Dear Subcommittee member,

I appreciate all you're doing to build safe sidewalks in Oklahoma City which will contribute to the safety and well-being of it's citizens.

Also, in doing this, you're connecting our community which so important. Your current effort to create a complete sidewalk along Shartel from NW 50th to downtown is especially appreciated. I, and many others, walk Shartel everyday or ride bicycles and to have a distinct place to do these activities, not in competition with cars, would add to our safety.

Thank you for your vision and all you're doing to assure our city will be safer and more connected in the future.
