cab Controls
- Internal Spraybar Valves
- 400 Gallons Per Minute (1.5 M lpm) Viking Asphalt Pump
- End-of-Flux Clean Out System
- Accurate Application Regardless of Spraybar Width or Speed
- 12 Presets for Application Rate
- GPS speed and distance monitoring

# Maximizer 3B Asphalt Distributor

**Rosco**  
Leadbay Group

## Performance Features:

With a larger fully circulating extending spray bar, the Maximizer 3B has the ability to cover a wide area in an extremely efficient manner. Admired by contractors and municipalities alike, this trusted machine always delivers an accurately consistent end result. With the aid of a large color monitor, operators can monitor vitals, oversee the variable width and rate control or engage the enviro-flush clean out system among others. The Maximizer 3B is a highly versatile piece of equipment designed with the end user in mind.

- 8' to 16' (2.4 to 4.9 m) Fully Circulating Extending Spraybar
- Automatic In-Cab Controls
- Internal Spraybar Valves
- 400 gallons per minute (1,514 lpm), Viking Asphalt Pump
- Enviro-Flush Clean Out System
- Straight Line Start and Stop
- Accurate Application Regardless of Spraybar Width or Speed
- 12 Presets for Application Rate
- GPS Speed and Distance Monitoring

# Max 3B Asphalt Distributor Specifications

**Tank Capacity** - 1,050 gallons (3,974 l) to 4,250 gallons (16,088 l)

\* Gallons listed are maximum tank capacities. Recommended tank capacities may be limited by 1) Thermal expansion of materials. 2) Density of materials. 3) Truck/axle load ratings. For more detail, please contact your local Rosco Sales Representative or Dealer.

**Tank**

- Meets all applicable Federal DOT regulations
- 10 gauge (3.4 mm) steel shell
- 7 gauge (4.5 mm) steel reinforced, flanged heads
- Seams are electrically welded

**Insulation**

- 2" (51 mm) rock wool with spacers to prevent compression
- Protected by an aluminium jacket

**Heat System**

- Two diesel fired burners with electric ignition
- 560,000 BTU per burner, per hour capacity

**Asphalt Pump**

- Viking, positive displacement pump
- 400 gallon per minute (1,514 lpm)

**Clean Out**

- Enviro-flush allows circulation through asphalt pump, valves, distributing lines and spraybar
- Material returned to tank for later use or disposal
- 25 gallons (95 l) capacity

**Spraybar**

- Brass, slotted nozzles and valves are non-clogging
- Quick-disconnect allows operator to change spray widths in 4" (102 mm) increments
- 16' (4.87 m) full circulating bar, extendable spraybar
- Two 8' (2.43 m) independently controlled sections
- Nozzles: spaced 4" (102 mm) centers on spraybar
- Each spray nozzle automatically turns on when extended and off when retracted

**Operator's In-Cab Controls**

- Plus+ CAN Bus control and onboard diagnostics
- 7" (177 mm) 800 x 480, high-res color display
- Automatic application rate control
- Settings for flow, speed calibration, spraybar width, spraybar on/off control by section
- Up to 12 application rate preset combinations
- Readouts include FPM, GPM, total feet sprayed, total gallons sprayed, total sq. yards sprayed, flow and speed calibration, application rate, tank temperature, hour meter, spraybar width

**Additional Standard Equipment**

- Hand spray wand with a 25' (7.6 m) rubber hose
- Front and rear dial contents gauge
- 4" (102 mm) dial, internal pencil thermometers
- Sample valve
- Back up alarm
- Ladder and platform assembly
- Rear bumper to protect spraybar

**Optional Equipment**

- Installation for a customer supplied truck chassis
- PTO transmission (required if not using front live power)
- LPG burner in lieu of diesel burner [includes 52 gallon (197 l) LP tank]
- Diesel burners with electronic ignition, 100% out fire protection and heat control
- Heated asphalt pump
- Washdown system with pump and hose, self-winding hose reel
- Loading hose, 3" x 15' (76 mm x 4.572 m) flexible steel with quick couplers
- Loading hose, 3" x 15' (76 mm x 4.572 m) rubber with quick couplers
- Electric overnight heat
- Radar horn in lieu of GPS

## Product Specifications

## Rosco RA-400 Patcher

**The following specifications are based on the Rosco RA-400 Patcher manufactured by LeeBoy Group. Because of continuous equipment research and development, we reserve the right to change these specifications. For more information, questions or assistance preparing specifications, please contact your local LeeBoy sales representative.**

Comply	1. Dimensions:
Y__ N__	a. Length: 26' (7.9 m) with boom retracted 38' 5" (11.7 m) with boom fully extended
Y__ N__	b. Width: 8' 6" (2.59 m)
Y__ N__	c. Height: 10' (3 m)
Y__ N__	d. Weight: 18,000 lbs (8,164 kg) with standard chassis
Y__ N__	2. Chassis:
Y__ N__	a. Cab-over Peterbilt 220 (or equivalent)
Y__ N__	b. GVWR: 33,000 lbs (14,969 kg)
Y__ N__	c. Front axle: 12,000 lbs (5,443 kg)
Y__ N__	d. Rear axle: 21,000 lbs (9,525 kg), rear springs rated for 23,000 lbs (10,433 kg)
Y__ N__	e. Engine: 240 hp (179 kw) @ 2,400 rpm diesel engine
Y__ N__	f. Wheelbase: 164" (4.165 m)
Y__ N__	g. Cab-to-axle: 153" (3.88 m)
	*Rosco to review truck specifications prior to bid and/or order
Y__ N__	3. Hydraulics:
Y__ N__	a. Dual hydraulic pump
Y__ N__	b. 28 gallons per minute (105.9 l per minute) for blower function
Y__ N__	c. 9 gallons per minute (34 l per minute) for all other functions driven from auxiliary engine
Y__ N__	d. Hydraulic tank reservoir: 20 gallons (75.7 l)
Y__ N__	4. Auxiliary Engine:
Y__ N__	a. Output (gross intermittent): 65 hp (48.4 kw) @ 2,600 rpm
Y__ N__	b. Tier 4 Final, naturally aspirated 4 cylinder Kubota diesel engine
Y__ N__	c. In-cab aux engine controls at operator's station with tachometer, hour meter and warning system
Y__ N__	d. Engine info:
	i. Bore: 3.43 in (87 mm)
	ii. Stroke: 4.33 in (110 mm)
	iii. Displacement: 159.5 cubic in (2.615 l)
	iv. Fuel consumption: 4.54 gallons per hour (17.18 l per hour)@ max torque
	v. Alternator: 60 amp
Y__ N__	5. Air System:
Y__ N__	a. High volume, low pressure. Positive displacement blower driven by truck hydraulics motor
Y__ N__	b. Capable of 850 cfm @ 2,850 rpm
Y__ N__	c. Hydraulically-driven blower with variable CFM from 0-850

#### 6. Aggregate System:

- a. Low profile, 5 cubic yard (3.82 cubic m) hopper, or 11,000 lbs (4,990 kg)
- b. Rectangular welded 10' 3" x 7' (3.12 x 2.13 m) aggregate hopper
- c. In-cab controlled vibration system
- d. Dual electric over hydraulic activated hopper lids, rear access open/close switch
- e. Cab controlled adjustable, feed slide gate meters aggregate flow
- f. System will accept aggregates up to .75" (19 mm)
- g. Plus+1 system store settings: rock flow, emulsion flow and air flow
- h. VORTEC: Vacuum Operated Rock Transfer Emulsion Coating system
  - i. System utilizes no mechanical or moving parts to move aggregate
  - ii. Ease of access to clean and service the slide gate and sub systems
  - iii. Conveyors and/or paddle feeders are NOT acceptable

#### 7. Liquid Asphalt Emulsion Tank:

- a. Insulated liquid asphalt emulsion tank
- b. Overnight heating by two 4,500 watt, 240 volt thermostatically controlled heater elements, located in water heat exchanger tube
- c. Alternate heat source provided to maintain heat on work site, regulated automatically to prevent over or under heating of materials
- d. Asphalt line heated to prevent clogging during operation
- e. Tank mounted 5" (127 mm) dial thermometer and emulsion level indicator both visible from cab
- f. Tank size: 300 gallons (1,135.6 l)
- g. Tank fill opening: 12" (305 mm)

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

#### 8. Asphalt Emulsion Feed and Flush System:

- a. Air pressurized system to deliver sufficient asphalt to completely cover aggregate at full feed capacity
- b. Delivery system capable of maintaining 60 psi
- c. Flush system 30 gallon (113.5 l) minimum capacity with provisions for storing used flush material
- d. Asphalt tank is equipped with a three-way valve for flush, delivery and shut-off

#### 9. Operator Controls:

- a. One person operation from driver's seat
- b. All patching functions are in the cab, including cleaning, tack coating, patching and dust coating
- c. DP 200 LCD display controlled from Plus+1 CAN Bus system in cab monitors boom location, blower speed, rock and emulsion flow, hydraulic temperature, emulsion level and system faults
- d. Single joystick controls: Boom swing, extend/retract and push button for up/down
- e. Push buttons operate: Blow out mode, emulsion on/off, aggregate gate on/off and extension/retraction
- f. Control center includes: Auxiliary engine on/off, blower on/off, blower inc/dec, rock flow inc/dec and emulsion inc/dec
- g. Engine alarm, tachometer, pre-heat, engine start/on/off, rpm min/max
- h. Boom auto stow and override

Y__ N__	i. Vibrator on/off, beacon light switch, hour meter, circuit breakers
Y__ N__	j. Separate arrow board control panel
Y__ N__	<b>10. Arrow Board:</b>
Y__ N__	a. Multi-function arrow board mounted on rear
	b. Size: 30" x 60" (.762 x 1.524 m)
Y__ N__	<b>11. Telescopic Boom:</b>
Y__ N__	a. Front-corner mount boom storage system
Y__ N__	b. Eliminating windshield obstruction in stow position
Y__ N__	c. One piece, double acting boom with three-stage telescoping aggregate delivery tube
Y__ N__	d. Cable/hose carrier, heated water lines with individual nozzle shut-offs
Y__ N__	e. Double acting swing and hoist hydraulic cylinders
Y__ N__	f. Position censored safety system that does not allow boom swing into traffic beyond center line
Y__ N__	g. Capable swing operations to shoulder and center with caution
Y__ N__	h. Reach, retracted: 7' 5" (2.3 m)
Y__ N__	i. Reach, extended: 11' 5" (3.5 m)
Y__ N__	j. Patching area: 42 ft <sup>2</sup> (12.8 m <sup>2</sup> )
Y__ N__	<b>12. Patch (on the Go):</b>
	a. Electric hydraulic flow control for independent operation allows patching while moving at slow speeds
Y__ N__	<b>13. Optional Equipment:</b>
Y__ N__	a. Back-up camera with in-cab color display
Y__ N__	b. Larger arrow board 48" x 96" (1.2 x 2.4 m)
Y__ N__	c. LED night working lights package
Y__ N__	d. LED lights, stop, turn signals and tail lights
Y__ N__	e. 240V heater conversion in lieu of 120V
Y__ N__	f. Emergency triangle kit, flare, fire extinguisher
Y__ N__	g. Jet flush system
Y__ N__	<b>14. Training, Support and Company</b>
Y__ N__	a. Training and support manuals
Y__ N__	b. Optional on-site operator training by Dealer
Y__ N__	c. One-year, unlimited hours warranty against any manufacturer defects
Y__ N__	d. Extended warranty available
Y__ N__	e. 50+ years manufacturing experience
Y__ N__	f. ISO 9001 Certified
Y__ N__	g. Manufactured in the USA

# RA-400 Patcher

**Rosco**  
LeeBoy Group

## Performance Features:

The ultimate output of the RA-400, which is capable of correcting over 200 road defects in a single day by a single individual, has been deployed by contractors looking to maximize productivity while finding a cost-effective patching solution. The driver operated joystick performs a four-step spray injection process typically in less than one minute per repair. Including one of the largest emulsion tanks available in the market, the RA-400 patching boom extends and retracts providing a wide patching range with minimal required maintenance.

- Front-Corner Mounted Boom for Greater Working Range
- VORTEC System (Vacuum Operated Rock Transfer Emulsion Control)
- 10' 3" x 7' (3.12 x 2.13 m) Rectangular Aggregate Hopper
- 300 Gallon (1135 l) Liquid Asphalt Emulsion Tank
- Can-Bus Plus 1 In-Cab Control System
- One Person Operation, Easy-to-Use Joystick Controls
- Industry Leading Hydraulic "Patch on the Go" System
- Tier 4 Final 65 HP (48.4 kw) Kubota Diesel Auxiliary Engine
- 30" x 30" (762 x 762 mm) Rear Mounted Arrow Board

2. No
3. No
4. 60-120 Days ARO (Unit Specific)
5. 53
6. No \*See Extended Warranty Service Plans that are included in Product Catalog.
7. No
8. LeeBoy is an "all in one" manufacture with the exception of the units that require a chassis. All units, including the units mounted on the chassis, are built at the factory which is located in Lincoln, NC. Chassis are purchased on a case by case basis depending on the unit that will be purchased. LeeBoy will purchase the chassis to the specific spec from the State of Oklahoma and chassis lead time is approximately 90 Days from the chassis manufacturer.
9. \*Included in Product Catalog
10. LeeBoy and all associated brands are currently renewing their listing on the GSA Schedule and our company is proudly a NJPA Awarded Contract Holder. LeeBoy participates yearly in an average of 7 domestic trade shows while also being represented at local trade shows by our Dealer network - totaling as many as 100+ events a year – many with a federal and local governmental focus. Promotional and additional marketing items include but not limited to: Print materials, National and International Advertisements, White Papers, Technical Articles, Website ([www.LeeBoy.com](http://www.LeeBoy.com)), Social Media (Facebook, Twitter, Linked In, Google Plus, YouTube) and Webinars.

# Tru-Pac 915B Pneumatic Roller

**Rosco**  
LeeRay Group

## Performance Features:

The Tru-Pac 915B pneumatic roller provides a versatile, center-point articulating roller for asphalt paving, chip sealing and soil applications. Easy to operate and fully hydrostatic, this roller's low profile water tank enhances operator visibility and safety. The Tru-Pac 915B features all-wheel oscillation to increase the kneading action during compaction and can be easily ballasted with water, sand or steel in the front and rear compartments. This machine provides consistent tru-tracking compaction in forward, reverse and especially when turning.

- 74 hp (55 kw) Cummins Tier 4 Final Diesel Engine
- Ballastable from 6.7 to 15 Tons
- 9-Wheel Design with 1/2" (12.7 mm) Tire Overlap
- All Wheels Oscillate Individually or in Pairs 11.5°
- Responsive Hydrostatic Drive
- 1150 Gallons (568 l) Tank
- 13,100 lbs (5,942 kg) static weight
- Articulating Frame for Tru-Tracking Compaction
- Operator's Suspension Seat with Slide, Swivel and Belt
- Pressurized Water System
- Dynamic Braking and Parking Brake

# DS Water Truck

**Rosco**  
LeeBoy Group

## Performance Features:

Used in a multitude of applications including dust abatement, street cleaning and water transporting, the DS water truck has been engineered for long-lasting, strong performance. Contractors find the DS water truck to be an essential everyday staple in their operations due to its ability to fill complementary equipment such as rollers as well as to keep dust at manageable levels. This popular piece of equipment can also be found in rental fleets as a revenue generating solution that is easy-to-operate by any end user.

- Tank Capacities of 2,000, 3,000 or 4,000 Gallons
- 550 Gallons Per Minute (3.0 GPM)
- Direct PTO Drive from Truck Transmission
- Heavy-Duty Tank Construction
- Epoxy-lined Tank for Long Life
- Two Sprinkler Heads Mounted Horizontally at Truck Front
- Two Sprinkler Heads Mounted Horizontally at Truck Rear
- One Midship Nozzle
- Versatile Truck for Various Applications

# CB95 Self Propelled Broom

## Performance Features:

The CB95 provides best-in-class, aggressive sweeping in a rugged design. This self-propelled broom features well-thought-out control placement and heightened visibility that makes this machine extremely easy to operate for drivers of all experience levels. Perfect for general application sweeping to highway use, the CB95 incorporates the notable quick-change brush system which allows one person the ability to switch the brush core within minutes.

- 74 hp (55 kW) Hatz Tier 4 Final Diesel Engine
- 6,710 lbs (3,043 kg) weight with water
- 7'-6" (2.28 m) Diameter Heavy-Duty Frame with PolyTube Brush
- Optional 150 gallon (568 l) Tank
- Joystick Control for Travel and Broom Functions
- Hydrostatic Drive
- 10' (3.05 m) Inside & 18'-0" (5.71 m) Outside Turning Radius
- Variable Brush Down-Pressure Control
- Canopy or Climate-Controlled Cab Configurations

# CB95 Broom Specifications

# FB90B Self Propelled Broom

## Performance Features:

Featuring a front-mounted brush, the FB90B exhibits all of the high-end features you could expect from a self propelled broom. Serving as a pleasurable amenity, the quick-change core system allows the brush to be changed swiftly with no tools required. Ergonomic joystick controls provide simple-to-use travel and broom functions while this unit also grants a 3 foot turning radius for the ultimate maneuverability. In addition to an extra-heavy duty frame, the FB90B features a high-raise lift to ensure easy trailer loading and unloading.

- 74 hp (55 kW) Cummins Tier 4 Final Diesel Engine
- 7,500 lbs (3,401 kg) weight
- Choice of 7' 6" (2.28 m) or 8' (2.43 m) Heavy-Duty Frame with Poly-Steel Tube Brush
- 150 gallons (568 l) Rear-Mounted Brush Watering System
- Joystick Control for Travel and Broom Functions
- Hydraulic Drive
- Rear Steering for 3' (0.91 m) Turning Radius
- Variable Brush Down-Pressure and Brush Speed Control
- Single Door ROPS Climate Controlled Cab

Y___ N___	<b>3. Capacities:</b> a. Fuel: 48 gallons (182 l)
Y___ N___	b. Hydraulic: 48 gallons (182 l)
Y___ N___	<b>4. Hopper:</b> a. Conveyor fed
Y___ N___	b. Side wings hydraulically fold in or out
Y___ N___	c. Hopper size: 9.8 ton (8,890 kg)
Y___ N___	d. Hopper height: 36" (.9144 m)
Y___ N___	<b>5. Paving Widths:</b> a. Variable up to 14' (4.27 m)
Y___ N___	<b>6. Paving Depths:</b> a. Depth: 0" to 6" (.152 m)
Y___ N___	<b>7. Screed:</b> a. 8' (2.43 m) main screed
Y___ N___	b. Constructed of .5" (12.7 mm) Hardox bolt-on wear plates for easy replacement
Y___ N___	<b>8. Screed End Gates:</b> a. Equipped with vertical height adjustment and tilt

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**9. Screed Extensions:**

- a. Two 41.75" (1.06 m) screed extensions hydraulically actuated to a width of 14' (4.27 m)
- b. To eliminate seams, the heated extensions are mounted flush with the main screed and are adjustable with the angle of attack (WL screed only)
- c. Includes replacement .5" (12.7 mm) Hardox bottom wear plates

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**10. Screed Heat:**

- a. Four SureHeat electric heat bars on main screed
- b. One SureHeat electric heat bars on each extension
- c. Timer controlled heat

Y\_\_\_ N\_\_\_

**11. Screed Vibration:**

- a. Equipped with a hydraulic vibrator capable of producing 2,000 vibrations per minute

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**12. Screed Crown/Invert:**

- a. Equipped with a crown/invert adjustment allowing at least 3" (76.2 mm) of crown and .75" (19.05 mm) of valley
- b. Includes a leveling indicator for the operator to know when the screed is level

Y\_\_\_ N\_\_\_

**13. Material Flow Gates:**

- a. Two independent hydraulically operated 26" (.66 m) wide gates located at the back of the hoppers and constructed of at least .25" (.006 m) A 36 material

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**14. Material Augers:**

- a. Two independently operated hydraulic casted augers constructed with .625" (.016 m) segmented NiHard material for wear resistance
- b. Augers are 14" (.356 m) diameter

Y\_\_\_ N\_\_\_

**15. Operator's Platform:**

- a. Full machine width platform with dual seats

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

Y\_\_\_ N\_\_\_

**16. Operator's Controls:**

- a. Dual control stations, with seats and steering/traction pedestals
- b. Single control panel provides steering, direction/speed selection, auger conveyor system control, screed lift, screed vibrator drive, folding hopper, main power switch, starter, throttle, horn, electrical shifting, traction lock system, pivot steering, parking brake and power flow gates
- c. Analog gauges include hydraulic oil temperature, engine oil pressure, engine coolant temperature and voltmeter

Y\_\_\_ N\_\_\_

**17. Steering:**

- a. Independent hydrostatic steering from the left or right side of machine

Y \_\_\_ N \_\_\_

**18. Washdown System:**

- a. Electric pump with one 25' x .375" (7.6 x .009 m) diameter hose and spray nozzle

Y \_\_\_ N \_\_\_

**19. Hydraulic System:**

- a. Variable volume hydraulic pumps for each drive
- b. Variable volume load sense pump for each side of auger/conveyor
- c. Variable volume pressure compensation pump for all other functions
- d. Hydraulic reservoir: 48 gallons (182 l)

Y \_\_\_ N \_\_\_

Y \_\_\_ N \_\_\_

Y \_\_\_ N \_\_\_

**20. Push Rollers:**

- a. Two 4" (.101 m) diameter rollers with sealed bearings

Y \_\_\_ N \_\_\_

**21. Track Drive System:**

- a. Hydrostatic drive using a hydrostatic pump which drives left and right side, 2-speed hydrostatic motors
- b. Rear: 385/65R 22.5 tubeless heavy-duty hydroflated pneumatic tires
- c. Front: steerable wheels, 12" x 22" (.304 x .558 m) diameter solid rubber tires
- d. Paving speed: 0 to 193' per minute (2.2 mph)
- e. Travel speed: 0 to 783' per minute (8.9 mph)

Y \_\_\_ N \_\_\_

Y \_\_\_ N \_\_\_

Y \_\_\_ N \_\_\_

**23. Optional Equipment:**

- a. 10' (3.04 m) auger extension kit
- b. 12' (3.65 m) auger extension kit
- c. 12" (.304 m) screed extension with heat, right or left sides (O1E or WLH Screeds)
- d. 12" (.304 m) screed extension with heat and vibration, right or left sides (O1E only)
- e. Adjustable cut-off shoe weldment
- f. 12" (.304 m) cut-off shoe extension
- g. Single or dual grade controls, Topcon P-32
- h. Single or dual slope controls, Topcon P-32
- i. Screed remote kit
- j. Material indicator kit
- k. Umbrella
- l. Truck hitch

# PF-161C Asphalt Paver

**LBP**  
LeeBoy Group

## Performance Features:

The field-tested, proven PF-161C is a heavy-duty, wheel mounted, compact paver, capable of operation by a two person team. This machine saves valuable time with easy-to-diagnose troubleshooting steps due to the use of analog components. With the ability to successfully complete complex projects comfortably, the PF-161C provides low owner and operating cost benefits while meeting goals for productivity, reliability and excellent mat quality.

