Subject: Correspondence regarding SP-570 Special Permit

Good Afternoon Subdivision & Zoning:

The Garden Neighborhood Council (GNC) recently received correspondence from your office regarding SP-570 Special Permit - Mining and Processing Minerals and Raw Material (Sand and Soil). At this time, The Council has many reservations and questions pertaining to this special permit. For this reason, we are not on board with this project.

The Council would like the answers to the following questions and/or concerns:

What are the hours of operation for mining? What does this entail?
Who received notice/notification for the SP-570 Special Permit?
What is the length (completion) of time for mining and processing?
What is the plan for the land? How will it affect the neighborhood?
What level of disturbance should we anticipate?
What are the expectations of the miners? What are the expectations from the homeowners/residents?
How does this project affect the climate and community?
Is this project the equivalent to the business located on the corner of Northeast 10th Street & Sunny Lane?
Does this special permit include Northeast 23rd St & Coltrane Road?
Are we able to set up a meeting with the developers/miners and the neighborhood association prior to the Dec. 8th meeting?

More information would be beneficial in order to make a sound decision regarding the proposed plan/SP-570 Special Permit. We await your written response and look forward to some positive feedback. Please advise if I may be of further assistance.

Respectfully,

Joyce Willis, President, 405-424-1577
Josette Ward, Vice President
LaToshia Finney, Secretary
Lauren Henderson-Ross, Treasurer