- 110 hp (82 kW) Cummins Tier 3 Turbocharged Diesel Engine
- Wheel Mounted Mobility
- Parking Widths Variable Up To 14' (4.3 m)
- Single Proving Operator's Control Station
- Ultra-efficient Material Management System
- Modular Rear Feed Section
- 8.0 Ton (18,000 kg) Capacity Material Hopper
- ScreenHeat Screen System
- Electric Screen Heat
- LED Operating Light Package

# PF-161C Asphalt Paver Specifications

## Product Specifications

### **LBP RW-35B Road Widener**

The following specifications are based on the LBP RW-35B Road Widener manufactured by LeeBoy Group. Because of continuous equipment research and development, we reserve the right to change these specifications. For more information, questions or assistance preparing specifications, please contact your local LeeBoy sales representative.

Comply	<b>1. Dimensions (Transport):</b>
Y ___ N ___	a. Length: 12' 10" (3.912 m)
Y ___ N ___	b. Width (hopper up): 10' (3.048 m)
Y ___ N ___	c. Height: 7' 5" (2.26 m)
Y ___ N ___	d. Total weight: 7,080 lbs (3,211 kg)
Y ___ N ___	<b>2. Dimensions (Working):</b>
Y ___ N ___	a. Length: 12' 8" (3.861 m)
Y ___ N ___	b. Width (hopper down): 11' 3" (3.454 m)
Y ___ N ___	c. Height: 7' (2.134 m)
Y ___ N ___	d. Total weight: 7,080 lbs (3,211 kg)
Y ___ N ___	<b>3. Engine:</b>
Y ___ N ___	a. Tier 4 Final 37 hp (27.5 kw) Kubota diesel
	b. Fuel reservoir: 14 gallons (53 l)
Y ___ N ___	<b>4. Hopper:</b>
Y ___ N ___	a. Capacity: 71 ft <sup>3</sup> (2m <sup>3</sup> ), 3 tons (2,721.5 kg)
	b. Vibration: Vibratory hopper
Y ___ N ___	<b>5. Conveyor System:</b>
Y ___ N ___	a. Sprocket driven, 6.5" (165.1 mm) diameter steel pulley with 17 – 3.5" (88.9 mm) diameter idler rollers with bearings driven by a hydraulic motor
Y ___ N ___	b. Conveyor belt: 15" (.381 m) wide, triple-ply rated at 220lbs/inch tensile strength
Y ___ N ___	c. Heat resistant to 350° F (176.6° C)
Y ___ N ___	d. Drive chains bolted to the conveyor belt
Y ___ N ___	<b>6. Material Spread Strike Off:</b>
Y ___ N ___	a. Hydraulically operated cylinders used for varying spread
Y ___ N ___	b. Width of spread: 18" (.45 m) to 4' (1.21 m)
Y ___ N ___	c. Height adjustment: 6" (152 mm) above and 6" (152 mm) below road surface
Y ___ N ___	d. Slope: 8° incline and 26° decline
Y ___ N ___	e. Forward angle: 20°
Y ___ N ___	f. Back angle: 40°
Y ___ N ___	<b>7. Hydraulic Reservoir:</b>
	a. 21 gallons (79.5 l)

# RW-35B Road Widener

**LB/P**  
LeeBoy Group

## Performance Features:

Unique to the industry, this conveniently designed RW-35B road widener can easily and cost-effectively be towed to any job site as needed - with no trailer required. This compact machine has been equipped with adequate power considerations to precisely place materials including asphalt, sand or gravel. The operator's station is perfectly positioned to grant an unobstructed view of the material discharge, the strike off and the finished shoulder. This compact, yet extremely rugged road widener, provides both balance and stability in one package.

- 37 hp (27.5 kw) Kubota Tier 4 Final Diesel Engine
- Width of Spread: 33" to 4' (1.45 to 1.21 m)
- Hydraulic Slope Adjustment
- 15' (3.81 m) Wide Heat-Resistant Conveyor Belt
- 3 Ton (2,721.5 kg) Hopper Capacity with Vibration
- Towable, No Trailer Required, Locking Wheel Hubs
- Ford Army Operator's Seat and Swing-Off
- Hydrostatic Drive and Traction Control System
- Wide, Adjustable Push Rollers
- Unobstructed View from the Operator's Station

Comply	<b>1. Dimensions:</b>
Y___ N___	a. Length: 19' 7" (5.96 m)
Y___ N___	b. Width (shipping): 10' (3.04 m)
Y___ N___	c. Height: 9' (2.74 m)
Y___ N___	d. Wheelbase: 9' 3" (2.81 m)
Y___ N___	e. Total weight: 17,562 lbs (7,965 kg)
	<b>2. Engine:</b>
Y___ N___	a. 80 hp (59.6 kw) @ 2,200 rpm Cummins turbo charged diesel
Y___ N___	b. Water-cooled
Y___ N___	c. Battery: 12 volt, 120 amp alternator
Y___ N___	d. Electric start
Y___ N___	e. Fuel reservoir: 68 gallons (257.4 l)
	<b>3. Hopper:</b>
Y___ N___	a. Hydraulically adjustable front hopper lip, adjustment range of 7" (177.8 mm) maximum
Y___ N___	b. Two bearing equipped push rollers, truck entry 9' 3" (2.81 m)
	<b>4. Traction Drive:</b>
Y___ N___	a. Front wheel hydrostatic planetary drive with electric hydraulic controlled two-speed motor
Y___ N___	b. Independent hydraulic pumps for each planetary drive motor
Y___ N___	c. Pumps are interconnected to synchronize drive system
Y___ N___	d. Infinitely variable throughout both operating ranges
Y___ N___	e. Full reverse in both speed ranges
	i. Low range: @ 1,800 rpm – 0 to 1.8 mph (0 to 2.89 kph)
	@ 2,200 rpm – 0 to 2.1 mph (0 to 3.37 kph)
	ii. High range: @ 1,800 rpm – 0 to 7.8 mph (0 to 12.55 kph)
	@ 1,800 rpm – 0 to 9.8 mph (0 to 15.77 kph)
	<b>5. Conveyor System:</b>
Y___ N___	a. Independent, variable speed, hydrostatic, dual end drive system
Y___ N___	b. Two high torque, direct drive hydraulic motors
Y___ N___	c. Conveyor speeds: 0 to 264' per minute (80 mpm)
Y___ N___	d. Discharge speed controlled with conveyor speed control knob on operator's console
Y___ N___	e. On/off function controlled with foot switch located at each control station
Y___ N___	f. Conveyor belt: 21" (.533 m) wide, high temperature service nitrile belt traveling on tapered roller bearing support rollers
Y___ N___	g. Equipped with adjustable wipers to prevent material build up

Y___ N___	h. Conveyor assembly able to extend and retract up to 4.75" (120 mm) hydraulically
Y___ N___	i. Control the direction of conveyor discharge of material at operator's console from either side of machine
Y___ N___	<b>6. Strike Off:</b>
Y___ N___	a. Contoured strike off for controlled spread of material width, depth and slope with minimum side draft and minimum segregation of materials
Y___ N___	b. Basic strike off consist of two 1' (.304 m) and two 3' (.91 m) sections
Y___ N___	c. Raised, lowered, extended and retracted hydraulically with manual stops for fine adjustment of elevation and slope
Y___ N___	d. Outer edger plate assembly included
Y___ N___	<b>7. Hydraulic Reservoir:</b>
Y___ N___	a. 42.5 gallons (160.8 l)
Y___ N___	<b>8. Operator Controls:</b>
Y___ N___	a. Dual control stations, each equipped with:
Y___ N___	i. Direction and speed control lever
Y___ N___	ii. Foot actuated conveyor function switch
Y___ N___	b. Control functions on the operator's console include:
Y___ N___	i. Main power
Y___ N___	ii. Starter throttle
Y___ N___	iii. Horn
Y___ N___	iv. Conveyor speed
Y___ N___	v. Shuttle and discharge direction
Y___ N___	vi. Strike off lift and lateral movement
Y___ N___	vii. Hopper lip position
Y___ N___	viii. Steering
Y___ N___	ix. Parking brake
Y___ N___	c. Analog gauges for engine oil pressure, water temperature, voltmeter and hydraulic oil temperature, tachometer and hour meter
Y___ N___	d. Main power and starter switches, tail light switch and engine governor control located on the lockable engine instrument panel
Y___ N___	<b>9. Brakes:</b>
Y___ N___	a. Hydrostatic traction drive primary braking
Y___ N___	b. Parking brake controlled by electric switch on operator's console
Y___ N___	c. Failsafe parking brake
Y___ N___	<b>10. Tires:</b>
Y___ N___	a. Four 385/65 R 22.5 radial
Y___ N___	b. Hydro-inflated, pneumatic tires
Y___ N___	<b>11. Oscillating Push Rollers:</b>
Y___ N___	a. Two bearing equipped push rollers
Y___ N___	b. Mounted on a 9' 3" (33.83 m) wide oscillating frame
Y___ N___	c. Compensates for minor directional misalignment of truck with widener

## 13. Training, Support and Company

- a. Training and support manuals
- b. Optional on-site operator training by Dealer
- c. One-year, unlimited hours warranty against any manufacturer defects
- d. Extended warranty available
- e. 50+ years manufacturing experience
- f. ISO 9001 Certified
- g. Manufactured in the USA

# RW-80 Road Widener

## Performance Features:

The RW-80 road widener is an extremely accommodating machine that allows for several key modifications including a dual-position control station, an adjustable front hopper lip and a switch controlled left or right side material discharge. Able to place aggregate or bituminous materials above or below grade, this mid-size convertible features front wheel drive for better tractive efforts.

- 80 hp (59.6 kw) Cummins Diesel Engine
- Width of Spread: up to 8' (2.44 m)
- Contoured Strain-Off
- 31" (7.87 m) Wide Heat-Resistant Conveyor Belt
- 2 Ton (1.814 kg) Hopper Capacity
- Power Adjustable Front Hopper Lip
- Dual-Position Control Station
- Hydrostatic Drive and Traction Control System
- Operating Push Buttons
- Unobstructed View from the Operator's Station

### Product Specifications

The following specifications are based on the LBP RW-100B Road Widener manufactured by LeeBoy Group. Because of continuous equipment research and development, we reserve the right to change these specifications. For more information, questions or assistance preparing specifications, please contact your local LeeBoy sales representative.

Comply	1. Dimensions:
Y ___ N ___	a. Length: 25' 6" (7.77 m)
Y ___ N ___	b. Width (shipping): 10' 10" (3.3 m)
Y ___ N ___	c. Height: 8' 1" (2.46 m)
Y ___ N ___	d. Wheelbase: 14' 4" (4.36 m)
Y ___ N ___	e. Total weight: 24,500 lbs (11,113 kg)
Y ___ N ___	2. Engine:
Y ___ N ___	a. 110 hp (82.02 kw) @ 2,200 rpm Cummins turbo charged diesel
Y ___ N ___	b. Water-cooled
Y ___ N ___	c. Battery: 12 volt, 120 amp alternator
Y ___ N ___	d. Electric start
Y ___ N ___	e. Fuel reservoir: 68 gallons (257.4 l)
Y ___ N ___	3. Hopper:
Y ___ N ___	a. Hydraulically adjustable front hopper lip, adjustment range of 7" (177.8 mm) maximum
Y ___ N ___	b. Two bearing equipped push rollers, truck entry 9' 3" (2.81 m)
Y ___ N ___	4. Traction Drive:
Y ___ N ___	a. Front wheel hydrostatic planetary drive with electric hydraulic controlled two-speed motor
Y ___ N ___	b. Independent hydraulic pumps for each planetary drive motor
Y ___ N ___	c. Pumps are interconnected to synchronize drive system
Y ___ N ___	d. Infinitely variable throughout both operating ranges
Y ___ N ___	e. Full reverse in both speed ranges
	i. Low range: @ 1,800 rpm – 0 to 1.8 mph (0 to 2.89 kph)
	@ 2,200 rpm – 0 to 2.1 mph (0 to 3.37 kph)
	ii. High range: @ 1,800 rpm – 0 to 7.8 mph (0 to 12.55 kph)
	@ 1,800 rpm – 0 to 9.8 mph (0 to 15.77 kph)
Y ___ N ___	5. Conveyor System:
Y ___ N ___	a. Independent, variable speed, hydrostatic, dual end drive system
Y ___ N ___	b. Two high torque, direct drive hydraulic motors
Y ___ N ___	c. Conveyor speeds: 0 to 466' per minute (142 mpm)
Y ___ N ___	d. Discharge speed controlled with conveyor speed control knob on operator's console
Y ___ N ___	e. On/off function controlled with foot switch located at each control station
Y ___ N ___	f. Conveyor belt: 21" (.533 m) wide, high temperature service nitrile belt traveling on tapered roller bearing support rollers
Y ___ N ___	g. Equipped with adjustable wipers to prevent material build up

Y__ N__	h. Conveyor assembly able to extend and retract up to 4.75" (120 mm) hydraulically
Y__ N__	i. Control the direction of conveyor discharge of material at operator's console from either side of machine
Y__ N__	<b>6. Strike Off:</b>
Y__ N__	a. Contoured strike off for controlled spread of material width, depth and slope with minimum side draft and minimum segregation of materials
Y__ N__	b. Basic strike off consist of two 1' (.304 m) and two 3' (.91 m)
Y__ N__	c. Raised, lowered, extended and retracted hydraulically with manual stops for fine adjustment of elevation and slope
Y__ N__	d. Outer edger plate assembly included
Y__ N__	<b>7. Hydraulic Reservoir:</b>
Y__ N__	a. 42.5 gallons (160.8 l)
Y__ N__	<b>8. Operator Controls:</b>
Y__ N__	a. Dual control stations, each equipped with:
Y__ N__	i. Direction and speed control lever
Y__ N__	ii. Foot actuated conveyor function switch
Y__ N__	b. Control functions on the operator's console include:
Y__ N__	i. Main power
Y__ N__	ii. Starter throttle
Y__ N__	iii. Horn
Y__ N__	iv. Conveyor speed
Y__ N__	v. Shuttle and discharge direction
Y__ N__	vi. Strike off lift and lateral movement
Y__ N__	vii. Hopper lip position
Y__ N__	viii. Steering
Y__ N__	ix. Parking brake
Y__ N__	c. Analog gauges for engine oil pressure, water temperature, voltmeter and hydraulic oil temperature, digital tachometer and hour meter
Y__ N__	d. Main power and starter switches, tail light switch and engine governor control located on the lockable engine instrument panel
Y__ N__	<b>9. Brakes:</b>
Y__ N__	a. Hydrostatic traction drive primary braking
Y__ N__	b. Parking brake controlled by electric switch on operator's console
Y__ N__	c. Failsafe parking brake
Y__ N__	<b>10. Tires:</b>
Y__ N__	a. Four 385/65 R 22.5 radial
Y__ N__	b. Hydro-inflated, pneumatic tires
Y__ N__	<b>11. Oscillating Push Rollers:</b>
Y__ N__	a. Two bearing equipped push rollers
Y__ N__	b. Mounted on a 9' 3" (33.83 m) wide oscillating frame
Y__ N__	c. Compensates for minor directional misalignment of truck with widener

## 12. Optional Equipment:

- a. Four-wheel steering
- b. Truck hitch
- c. Automatic grade sonic and slope control
- d. Contoured strike-off sections, 1' (.3 m), 3' (.91 m), 6' (1.8 m)
- e. 3' to 6' (.914 to 1.82 m) Hydraulic strike off extensions, left or right
- f. Dual strike off support group
- g. Auxiliary hose reel kit
- h. 6.5 kw generator with two 12v AC accessory power outlets
- i. Engine fail safe shutdown kit
- j. 3' or 6' (.914 or 1.8 m) vibratory strike off
- k. Additional operator's seat
- l. Umbrella
- m. Rear-wheel power assist
- n. Washdown system

and CNH Industrial Canada, Ltd.

## WARRANTY AND LIMITATION OF LIABILITY AGREEMENT CASE CONSTRUCTION EQUIPMENT

### The Case Warranty

The Case Warranty is a limited warranty that is provided to the initial retail purchaser in return for consideration paid as part of the purchase price of the product. The selling dealer must review the warranty coverage with the initial retail purchaser and obtain signature on this document.

### New Limited Warranty

The warranty described here is from CNH Industrial America LLC and in Canada, CNH Industrial Canada Ltd., both of which are referred to in this agreement as "Case". This warranty is for Case products sold and registered in the United States or Canada and normally operated in the United States or Canada. This warranty does NOT apply to any product normally operated outside of the United States and/or Canada, or to any unit purchased outside of the United States or Canada and imported in for any reason other than a customer relocation/personal move.

### Warranty Period

For the products listed below, the Warranty Period for all coverage begins at the time that any person, dealer or agent first places the unit into service. At the latest, a unit is considered to be placed into service when purchased or delivered to an initial retail purchaser. Certain demonstration, rental, lease, and other used units may be eligible for a portion of a new unit warranty. The availability of the remaining portion of a new unit warranty does not mean that a unit is new or unused. The Warranty Period ends when either the month or machine hour limit is reached, whichever limit occurs first.

PRODUCT	WARRANTY COVERAGE
SKID STEER / COMPACT TRACK LOADERS <sup>5</sup>	12 Months / Unlimited Hours
LOADER BACKHOES - N SERIES <sup>2,5</sup>	12 Months / Unlimited Hours
TRACTOR LOADERS / FORKLIFTS <sup>5</sup>	12 Months / Unlimited Hours
COMPACT EXCAVATORS CX-B SERIES <sup>5</sup>	12 Months / 1000 Hours
COMPACT EXCAVATOR CX-C SERIES <sup>5</sup>	24 Months / 3000 Hours
COMPACT WHEEL LOADERS <sup>1</sup>	12 Months / Unlimited Hours
COMPACTION EQUIPMENT - SINGLE OR DOUBLE DRUM <sup>1</sup>	12 Months / Unlimited Hours
TELESCOPIC HANDLERS <sup>1, 2</sup>	12 Months / Unlimited Hours
WHEEL LOADERS <sup>4, 5</sup>	12 Months / Unlimited Hours
MOTOR GRADERS <sup>4, 5</sup>	12 Months / Unlimited Hours
EXCAVATORS <sup>3, 4, 5</sup>	12 Months / 1800 Hours
CRAWLER DOZERS <sup>4, 5</sup>	12 Months / Unlimited Hours

1) Engine coverage is provided directly by the engine manufacturer.

2) Torque converter, transmission, drive shafts, & drive axles are covered for 24 months / 2000 hours.

3) Warranty does not cover any configuration excavator equipped with feller buncher/accumulator attachments

4) Units equipped with factory standard telematics are authorized for Case ProCare extended coverage for an additional 24 months / 3000 total machine hours, whichever comes first

5) Engine warranty coverage is provided through CNH Industrial.

### Operator's Manual / Warranty Receipt Verification

The selling dealer has reviewed the correct operator's manual with me and will provide upon delivery of the product. YES ☐ / NO ☐

The selling dealer explained safety precautions to me. YES ☐ / NO ☐

The selling dealer explained the warranty terms and coverage to me. YES ☐ / NO ☐

The selling dealer explained Purchased Protection Plan options for additional coverage on select components. YES ☐ / NO ☐

I wish to be part of future Case communications, offers or events. YES ☐ / NO ☐

### What's Covered

If a defect in material or workmanship is found in a unit and reported during the Warranty Period, Case will pay parts and labor costs to repair the defect if the services are performed by an authorized Case dealer at the dealer's location. If parts are needed during the repair, Case will, at its option, use genuine Case new or remanufactured parts. Case replacement parts that are used in a warranty repair are warranted until the end of the machine warranty or to the end of the Case Replacement Parts Warranty, whichever is longer.

CASE PROVIDES NO WARRANTY, EXPRESS OR IMPLIED, FOR A COMPONENT OR OTHER ITEM THAT IS SEPARATELY WARRANTED TO THE PURCHASER BY ITS MANUFACTURER, SUCH AS TIRES, BATTERIES AND FUEL INJECTION COMPONENTS. CHECK WITH YOUR DEALER FOR DETAILS

### No Modification or Extension of Warranty Period

The Case Warranty is limited to the written terms in this document. Case does not authorize any person, dealer or agent to change or extend the terms of this warranty in any manner. Any assistance to the purchaser in the repair or operation of any Case product outside the terms or limitations or exclusions of this warranty will not constitute a waiver of the terms, limitations or exclusions of this warranty, nor will such assistance extend or re-establish the warranty.

### EXCLUSIVE REMEDY

**THE REMEDY OF REPAIRING A DEFECT IN MATERIALS OR WORKMANSHIP AT A CASE DEALERSHIP UNDER THE TERMS OF THIS WARRANTY IS THE PURCHASER'S EXCLUSIVE REMEDY AND IS IN LIEU OF ANY OTHER REMEDY OTHERWISE AVAILABLE.**

### This Warranty is Void If

The unit's hour meter is changed or altered, unless a Case dealer, at the direction of Case, changed the meter. If the unit is used in an application for which it is not designed or the unit has been scrapped, salvaged, stolen, junked or totaled.

**Limitation and Exclusions** The Case Warranty gives you specific legal rights and you may also have other rights, which vary, from region to region.

**THIS DOCUMENT CONTAINS THE ENTIRE CASE WARRANTY. CASE MAKES NO OTHER REPRESENTATIONS OR WARRANTIES, EXPRESSED OR IMPLIED, AND SPECIFICALLY EXCLUDES THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR PARTICULAR PURPOSE.\* CASE WILL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM A BREACH OF THE WRITTEN WARRANTY OR ANY IMPLIED WARRANTY IMPOSED BY LAW.\***

### Owner's Responsibility

The Case warranty remains in effect during the Warranty Period if the owner performs the required maintenance at the recommended intervals outlined in the product operator's manual and the unit is operated within its rated capacity. Genuine Case service parts or Case approved service parts that meet Case specifications must be used for maintenance and repair.

### What's Not Covered

- ≠ Cost associated with performing pre-delivery or scheduled inspection service.
- ≠ Repairs arising from storage deterioration, failure to maintain the equipment, negligence, alteration, improper use of the equipment, collision or other accident, vandalism, or other casualty, or operation beyond rated capacity or specification.
- ≠ Repairs arising from abuse or neglect, including but not limited to: operation without adequate coolant or lubricants, adjustments to the fuel system outside equipment specifications, over-speeding, improper storage, starting, warm-up, or shutdown practices, incorrect fuel or contaminated fuel, oil or other fluids.
- ≠ Normal maintenance services, such as engine tune-ups, engine fuel system cleaning, checks, adjustments, shimming, etc.
- ≠ Replacement of non-defective wear items expected to be replaced during the warranty period, including but not limited to: light bulbs, spark plugs, ignition points, brake or clutch linings, slip clutches, belts, chains, knives, bucket cutting edges and teeth, crawler track pads and track components, crop processing and cutting components, external drive sprockets and chains, soil engaging tools and accessories.
- ≠ Items replaced due to customer demand.
- ≠ Labor charges performed by anyone except a dealer authorized by contract to repair the equipment, unless they qualify under special provisions (i.e.; outside labor).
- ≠ Any and all travel costs for items such as towing, service calls, or transporting a unit to and from the place where the warranty service is performed, unless specifically covered by a product improvement program or units classified as heavy and/or compaction products
- ≠ Claims involving loss or damage during shipment or handling, including units subsequently sold as a "salvage" unit.
- ≠ "Salvage" or other units sold on an "as is" basis, unless otherwise specified in writing at the time of sale.
- ≠ Normal maintenance costs, including but not limited to: lubricants, coolants, fluids, fuel, filters, and associated labor. Lubricants, filters, and coolants may qualify for warranty reimbursement if they require replacement as a DIRECT RESULT of a defect in material or workmanship.
- ≠ Claims involving the inspection or reconditioning of units after storage or prior use.
- ≠ Components or items that are separately warranted directly by the manufacturer including but are not limited to: tires, tracks, engines, transmissions, batteries, fuel injection pumps, fuel injectors, etc.
- ≠ Shop comebacks: any duplicate, repeat, or comeback repair resulting from improper diagnosis, testing, or service work. This also includes repairs arising from service performed by agents not approved by Case.
- ≠ Repairs arising from any unauthorized modification to the product or the use on non-CNH Industrial parts, implements, or attachments, including but not limited to performance changing (i.e., increasing horsepower or other modifications) and/or emissions defeating modifications.
- ≠ Removal, replacement, or installation of non-CNH Industrial optional equipment, attachments or components.
- ≠ Premiums charged for overtime labor costs or out of shop expenses.
- ≠ Economic loss including lost profits, crop loss, equipment rental, or other expense.
- ≠ Unauthorized modification or updating machines without a warrantable failure based on Service Bulletin information or production changes.
- ≠ Any and all costs of special tools
- ≠ Any and all costs of dealer shop supplies incurred with repairs, including but not limited to: solvents, cleaners, anti-seize lubricants, loctite, sealant, adhesive, oil-dry, shop towels, etc. Sealant or adhesive may qualify for warranty reimbursement in certain applications requiring a large volume of sealant/ adhesive.
- ≠ Failure of the machine, its implements or attachments caused by improper field application or loading.
- ≠ Any and all costs for coolant, fuel, or lube (oil) analysis including supplies and lab recommendations.
- ≠ Cost of initial setup or installation of any optional equipment or attachments to a unit.
- ≠ Cost associated with cleaning of machine in preparation for servicing

# Flat-Out Amazing

Easy to operate, easy to maintain and easy on the operator, CASE asphalt compaction equipment is built for the daily grind without the daily grief. With dual-drum drive technology, high vibration frequencies up to 67 Hz, impressive maneuverability and standard features you won't find elsewhere, these easy machines are hard to beat.

## DV SERIES

- + Pressurized Water System
- + Standard Offset Drum Design
- + Automatic Vibration Control
- + Serviceability Second-to-None

## PT SERIES

- + Iso-Static Front Axle
- + Standard Air-on-the-Run

## COMBINATION ROLLERS

- + Vibratory Front Drum
- + Pneumatic Rear Tires

## **INSIDE THE LARGE DV**

**DV207/DV209D/DV210D/DV213**

### **SWIVEL, SLIDE AND SPIN TO SEE**

In addition to a seat that spins left or right and slides forward, the entire operator station – seat, steering console and drive lever – swivels almost 180° to reach both edges of the platform and provide operators a full view of the compacted surface, both drums and all spray bars.

### **COMMON-SENSE CONTROLS**

Dual multi-function directional levers on either side of the seat allow for right- or left-handed operation. Automatic vibration control makes it easy to avoid surface damage from starting or stopping the machine. And if manual activation is preferred, it's just a push of a button. Also, an adjustable speed control lets operators set a max speed so there's no need to worry about going too fast for the frequency of the drum. The DV209D and DV210D feature a new intuitive and innovative in-steering wheel front display. This display provides all machine diagnostics for the operator to review. The operator structure is also completely redesigned to continue to offer excellent visibility to both drums while offering a comfortable and ergonomic operating environment.

Open ROPS work platform  
provides excellent visibility  
around the machine.  
Enclosed cab available.

## **INSIDE THE SMALL DV**

**DV23/DV26/DV36/DV45**

### ***SUPERIOR SIGHT LINES***

All small DV models come standard with features to maximize visibility around the machine. For starters, a lateral-sliding seat with integrated operating lever gives operators a comfortable view of all drum edges while keeping controls within reach. A narrow front console and tapered hood improve forward visibility, while a flat-back design allows for a full view of the rear.

### ***FATIGUE-FIGHTING COMFORT***

The operator's platform is isolated from the chassis to reduce vibration from the engine and is on a heavy-duty rubber mount to help absorb shock.

### ***CONTROLS MADE SIMPLE***

Operation is easy with a steering wheel and a single lever controlling forward/reverse travel, sprinkler activation and the vibration system, which allows for automatic or manual start/stop of drum vibration.

## **INSIDE THE PT240**

### **DUAL WORK STATIONS**

The dual operating seats of the PT240 allow operators to place themselves at either edge of the machine for maximum visibility of the working side. Each station mirrors the other and offers adjustable seats and automotive-style drive controls for a familiar feel. There is also ample storage space under each seat.

### **EVERYTHING AT YOUR FINGERTIPS**

Centralized controls are easily within reach from either seat, including AOR switch, sprinkler flow selector, working lights, turn signals, emergency stop and more. The control panel also includes warning lights, speedometer and an easy to access fuse panel.

**DOMINATE WITH LARGE DV ROLLERS**  
**DV207/DV209D/DV210D/DV213**

#### **HIGH-FREQUENCY OPTION**

The CASE DV207, DV209D and DV210D are available in high-frequency models maxing out at 67 Hz. This increases the application opportunities for the CASE roller line, allowing operators to compact a more versatile array of asphalt mixes.

#### **SUPERIOR WATER SYSTEM**

Water plays a crucial role in preventing surface damage and keeping rollers clean. That's why every component of DV rollers' spray system is built to be the best.

- + Triple Filtration – Filters at the tank, pump and nozzles help prevent spray-stopping clogs and prolong component life
- + Pressurization – Maintains even water flow to all nozzles regardless of grade
- + Standard Back-Up Pump – Ensures uninterrupted production with primary and back-up pumps
- + Multiple Water Settings – Matches water pressure to the job at hand
- + Dual Fill Ports – Offers convenient access from either side

#### **HIGH-FREQUENCY OPTIONS**

The CASE high-frequency option features a low amplitude setting that is ideal for thin-layer asphalt compaction at faster speeds. Thinner layers of asphalt tend to cool quicker and use smaller aggregates that can be crushed if too much force is applied. This option increases the versatility of the DV207, DV209D and DV210D by increasing the range of applications and asphalt mixes on which they can be used.

#### **IMPRESSIVE MANEUVERABILITY**

CASE large DV rollers come standard with a hydraulically adjustable "crab steering" system that can offset the rear drum up to seven inches\*. In addition to that, a heavy-duty, roller-style articulation joint allows the machine to oscillate +/-10° to maintain drum-to-ground contact. Together, these features enable superior operation around corners, over bumps or dips, and in confined areas.

\*Seven-inch offset on DV207

## **SAVE TIME WITH SMALL DV ROLLERS**

**DV23/DV26/DV36/DV45**

#### **SUPERIOR WATER SYSTEM**

Just like their big brothers, our small DV rollers are designed with the highest-quality water system.

- + Dual Filtration – Water is filtered at both the fill point and midway through the water cycle, reducing the amount of debris that can make it to the spray nozzle
- + Pressurization – Maintains even water flow to all nozzles regardless of grade
- + High-Capacity, Corrosion-Proof Tank – Runs all day on a single tank
- + Multiple Water Settings – Matches water pressure to the job at hand

#### **STANDARD OFFSET DRUM WITH EXCELLENT CURB CLEARANCE**

The front drums of our small DV rollers are positioned about two inches off center from the back drum, allowing for a tighter turning radius, while both drums have a balanced design and a tapered edge to reduce tearing around curves and during transitions.

#### **INDUSTRY-LEADING PERFORMANCE**

Dual frequency is standard on all small DV models, with dual amplitude standard on DV36 and DV45 – helping generate outstanding compaction on any surface. An electronic control module smoothly moves the rollers forward or reverse, unlike direct-link cables, which can lurch and create waves in the compaction surface.

***PRECISION OF THE PNEUMATIC***  
***PT240***

#### **BALLAST UP TO 24 TONS**

Ideal for stabilizing soil and sand, the versatile PT240's operating weight can easily be increased to more than 52,000 pounds (24 MT). Ballasts can be attached underneath, an available watertight frame allows for fluid ballast and the machine frame can hold additional scrap.

#### **FOUR-PLUS-FOUR TIRE SETUP**

The PT240 design uses dual front axles and four rigid rear tires with a two-inch offset for a total compaction width of 78 inches (1 984 mm). The maneuverable front configuration creates a "kneading" effect for uneven surfaces, while the fixed rear axle presses materials firmly into place.

#### **ISO-STATIC FRONT AXLE**

Each pair of front tires oscillates five degrees in either direction and moves four inches up and down. This helps maintain contact with the ground at all times to minimize bridging and maximize compaction – and also creates a more comfortable ride for the operator.

#### **STANDARD AIR-ON-THE-RUN (AOR)**

Unlike most competitive models, CASE pneumatic tire compactors come standard with AOR. This automatic central tire inflation system ensures consistent pressure to all eight tires at all times, and allows for easy adjustment of tire pressure to meet ground conditions and compaction needs.

#### **ASPHALT ADD-ONS**

The PT240 also offers a triple-filtration water system with a pressurized, polyethylene tank and sprinkler bars for the front and rear tires. Optional thermal aprons keep heat close to the tires to prevent asphalt from sticking. Cocoa mats are also available.

# MAINTENANCE MADE EASY

## SERVICEABILITY IS IN OUR DNA

When you invest in CASE equipment, you need it to last. We make it simple. CASE DV and PT Series rollers are no exception. From their open-access hoods to grouped, ground-level checkpoints, you can do daily maintenance in a matter of minutes. It's the easiest way to help you get the most performance and longest life out of your machine.

### Easy access to DVS

- |   |                               |  |
|---|-------------------------------|--|
| 1 Spin-on fuel, oil and hydraulic filters | 5 Engine                      | 9 Greaseless Teflon articulation joint (Small DVs) |
| 2 Vertical-lift rear hood (Large DVs)     | 6 Oil fill                    | 10 Flip-forward hood (Small DVs)                   |
| 3 Drive motor or eccentric motor          | 7 Dual fill ports (Large DVs) | 11 No tool access, swing out doors                 |
| 4 Heavy-duty articulation joint           | 8 Spray nozzles               |  |

#### Easy access to PT

- 12** Drains for engine oil, gearbox oil and water
- 13** Water fill
- 14** Service doors
- 15** Flip-up hood
- 16** Hydraulic check

## **SUPPORT COMES STANDARD**

### **BASE & EXTENDED WARRANTY COVERAGE:**

#### **1-YEAR/UNLIMITED-HOUR FULL-COVERAGE BASE LIMITED WARRANTY**

#### **2-YEAR/2,000-HOUR EXTENDED ENGINE WARRANTY**

Discuss the extended engine warranty coverage details with your dealer.

#### **UPTIME SOLUTIONS**

Your CASE dealer can provide solutions to meet all your needs and keep you productive.

#### **STRONGER PRODUCT SUPPORT SOLUTIONS**

Your CASE dealer knows best how you can maximize your equipment investment and uptime—with genuine CASE parts, expert service and a complete range of product support solutions including CASE remanufactured and all-makes parts. CASE supports better parts availability and faster deliveries through nine parts distribution centers in North America and a forecasting system to ensure that the right parts will be there when you need them. And only CASE dealers have exclusive access to the Electronic Service Tool (EST) that quickly pinpoints machine issues. Just ask your dealer for details.

#### **FLEXIBLE FINANCIAL OPTIONS**

Specialized finance programs and flexible leasing packages put you in the driver's seat of industry-leading CASE equipment while no-nonsense warranties and comprehensive protection plans ensure that your equipment is protected. As the only finance company dedicated to CASE, we offer strong products and services designed around your unique needs and are the only ones supported by the helpful service professionals at your CASE dealer.

\*Please see your CASE dealer for limitations, exclusions and confirmation of policies in effect.

## REMOTE CONTROL

Available on large DV Series rollers and the PT240, CASE SiteWatch™ telematics breaks the boundaries of fleet management by allowing you to monitor and manage multiple machines from your office, wherever that may be. No more manually tracking down engine hours and fuel levels. Get real-time performance metrics, idle-time analytics, scheduled maintenance intervals and programmable security alerts sent to any computer, anytime, anywhere.

## ***BUILDING A STRONG CASE***

Since 1842, we at CASE Construction Equipment have lived by an unwavering commitment to build practical, intuitive solutions that deliver both efficiency and productivity. We continually strive to make it easier for our customers to implement emerging technologies and new compliance mandates.

Today, our global scale combined with our local expertise enables us to keep customers' real-world challenges at the center of our product development. This focus has led to numerous innovations like Ride Control™, EZ-EH controls, blade shake, PowerLift™, over-center boom design and the peace of mind that only CASE ProCare provides.

Every CASE machine is backed by more than 350 North American dealer locations, thousands of OEM, remanufactured and Gold Value™ parts, and flexible financing and insurance options that provide the kind of reliable, steadfast support you expect from a professional partner.

We are passionate about improving the lives of others, whether investing in our veterans or raising awareness about local infrastructure initiatives through Dire States. Our goal is to build both stronger machines — and stronger communities.

At the end of the day, we do what's right by our customers and our communities so that they can count on CASE.

# Soil Compactors

SV AND PT SERIES

SV208 / SV208D / SV212 / SV216 / PT240

**SINCE 1842**

**SV208\***

**SV208D**

**SV212\***

**SV216\***

**PT240\***

\*Model available in Canada only

# More Compaction Per Pass

With four machines that deliver unmatched gradeability and industry-leading performance, the SV Series are real difference-makers in compaction applications. They can work in places competitors just can't, such as water retention areas or steep traffic grades. And from ground prep to final pass, the PT pneumatic tire compactor has the versatility contractors need. Plus, both the SV and PT soil compactors offer superior serviceability and are as durable as they come.

## SV SERIES

- + Industry-Best Gradeability
- + Best-in-Class Centrifugal Force
- + Hydrostatic Drive System
- + Superior Drum Design

## PT SERIES

- + Iso-Static Front Axle
- + Standard Air-on-the-Run

## INSIDE THE SV

### **OPEN OPERATING ENVIRONMENT**

All SV Series models come standard with an open ROPS-certified canopy\* and a narrow front console to maximize visibility of the drum and work area. The operating platform can also be accessed from either side for added convenience.

\*Enclosed cab with heat and air available

### **EXCEPTIONAL REAR VISIBILITY**

Visibility behind the machine is invaluable for compaction, where nearly half of operating time is spent in reverse. That's why the SV Series is designed with a fully adjustable swivel seat that rotates 50°. Coupled with one of the lowest-profile hoods in the industry, operators can see more with less strain.

### **INTUITIVE CONTROLS**

The heavy-duty front console is made of metal for longer component life and offers simple controls that are easy to learn. There's also an integrated travel lever, with push-button vibration activation, that swivels with the seat to keep operators comfortably in control.

## ***INSIDE THE PT***

### ***DUAL WORK STATIONS***

The dual operating seats of the PT240 allow operators to place themselves at either edge of the machine for maximum visibility of the working side. Each station mirrors the other and offers adjustable seats and automotive-style drive controls for a familiar feel. There is also ample storage space under each seat.

### ***EVERYTHING AT YOUR FINGERTIPS***

Centralized controls are easily within reach from either seat, including AOR switch, sprinkler flow selector, working lights, turn signals, emergency stop and more. The control panel also includes warning lights, speedometer and an easy to access fuse panel.

## STRENGTH IN THE SV

### SEVERAL SV SETUPS

SV Series compactors offer multiple configurations to meet demanding applications:

- + Automatic Traction Control (ATC) – Maintains consistent flow to all drive motors to improve traction control
- + HX Drive provides improved speed and gradeability and, when coupled with excellent torque, you have the equipment features needed to get the job done.

#### **UNRIVALED LEVEL OF GRADEABILITY**

Compacts where others can't: SV Series rollers are able to compact while holding an industry-leading grade of up to 65%. It's made possible by the low center of gravity resulting from our axle-free design, which allows the engine to sit lower, helping hold the drum to the ground.

#### **HYDROSTATIC DRIVE SYSTEM**

All SV Series rollers use three separate hydrostatic motors to drive the drum and each rear wheel. By eliminating the rear axle, the engine sits lower between the tires, making it more accessible and minimizing hood height for greater visibility.

#### **BEST-IN-CLASS CENTRIFUGAL FORCE**

Higher lifts, deeper depths and fewer passes – get the job done quicker, thanks to some of the highest centrifugal forces of their class. You can even use a smaller, more fuel-efficient CASE machine to achieve compaction equal to that of a larger class, reducing your cost of ownership.

#### **THE DRUM MAKES THE DIFFERENCE**

CASE roller drums are designed inside and out for superior performance, straighter travel and a smoother ride. Weight is evenly distributed throughout the drum to help reduce drift and maintain constant compaction during each rotation, while a heavy-duty rubber iso-mount enhances comfort by keeping vibrations from spreading to the machine.

60% Front

40% Rear

#### **IDEAL WEIGHT DISTRIBUTION**

The SV Series offers a weight distribution of 40% in the rear and 60% in the front. The heavier front end enhances compaction forces and reduces the risk of the drum "jumping" off the ground.

## ***PRECISION OF THE PT***

#### **POWER TO PERFORM**

A 99-horsepower, turbocharged engine with standard power-shift transmission and high-capacity, 66-gal. fuel tank keep the PT240 on the job for long days full of long passes.

#### **ISO-STATIC FRONT AXLE**

Each pair of front tires oscillates five degrees in either direction and moves four inches up and down. This helps maintain contact with the ground at all times to minimize bridging and maximize compaction, and it also creates a more comfortable ride for the operator.

#### **FOUR-PLUS-FOUR TIRE SETUP**

The PT240 design uses dual front axles and four rigid rear tires with a two-inch offset for a total compaction width of 78 inches (1 986 mm). The maneuverable front configuration creates a “kneading” effect for uneven surfaces, while the fixed rear axle presses materials firmly into place.

#### **STANDARD AIR-ON-THE-RUN (AOR)**

Unlike most competitive models, CASE pneumatic tire compactors come standard with AOR. This automatic central tire inflation system ensures consistent pressure to all eight tires at all times, and allows for easy adjustment of tire pressure to meet ground conditions and compaction needs.

#### **BALLAST UP TO 24 TONS**

Ideal for stabilizing soil and sand, the versatile PT240's operating weight can easily be increased to more than 52,000 pounds (24 MT). Ballasts can be attached underneath, an available watertight frame allows for fluid ballast and the machine frame can hold additional scrap.

# MAINTENANCE MADE EASY

## SERVICEABILITY IS IN OUR DNA

When you invest in CASE equipment, you need it to last. We make it simple. CASE SV and PT compactors are no exception. From flip-up hoods to ground-level service points to easy-access drains, you can do daily maintenance in a matter of minutes. It's the easiest way to help you get the most performance and longest life out of your machine.

### Easy access to SV

- ① Oil fill
- ② Air filters
- ③ Lockable fuel cap
- ④ Dual batteries
- ⑤ Cooling system
- ⑥ Flip-up hood
- ⑦ Tiltable operating platform
- ⑧ Hydraulic hose routing

### Service-free features

- + Heavy-duty rubber drum mount
- + Self-lubricating exciter system
- + High-capacity roller bearing

#### Easy access to PT

- ⑨ Drains for engine oil, gearbox oil and water
- ⑩ Water fill for watertight frame

- ⑪ Service doors
- ⑫ Flip-up hood
- ⑬ Hydraulic check

## **SUPPORT COMES STANDARD**

### **BASE & EXTENDED WARRANTY COVERAGE\***

#### **1-YEAR/UNLIMITED-HOUR FULL-COVERAGE BASE LIMITED WARRANTY**

#### **2-YEAR/2,000-HOUR EXTENDED ENGINE WARRANTY**

Discuss the extended engine warranty coverage details with your dealer.

### **UPTIME SOLUTIONS**

Your CASE dealer can provide solutions to meet all your needs and keep you productive.

### **STRONGER PRODUCT SUPPORT SOLUTIONS**

Your CASE dealer knows best how you can maximize your equipment investment and uptime—with genuine CASE parts, expert service and a complete range of product support solutions including CASE remanufactured and all-makes parts. CASE supports better parts availability and faster deliveries through nine parts distribution centers in North America and a forecasting system to ensure that the right parts will be there when you need them. And only CASE dealers have exclusive access to the Electronic Service Tool (EST) that quickly pinpoints machine issues. Just ask your dealer for details.

### **FLEXIBLE FINANCIAL OPTIONS**

Specialized finance programs and flexible leasing packages put you in the driver's seat of industry-leading CASE equipment while no-nonsense warranties and comprehensive protection plans ensure that your equipment is protected. As the only finance company dedicated to CASE, we offer strong products and services designed around your unique needs and are the only ones supported by the helpful service professionals at your CASE dealer.

\*Please see your CASE dealer for limitations, exclusions and confirmation of policies in effect.

## REMOTE CONTROL

**SiteWatch™**

Available on SV Series compactors and the PT240, CASE SiteWatch™ telematics breaks the boundaries of fleet management by allowing you to monitor and manage multiple machines from your office, wherever that may be. No more manually tracking down engine hours and fuel levels. Get real-time performance metrics, idle-time analytics, scheduled maintenance intervals and programmable security alerts sent to any computer, anytime, anywhere.

## ***BUILDING A STRONG CASE***

Since 1842, we at CASE Construction Equipment have lived by an unwavering commitment to build practical, intuitive solutions that deliver both efficiency and productivity. We continually strive to make it easier for our customers to implement emerging technologies and new compliance mandates.

Today, our global scale combined with our local expertise enables us to keep customers' real-world challenges at the center of our product development. This focus has led to numerous innovations like Ride Control™, EZ-EH controls, blade shake, PowerLift™, over-center boom design and the peace of mind that only CASE ProCare provides.

Every CASE machine is backed by more than 350 North American dealer locations, thousands of OEM, remanufactured and Gold Value™ parts, and flexible financing and insurance options that provide the kind of reliable, steadfast support you expect from a professional partner.

We are passionate about improving the lives of others, whether investing in our veterans or raising awareness about local infrastructure initiatives through Dire States. Our goal is to build both stronger machines — and stronger communities.

At the end of the day, we do what's right by our customers and our communities so that they can count on CASE.

# CASE PROTECTION PLAN

FOR NEW & USED  
CONSTRUCTION EQUIPMENT

## ADVANTAGES OF THE CASE PROTECTION PLAN

### PEACE OF MIND

Provides protection beyond the Manufacturer's Base Warranty Period.

### FLEXIBLE OPTIONS

Plans can be customized to meet individual needs.

### FINANCING AVAILABLE

Plans may be financed on CNH Industrial Capital America LLC. (CNH Industrial Capital) retail installment contracts and leases (retail contract) or commercial revolving accounts.

### DEPENDABLE SERVICE

Eligible repairs completed by authorized service technicians using genuine OEM parts.

### TRANSFERABLE PROTECTION

New Equipment Plans may be transferred to a new owner at no charge.

## PRODUCTS DESIGNED TO MEET YOUR NEEDS

We understand the equipment business. That's why we offer these additional products to help keep your operation running smoothly.

### CREDIT LIFE INSURANCE

Provides life insurance coverage to help pay off the balance due on equipment financed with CNH Industrial Capital, in the event of insured's death.

### RENTAL DAMAGE WAIVER

Helps protect rented equipment against most causes of direct physical loss or damage.

### PHYSICAL DAMAGE INSURANCE

Provides coverage to repair or replace insured equipment in the event of direct physical loss or damage.

## GETTING STARTED

For more information, contact your local CASE dealer or call CNH Industrial Insurance Agency Inc. at 1-866-559-6814.

# PROTECT YOUR EQUIPMENT BEYOND THE BASE WARRANTY PERIOD

## CASE PROTECTION PLAN

When the unexpected occurs, you need to know that your equipment is protected. The CASE Protection Plan is a purchased service contract designed to help keep your equipment working properly beyond the Manufacturer's Base Warranty Period.

Select the Plan Option that best meets your needs:

### NEW EQUIPMENT PLAN OPTIONS

- Structural
- Powertrain
- Powertrain Plus Hydraulics
- Premier

New Equipment Plans are available for Protection Periods of up to 60 total months or 7,500 total machine hours, whichever occurs first. The Protection Period you select includes the Manufacturer's Base Warranty Period.

### USED EQUIPMENT PLAN OPTIONS

- Powertrain
- Powertrain Plus Hydraulics

Used Equipment Plans are available for Protection Periods of up to 36 months or 6,000 machine hours, whichever occurs first, for eligible equipment that is beyond the Manufacturer's Base Warranty Period.

**STAY PRODUCTIVE WITH A CASE PROTECTION PLAN.**

### NEW EQUIPMENT PLAN OPTIONS\*

\* See your dealer for the CASE Protection Plan Master Parts Schedule and Terms and Conditions document for exact Plan details and exclusions.

\*\* May be purchased separately or with Powertrain, Powertrain Plus Hydraulics or Premier New Equipment Plan Options.

### NEW EQUIPMENT PLANS

- Equipment that is within the Manufacturer's Base Warranty Period, or up to 120 days beyond the expiration of the Manufacturer's Base Warranty Period, may be eligible for a New Equipment Plan.

### USED EQUIPMENT PLANS

- Equipment that is less than seven years old and has less than 7,000 machine hours, may be eligible for a Used Equipment Plan.

# **Part 1**

## ***Service and Warranty Policy***

# **WIRTGEN AMERICA**

## **Product Support Manual**

---

### **1 Introduction**

We are pleased to present the Wirtgen America, Inc. (Wirtgen America) Product Support Manual which reflects the policies and procedures for all products including:

- Wirtgen Products (Wirtgen)
- Vögele Products (Vögele)
- Hamm Products (Hamm)
- Kleemann Products (Kleemann)

The purpose of the manual is to assist the Dealer in providing Customers of all Wirtgen America machines with the service that they deserve and to which they are entitled. The manual is essential to a Dealer since it contains the information needed to provide services fairly and uniformly. It provides detailed information about the responsibilities of the Wirtgen America Products, their Dealers and their Customers in regard to service, parts, and warranty. Wirtgen America's warranty is a written statement of the company's responsibility for the repair or replacement of defective parts.

Applying the provisions of this manual will help you satisfy the machine owner's needs and protect the good name of Wirtgen America and its Products and the Dealership by providing prompt, high-quality service. These practices will help all of us accomplish our goal of having the most satisfied machine owners in the world.

#### **1.1 Scope**

The procedures, terms and conditions established in this policy shall apply unless other provisions have been stipulated in a dealer's contract. This manual serves as a supplement to and an extension of the Sales and Service Agreement and the Nonexclusive Distributor Agreement. Please begin to use and conform to the guidelines of this manual immediately. Effective November 1, 2013, previous manuals become invalid.

#### **1.2 Approval of this Manual**

The release of this policy is subject to the approval of the President of Wirtgen America. Questions regarding the use of this manual should be directed to the Product Support Manager of the appropriate product line.

## **2 Responsibilities of Wirtgen America**

### **2.1 Documentation and Information Systems**

Wirtgen America provides technical documentation to the Dealer and the Customer.

#### **2.1.1 Wirtgen America Service Portal**

The website address is <http://portal.wirtgen-group.com>

The Service Portal provides the following functionalities to dealer personnel based on access rights:

- Ability to place parts orders
- Check pricing
- Review parts availability
- Tracking of billing and shipping information
- Online Infothek
- Service documents
- Software release management

**Note:**

- Consult the Help Section in the Service Portal for assistance.
- See also chapter 6.2.

#### **2.1.2 WIDOS (Wirtgen Documentation System)**

Wirtgen America offers its dealers WIDOS which is a comprehensive electronic data information system especially designated to Wirtgen America Dealers. WIDOS is updated on a regular base and is therefore the most important and current source of information and technical data while supporting Wirtgen America Equipment.

This electronic information system contains the following information:

- Spare Parts Manual for a comprehensive range of Wirtgen Group products
- Electronic spare parts catalogue with search functions
- Parts Illustrations with Electric and Hydraulic Component Descriptions
- Operator Manuals
- Electric and Hydraulic Schematics
- Hose Routing Diagrams
- Machine Data
- Safety Instructions
- Machine Menu Guidance
- Additional documentation, such as transportation instructions, transport data, Interlink lists, operating manual for liquid gas units, PLC/CGC forms, etc. when available.
- Technical (TEI) and Service (SEI) Information
- Software installation instructions

Please contact the Wirtgen America Parts Department for your WIDOS order.

# **WIRTGEN AMERICA**

## **Product Support Manual**

---

### **2.1.3 Machine Documentation**

Wirtgen America provides the following documentation in hardcopy with each machine:

- Operators Manual
- Spare Parts Manual
- Engine Manual
- Safety Manual
- Electric Diagram
- Hydraulic Diagram
- Parts and More Catalogue

### **2.1.4 Technical and Service Info's**

Technical (TEI) and Service (SEI) Information contain important technical and organizational information updates and will be issued as required. These bulletins are particularly important for every Dealership within the Wirtgen America Dealer Network and must be carefully reviewed and stored. Service bulletins are distributed via e-mail and or as part of the regular WIDOS update.

### **2.1.5 WITRAIN**

Wirtgen America offers WITRAIN which is a machine serial number specific training and documentation CD. This CD contains:

- Product Training
- Options
- Application Information
- Spare Parts Manual
- Parts Illustrations with Electric and Hydraulic Component Description
- Operators Manual
- Safety Instructions
- Machine Menu Guidance
- Electric and Hydraulic Schematics
- Hose Routing Diagrams
- Machine Data
- Additional documentation
- Technical (TEI) and Service (SEI) Information
- Software installation instructions

WITRAIN is available on CD and designated for end-users of Wirtgen America Equipment. Please contact the Wirtgen America Parts Department for your WITRAIN order.

# **WIRTGEN AMERICA**

## **Product Support Manual**

---

### **2.1.6 Parts and More**

Parts and More is an extensive information system for genuine Wirtgen Group spare parts. The individual media (Such as Electronic/Hardcopy Catalogue, DVD and Parts and More Compact) are designated for the usage by the Wirtgen America Dealerships as well as for End-users. Certain subjects on the Parts and More DVD and in WIDOS contain information for Dealer usage only. This information is only accessible with a corresponding license code. Its release and licensing is processed in accordance to the WIDOS release procedure.

**Note:**

- Any documentation / literature released by Wirtgen America is protected by copyright and cannot be reproduced without the permission.
- Upon request, Wirtgen America will supply a list of documentation available.
- Any orders for technical documentation must be forwarded to the Parts Department.
- Orders for sales literature must be forwarded to the Sales Department.

### **2.2 Support**

The Service Department will provide required technical information and assistance to the Dealer and/or Customer. Upon request, the Service Department will provide service staff under the terms and conditions agreed upon and according to its available capacities.

The Service Department assists further with:

- Suggestions for solving technical problems and failure diagnosis.
- Warranty claim processing.
- Special tool requirements and offers.

### **2.3 Training**

Wirtgen America provides regularly scheduled open-enrollment training courses on its products that are available to Dealer personnel as well as training courses which are available to customer personnel.

Courses cover various technical, operational, and maintenance aspects of the current Wirtgen America product lines and systems. Courses are held at the Reinhard Wirtgen Learning Center. Course information and schedules are published on the Wirtgen America web site and available for download.

Wirtgen America product training courses can be delivered locally, at a mutually agreed upon site. Course fees, including cancellation penalties, conform to Wirtgen America's terms and conditions for training. Wirtgen America reserves the right to change, modify, suspend, or discontinue specific open-enrollment courses at any time without incurring any obligation.

# **WIRTGEN AMERICA**

## **Product Support Manual**

---

### **2.4 Service Update / Campaign**

This program is implemented if a certain component(s) require replacement, or if there are any changes occurring with a certain component(s). Wirtgen America may issue Technical Service Information which covers the change. The program may apply to machines either within or beyond the warranty period. A letter will inform the Dealer or Customer about the component concern and clearly states the requested response. This information is distributed via e-mail to the designated Dealer Campaign Coordinators.

The following information is provided:

- Technical Service Information Number
- Classification such "Information, Operational Enhancement, Optional Repair or Repair.
- Subject of the Notification.
- Machine models and serial numbers affected
- Summarized description of the Campaign
- Personnel qualification requirements
- Labor time requirements
- Tools and parts requirements
- Reimbursement terms, terms of coverage (whether the repair is fully covered by Wirtgen America or is based on a co-pay basis).
- Inspection and repair procedures
- Time frame to finish the campaign

**Note:**

- Wirtgen America reserves the right to make changes or modifications to all of its products at any time without incurring any obligation to make similar changes or modifications to previously sold machines.
- Wirtgen America dealers are obligated to notify Wirtgen America if there is a change in personnel to ensure accurate distribution of information.

### 3 Authorized Dealer Responsibilities

The Dealer is responsible for all after-sales support affecting all Wirtgen America products in its territory. Wirtgen America requires its Dealer's to have trained technicians with proper tools and documentation supporting Wirtgen America equipment. In assuming that responsibility, the Dealer must maintain adequate service facilities with proper tools based on Wirtgen America requirements and a competent, regularly trained service staff that always offers prompt, effective service.

The Dealer is responsible for providing complete after-sales support in the areas of warranty, service, parts availability, machine maintenance, and consulting. The Dealer must investigate and resolve all complaints received from Wirtgen America Customers. All complaints must be documented and promptly reported to the Service Department of Wirtgen America.

The Dealer has the responsibility to maintain accurate machine files including but not limited to:

- Sales Documentation
- Start-up and Commissioning Documentation
- Warranty and Campaign Documentation
- Repair Records

Upon request, any information must be made available to the responsible Wirtgen America Sales or Product Support Department. It is the Dealer's responsibility to inform the responsible Product Support Department of any changes regarding machine ownership (for maintaining accurate machine and Customer data).

#### Note:

- The listed Dealer Product Support Responsibilities are in effect as soon as there is a machine present in the dealer's territory.

### 3.1 Customer Service

- Operation:** The Dealer has the responsibility to instruct the Customer's operators in proper handling of the equipment thus conforming to specifications published in the Manufacturer's documentation.
- Maintenance:** The Dealer has the responsibility to instruct the Customer's personnel on proper maintenance of the equipment as described in the Operating and Maintenance Manual.
- Inspection:** The Dealer must inspect the equipment according to inspection intervals published by the manufacturer. Non-compliance will invalidate any warranty claims.
- Safety:** The Dealer must assure that the Customer's personnel understand and follow all current safety instructions.
- Service Updates/Campaigns:** When a Wirtgen America machine is in the Dealer's possession and/or territory for any reason, all known technical service updates must be performed within notified time limits.

# WIRTGEN AMERICA

## Product Support Manual

---

### 3.2 Customer Support

The Dealer is obligated to maintain Customer confidence in Wirtgen America equipment with regular after-sales contact.

- a) **Spare Parts:** The Dealer is obligated to stock adequate parts to support the regional machine population. Recommended Spare Parts Lists and Machine Populations are available upon request. Every dealership is required to maintain sufficient parts inventory to enable the Dealer to achieve a 70/30 Stock/Emergency order fulfillment ratio by order, to comply with Customer requirements.
- b) **Warranty Work:** The Dealer is required to provide warranty and policy repair service in accordance with the provisions of the Sales and Service Agreement and this manual. The Dealer must handle all warranty work in a timely, reliable manner as per the guidelines set forth in this manual.
- c) **Qualification:** The Dealer must have adequate, authorized service personnel to perform any work required by the Customer or the Wirtgen America Product Support Department.

### 3.3 Service Management Responsibilities

The Dealer service management is responsible for:

- a) Providing Customers with prompt, high-quality assistance whenever it is required.
- b) Implementing procedures to eliminate improper or unnecessary repairs.
- c) Making at least one service specialist available for solving technical and application problems. The service specialist must participate in all service certification programs.
- d) Ensuring that Dealer technicians and product specialists receive ongoing training for Wirtgen America products on an annual basis and maintain records of training completed.
- e) Making an effort to resolve technical problems through consultation with the Customer's operating or service personnel by phone before sending a service technician to perform a minor adjustment or to install a low cost part. Excessive labor or travel time is subject to denial.
- f) Retaining parts removed from any machine for which a warranty claim has been filed.
- g) Recommending appropriate Wirtgen America Customer-specific courses to Customer personnel; ensuring that Customer personnel receive training on Wirtgen America product(s); ensuring that Customer personnel are qualified to operate and, where applicable, maintain the Wirtgen America equipment; and provide verification of Wirtgen America courses Customers have completed.

### 3.4 Product Support Tool and Parts Requirements

- a) Every Dealer location must have at least one Emergency or First Aid Kit available per branch and model line for their service technicians and product specialists. Machine population lists are available from Wirtgen America.
- b) Specialty tools recommended by Wirtgen America must be available in the Dealer's service facility as well as on their service trucks.
- c) Dealer locations are obligated to maintain an adequate number of WIDOS licenses for their parts and service personnel. In addition at least one complete set of documentation containing parts list, operator manuals, service manuals and service bulletins must be available for products not supported by WIDOS. Wirtgen America will distribute one set of manuals free of charge for every product (electronic file).

## Product Support Manual

---

- d) Deficiencies due to missing tools and parts resulting in excessive warranty labor or travel time are subject to denial.

### Note

- Contact the Wirtgen America parts department for your tool and documentation requirement.

### 3.5 Demonstration and Start-Up (In General)

The Dealer is responsible for Demonstrations and Start-Up's of Wirtgen America products. This means that a trained mechanic or dealer product specialist with an appropriately equipped service vehicle is present at all time on the job site while operating the equipment for demonstration or start-up purposes.

Wirtgen America will provide factory support for new products. Three (3) "free of charge" demonstrations and/or start-ups with a factory representative will be provided. After the "free of charge" demonstrations and/or start-ups have been provided, Wirtgen America product support for demonstrations and start-ups will be charged to the responsible Dealer location.

### Note

- It is the dealer's responsibility to manage the demo or start-up, means scheduling any Wirtgen America product support assistance as well as dealer service personnel and the required equipment with the customer.
- The dealer must provide a Purchase Order Number with the Service Request. No charges will occur as long as the dealer actions conform to this guideline.
- If Dealer product support personnel are not present on the job during demonstration or start-up, the responsible Dealership will be billed by Wirtgen America for all charges relating to Wirtgen America Service Personnel including labor time, travel time, accommodation, and any type of travel expense.
- The dealer must provide 24 hours advanced notice to the responsible Wirtgen America Service Manager in case that job is cancelled and Wirtgen America service assistance is not required on the job in order to avoid travel time and expense charges for jobs being cancelled without prior notice.

### 3.6 Receiving and Inspecting New Machines

The Interstate Commerce Commission (ICC) governs the receipt of machines and the regulations for submitting and settling loss and damage claims. These regulations protect the Dealer, Customer, and the Carrier.

The ordering Dealer or Customer becomes the owner of the machine when it is turned over to the Carrier. Claims for shortages in shipment shall be deemed waived and released by the Dealer or Customer unless made in writing within five days after the Dealer's or Customer's receipt of shipment. Wirtgen America's responsibility for shipment ceases upon delivery to the Carrier, and the Dealer or Customer must make, to or against the Carrier, all claims occurring thereafter. It is the Dealer's or Customer's responsibility to accept new machines, therefore the bill of lading is a delivery / inspection document used by all carriers.

# WIRTGEN AMERICA

## Product Support Manual

---

**Note:**

- A copy of the bill of lading should be kept with the machine file.
- Order new parts if parts are missing or damaged with a new machine. Use the parts invoice to claim the missing or damaged parts with the Carrier.

### **3.6.1 Inspection Process**

Begin the inspection before the machine is unloaded; check the entire machine and the body side panels for dents, scratches, etc. Check accessories and any options that might have shipped separate from the machine. Check the storage compartments of the machine. Use the sales agreement to ensure that you have received all ordered options. All damage(s) and shortage(s) must be noted on the trucker's bill of lading.

### **3.6.2 Machine Inspection and Receiving Report with New Machines**

It will be the responsibility of the Dealer to perform the Machine Delivery and Inspection at the Dealer's expense. After receiving the machine, a pre-delivery inspection (PDI) must be performed by an authorized representative. The PDI of sold machines should be performed with the Customer's personnel present for training purposes.

The Machine Inspection & Receiving Report (Enclosures 1a – 1d) must be completed and returned to Wirtgen America within 15 days of receipt of the machine. Any missing items or damage to the machine should be noted on this report even if it was previously noted on the trucker's bill of lading.

Noting damage on this form does not relieve the Carrier of responsibility for damage to the machine after taking possession, nor does it relieve the Dealer of the responsibility to file a claim with the carrier company.

A copy of the report must be sent to Wirtgen America (whether the machine is sold or not). The Dealer should keep a copy of this report as a permanent part of the machine file. The Customer must sign this form when he receives the machine, and a signed copy should then be sent to Wirtgen America.

**Note:**

- If the machine is sold at a later date, an updated report form including the Customer's name and address must be sent to Wirtgen America.
- An accurate inspection and pre-delivery of each machine is an investment in our Customers' satisfaction, helping eliminate unnecessary job-site breakdowns and avoiding job-site repairs.

### **3.6.3 Shipping and Receiving Wirtgen America Owned Equipment**

Every dealer using Wirtgen America Owned Equipment is required to complete the specific Machine Inspection Form for demonstration units once when receiving and once when shipping Wirtgen America owned units. The completed form must be emailed to Wirtgen America; [warranty@wirtgen-america.com](mailto:warranty@wirtgen-america.com) within 5 days after receiving and inspecting the demonstration unit and immediately before the shipment of an inspected demonstration unit to avoid charges for missing and damaged parts. If a dealer finds parts missing or damaged, all efforts must be made to repair/replace the parts in order to ship the machine in a complete and functioning condition.

# WIRTGEN AMERICA

## Product Support Manual

---

**Note:**

- Shipping arrangements for all demonstration units are to be executed by the Wirtgen America Sales Department.
- The Wirtgen America Sales Department must be informed by email or phone if other shipping arrangements are made by the dealer.
- Unless the dealer chooses, dealer intercompany movement of demonstration units does not require additional reporting. It is however mandatory that the dealer informs the Wirtgen America Sales Department when moving units from one location to another. A simple e-mail is acceptable.
- Any missing pieces, damaged pieces or machines that are not cleaned properly will result in charges invoiced to the dealer based on the completed forms.
- Warranty claims for missing or damaged pieces with incoming Wirtgen America demonstration units must be accompanied by the Inspection Form.
- Failure to complete the incoming and outgoing reports could result in charges for missing equipment pieces, damaged equipment or cleaning charges.

### **3.6.4 Maintaining Wirtgen America Owned Equipment**

The dealer is responsible for ensuring that scheduled maintenance conforms to the maintenance schedule in the operator's manual, is performed while a Wirtgen America owned machine is used for demonstrations in the dealer's territory. The machine must be serviced while within a 50 hour operating window to conform to the maintenance intervals in the operator's manual.

**Note:**

- The dealer must order and use genuine maintenance parts from Wirtgen America for scheduled maintenance.
- Genuine parts cost can be recovered with Wirtgen America owned demo machines while following the warranty process guidelines. Any additional costs such as, but not limited to labor, travel, lubricants, etc. are born by the dealer using the Wirtgen America demonstration equipment.
- Any maintenance cost occurring with Wirtgen America owned "Loaner" machines are fully the responsibility of the dealer/customer.

### **3.6.5 Pre-Delivery / Delivery to the Customer**

All machines must conform to the highest appearance and performance standards at time of delivery, regardless of when the pre-delivery service was performed. The Dealer is responsible for inspecting, preparing, and repairing each machine before it is delivered to the retail or rental Customer. The Machine Inspection & Receiving Report can be used as a pre-delivery checklist.

### **3.6.6 Storage Procedure for Batteries**

Electronic modules such as computers, controllers and displays require a small amount of power even when the machine is not running. To prevent complete battery drainage, batteries should be disconnected if the machine is to be stored more than three (3) weeks as a stock unit.

# WIRTGEN AMERICA

## Product Support Manual

---

### 3.7 Warranty Registration Process

Upon delivery of the machine, the Machine Inspection & Receiving Report (Enclosures 1a-1d) must be completed and signed (please sign and print the name) by the authorized Dealer (and/or Wirtgen America) service representative and the Customer (sold machines). The completed report must be returned to the Wirtgen America warranty department for machine registration. The signature acknowledges acceptance of:

- a) Correct and complete delivery of the machine
- b) Registration of the machine
- c) Warranty registration to the Initial Customer
- d) Proper operation and maintenance conformity to all safety guidelines
- e) Receipt of the parts, operators, schematics, engine, and safety manuals

The following specific form must be completed and returned in order to validate the registration:

Wirtgen: Machine Inspection & Receiving Report (Enclosure 1a)  
Vögele: Machine Inspection & Receiving Report (Enclosure 1b)  
Hamm: Machine Inspection & Receiving Report (Enclosure 1c)  
Kleemann: Machine Inspection & Receiving Report (Enclosure 1d)

In addition the Confirmation of Receipts / Machine Guarantee Card (Enclosure 2) must be provided to start the machine warranty period.

**Note:**

- Warranty claims are rejected immediately if above listed Warranty Registration Documents including the Machine Inspection & Receiving Report are not completed and returned to the Wirtgen America Warranty Department within 15 days of delivery/receipt of the machine. Warranty claims submitted without the form on file will be returned as denied. Claims may be resubmitted electronically within 10 days only if the completed Machine Inspection & Receiving Report is attached.
- The Machine Inspection & Receiving Report may also be used with rental equipment in order to document the condition of the machine as well as proper training of operating personnel.

### 3.8 Engine Warranty Registration

Engine Warranty Registration is processed by Wirtgen America.

**Note:**

- The engine is subject to the warranty terms and conditions of the engine manufacturer.

### 3.9 Customer Machine Start-up

Upon delivery the Dealer has the responsibility to explain the safe operation and maintenance of the equipment to the Customer using the operation, maintenance, and safety manuals. The use of parts books and appropriate parts ordering procedures must be explained to the Customer at the same time as the Warranty Handbook.

# WIRTGEN AMERICA

## Product Support Manual

---

The Dealer is responsible for explaining the warranty to the Customer at the time of sale so the Customer understands which services are covered by the warranty. The Dealer should provide the following to the Customer:

- a) Warranty Information Booklet
- b) Signed and dated Machine Inspection & Receiving Report and Machine Guarantee Card to be retained in the machine file.
- c) Signed and dated Machine Inspection & Receiving Report and Machine Guarantee Card for the buyer.
- d) The completed Machine Inspection & Receiving Report for Wirtgen America signed by the appropriate person confirming that the operating and safety information received with the machine has been read and understood (the warranty is in effect for the specified period unless invalidated).
- e) The appropriate operator's, maintenance, spare parts, schematics, engine, and safety manuals.

### 3.10 Warranty Repairs for Machines sold outside the Dealer's Territory

As the Wirtgen America's machine population continues to grow in all geographic areas, there will be more occasions when a machine may be in your territory and require repair, but you are not the selling Dealer. The following procedures should be followed when servicing a machine that was not sold by your Dealership:

1. Contact the Warranty Department to verify the in-service date of the machine. Include a brief description of the failed component, part number, the machine model and serial number, hour meter reading, and Customer name.
2. You will receive notification from the Warranty Department – by return email, confirming warranty status of the machine. The reply will include the machine in-service date, model year, and engine model and serial number. This information must be included on any warranty claim submitted.
3. As the repairing Dealer you must:
  - Submit the warranty claim as outlined in the Wirtgen America Product Support Manual; or
  - Submit the repair invoice directly to the Customer (in the event you were notified that the machine is no longer under warranty).

### 3.11 Change of Ownership - Used/Rental Machines

The following forms should be submitted when a machine is transferred to a new owner. The forms should indicate the original in-service date of the machine, the sale date, and the machine hours at time of transfer.

The following forms must be completed and returned to validate the warranty registration in addition to the form "Transfer of Ownership" (Enclosure 3):

Wirtgen: Machine Inspection & Receiving Report (Enclosure 1a)  
Vögele: Machine Inspection & Receiving Report (Enclosure 1b)  
Hamm: Machine Inspection & Receiving Report (Enclosure 1c)  
Kleemann: Machine Inspection & Receiving Report (Enclosure 1d)

# **WIRTGEN AMERICA**

## **Product Support Manual**

---

### **3.12 Campaigns**

The Dealer is obligated to complete any campaign work within the outlined timeframe. No overtime on campaign work is allowed. Labor requirements are specified within the campaign/update instructions. Whenever possible campaign updates should be combined with regularly scheduled visits or service calls. Campaigns must be bundled if there is more than one campaign required with a specific machine at the time.

Travel cost and expense will be charged to the responsible Dealership if campaigns are not completed within the time frame specified on the service bulletin and a Wirtgen America representative has to perform these campaigns instead of the responsible Dealer.

**Note:**

- Contact the responsible Product Support Manager for any campaign related issues.
- Labor and travel reimbursement on campaign work is 100% of the Dealer posted charge-out rate.
- Wirtgen America credits campaign parts at the dealer net purchasing price.
- Service updates, campaigns, or owner notification programs involving labor or parts reimbursement must be filed on a warranty claim form including the campaign name and number. No additional failure description is required.

### **3.13 Notification of Accidents**

The Dealer should notify Wirtgen America in the event an accident happens involving a machine, i.e. property damage.

If there is an accident involving an injury to a person, the Dealer must immediately notify the Wirtgen America VP of Product Support and/or the Safety Director.

### **3.14 50 Hour Failure Reports**

The 50 hour failure report form (Enclosure 8) should be completed and returned to the Wirtgen America Warranty Department when the machine has reached the first 50 hours of in service due to any type of operational activity, i.e. sales, demo, rental, etc. Any concerns should be listed in this report while using the failure key enclosed with the form. This report will assist Wirtgen America in improving the machine as well as delivery quality with all products.

# WIRTGEN AMERICA

## Product Support Manual

---

### 4 Warranty Policy

#### 4.1 General Procedure

Warranty claims must be sent from the authorized Dealer to the Wirtgen America Warranty Department. A Warranty Claim Form (Enclosure 4) must be completed, whereby one failure of a specific machine must be listed on the warranty form; Wirtgen America supplies a separate warranty claim number for each claim. The warranty claim number must be indicated on any correspondence and on any part affected by warranty. Serial numbers must be provided for all major components replaced, such as gear boxes, hydraulic pumps, motors, electronic components, etc. Serial numbers must be provided for the original as well as the replacement part.

Failure of Hydraulic components or gear boxes require oil samples be taken prior to repair and made available if requested by Wirtgen America.

**Note:**

- Any warranty authority resides with the Wirtgen America Product Support Manager
- One claim per failure, per machine

#### 4.2 Pre-Authorization Requirements

Certain repairs and claims require pre-authorization. The Dealer is responsible for obtaining and documenting pre-authorization when required. Pre-authorization does not exempt the Dealer from complying with warranty provisions outlined in this manual, including documentation of labor hours. Photographs in hard copy or digital form may be required to substantiate any claim.

The Claim Pre-Authorization Form (Enclosure 5) must be submitted via e-mail to the responsible Wirtgen America Product Support Manager or the Warranty Department for approval. Once the pre-authorization is approved, the Dealer will receive detailed instructions on how to continue the process of filing the claim. The claim must be submitted within 30 days of receiving the approval.

The following situations require pre-authorization:

- a) **Accident claims:** Any condition that could have contributed to personal injury or property damage
- b) **Machine modification:** Welding, painting, fabrication
- c) **After-warranty repairs:** Repairs made to any machine that is beyond the parameters of the warranty by months or hours

#### 4.3 Warranty Periods

##### 4.3.1 New machines

- The machine warranty time period with any Wirtgen, Vögele or Hamm product is twelve months from commissioning or 1000 operating hours; whichever occurs first.
- The machine warranty time period with any Kleemann product is twelve months from commissioning or 2000 operating hours; whichever occurs first.
- The engine warranty is covered by the engine manufacturer.

# WIRTGEN AMERICA

## Product Support Manual

---

### 4.3.2 Rental / demonstration machines

- The warranty period is twelve months or 1,000 hours, whichever comes first on a machine. Warranty begins on a rental machine on the first day rented.
- In the case of a demo machine, warranty begins after reaching 50 operating hours provided that it is a new machine.

### 4.3.3 Machines stocked at the Dealer's premises

- The Dealer is obligated to follow storage procedures (carry out appropriate maintenance procedures and maintain records of having done so).
- In the event that the machine is stored for considerable time, the warranty period is twelve months and commences when the machine is put into service for the first time.
- This does not include the engine if it is beyond the engine manufacturer's guidelines.

### 4.3.4 Used or previously owned equipment

- Warranty terms and conditions of used machines are subject to the specific sales agreement.

### 4.3.5 Repaired Parts

- Warranty terms and conditions for repaired or re-manufactured parts are subject to the specific agreement.

### 4.3.6 Machine Parts

- Parts are warranted for 1 year or 1000 hours, whichever comes first.
- Parts replaced under warranty, while the machine is in the standard warranty period, take on the remainder of the machine warranty. If the part fails a second time it takes on the original warranty of the machine part replaced.
- A replacement part used in the normal course of repair has a warranty period of 1 year or 1000 hours, whichever comes first. (See section 8 – Service Parts Warranty).

### 4.3.7 Track Rollers

- Track Rollers are considered wear items. Claims filed for track rollers are subject to be prorated. The Track Roller Failure Report Form (Enclosure 7) must accompany the claim.

#### Note:

Wirtgen America strongly recommends purchasing warranty extensions before the initial start-up if the machine is scheduled to be a rental or a demo unit.

## 4.4 Warranty Exclusions

The following parts, fluids, services, or failures are not covered by this warranty:

- a) Adjustments to bring the machine performance beyond specified standards
- b) Regular maintenance and adjustments required (tightening nuts, bolts, fittings, bulbs, etc.)
- c) Adjustments to correct prior improper or incomplete Dealer adjustments or adjustments that are prohibited in a publication
- d) Performance tolerance levels within  $\pm 10\%$  of published specifications
- e) Replacing or adding fuel, Hydraulic and lubricating oil, grease and anti-freeze, air/filter inserts and replacement parts as the result of normal maintenance requirements, normal use, and/or wear and tear

# WIRTGEN AMERICA

## Product Support Manual

---

- f) Failure of attachments or components that were not supplied by the manufacturer
- g) Damage caused by non-authorized conversion or modification
- h) Failure of or subsequent damage to original parts caused by the use of non-genuine parts
- i) Damage due to the use of contaminated or improper lubricants, anti-freeze, or fuel
- j) Failures resulting from improper application, operation, maintenance, or repair practices
- k) Damage resulting from improper or non-adherence to maintenance procedures or schedules during the warranty period
- l) Damage resulting from negligence and accidents or damages caused by abuse, misuse, vandalism, theft, fire, or natural disaster
- m) Any consequential costs such as downtime, commercial loss, lost wages etc., as well as replacement costs such as leasing, renting etc.
- n) Costs incurred due to application issues or incorrect work performed
- o) Towing, hauling, loading, unloading, and any transportation costs
- p) Freight costs or storage costs
- q) Mileage, bridge, and road tolls
- r) Shop supplies and any type of surcharges
- s) Expenses such as meal or entertainment costs
- t) Transport damage or loss
- u) Repairs required as the result of improper handling, storage or protection
- v) Costs for non-authorized work
- w) Time to identify and order parts as well as time spent on calls for diagnostic assistance
- x) Telephone or any other communication expenses
- y) Engines are warranted directly by the manufacturer of the specific engine
- z) Parts damaged due to chemical, electro-chemical, or similar effects
- aa) Machines forwarded outside the USA or Canada
- ab) Machines having an Hour meter which was tampered with

**Note:**

- All maintenance must be performed according to the Maintenance Manual to avoid warranty claim denial.
- Maintenance costs are the responsibility of the Customer.

### 4.4.1 Non-Warrantable Parts

**Wirtgen Products:**

Engine, tires, track pads, chains & rollers, batteries, clutches, teeth, holders, drive belts, conveyor belts, hoses, lights, bulbs and any wear or maintenance parts.

**Vögele Products:**

Engine, pads, drive chains, drive belts, hoses, lights, bulbs, batteries, any wear or maintenance parts

**Hamm Products:**

Engine, tires, scrapers, batteries, hoses, oscillation belts, lights, bulbs and any wear or maintenance parts.

# WIRTGEN AMERICA

## Product Support Manual

---

### Kleemann Products:

Engines, track pads, batteries, drive chains, blow bars, jaw plates, screen meshes, liner plates, crusher bearings, screen bearings, conveyor bearings support elements (springs, rubber, bumpers), conveyor belts, scrapers, seal elements, hoses, lights, bulbs and any wear or maintenance parts.

### 4.5 Warranty Coverage

The Dealer should consult the responsible Wirtgen America Product Support Manager for analysis of the failure and suggested remedies on machines. The primary goal of consultation is to solve the problem by phone with either the Dealer or the Customer's service personnel, establish an estimate of repair time, and get the machine back in service promptly.

#### Note:

Do not disassemble complete assemblies such as Hydraulic motors and pumps, water pumps, gear boxes, etc., while the machine is within the parameters of warranty. Assemblies should be replaced not repaired (Exception: Disassembly instructed by the responsible Product Support Manager).

#### 4.5.1 Estimated Repair Times

Wirtgen America does not obligate their Dealers to estimate times of repair, but it does expect trained and well-equipped Dealer technicians to perform the warranty repair in a time close to the estimate established during consultation with the responsible Product Support Manager.

#### 4.5.2 Labor and Travel Time

At the time that the Dealer is appointed by Wirtgen America and at the start of each calendar year thereafter, Wirtgen America establishes the Dealer's warranty rates (Enclosure 6) such as:

- Shop rate
- Field Rate

These rates are to be 75% of the Dealers published charge-out rates for service labor and travel.

Copies of the Dealer technician's time card, service report, or both must document labor and/or travel time spent.

#### Note:

- All unusual situations requiring abnormal labor or travel hours will require pre-approval and documentation. Overtime is applicable to "machine down" conditions only, and 75% of the Dealer's posted overtime rate will be paid. Premium labor rates for overtime, weekend, or holiday work will not be paid unless specifically authorized by the responsible Wirtgen America Product Support Manager.
- Dealer labor or travel expenses will not be accepted if a Wirtgen America service representative is present and/or on the job site.
- Only one round trip per incident will be paid with a maximum total round trip travel time of ten hours.
- Repair and material costs incurred through third parties require pre-authorization by the appropriate Wirtgen America Product Support Manager; otherwise these costs will not be reimbursed. Costs must be confirmed by an invoice. This warranty is in lieu of all other warranties (except of title), expressed or implied.

# **WIRTGEN AMERICA**

## **Product Support Manual**

---

### **4.5.3 Comebacks / Rework**

Comebacks or repeat repairs to correct previous incomplete or improper repairs (second or subsequent attempts to repair or correct the same complaint) will not be reimbursed. If information and documentation exist to support a repeat repair claim, contact the responsible Product Support Manager for authorization to submit the claim for review. The Dealer will be paid one time only for repairs or adjustments unless a known product problem is involved or a part failure occurs. Wirtgen America will not pay for substandard repairs.

### **4.5.4 Accommodation**

Accommodation will be paid upon pre-approval up to \$120.00 per night.

### **4.5.5 Parts and Vendor Component Coverage**

Wirtgen America will, at its election, provide a new or rebuilt part in place of any part which upon inspection is found to be defective in material or workmanship during the warranty period. Such part will be repaired or replaced without charge to the Customer from a Wirtgen America representative or an authorized Dealer during normal working hours. Wirtgen America reserves the right to conduct the repair of the machine or replacement of the part at the job site.

**Note:**

- Freight costs are not covered under warranty.

### **4.5.6 Track Roller Parts Warranty (Wirtgen products only)**

Track rollers are wear items. Claims for track rollers are subject to be prorated. Wirtgen America will file track roller claims with the manufacturer. Warranty consideration for track rollers requires the return of the rollers to Wirtgen America, who will forward defective rollers for inspection and analysis. Track roller claims must be accompanied by a Track Roller Failure Report (Enclosure 7) indicating the serial number of the track frame and the location and position of the defective roller in the track frame. Warranty claims submitted without this form will be returned as denied. Claims may be resubmitted via mail within 10 days only with the completed Track Roller Failure Report attached.

**Note:**

- Repairs caused by lack of or improper maintenance of the machine are not reimbursed.
- Any warranty claim for track rollers must indicate the serial number of the track frame.
- Review the following report – Oil Leakage Assessment of Track Rollers – before filing a track roller claim.
- Find more track roller information regarding function, wear and maintenance on [http://www.partsandmore.net/en/content.aspx?fl\\_num=FT&id=4&pageID=405](http://www.partsandmore.net/en/content.aspx?fl_num=FT&id=4&pageID=405)

### Oil Leakage Assessment of Track Rollers

by Andreas Lipinski

#### 1. Case Study

The undercarriage component track rollers are generally subjected to high loads during operation. Due to the operating conditions of construction machinery, especially the sealing areas of the roller which are heavily stressed by external influences such as dirt.

In practice it repeatedly happen that track rollers are prematurely removed by users if only a little amount of lubricant shows. In many cases it is assumed – mostly without really knowing the correlation – which this is caused by a defective seal. After closer investigation, however, it is very often found that this is not a real leakage in the typical sense but just the lubricant showing under the normal loading of the track roller.

Although in field operation it is not so easy to differentiate between the two cases, the following shall give some advice for a better assessment, above all, because this also plays a role with regard to environmental aspects which most users consider important.

#### 2. Appearance of Leakage on Track Rollers of Excavators and Tractors

Principally, there are three points at which leakage on track rollers may appear [1]:

- At the filling hole plug
- Between track roller and bracket (O-ring of the shaft)
- Between track roller and flange of bracket (floating ring seal).

Oil traces between roller shell and bracket flange (area of the floating ring seal) are the most frequent cause for track rollers removal by the user. In the past, these cases were left unclear whether the roller was leaky or the lubricant showing is just a normal functional effect. In the case of the latter, this is normally called a “sweating” track roller.

##### 2.1 Leaky Track Rollers

Track roller leakage becomes visible in the following way:

- Oil traces are clearly visible in the area of the bracket seal of the track roller.
- The track roller always remains wet and does not get dry.
- In the advanced stage of leakage drops are formed finally leaving oily shoes which are well recognizable after a longer stand still of the machine.

This case of damage has been explained in detail under [1] so that at this point a further explanation is not required.

It should, however, be mentioned that in these cases the roller must be removed for repair. If it cannot be repaired, the roller must be replaced.

##### 2.2 “Sweating” Track Rollers

For functional reasons, a floating ring seal must always float on an oil film to work properly. Here, it often happens that the oil is “sweating” which can be regarded as normal from the structural point of view.

“Sweating” track rollers can be easily identified by slight oil traces on the roller shell although the oil is bound by dirt and dust already after a short period of operation. Principally, track rollers which are commercially available today are designed with an oil amount that allows oil losses due to “sweating” and will not cause a failure.

# WIRTGEN AMERICA

## Product Support Manual

---

“Sweating” of track rollers may have the following causes:

- During assembly, seals are mounted in oily condition. This oil may show on the roller shell after commissioning.
- Due to the geometric design of floating rings the oil gets from the floating area cone through the seal fact up to the seal gap. This oil may also show during operation (Section 5).
- During dirt collection in the external mounting space of the seal, floating rings may, under the influence of sudden axial motions, move away from each other temporarily leaking oil.
- If the machine is not used for a longer time, in particular, if the soil is frozen, floating rings may stick together. If the machine is taken into operation again, seals break free and some oil leaks temporarily.
- A kind of sweating effect may also be produced in winter (under cold conditions) when floating rings temporarily move off due to the changed elasticity of the O-rings until the roller has reached operating temperature.

### 3. Investigation

Over two years INTERTRACTOR AG has carried out systematic investigations on leaky rollers of various sizes having been in operation for 500 to 4000 hours.

The objective of these investigations was to find out if oil traces are due to a principal defect of the seal. Prior to disassembly, track rollers were inspected visually for external damages and the existing oil amount of each roller was assessed by quality and quantity. Then rollers were dismantled and the inside wear was measured. The bearing and the floating ring seal (floating ring and O-seal) required for the sealing of the roller as well as their retainer at the roller shell and bracket were assessed visually and also measured.

### 4. Results of Investigations

Checking the oil amount of the investigated track rollers proved that about 80% of the rollers still had the total oil amount or an amount of oil sufficient for the functioning of the roller. This means that a removal of the rollers was not necessary.

A dimensional check of the rollers did not show any obvious abnormalities. The bearings in the roller shell showed more or less wear which, however, is to be considered as normal. The wear of the bearing which is due to the loading of the roller does not affect its function.

As a result of visual tests of tract rollers and roller components and leak tests, it was proved that floating ring seals did not suffer any functional shortcomings. Thus, based on those comprehensive investigations, it could clearly be stated that the majority of “leaky” rollers were just a result of the normal functioning of floating ring seals.

For a better illustration of the correlation explained in this section, the follow is pursuant to [2] and describes again in more detail the cause of the “sweating” effect of rollers, in particular with regard to the normal functioning of the seal.

### 5. Structural Design and Function of the Floating Ring Seal

The floating ring (fig.1) seal consists of two metal rings of the same shape each elastically embedded in an O-ring [2].

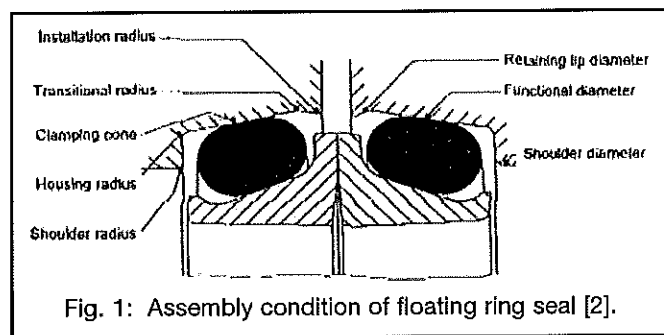

The O-rings are designed for torque transmission and for the static tightness of the floating rings.

The seal is arranged in the roller in such a way that one of the two floating rings is rotary (roller shell) and the other one (bracket) is stationary.

The axial force required for the sealing is achieved by compression of the O-rings between the tension cones of the floating rings and the location borings on roller shell and bracket.

The contact surfaces of the floating rings (floating surfaces) are lapped. From these contact surfaces, the rings are wedge-shaped at a specific angle. The rings seat with their floating surface (lapping or sealing face) upon another and form a gap which is tapered towards the axis. Through this gap the lubricant gets easily to the seat faces.

During operation of the track rollers the seal faces continuously shift towards the internal diameter due to wear. Therefore, the wear reserves are relatively high and are generally sufficient for the service life of a roller in a construction machine. Life limit is reached when the floating surfaces have completely moved to the internal diameter of the floating ring.

A proper function of the seal is only granted if the floating surfaces are separated from each other by a good bearing oil film (mixed friction). Through capillary action during rotation, the lubricant gets into the seal gap. This provides an adequate lubricating and cooling effect preventing a cold welding of the sealing faces.

Due to this function, a minor amount of lubricant shows at the external sealing gap which is not to be regarded as leakage, but indicates the optimum design and proper function of the floating ring seal.

### 6 Conclusions

The results of investigations derived from the functioning of a floating ring seal showed that about 80% of rollers which have been removed for failure analysis were "sweating" rollers.

This means that many track rollers tested for leakage did not have to be removed; i.e., it shows that proper assessment of the rollers would have reduced costs and prevented downtime periods of the machine.

For these reasons, track rollers showing oil traces described as "sweating" rollers should not be removed immediately.

This article should help to make a correct assessment of the real conditions.

---

### **4.5.7 Rubber Track System Warranty (Vögele Products Only)**

#### **4.5.7.1 Warranty Coverage**

Wirtgen America provides warranty coverage for defects in material and workmanship with rubber track system components on paving equipment as listed below. Failures due to a lack of maintenance and or improper operation are not covered under any circumstances.

#### **4.5.7.2 Parts Covered Under Warranty**

1. Rubber tracks
2. Drive, idler and bogie wheels
3. Track frames
4. Idler arms

#### **4.5.7.3 Labor Coverage**

Labor for parts replacement is covered under warranty conform to the terms and conditions in this policy.

#### **4.5.7.4 Warranty Period**

During the first 12 months or 1000 hours of service, whichever occurs first, a free replacement is provided if the failed parts fall within the terms and conditions of this warranty. Beginning with the 13th month and up to 36 months or 3000 Operating hours – whichever occurs first, the warranty on parts is prorated. As an example: a track that has been in service for 20 months will be replaced at 20/36, i.e. Wirtgen America would provide a credit of 44.4% of the original purchase price.

#### **Note:**

- In addition any other warranty terms or conditions stated in this manual are in effect.

### **4.5.8 Non-Wirtgen Parts**

Non-Wirtgen parts are reimbursed only when completing an emergency repair and are specifically excluded from any Wirtgen America Warranty. Parts are reimbursed at actual cost not to exceed the cost of the applicable genuine Wirtgen Group part. Costs must be confirmed with an invoice.

#### **Note:**

- The non-Wirtgen part must meet the standards and specifications of the genuine Wirtgen Group part.
- A non-Wirtgen part should not be installed on a new machine in Dealer stock.
- Send the original invoice with the returned parts.

### **4.5.9 Engine Warranty**

The engine is subject to the warranty terms and conditions of the engine manufacturer.

## **4.6 Dealer Warranty Claim Processing**

The Dealer must carry out warranty work promptly upon the Customer's request. The warranty claim form (Enclosure 4) must be submitted to the Warranty Department within 60 days of the failure date and 30 days of the repair date.

# WIRTGEN AMERICA

## Product Support Manual

---

Discard the claim forms received with the machine; only use the warranty claim form provided by the Wirtgen America Service Department.

The following requirements apply to the preparation of all warranty claim forms:

- All inquiries and correspondence regarding warranty claims should be communicated while using the Wirtgen America claim number (Wirtgen America does not identify claims using the dealer in-house work order number).
- Additional claim forms should be used for parts and labor overflow.
- Provide documentation supporting service technician's labor hours and travel. Attach copies of technician's service reports to support labor hours (Wirtgen America may require documentation for labor and travel on any claim).
- Labor hours and travel hours must be claimed separately. Provide the number of hours and the hourly warranty rate.
- Provide copies of invoices for sub-let repairs.
- Use a manufacturer part number to indicate the part's failure even if the part is actually purchased locally (this will ensure identification of the failed part). Place parentheses around the genuine part number and write "local" in place of the invoice number. A copy of the invoice for any part not purchased from Wirtgen America must be provided. The non-Wirtgen Group part must not exceed the cost of the Wirtgen Group part.
- Claim forms must list original and replacement part serial numbers of electronic and Hydraulic parts must have a serial number (controllers, tracer, slope sensors, pumps, motors etc.).
- E-mail the completed warranty claim form to the Wirtgen America Warranty Department for processing; [warranty@wirtgenamerica.com](mailto:warranty@wirtgenamerica.com)

**Note:**

- The warranty claim form must be filled out in its original format and electronically submitted as an e-mail attachment.
- Supporting documentation must be legible and may be submitted electronically with the claim.
- The warranty claim form and instructions for completion are included in this manual.

### 4.6.1 Warranty Parts Return Procedure

Defective parts may be returned to Wirtgen America only after approval and obtaining a Return Goods Authorization (RGA). Dealers are required to hold all defective warranty parts for 120 days from the date credit is given or the claim is denied.

**Note:**

- Legal Parts - Parts involved in accidents, personal injuries, or property damage must not be scrapped until authorized by Wirtgen America.

There is no mandatory parts return list; any part may be recalled for inspection. However, hydraulic parts, motors, pumps, gear boxes, planetary, track rollers, controllers, electronic consoles, CGC displays, milling depth regulators, tracers, sonic sensors, etc. must always be returned to Wirtgen America.

# WIRTGEN AMERICA

## Product Support Manual

---

**Note:**

- Do not return parts COD. Parts shipped COD will be refused.
- Freight costs are not covered under warranty.
- A RGA is required for the return of any parts.

### 4.6.2 Preparation of Parts and Return Shipments

Parts should be tagged and prepared for return as follows:

- Drain all parts of oil and fluids.
- Clean parts before returning.
- Pad any parts that could be damaged in transit.
- Do not ship large or heavy parts in the same carton with smaller, lighter parts.
- Be certain that all parts are complete and assembled. Do not disassemble any warranty part.
- The RGA number must show on the outside of the box/crate or on the shipping label.
- Enclose a copy of the RGA form as the packing list.

**Note:**

- Failure to return requested parts within 30 days will result in claim denial.
  - ⇒ No parts return is allowed without a Return Goods Authorization. Shipments without a proper RGA will be returned to the sender.
- Parts shipped prior to draining or clean-up are subject to a \$450.00 clean-up fee.
- Air Condition units must be free of Freon Gas before shipping.

### 4.7 Wirtgen America Warranty Claim Processing

The Wirtgen America Warranty Department will review the warranty claim for registration and technical evaluation purposes. Defective parts must be returned to the Warranty Department immediately upon request after receiving a RGA number. The warranty claim numbers must be clearly referenced on the packing list. The Warranty Department will notify the Dealer of the decision in writing.

**Note:**

- All credits are subject to the final vendor decision after inspection.

### 4.8 Back Charges

Payment for warranty, policy, or service parts may subsequently be charged back if the payment proves to be unjustified. Back charges are made for claims that are duplicated, unsubstantiated, or not meeting the requirements stated in this manual (an example of a charge back would be credit issued for a part returned as defective, but inspection and analysis by the manufacturer reveals no problem with the part).

### 4.9 Appeals Procedure

If the warranty applicant believes a denied claim is justified and wishes to appeal, it is not necessary to generate a new claim. Additional justification for the claim along with any supporting documentation such as technician's service report, etc., must be sent via email or fax to Wirtgen America's Warranty Department on the Dealer's letterhead. The appeal must reference the denied claim number and be sent electronically within 15 days of the original denial.

# **WIRTGEN AMERICA**

## **Product Support Manual**

---

### **4.10 Dealer Warranty**

The selling Dealer implies no additional warranty on any item covered by this warranty, and provides no warranty on other items unless he delivers a separate written warranty certificate to the Purchaser. The Dealer has no authority to make any representation or promise on behalf of Wirtgen America or to modify the terms or limitations of this warranty in any way.

### **4.11 Parts Warranty Reimbursement**

Wirtgen America reimburses warrantable parts at 80% of the list price for claims received within the allowed filing period of 60 days of the failure date and 30 days of the repair date. Claims received after the filing time limit will be reimbursed at the invoiced price. Claims will be considered received when the complete and correct information requested on the claim is provided. Requests for additional information to correct the claim will delay the date that the claim is received. Parts purchased below 20% discount are reimbursed at dealer net purchase price.

### **4.12. Extended Warranties**

Wirtgen America is offering several Extended Warranty Programs. Terms and Conditions are specific to a machine and are provided with the sale of the program.

Extended Warranty Plans are inclusive of the standard warranty, i.e. a 2 Year / 2000 Hour Full Machine Warranty expires after 2 years from the date of start-up or 2000 operating hours, whichever occurs first.

### **4.13 Policy**

On occasion a situation may arise when the Wirtgen America Product Support Department will accept claims outside the warranty policy. Special allowances will be made on an individual basis and do not represent an admission of liability by Wirtgen America. Wirtgen America's Product Support Manager may authorize repairs not covered by warranty or credit repairs after the machine is no longer within the parameters of Wirtgen America's warranty when, in his opinion, an owner deserves consideration for beyond warranty repair. The Dealer should not make any commitment to a machine owner without first obtaining Wirtgen America's authorization.

### **4.14 Limitation of Liability**

The remedies of the user set forth under the provisions of warranty outlined above are exclusive and the total liability of Wirtgen America or its Dealer with respect to the sale of the equipment and service furnished hereunder, in connection with the performance or breach thereof, or from the sale, delivery, installation, repair or technical direction covered by or furnished under this sale whether based on contract, warranty, negligence, indemnity, strict liability, or otherwise shall not exceed the purchase price of the unit of equipment.

Wirtgen America, Suppliers, and Dealers shall in no event be liable to the User, any successors in interest, or any beneficiary or assignee relating to this sale for any consequential, incidental, indirect, special, or punitive damages arising out of this sale or any breach thereof, or any defects in, or failure of, or malfunction of the equipment under this sale whether based upon loss of use, lost profits or revenue, interest, lost goodwill, work stoppage, impairment of other goods, loss by reason of shutdown or non-operation, increased expenses of operation of the equipment, cost of purchase of replacement power or claims of users or Customers of the user for service interruption whether or not such loss or damage is based on contract, warranty, negligence, indemnity, strict liability, or otherwise.

# WIRTGEN AMERICA

## Product Support Manual

---

### 4.15 Statement of Warranty

Wirtgen America warrants such equipment, parts, and other products as are manufactured by Wirtgen America against defective material or workmanship for a period of twelve months after date of first delivery or for 1,000 hours of use with any Wirtgen, Vögele and Hamm product and 2000 hours of use with any Kleemann product, whichever comes first, provided that the Buyer sends Wirtgen America a notice of the defect within 30 days of its discovery and clearly establishes that (1) the equipment, parts, etc., have been properly installed and setup, maintained, and operated within the limits of rated and normal usage and (2) that the defect did not result in any manner from the intentional or negligent action or inaction of the Buyer; further provided that Buyer cannot establish that conditions (1) and (2) have been met, then this warranty shall not cover the alleged defect. Failure to give notice of defect within such period shall be a waiver of this Warranty and assistance rendered thereafter shall not extend or revive it. WIRTGEN AMERICA MAKES NO SUCH WARRANTIES WITH RESPECT TO PARTS OR EQUIPMENT NOT MANUFACTURED BY WIRTGEN AMERICA, SUCH AS ENGINES, MOTORS, CLUTCHES, SPEED REDUCERS, PUMPS AND OTHER ASSEMBLIES, VALVES, SOLENOIDS, AND OTHER PARTS AND ACCESSORIES. Accessories, assemblies, and components included in products of Wirtgen America, which are not manufactured by Wirtgen America, are subject only to the warranty of their respective manufacturers.

This warranty shall not cover misuse, alteration, abuse, negligence, accident, acts of God, sabotage, or any item on which serial numbers have been altered, defaced, or removed but shall be limited to repair or replacement, F.O.B., Wirtgen America facility, of those parts which upon inspection by Wirtgen America appear to have been defective in material or workmanship. Wirtgen America will, at its option, use genuine Wirtgen Group or remanufactured parts. Wirtgen Group replacement parts that are used in a repair are covered by the Wirtgen America replacement warranty. Parts such as liners, cutting edges, rubber flashing, conveyor belting, castings, vibrators, teeth, and other wear parts, which are subject to wide variations or destructive service, are not covered by this Warranty and are the maintenance responsibility of the Buyer from the beginning of operation. THIS WARRANTY IS LIMITED TO THE BUYER AND IS NOT ASSIGNABLE OR OTHERWISE TRANSFERABLE.

THIS WARRANTY IS EXPRESSLY IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES EXPRESSED OR IMPLIED (INCLUDING ANY WARRANTY OF MERCHANTABILITY AND FITNESS OF ANY PRODUCT OR GOODS FOR A PARTICULAR PURPOSE) AND ALL OTHER OBLIGATIONS OR LIABILITIES ON WIRTGEN AMERICA'S PART, AND WIRTGEN AMERICA NEITHER ASSUMES NOR AUTHORIZES ANY OTHER PERSON TO ASSUME FOR WIRTGEN AMERICA ANY OTHER LIABILITY IN CONNECTION WITH THE SALE OF WIRTGEN AMERICA'S PRODUCTS. THERE ARE NO WARRANTIES THAT EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF.

#### LIMITATION OF LIABILITY

It is agreed that in the event of breach of any warranty by WIRTGEN AMERICA the liability of WIRTGEN AMERICA shall be limited exclusively to the remedies of repair or replacement of defective parts covered by the Warranty set forth in the paragraph WARRANTY ON EQUIPMENT above and that such repair and replacement shall be Buyer's sole and exclusive remedy. WIRTGEN AMERICA shall not have any liability whatsoever for loss of use or for any other incidental, consequential, or other damages or losses resulting from a breach of warranty, such as, but not by way of limitation, labor costs, loss of profits, loss of use of other than equipment, third party repairs, personal injury, emotional or mental distress, improper performance of work, penalties of any kind, loss of service of personnel, or any other damages or losses which may be experienced by the Buyer.

### **5.5 Confirmation of Receipt – Machine Guarantee (Enclosure 2)**

The purpose of this form is to start the warranty on the machine. The form is to be completed and returned to the Wirtgen America Warranty Department upon delivery of the machine to your Customer as a sold unit. A machine that is rented should be registered as a rental unit. The in-service date for a rental unit is the first day that it is rented to a Customer. Demo units are to be registered when the hour meter exceeds 50 hours of service for warranty claims to be considered. This form must be completed and received by the Wirtgen America Warranty Department along with the Machine Inspection and Receiving Report before warranty claims will be considered for sold, leased or rented machines.

This form must be completed when a machine is sold as a new, rental or lease machine. For example if a machine has been leased to a Customer but registered as a Rental Machine, the registration needs to be changed if the Customer purchases the machine at the end of the lease.

#### **5.5.1 Confirmation of Receipt – Machine Guarantee Card Completion Instructions**

Electronically enter the data on the form as explained below. Once you have completed the form, save and print the file. Have all required personnel sign the form. Once signed, the form must be electronically scanned and emailed as an attachment to the Warranty Department; [warranty@wirtgen-america.com](mailto:warranty@wirtgen-america.com). The serial number of the machine must appear in the e-mail subject line. If you are unable to electronically send the form then you may return it via mail or fax.

- (1) Select the appropriate Wirtgen America Product Line
- (2) Complete Dealer physical address – All fields are to be completely filled in.
- (3) Machine model – model number of machine
- (4) Serial number of the machine
- (5) Year of manufacture
- (6) Check new or used machine
- (7) Engine model
- (8) Serial number of the engine
- (9) Start-up date of the machine
- (10) Machine operating hours at start-up
- (11) Machine location at start up (City, State)
- (12) Complete Customer physical address – All fields are to be completely filled in.  
The street address MUST be a physical address. P.O. Box numbers are not acceptable.
- (13) Contact first and last name for the responsible safety personnel with e-mail address and phone number
- (14) Contact first and last name for the responsible service/maintenance personnel with e-mail address and phone number
- (15) Contact first and last name for the responsible machine operations personnel with e-mail address and phone number
- (16) Signature by a Customer representative
- (17) Signature by a Dealer representative
- (18) Name and title of the Operating Personnel.

### 5.6 Transfer of Ownership Form (Enclosure 3)

The purpose of this form is to notify Wirtgen America if there is a change of Ownership with used machines. The form must be completed and returned to the Wirtgen America Warranty Department upon delivery of the machine to the new Customer as a sold unit. The Machine Inspection and Receiving Report must be returned with the Transfer of Ownership form before warranty claims will be considered for used machines (if warranty is applicable).

#### 5.6.1 Transfer of Ownership - Completion Instructions

Electronically enter the data on the form as explained below. Once you have completed the form, save and print the file. Have all required personnel sign the form. Once signed, the form must be electronically scanned and emailed as an attachment to the Warranty Department; [warranty@wirtgen-america.com](mailto:warranty@wirtgen-america.com). The serial number of the machine must appear in the e-mail subject line. If you are unable to electronically send the form then you may return it via mail or fax.

- (1) Select the appropriate Wirtgen America Product Line
- (2) Complete Dealer physical address – All fields are to be completely filled in.
- (3) Machine model – model number of machine
- (4) Year of manufacture
- (5) Serial number of the machine
- (6) Check remaining factory warranty Yes or No
- (7) Engine model
- (8) Serial number of the engine
- (9) Original Start-up date of the machine with operating hours at initial start-up
- (10) Transfer date of the machine with operating hours at that date
- (11) Machine location at start up (City, State)
- (12) Complete Customer physical address – All fields are to be completely filled in.  
The street address MUST be a physical address. P.O. Box numbers are not acceptable.
- (13) Contact first and last name for the responsible safety personnel with e-mail address and phone number
- (14) Contact first and last name for the responsible service/maintenance personnel with e-mail address and phone number

---	--	---	--

This form is to be completed and returned, with a completed PDI form, to Wirtgen America, Inc. upon delivery of the machine to your new customer as a sold unit. A machine that is rented should be registered as a rental unit. The in-service date for a rental unit is the first day it is rented to a customer. The enclosed safety manual is to be placed with the machine. In order to maintain our machine records for future mailings and machine updates, we ask that you supply the contact name, phone number and email address of the person responsible for documents pertaining to Safety, Service/Maintenance and Machine Operations.

By signing this form, the responsible persons confirm that they know the location of safety devices and that they have read and understand the operating and safety instructions that were received with the machine. Operating personnel confirm that they have received operation and safety instructions necessary for putting the machine into service. Dealers are responsible for obtaining the proper signatures from their customers.

This form registers the warranty for the machine and ensures that you and your customers are aware of the safety requirements for machine operation. This completed form must be on file with Wirtgen America, Inc. before any warranty claims will be processed.

### 5.7 Warranty Claim Form (Enclosure 4)

#### 5.7.1 Warranty Claim Completion Instructions

The claim form is designed to be e-mailed as an attachment. Contact the Wirtgen America Warranty Department for your claim numbers. Reference the following information in the subject line of the e-mail:

- Wirtgen America claim number
- Serial number of the machine

Attach only one claim per email and sent your claim to [Warranty@WirtgenAmerica.com](mailto:Warranty@WirtgenAmerica.com)

Beginning with the section marked Warranty No. Dealer you will enter the required information using the TAB key to move to each section. Use of the enter key to move to each section will cause the form to become obscure and invalid for entry into the warranty system for processing. The dark gray boxes on the warranty claim form are for Wirtgen use only.

- (1) Select the appropriate Wirtgen America Division affected by the claim
- (2) Enter the Wirtgen America Warranty Claim number provided
- (3) Dealer Reference Number, such as work-order number, internal claim number, etc.
- (4) Filing Date of the claim
- (5) Complete Dealer physical address – All fields are to be completely filled in.
- (6) Complete Customer physical address – All fields are to be completely filled in.  
The street address MUST be a physical address. P.O. Box numbers are not acceptable.
- (7) Machine model – model number of the machine
- (8) Serial number of the machine.  
The serial number is divided into 2 sections. The first four digits are typed in the first section, press TAB, and the last four digits are typed in the second section – examples 0710 xxxx , 04WR xxxx , 0805 xxxx etc.
- (9) Start-up date of the machine as entered on the Machine Inspection & Receiving Report
- (10) Screed model – model number of the screed (where applicable)
- (11) Serial number of the Screed (where applicable)
- (12) Date when the original part or the spare part failed (only one failure date per claim)
- (13) Serial of the Engine
- (14) Date when the machine was repaired
- (15) Year of manufacture of the machine as indicated on the serial number plate
- (16) Indicate if this is an original machine part or a spare part
- (17) Operating hours on the machine at the time of repair

*(continued on next page)*

### Part Section of the Claim Form

This portion of the claim is divided into five sections. Each section requires the part number of the delivered (replacement part) and the failed part number. At times a replacement part number has changed from the original part number. It is important that this information is correct when the claim is submitted. The claim form also has a section for the serial number of the part mounted and the serial number of the failed part. This field is required for all parts that have a serial number (e. g. hydraulic motors, pumps, gear boxes, planetary, controllers, electronic consoles, CGC displays, milling depth regulators, tracers, sonic sensors, etc.)

- (18) Parts description examples: Description of delivered part: Conversion Kit Gearbox  
Description of failed part: Gearbox
- (19) Part number examples: Part no. delivered: 138765  
Part no. failed: 99913
- (20) Serial number examples: Serial no. part mounted: 067  
Serial no. part failed: 307

**Note:**

The technician making the repair should record this information at the time this work is performed.

- (21) Quantity of parts
- (22) Operating hours at the time the part failed
- (23) Wirtgen America invoice number and date of the spare part purchase (a copy of the invoice is required for parts purchased from local vendors)
- (24) Purchase price of parts in USD (amount should be extended if quantity is more than one)
- (25) Describe the Customer's complaint, diagnosis of cause, and corrective measures taken. Words such as bad, defective, failed or inoperative are not adequate descriptions of failure. Terms that will better describe the failure are stripped, shorted, torn, twisted, binding or noise. The part number of the affected component is also required for any Labor Only claim as reference. The part number should be listed in the claim's description and repair of failure statement.
- (26) Labor and Travel amounts – The USD amount to be used for the claim is the approved rate @ 75% of the Dealer charge-out rate for labor and travel. The full rate can only be used for campaign work claimed on the warranty claim.
- (27) The fax number of the person originating the claim
- (28) Indicate the number of enclosures included
- (29) Check attached enclosures
- (30) Date claim is submitted by e-mail
- (31) Name of person submitting the claim

### 5.8 Claim Pre-Authorization Form (Enclosure 5)

#### 5.8.1 Claim Pre-Authorization Form Completion Instructions

This form is a fillable PDF designed to be e-mailed as an attachment. Electronically enter the data on the form. Once you have completed the form, click the email button at the bottom, enter the appropriate e-mail address and send the form to [warranty@wirtgenamerica.com](mailto:warranty@wirtgenamerica.com)

Contact the Wirtgen America Warranty Department for your claim numbers. The dark gray boxes on this form are for Wirtgen America use only.

- (1) Select the appropriate Wirtgen America Product Line
- (2) Enter Dealer Reference #
- (3) Enter the Filing Date
- (4) Complete Dealer name and physical address
- (5) Dealer contact person
- (6) Dealer phone number
- (7) Complete Customer name and physical address
- (8) Customer contact person
- (9) Customer phone number
- (10) Check if the Repair is already completed
- (11) List the Date of Failure with Machine Operating Hours at that Date
- (12) List the Date of Repair with Machine Operating Hours at that Date
- (13) Complete model of machine
- (14) Complete machine serial number
- (15) Start up date of machine
- (16) Failed component/part number(s)
- (17) Failed component/part description(s)
- (18) Quantity of failed part(s)
- (19) Invoice Number if already available
- (20) Price of each failed part
- (21) Extended total price of failed part(s)
- (22) Estimate of the requested reimbursement for labor, travel, parts, sublet or other costs.
- (23) Repair estimate Total
- (24) List the Current Warranty Reimbursement Rate
- (25) Describe the Customer's complaint, diagnosis of cause, and corrective measures taken. Words such as bad, defective, failed or inoperative are not adequate descriptions of causes. Terms that will better describe the cause are stripped, shorted, torn, twisted, binding or noise. The part number shall be referenced in the failed component area. This is to include labor or travel only requests as well as requests for sublet/third party repairs, etc. In the description include any extenuating circumstances related to the request.

### 5.10 Wirtgen Track Roller Failure Report (Enclosure 7)

#### 5.10.1 Wirtgen Track Roller Failure Report Completion Instructions

This form is for reporting failures of track rollers on Wirtgen machines only. A completed Warranty Claim Form must accompany this Failure Report.

This form is a fillable PDF designed to be e-mailed as an attachment. Electronically enter the data on the form. Once you have completed the form, click the email button at the bottom, attach the completed corresponding Warranty Claim Form and send the email.

- (1) Enter the Customer or Dealer complete physical address, fax number and phone number
- (2) Enter machine model and serial number
- (3) Enter warranty claim number as reference
- (4) Circle the position where the roller failed for each track position
- (5) Enter track frame serial number for each track position

**Note:**

- Every undercarriage or side frame has a serial number for identification; this number is stamped on the bottom of the front cross plate next to the sprocket hub and looks like this:  
88.0785-1
  - ⇒ 88.785 is the job and order acknowledgment number.
  - ⇒ -1 is the running number of the side frame or undercarriage.
- To receive track roller consideration from the manufacturer, the track frame serial number and the position of the failed rollers must be furnished.
- Track rollers are a mandatory return item.

 		<b>Track Roller Failure Report</b>		Wirtgen America, Inc. 6030 Dana Way, Antioch, TN 37013 USA Phone (615) 501-0605 · Fax (615) 501-0692 www.wirtgenamerica.com

## **Part 2**

### ***Parts Policy***

# **WIRTGEN AMERICA**

## **Product Support Manual**

---

### **6 Parts Policy**

#### **6.1 Commitment of Wirtgen America**

Wirtgen America is under the obligation to supply spare parts for a period up to ten years after terminating serial production of any machine.

The following assistance is available to aid Dealers in sales of Wirtgen Group parts:

- Parts Training
- Service Portal
- WIDOS Software
- Parts and More Software & Catalog
- WITRAIN Software
- Recommended spare parts list

**Note:**

- Contact the Wirtgen America Parts Department for any Documentation Requirements.
- Refer to Chapter 2.1 for additional Information on Documentation Systems.

#### **6.2 Parts Orders**

Please contact the Wirtgen America Parts Department for your parts order at:

Wirtgen America, Inc.  
6030 Dana Way  
Antioch, TN 37013

Phone: 615-501-0601  
Fax: 615-501-0693  
E-Mail: [parts@wirtgenamerica.com](mailto:parts@wirtgenamerica.com)

Internet: [www.wirtgenamerica.com](http://www.wirtgenamerica.com)

Business Hours: 7:00 am - 6:00 pm CST, Mon.-Fri.  
8:00 am - 12:00 am CST, Saturday

##### **6.2.1 Wirtgen America Service Portal**

The website address is <http://portal.wirtgen-group.com>

The Service Portal provides the following functionalities to dealer personnel:

- Ability to place parts orders
- Check pricing
- Review parts availability
- Tracking of billing and shipping information.

# WIRTGEN AMERICA

## Product Support Manual

---

There are 2 levels of Users for the portal:

- Level 1 user has the ability to look up parts drawings and check availability and pricing as well as placing orders.
- Level 2 user has the same capabilities as level 1, in addition the user can review invoicing and tracking information as well as perform order management.

Other functionalities based on access permissions are:

- Online Infothek,
- Service Documents
- Software Release management.

Please contact the Wirtgen America parts department for access permissions and fees.

### 6.3 After-Hours Emergency Parts Service

After-Hours Emergency Parts Service is available after normal business hours. To access After-Hours Emergency Parts Service, dial either 615-430-1307 or 615-501-0600 and follow the instructions.

There is an additional charge of \$250.00 for every After-Hours Emergency Parts Service order placed.

### 6.4 Order Acknowledgement

A Parts & Accessories Order Form (Enclosure 10) is required for Wirtgen America to fulfill parts orders. The following information must be provided on that form:

- Dealer purchase order number
- Part number, description, and quantity required
- Order type (i.e. Machine Down, Emergency or Stock)
- Shipping instructions and indication if order is to be shipped Partial or Complete
- Machine model and serial number
- Contact name, phone number, and fax number

### 6.5 Stock Orders

Stock orders are designed to provide additional discounts to assist our dealers in maintaining parts inventory to provide sufficient parts service to our customer.

Please note the following procedures for stock orders:

- Wirtgen America reserves the option of carrier selection on prepaid freight.
- Drop shipments are designed to be used in a machine-down emergency and not to take the place of well-planned inventory stocking strategies at the distributor location.
- Stock orders are shipped ground freight as a standard. Shipping stock orders expedited will adjust the discount to emergency discount levels.
- Stock orders are processed within 2 working days after receipt.
- Stock orders must be clearly marked.
- Stock orders qualify for the annual surplus return.
- Stock orders should be entered frequently as they are necessary to support in-service machines.
- Stock orders must have a minimum of 10 line items.

# WIRTGEN AMERICA

## Product Support Manual

---

### 6.5.1 Stock Order Discount

Stock orders receive 30% discount off list price. (Excluding parts listed under paragraph 7.2.1)

### 6.5.2 Stock Order Freight

Wirtgen America is paying ground freight the most economical way on multi-line stock orders shipped in continental North America, conforming to the minimum, combined order volume of \$17,500.00 (Excluding parts listed under paragraph 7.2.1).

#### Note:

- Parts for all products may be combined to one order to meet order volume based on net pricing.
- Stock orders can be shipped only to authorized dealer locations.
- Highly price competitive items listed under paragraph 7.2.1 are excluded from free freight arrangements.

### 6.6 Emergency Orders

**MAKE SURE TO CLEARLY "MARK MACHINE DOWN" ON AN EMERGENCY ORDER WHEN APPROPRIATE.**

Please note the following emergency order terms:

- These orders receive top priority and will be shipped on a same-day basis.
- "MACHINE DOWN" situations **MUST** be clearly marked on emergency orders. A follow up phone call with the parts department is highly recommended.
- Emergency orders must be clearly marked with a shipping method. Emergency orders can be shipped by air or ground.
- Indicate if the order may be shipped Partial or must ship Complete.
- Emergency orders will not be processed without model and serial number of the machine.
- Emergency orders might be drop-shipped.
- Emergency orders may qualify for the annual surplus return.
- Wirtgen America reserves the option of carrier selection on prepaid freight.

#### 6.6.1 Emergency Order Discounts

Emergency orders receive 20% discount off list price. (Excluding parts listed in chapter 7.2.1)

#### 6.6.2 Emergency Order Freight

Freight will be at Dealer or Customer expense.

### 6.7 Minimum Order Charge

Wirtgen America has a Minimum Order Charge of \$150.00. Any parts orders that do not meet the criteria will be subject to an additional charge equal to the difference between the price of the part and \$150.00.

#### Note:

- Orders shipped directly to customers are not subject to the Minimum Order Charge.

# **WIRTGEN AMERICA**

## **Product Support Manual**

---

### **6.8 Order Cancellation**

Parts orders containing the following parts cannot be cancelled:

- Weldment assemblies
- Internal components of major assemblies
- Special order parts

Stock orders must be cancelled in writing, and the written request received before the day of shipment. An order cancellation of fee of \$250.00 will be charged for processed orders.

### **6.9 Annual Parts Return**

#### **6.9.1 Parts Return Procedure**

Wirtgen America will accept the return of certain surplus parts during a designated 2 year period. The enclosed Return Goods Authorization (RGA) form (Enclosures 11), must be used for all parts returns. If the return requires more lines than the form contains, subsequent forms should be completed in full and attached. Fill in the form electronically and email the form to [rgaclerk@wirtgenamerica.com](mailto:rgaclerk@wirtgenamerica.com)

Terms and conditions for returning parts:

- Freight must be prepaid. Wirtgen America may pay freight upon agreement with the dealer.
- Parts must be in original packing, in new, saleable condition, and purchased from Wirtgen America.
- Limited shelf life parts are not returnable.
- Invoice numbers should be included with all Parts being returned. A 10% processing fee will be charged if Invoice numbers are not provided.
- Items, which have been painted or modified, will be considered used and are not returnable.
- Do not return any parts without the pre-approval of the RGA clerk. Parts returned without approval will be returned at Dealer expense.
- Do not ship multiple returns on a single RGA number. For example, do not return warranty parts together with annual stock returns (one RGA number per return only).
- The dealer must return RGA parts within 30 days after receiving the approval for parts returned outside the annual return process.

Upon receipt of the RGA form, the return request will be processed; the RGA clerk will inform the Dealer on the decision. If the return is accepted, an RGA number will be issued with shipping instructions.

Wirtgen America RGA receiving personal will carefully inspect returned parts. Any parts that do not meet the return criteria will be rejected. The returned RGA form will advise the Dealer which parts are returnable and which are not. Parts that are identified as non-returnable will be held for 30 days awaiting the Dealer's instruction for disposal. If the RGA clerk has not been advised within 30 days, the parts will be returned to the Dealer, freight collect. Dealers have the option to request disposal of the unauthorized returned part. This request should be made in writing, including the part number, and faxed to the RGA Clerk. Verbal requests will not be accepted.

# WIRTGEN AMERICA

## Product Support Manual

---

### 6.9.2 Returnable Amount

Dealers are permitted to return annually up to 15% of their prior year purchases. To avoid restocking charges, the return must be accompanied by an offsetting order equal to the return amount and submitted at the time of the return request. Restocking charges are 15% of the approved amount returned. Restocking charges of 25% will be charged for parts returned outside the annual return period.

**Note:**

- Returns will be processed annually on a scheduled basis. A notification will be sent by fax or e-mail the month prior to the dealers scheduled return month.
- Annual part returns must be submitted during the scheduled month or be subject to restocking fee.
- Annual parts return lists must be provided in an Excel spreadsheet format. Forward the list via e-mail to [rgaclerk@wirtgenamerica.com](mailto:rgaclerk@wirtgenamerica.com)

### 6.9.3 Shipping Instructions

Ship return parts to the location printed on the RGA form using the carrier of your choice. Ship all returned parts "FREIGHT PREPAID". Do not ship freight collect to Wirtgen America; parts shipped collect will be refused.

Parts should be prepared for return as follows:

- Drain all parts of oil and fluids.
- Clean parts before returning.
- Parts must be identified with a part number.
- Pad any parts that could be damaged in transit.
- Do not ship large or heavy parts in the same carton with smaller, lighter parts.
- Be certain all parts are complete and assembled.
- The RGA number must show on the outside of the box, crate, or on the shipping label. Enclose a copy of the RGA form as a packing list.
- Returns are subject to a re-stocking fee of 25% if not returned during the assigned annual return time period.
- Parts shipped prior to draining or clean-up are subject to a \$450.00 clean-up fee.
- Air Condition units must be free of Freon Gas before shipping.

# WIRTGEN AMERICA

## Product Support Manual

---

### 6.9.4 Non-Returnable Parts

With the exception of limited life parts, all parts are returnable. Limited life parts are parts that have finite, limited shelf life expectancies. These parts may include but are not limited to:

- Filters
- Hydraulic Hoses and Hydraulic Tubing
- Seals, Gaskets, and O-Rings
- Moldings
- Some Electric/Electronic Components
- Some Rubber Components
- Belts
- Technical Publications
- Off-the-shelf items such as nuts, bolts, washers, etc.

**Note:**

- Non-returnable parts terms do not apply to initial stock order returns.
- Special order parts and accessories cannot be returned.

### 6.10 Dealer Price Book

The prices listed are suggested Dealer retail before discount. All prices are subject to change without notice. Wirtgen America will provide 30 days' notice of annual price increases; the invoice price reflects pricing in effect at time of order unless specially quoted.

**Note:**

- It is the policy of Wirtgen America to provide list prices for service parts to any Customer requesting it.
- Dealers are not to sell parts from Wirtgen America above published list price.

### 6.11 Requests for Review of Parts Pricing

To ensure competitive pricing on parts, which are also available from aftermarket suppliers, Wirtgen America provides the opportunity to review pricing on these parts. Providing an e-mail with part numbers affected as well as competitive quotes or invoices will get the process started.

# **WIRTGEN AMERICA**

## **Product Support Manual**

---

### **7 Special Components and Accessories**

#### **7.1 Placing Orders**

Orders for accessories not ordered with a new machine must be directed to the Wirtgen America parts department. Please use the Parts & Accessories Order Form (Enclosure 10) for accessory orders.

**Note:**

- Wirtgen America will supply information on available accessories and pricing on a regular basis.

#### **7.2 Discounts**

Accessory discounts are in accordance with the parts discount policy.

##### **7.2.1 Wirtgen America Discounts on Accessories and Special Components**

The following special discounts apply:

- Cutter Drums = 10%
- Blow Bars & Jaw Blades = 10%
- Designated highly price competitive Wear Parts = 10 – 15%

**Note:**

- These discounts apply for all highly price competitive items in general (stock or emergency order).
- Rhino Parts are having a specific discount structure which is available via the Rhino Parts Sales Representative.

#### **7.3 Delivery**

Freight is at Dealer or Customer's expense.

#### **7.4 Return of Special Components and Accessories**

Accessories ordered as add-ons qualify for the annual surplus return, excluding special order components or accessories.

# WIRTGEN AMERICA

## Product Support Manual

---

### 8 Service Parts Warranty

Machine Parts - Wirtgen America warrant parts sold for a period of one year or 1,000 hours, whichever comes first provided that the purchaser sends notice of the defect to the Wirtgen America warranty department within 30 calendar days of discovery, including proper documentation of purchase and/or installation. A replacement part used in the normal course of repair has a warranty period of 1 year or 1000 hours, whichever comes first. If the part fails during the warranty period, its replacement part takes on the remaining warranty of the original part sold. Parts replaced under warranty, while the machine is in the standard warranty period, take on the remainder of the machine warranty. (See section 4.3 – Warranty Periods).

**Note:**

- Warranty terms and conditions for repaired or re-manufactured parts are subject to the specific agreement.
- Parts replaced at the expense of Wirtgen America (service update, after-warranty adjustments) are covered under the applicable Service Parts Warranty or the remaining portion of the New Machine Warranty (if any), whichever is greater.
- Engines ordered as “spare parts” must be registered with the engine manufacturer and are subject to engine manufacturers warranty terms and conditions.

#### 8.1 Parts Coverage Application

Items not covered:

- Customer labor or travel time to remove and/or replace defective parts
- Parts and any related damage caused by a Manufacturer component not properly installed by the Customer or an outside repair source
- Parts those prove not defective upon inspection and analysis by the Manufacturer
- Repeat repairs performed because of previous repairs, misdiagnosis, or improper repair procedure
- In addition the exclusions stated with the Standard Warranty are in effect

If a Dealer installed the failed part, the warranty period will start with the date of installation. The warranty period of parts sold over the counter to a retail purchaser will begin on the date of sale.

**Note:**

- The Customer must return the defective part to the Dealer during regular business hours with the original sales invoice or repair order to validate the date of purchase and hours on the machine at the date of sale or installation of the part.
- Parts found to be defective due to workmanship prior to installation on the machine must be claimed through warranty and kept for RGA requests.
- There is no other expressed warranty of supplied replacement parts by Wirtgen America. Any implied warranty of merchantability or fitness for a particular purpose is limited to the duration of the written warranty.

### **9.2 Return Goods Authorization Form (Enclosure 11)**

#### **9.2.1 Return Goods Authorization Completion Instructions**

This form is a fillable PDF designed to be e-mailed as an attachment. Electronically enter the data on the form. Once you have completed the form, click the email button at the bottom, and send the email to [rgaclerk@wirtgenamerica.com](mailto:rgaclerk@wirtgenamerica.com). The dark gray boxes on this form are for Wirtgen America use only.

- (1) Select appropriate Wirtgen America Product Line
- (2) Date of Return request issued
- (3) Total number of pages sent
- (4) Complete physical address reflecting the parts location including contact name, phone and fax numbers
- (5) Model of machine
- (6) Serial number of machine
- (7) Operating hours on the machine at date of part failure
- (8) Mark the reason for parts return
- (9) Description of the returned part
- (10) Part number (list only one part on any single line)
- (11) Quantity of failed parts
- (12) Invoice number of spare part purchase (Example: 900123456)
- (13) Order number of spare part purchase (Example: 200123456)
- (14) Detailed explanation of why these parts are being returned
- (15) Printed name and signature of the person responsible for the parts return
- (16) Date of return

**Note:**

- All parts must be labeled with the part number, part description, and the RGA number.
- The RGA form must be used only for the return of new parts. Parts found to be defective due to workmanship require a warranty claim to be filed (see section 5.7).

## **B. SPECIAL PROVISIONS**

### **B.1. Type of Contract**

- B.1.1.** This will be a mandatory statewide contract that is available to all state agencies. Other government entities may avail themselves of this contract, including those in other states if their statutes allow for the use of other state's contracts, sometimes known as "piggybacking".
- B.1.2.** All state agencies must use the contract for the products specified herein unless the ordering agency has received a written exception from the contracting Officer. The State of Oklahoma reserves the right to conduct separate procurements to establish contracts for the same or similar products for any agency's specific needs.
- B.1.3.** The State of Oklahoma shall not guarantee any minimum or maximum amount under this contract, also known as an indefinite quantity contract.
- B.1.4.** This contract will be for the purchase of equipment, warranty work and parts.
- B.1.5.** This contract may be awarded to multiple vendors.

### **B.2. Contract Period**

This Contract is for Date of Award through one year with the option to renew for up to four (4) additional one year periods.

### **B.3. Extension of Contract**

The State may extend the term of this contract for up to 180 days if mutually agreed upon by both parties in writing.

### **B.4. Authorized Users**

This Contract shall be made available to all State Departments, Boards, Commissions, Agencies and Institutions. The Oklahoma Statutes also allow Counties, School Districts, Tribes and Municipalities to use this contract as well as State entities other than the State of Oklahoma if statutes allow for it.

### **B.5. Gratuities**

The right of the successful vendor to perform under this contract may be terminated by written notice if the Contracting Officer determines that the successful vendor, or its agent or another representative offered or gave a gratuity (e.g., an entertainment or gift) to an officer, official or employee of Central Purchasing.

### **B.6. Travel**

No reimbursable travel is contemplated under the terms of this contract.

### **B.7. Energy Conservation**

Oklahoma is an energy conservation State and we welcome any comments on your RFP that would indicate energy savings such as brochures, specifications, and descriptions of equipment that indicate environmentally friendly construction/usage..

### **B.8. Conflict of Interest**

The RFP is subject to the provisions of the Oklahoma Statutes. All Suppliers must disclose the name of any officer, director or agent who is also an employee of the State of Oklahoma or any of its agencies. Further all Suppliers must disclose the name of any State Employee who owns, either directly or indirectly, an interest of five percent (5%) or more in the supplier firm or any of its branches.

### **B.9. Patents and Royalties**

The Supplier without exception, shall indemnify and save harmless the State of Oklahoma and its employees from liability of any nature or kind, including cost and expenses for or on account of any copyrighted, patented or unpatented invention, process, or article manufactured or used in the performance of the contract including its use by the State of Oklahoma. If the Supplier uses any design, device or materials covered by letters, patent or copyright, it is mutually agreed and understood without exception that the RFP prices shall include all royalties or cost arising from the use of such design, device, or materials in any way involved in the work.

### **B.10. Property loss**

The Supplier shall reimburse the government entity for such property loss or damage caused by supplier, its employees or for anyone whose acts the supplier may be liable.

## **B.11. Contract Management Fee**

- B.11.1.** As provided by State Statute 85.33A, the Central Purchasing will assess a Contract Management Fee of 1% of total contract sales to all government entities. Awarded Supplier(s) shall remit payment of the fee on a quarterly basis in conjunction with the quarterly sales report. The fee amount is not to be invoiced to any contract users, either as an item on a sales invoice or by any other means. Delinquency in payment may be considered cause for contract termination.
- B.11.2.** Supplier shall make payment by company check to OMES (Office of Management and Enterprise Services) Central Purchasing Division within 45 days of the completion of the quarterly reporting period. To ensure the payment is credited properly, the Supplier must identify the check as "Contract Management Fee" and include the following information with payment: SW195 Road Maintenance Equipment. The Contract Management Fee shall be mailed to:

**Office of Management and Enterprise Services**  
**Attention: Accounts Receivable**  
**5005 N Lincoln Blvd Ste 300**  
**Oklahoma City OK 73105**

## **B.12. Contract Usage Reporting Requirements**

- B.12.1.** Reports shall provide the total dollar amounts sold to all political entities that include but are not limited to State Agencies, Counties, Cities, Schools, Hospitals, and Municipalities. Items sold should be itemized in order for the Contracting Officer to ascertain what type of equipment is being purchased.
- B.12.2.** Reports shall be submitted quarterly regardless of quantity. A standardized form has been developed for Supplier use.
- B.12.3.** If there are no sales reported by the vendor during the contract term, or if the vendor fails to report sales that have been discovered through state purchasing reports, the State reserves the right to terminate the contract.

**Usage reports shall be sent electronically, by email to: [strategic.sourcing@omes.ok.gov](mailto:strategic.sourcing@omes.ok.gov)**

<b>Reporting Quarter</b>	<b>Due Date</b>
<b>January 1 through March 31</b>	<b>May 15<sup>th</sup></b>
<b>April 1 through June 30</b>	<b>August 15<sup>th</sup></b>
<b>July 1 through September 30</b>	<b>November 15<sup>th</sup></b>
<b>October 1 through December 31</b>	<b>February 15<sup>th</sup></b>

## **C. SOLICITATION SPECIFICATIONS**

### **C.1. Scope**

- C.1.1.** The State of Oklahoma Central Purchasing Division is charged with developing statewide contracts for all government entities to use that have been competitively solicited for the best possible pricing or percentage discount off pricing based on high volume purchasing. Multi-unit discounts are encouraged. This contract's main customer base will be state agencies, cities and municipalities and counties.
- C.1.2.** The purpose of this competitive solicitation is to develop a "catalog discount" contract to provide for equipment to be made available for purchase on a statewide basis. Manufacturers as well as Dealers are encouraged to bid directly on the contract, as this will be a multiple award contract for both equipment and warranty work with replacement parts.
- C.1.3.** We have determined that the best pricing structure for this type of contract is a simple "percentage off" of the current dated manufacturer's government or commercial catalog or price list with a copy

of the catalog pricing page or price list to be made available to the purchaser for their accounting divisions at the time of order.

## **C.2. Authorized Representative**

- C.2.1.** Suppliers may offer any brand for which they are an authorized dealer, distributor or service representative. A current, dated, and signed letter of authorization from the manufacturer that states the Supplier is an authorized distributor, dealer, or service representative and is authorized to sell the manufacturer's products in the State of Oklahoma is to be submitted with the response.
- C.2.2.** If the Manufacturer is responding to this solicitation, please submit a list of authorized dealers, distributors or service representatives located in the State of Oklahoma and the product line you are the manufacturer of.

## **C.3. Licensing**

Sales of motor vehicles in the State of Oklahoma are subject to the Oklahoma Motor Vehicle Commission Statutes. (Oklahoma Statutes, Title 47 - Motor Vehicles, Chapter 62) Offeror certifies by submission of a response that all required Oklahoma Motor Vehicle Commission licenses are in place and current, and that copies of all such licenses have been submitted with the Response. It is the Vendor's responsibility to keep all required Oklahoma Motor Vehicle Commission licensing current during the term of the contract and to furnish copies at any time upon request by Central Purchasing. If the Vendor does not maintain current licensing, Central Purchasing may immediately terminate the contract upon discovery of the expiration of the license. Contracts for motor vehicles to be sold within the state of Oklahoma may be made only with properly licensed Oklahoma Motor Vehicle Dealers.

## **C.4. Warranty-Equipment/Options/Accessories/Attachments**

- C.4.1.** The Successful Supplier agrees the products furnished under this contract shall be covered by all commercial warranties the contractor provides for such products, and rights and remedies provided herein are in addition to and do not limit any rights afforded to the State of Oklahoma by any other clause of this contract.
- C.4.2.** The Supplier warrants that at the time of delivery, all equipment and purchased under this contract will be free from defects in material or workmanship and will conform to the specifications and all other requirements of this contract.
- C.4.3.** All warranty work performed and parts/materials supplied shall meet original equipment manufacturer (OEM) warranty requirements. Equivalent substitutions must be approved by the agency contact person prior to installation.
- C.4.4.** Warranty work performed not meeting specifications or found to be defective, shall not be accepted. The supplier shall be required to make repairs or corrections at no additional cost to the agency.
- C.4.5.** Supplier shall furnish a copy of their warranty applicable for the equipment.
- C.4.6.** All equipment warranties shall start on the date of delivery and shall be for the full term of said warranty.
- C.4.7.** Before actual warranty work begins, ownership of the equipment shall be established to ensure the equipment in need of repair belongs to the government entity requesting the service. The following information shall be provided in order to determine ownership of the equipment:
  - C.4.7.1.** Name of government entity and division, if applicable.
  - C.4.7.2.** Make, Model, and VIN of equipment
  - C.4.7.3.** Control number of government entity (Inventory number)
  - C.4.7.4.** Repairs made that are covered by a warranty shall not be paid for by the government entity.
  - C.4.7.5.** The Supplier shall furnish all necessary supervision, labor, equipment, tools, parts, materials, and supplies needed for the warranty repair work.
  - C.4.7.6.** All persons utilized in the performance of this contract shall be employees of the supplier and be fully qualified to perform the warranty work required. Warranty work shall be performed by certified or trained or authorized service technicians.

- C.4.8.** Equipment that will remain in the supplier's possession overnight and for extended periods shall be stored in a safe and secure location for protection from theft and environmental dangers. The supplier shall be responsible for the proper care and custody of any state owned equipment in the supplier's possession.

## **C.5. Insurance**

- C.5.1.** Prior to the commencement of this contract, the supplier shall obtain and keep in full force and effect until the termination of this contract, insurance coverage with an insurance company licensed and qualified under the laws of Oklahoma.
- C.5.2.** The supplier shall maintain insurance coverage in an amount not less than \$500,000 at all times during the entire term of this contract. The following types of risks shall be covered in the supplier's policy:
- Worker's Compensation Insurance and employer's liability insurance sufficient to cover supplier's employees as required by the State of Oklahoma.
  - Comprehensive General Liability Insurance to include Products/Completed Operations, Premises Operations, Personal Injury, Medical Expenses and Fire Damage.
  - Commercial Automobile Insurance, hired and non-owned.
  - Garage keepers Liability Insurance.
  - Commercial Property Coverage.

## **C.6. Quality of Parts**

- C.6.1.** Parts under these specifications should be name brand, nationally advertised merchandise. Equivalent substitutions must be approved by the agency contact person.
- C.6.2.** After Market Repair parts must be equal to, or exceed original equipment manufacturer's specifications.
- C.6.3.** Repair parts must be packaged and distributed under their respective nationally known name brands.
- C.6.4.** All rebuilt or remanufactured parts must meet the same requirements as listed above.
- C.6.5.** Some repair parts may be required to be original equipment manufactured repair parts. Suppliers must carry a complete line of OEM parts for all models of equipment they carry.
- C.6.6.** Preservation, packaging, and packing and marking will be in accordance with best commercial practice to provide adequate protection against shipping damage.

## **C.7. Warranty-Parts**

- C.7.1.** Suppliers are required to provide any buy-back, trade-in, or exchange policy concerning repair parts sold to government Entities.
- C.7.2.** Supplier shall correct ordering errors without further cost to the ordering entity.
- C.7.3.** A copy of the Warranty shall be included for replacement parts purchased.

## **C.8. Repair Facilities**

Repair facilities that will perform the warranty work of items on contract shall be identified on the Pricing Page.

## **C.9. Ordering**

- C.9.1.** No minimum orders will be considered under this contract.
- C.9.2.** Options/Accessories/Attachments on ordered equipment shall include all standard items normally furnished by the manufacturer/dealer for the basic equipment being purchased.
- C.9.3.** Suppliers shall identify any websites that can be of assistance in determining needs and calculating total cost of items purchased.
- C.9.4.** Any trade-in allowances determined by the dealer shall be deducted from the established current price after the discount is applied. The formula will be to deduct the discount from the established current price and then take off the trade-in allowance.
- Example: List price is \$17,199, and the discount is 23% and the trade-in is \$6,000.  $\$17,199 - 23\% = \$13,243.23$ .  $\$13,243 - \$6000 = \$7,243.23$ , final price.

- C.9.5.** The Customer is responsible for being familiar with all of the contract terms and conditions.
- C.9.6.** Supplier shall furnish any required Safety Data Sheets or a composite concentration list prior to contract award, with the product invoice, **or** at the request of Central Purchasing.
- C.9.7.** Suppliers shall provide catalogs and current price lists at no charge upon customer or Contracting Officer's request.
- C.9.8.** All equipment shall be delivered with one copy of the operator's manual, and an illustrated repair parts manual or list. If other manuals are required by the customer, they shall be offered at the discount offered in the Price Sheets.

## **C.10. Invoices**

To ensure prompt payment, the invoice shall include the following information:

- C.10.1.** Purchase order number if applicable.
- C.10.2.** Make, model, and VIN number of equipment.
- C.10.3.** Name of government entity.
- C.10.4.** Description of equipment purchased or warranty services performed and/or parts, material and supplies provided.
- C.10.5.** The Manufacturer's suggested retail price less any trade-in allowance if applicable, contract percentage discount off, freight cost, set-up fees, any allied or incidentals, and the final price for each item delivered.
- C.10.6.** The copy of the current, dated manufacturer's Price List showing the price of the equipment if requested by the ordering party for their accounting purposes.
- C.10.7.** Name of company who provided the products/services.
- C.10.8.** Payment remittance address.
- C.10.9.** Payment made by government agencies will be made by the procurement card that is issued by the State or Purchase Orders. Other entities may use Purchase Orders or Procurement cards.
- C.10.10.** Each Dealer/manufacturer who is awarded a contract as a result of this Solicitation shall be the only office authorized to receive orders, invoice and receive payment. If the Manufacturer or Dealer wishes to ship or provide a service from a point other than the address listed on the solicitation documents, they will furnish a list of these locations as part of their response.

## **C.11. Payment**

- C.11.1.** Payment method by State Agencies will be Purchase Orders.
- C.11.2.** Payment method by other government entities (Cities, Counties, Municipalities, Schools, and other State governments will be as in C.11.1 above or other purchasing methods, such as lease-purchase, as allowed by their purchasing guidelines, regulations or statutory mandates. For Lease purchases, the government entity is to follow the policies and procedures outlined by their purchasing authority or state regulations and statutes.
- C.11.3.** For County purchases by lease purchase, the Management Services Division of the State Auditor and Inspectors (SAI) Office has encouraged the use of an approved agreement form, Lease Purchase of Equipment Form 120B, as well as a Full Warranty Lease form, developed by their office. The State Auditor and Inspectors Office, through its Constitutional Authority, Article VI Section 19, establishes accounting procedures and forms and provides assistance to counties and other forms of local government. Link to the forms listed on the State Auditor website [https://www.sai.ok.gov/publications\\_forms/county\\_clerk.php?action=showform&formdiv=5](https://www.sai.ok.gov/publications_forms/county_clerk.php?action=showform&formdiv=5)
- C.11.4.** For those Government Entities subject to the Oklahoma Bond Oversight and Reform Act 62. O.S., Section 695.1 et seq., the Council of Bond Oversight reviews and must approve any request for financing by a State Government entity. (All state and local government entities). The State Bond Advisor's Office serves as staff to the Council of Bond Oversight. See Chapter 10, Administration of the Oklahoma Bond Oversight and Reform Act (Administrative Rules) Link to the Council of Bond Oversight website: [https://www.ok.gov/bondadvisor/Bond\\_Oversight/index.html](https://www.ok.gov/bondadvisor/Bond_Oversight/index.html)

**C.11.1. C.15.5.** Lease Purchase Rates may be adjusted during the contract period. All lease purchase agreements established by using prices obtained from Suppliers listed as a participant in this competitively bid statewide contract shall be included in the total sales reported by the vendors.

## **C.12. Delivery**

**C.12.1.** Delivery of equipment is to be made within 120 calendar days after receipt of order unless other arrangements are made between the ordering party and the Supplier. Earlier deliveries are encouraged however there shall be no change in contract price or discount terms because of the earlier delivery.

**C.12.2.** All equipment is to be delivered new, unused, assembled, serviced, oiled and ready for immediate use, unless otherwise requested by the customer. Liability for product delivery remains with the Supplier until delivered and accepted.

**C.12.2.1.** Delivery shall be made in accordance with instructions on purchase order from each agency. If there is a discrepancy between the purchase order and what is listed on the contract; it is the Supplier's obligation to seek clarification from the ordering party and, if applicable, from the Contracting Officer listed as the contact person in Central Purchasing.

**C.12.3.** Delivery on parts is to be made within 30 days.

**C.12.4.** One Operating Manual, an illustrated parts manual or List, and the Warranty, shall be furnished for each new item purchased, as well as any proprietary tools necessary to perform routine service or adjustments, all at no additional cost.

## **C.13. Training**

**C.13.1.** Vendor is to provide their training opportunities for the equipment they are bidding with their response to this solicitation

## **C.14. Price Adjustments**

**C.14.1.** Since the various manufacturers update their pricing throughout the year and at different times during the year, there will be no pre-determined price adjustment time period for this contract however the discounts provided by the Supplier can be increased during the contract period at any time.

**C.14.2.** The contract price shall be the Manufacturers dated Price List (MPL) in effect at the time the order is placed less the discount percentage offered. Manufacturer Price lists will be that price list published by the manufacturer.

**C.14.3.** Vendor is to notify the contracting officer at least 30 days before a price adjustment will occur, or as soon as possible upon notification from the manufacturer.

**C.14.4.** Vendors are to include information concerning their return policy.

**C.14.5.** See C.9.4 concerning trade-in allowances.

## **C.15. Allowable Charges**

**C.15.1.** Freight/Shipping/Set-up Fees.

**C.15.2.** Delivery is to be FOB Destination (of ordering entity) freight collect.

**C.15.3.** Any Freight, shipping and handling costs and set-up fees paid by the ordering entity are to be annotated on the quote/invoice as a separate line item.

**C.15.4.** Quotes shall show The Manufacturer's suggested retail price less any trade-in allowance if applicable, contract percentage discount off, freight cost, set-up fees, any allied or incidentals, and the final price for each item delivered

**C.15.5.** Allied and incidental items requested by customers to comply with their needs and with state or other government regulations. Allied equipment may only be sold in connection with the sale of a contract item. Items must be clearly labeled on the purchase order or quote as Allied.

**C.15.6.** Allied and incidental items are attachments, accessories, parts or bundles not manufactured by the contract vendor that are requested by the customer to complete the purchase of equipment awarded on contract.

**C.15.7.** Unpublished or non-contract options required to complete a product ordered.

#### **C.15.8. New Products**

**C.15.8.1.** New Products may be added to the contract as they are introduced by a manufacturer however the discount cannot be lowered throughout the contract period.

**C.15.8.2.** Dealers who become authorized dealers for other products during the contract period may add those products to their lists of equipment offered.

#### **C.15.9. Discontinued Products**

**C.15.9.1.** Vendors are to notify the Contracting Officer of any changes in their schedule of equipment such as discontinued products or replacement models.

### **D. EVALUATION**

#### **Evaluation Process**

In the initial phase of the evaluation process, all proposals timely received will be reviewed. Unacceptable proposals will be eliminated from further consideration. A pass/fail and weighted score methodology of selection with both objective and subjective criteria will be used.

Award of a contract resulting from this RFP may be made to multiple Suppliers in accordance with the method identified within this section. The state reserves the right to award on receipt of initial proposals without an opportunity for discussion or proposal revision, so Suppliers are encouraged to submit their most favorable proposal at the time established for receipt of proposals.

**D.1. Price 30%**

**D.2. Past performance 10%**

**D.3. Ability to meet requirements 60%**

The State reserves the right to negotiate with one or more Contractors. Central Purchasing may negotiate any and all content of the proposal.

### **E. INSTRUCTIONS TO SUPPLIER**

Please carefully read all the Sections of this solicitation as your response indicates your understanding of what is requested.

Section "A" is standard terms for all Central Purchasing Contracts

Section "B" contains terms specific to this contract. Section "B" may contain terms that take precedence over the terms in Section "A". See Section A.30.

Section "C" is the scope of work for this contract.

Section "H" Price and Cost. There are attachments for pricing. You will not have to fill out pricing on every attachment unless you sell all the equipment we are requesting. You only have to return the attachments for the equipment you sell. You DO have to fill out and return all of the rest of the documents. Attachments will be posted with the solicitation as well as the contact information for suppliers, all in Microsoft Word format.

You can submit pricing already figured with the discount if you wish.

If you will be providing leasing through your company finance office please list the present rates offered. You will be responsible for updating the information for the contract during the contract period.

If you have questions, you must submit them by the date and time noted on the first page of the solicitation documents.

You can but you do not have to submit electronic brochures for the equipment you are offering. These will be requested throughout the contract period by the customers and/or the contracting officer in charge of maintaining the contract. As much information as possible will be placed on Central Purchasing's website along with your contract documents.

### **F. CHECKLIST**

\_\_\_Your entire response submitted on a flash drive or cd. (We are mostly electronic so paper bids will be scanned to an electronic filing system if you were to submit them).

\_\_\_Copy of Workman's Comp Insurance Policy

\_\_\_Training plan offered with sales

\_\_\_A current, dated, and signed letter of authorization from the manufacturer

- ☐ If a manufacturer submitting a response, a list of certified dealers within the State of Oklahoma authorized to sell
- ☐ and service your products
- ☐ Specifications of equipment offered
- ☐ Copy of Oklahoma Motor Vehicle Commission license (if applicable to you)
- ☐ Copy of Certificate of Good Standing (If required to be registered with the Secretary of State of Oklahoma)
- ☐ Vendor Reference document
- ☐ All Technical Questions answered completely
- ☐ Any brochures or other literature requested (warranty information, re-stocking, marketing)

## G. OTHER

None

## H. PRICE AND COST

**The State of Oklahoma is requesting pricing for Road Maintenance equipment. The pricing matrix is a percentage off the Manufacturer's list price. Vendors can submit actual pricing schedules for their equipment though, with the percentage discount already figured. Attachments have been provided in Microsoft Word.**

The State of Oklahoma has been a leader in the push for State use of CNG-powered vehicles. If you have products that are fueled by means other than gas or diesel fuel, and that are considered environmentally friendly, please include them in your response.

Manufacturers responding please include a listing of Distributors/Dealers for the State of Oklahoma to include Name of business, Address, contact names, phone numbers, fax numbers, email addresses and websites.

Suppliers may submit specifications for all equipment bid, as well as options available. Please submit these specifications on a cd or dvd or flash drive. It is preferred that vendors have a website where customers can go and view the products. The Central Purchasing Statewide Contract website will be updated as necessary.

You will be expected to provide brochures and descriptive literature to those customers who request it and the contracting officer responsible for the maintenance of the contract. Although you will not be required to send actual pricing sheets as the prices are updated, you will be required to notify the contracting officer when there are price increases and a note will be made to the website where your contract will be located.

The Supplier will be expected to notify the Contracting Officer of any changes in the Company status, such as mergers, sell offs, discontinuation of equipment, addition of equipment lines and changes in the contact information for the contract. It is imperative that the Contracting Officer be able to contact someone at all times during business hours, especially when helping an entity make a decision on equipment they want to purchase.

With the age of technology, customers are more likely to use the internet to research the equipment they are interested in buying. We will put a link to your website on the contract website. Please provide a guide to the use of your website if you require a name and password to access current pricing, if listed, at no subscription cost to the State of Oklahoma. Also, please provide any additional enhancements such as any special ordering features available to users or a site with pricing specific to the Oklahoma contract even though we are not requiring you to offer a direct link to the Oklahoma-specific contract pricing or your current price lists.

Website: \_\_\_\_\_

Log-in required? ☐ Yes ☐ No

Government entities who will be buying from this contract will be expected to provide their accounting offices with a pricing sheet or pricing sheet reference date at the time they prepare their payment method. This pricing sheet will clearly state the Price Book/Catalog Number and Date. This sheet is to be attached to the quote provided by the Supplier. The quote will reference the Statewide contract number being used for the purchase. All set up charges, testing, and freight charges are to be included in the total price less discount offered.

Discounts offered will remain the same or can be increased throughout the contract period. Multiple Unit discounts are encouraged.

**THE FOLLOWING QUESTIONS ARE TO BE ANSWERD IN FULL. PLEASE USE THE NUMBERING SYSTEM AND MICROSOFT WORD TO ANSWER THE QUESTIONS AND ATTACH TO YOUR RESPONSE. These questions are part of the evaluation process.**

**Technical Requirements**

1. Do you, the manufacturer, or dealers offer any value-added incentives to purchase such as seasonal sales? Yes\_\_\_\_\_ No\_\_\_\_\_, and if so how would you incorporate special sale situations in the contract?
2. Have you ever had a recall situation for any of your equipment? Yes\_\_\_\_\_ No\_\_\_\_\_ and if yes, approximately how much of a negative impact in a dollar amount was it to the company to repair/replace the equipment?  
\_\_\_\_\_.
3. Has your company ever filed for Bankruptcy? Yes\_\_\_\_\_ No\_\_\_\_\_.
4. How long does it take usually from the build of the equipment until delivery? \_\_\_\_\_.
5. How many years has your company been in business? \_\_\_\_\_.
6. Will you offer discounts on your extended warranties? Yes\_\_\_\_\_ No\_\_\_\_\_. If yes, please include in your response the types of the extended warranties and the terms. If No, still include the types and terms of your extended warranty plans.
7. Do you offer green options for hydraulic fluids? Yes\_\_\_\_\_ No\_\_\_\_\_. If yes, please provide specifications for the fluid.
8. For the products that are not an "all in one" product, please describe the ordering process including locations where products are assembled and if chassis is provided by your company, whether or not the chassis is new and if not then how the chassis selection process is made and by whom, the customer or your company.
9. Please provide your parts return policy as well as any restocking fee for parts incorrectly ordered by the customer.
10. Central Purchasing is very limited in the marketing of products to the government entities across the state. Please describe your plan for marketing your products to the government entities. (trade shows, government employee organizations, publications, etc.)

**Supplier is to have this filled out by 3 separate government contract clients and returned with their response to the solicitation. Failure to submit this for 3 clients will result in your response not being considered.**

Subject: Past Performance Survey of: \_\_\_\_\_  
(Name of Vendor requesting verification)

NO	CRITERIA	Rated	
1	Rate the Quality of customer service		
2	Rate the Professionalism of the employees including prompt response to inquiries
